It is very important and has much influence on the future growth and crop of sweet peas to have good ripe full-grown seed, and if possible every grower should raise his own seed. In a well prepared soil sow very thinly (I recommend fall sowing), after they are up, support them well so that the vines will not lie on the ground, which

Use well rotted cow manure and plenty of it. After the plants have attained a good height and are growing well, use diluted nitrate of soda once a week. I have grown sweet peas seven years in the same soil with good results and I am trying again for the eighth year and the plants look very promising.

The time for sowing the seed all depends upon when crop is wanted. The first sowing for a good Christmas crop in our climate should be made the first part of August. They will start to bloom the first part of November and will give good long stemmed flowers for Christmas and will bloom all winter. For April, May and June crop, sow in December or January. Put from three to four seeds six inches apart, two inches deep, the rows to be three feet apart; on raised benches the planting can be a little closer. Keep the ground moist in hot weather, and cover the soil with paper, and in eight days the seeds will germinate. White seeded varieties should be sown out-doors in cold frames by dropping five or six seeds close together, covering with shaded glass till they are up

CHRISTMAS BASKET BY J. H. SMALL & SONS, NEW YORK.
California Pepper, Poinsettias and Various Flowering and Foliage Plants.

will keep mildew off, do not cut any flowers off these vines and the seed will be ripe in the latter part of July or the first of August, ready for the winter's sowing in the green-house. Do not try to save any seed from left over green-house grown flowers, as the vitality is not great and sickly looking plants will be the result.

Any soil which will grow chrysanthemums, carnations or roses is suitable for the culture of sweet peas.

and then give full sunlight, and in three weeks they will give better results than sowing in little pots.

It is very important to keep the plants on the dry side until they are about six inches in height, as too much water will surely cause stem rot. Be sure and give them support right from the start. As soon as they show good growth give more water; never neglect to give all the air possible, day and night, to insure a sturdy growth; be

careful about night air in late fall so as to prevent mildew.

The worst enemy of the sweet pea is red spider, which will attack it in its early growth and if not checked will soon destroy the plants. The best remedy is to spray with nicotine solution every two weeks and then spider never gets hold, and this also will keep the aphids and other insects in check; keep a sharp lookout for the green caterpillar, which will chew off whole branches and which appear sometimes in great numbers, the only remedy here is hand picking. There is another aphid which goes in the ground and attacks the roots, but I cannot say how much damage this insect causes, for I have not had any experience with it. In diseases, stem-rot and mildew are the most common, stem-rot can be prevented by being careful with water and air when the plants are young and not too close planting. For mildew use flowers of sulphur. Lately I have noted, especially in the young stage, that some of the leaves were turning yellow and the plants have a peculiar color, finally losing their leaves, and the plants dying off. I traced this back to inferior and not good developed seed and if you don't look out for good seed it will become a difficult matter to raise good flowers.

If you have by good culture and care succeeded in producing good flowers it is now important to deliver the same to your commission house or customers in the pink of condition. It is most necessary to bunch separately any flowers which have changed a little in color, as those will when mixed in with the good flowers, soon ruin the whole bunch; furthermore tie your bunches on the bottom end of the stems so they will be loose, and crushing flowers will be avoided. Never have any water on the flower itself as they soon get spotted and lose their fragrance and are unsalable. It is much better to ship your flowers without their having been in water, the commission man will attend to that. There is no flower so popular as the sweet peas, and it is most necessary for an up-to-date florist to always have a supply on hand, as they can be used for all occasions. We have now a great variety of winter blooming sweet peas and it is not necessary for one to name them all. Sweet peas well grown and in good colors will repay well for the attention and work they require.

Sulphur on Heating Pipes.

ED. AMERICAN FLORIST.

What is the best method of preparing and applying sulphur to heating pipes? SUBSCRIBER.

Mix air slacked lime and sulphur 2 parts lime to one part sulphur, then add water enough to form the consistency of a paste that can be easily applied with a whitewash brush. It is best to select one of the runs of pipe that it is not necessary to use every day, keeping it painted with fresh sulphur, turning the steam into it for a few hours once every week. The sulphur can also be dusted directly on to the pipes, but there is considerable waste by this method, as quite a lot will fall to the ground. Care should be exercised not to allow the sulphur fumes to become too dense as this will cause the flowers to bleach and the leaves to fall. C. W. JOHNSON.

The Newer Heleniums.

Fair Helen, the wife of Menelaus of Sparta, who eloped with Paris, and is renowned in ancient history and fable, has given her name to the genus *helenium*, writes a correspondent of The Gardeners' Magazine although the old plant called after her was probably *Inula helenium*. However this may be, the genus which bears the name of this fair cause of strife is a valued and valuable one in our gardens, and

done much yeoman service on the exhibition table. Thoroughly hardy, it is invaluable for lovers of late summer and autumn bloom.

Helenium Bigelovi, a useful species, is not much grown now, but deserves a little more consideration. Its deep yellow flowers, contrasted with the brown disc, and on a plant about two feet high, render this a useful border flower.

Many are well acquainted with the fine *H. Polanderi*, a useful border plant,

CHRISTMAS PLANTS.

Erica Melanthera.

it is to it that they owe much of their brightness in summer and autumn. Some of the species and their varieties are too well known to be embraced under the title of this article, but there are others which, if not absolutely new, are deserving of inclusion for the sake of those not well acquainted with the *heleniums*.

It is unnecessary to do more than refer to *H. autumnale*, one of the best known, but its variety *pumilum magnificum* is so worthy of cultivation that every grower of border flowers ought to cultivate it. It is finer than either *H. autumnale* or its variety *pumilum*, and grows to about three feet high, giving in autumn a long succession of large ornamental flowers of a bright yellow, with a disc which harmonizes well with the brighter yellow of the ray florets. In the border it is bright and useful, while, when well arranged, it is delightful as a cut flower, and has

only a foot and a half high, or little more, which affords us in autumn yellow flowers with a darker disc, but there is in addition a new variety, called *Golden Gem*, which has very deep golden flowers with tubular florets, and is about the same height as the typical plant. Its tubular florets and its color constitute this one of the most interesting of the newer varieties.

Helenium Hoopesi, an early-blooming Rocky Mountain *helenium*, is now fairly well known, and is appreciated by those who grow it for its large deep yellow blooms of effective appearance. Its early flowering is also a feature which appeals to a number. It is some two and a half feet high.

Some years ago there was introduced a fine *helenium* with flowers distinctly striped with yellow and brown. This was sent out as *grandicephalum striatum*, but it is now generally agreed that it is a variety of the variable

THE GEORGE ROBERT WHITE MEDAL OF HONOR.

North American *H. nudiflorum*. This is a valuable helenium on account of its coloring and its late blooming. It is some four feet or so high, and the varieties which are offered under various names, such as *striatum*, and *cupreum*, which is deeper in shade, and of almost self-copper color, are all worth possessing for the border, cut flowers for the home, or exhibition. Understood to have been derived from the foregoing, is a garden variety called *Riverton Beauty*, which promises to take a good place in the garden. It is only about three feet high, and gives us a supply of handsome brown and yellow flowers.

A sister flower is *Riverton Gem*, which is one of the most beautiful of all, and which is worthily named *Riverton "Gem."* About the same height as the preceding one, it is decidedly the best of the new varieties, and yields us, on stems about three feet high, lovely flowers of a fine crimson-brown. As a late border plant, especially where hardy flowers are set out in autumn-flowering borders, this choice plant is exquisite.

The cultivation of these heleniums is easy in the extreme, as they are hardy, and give good results on any good, well-manured soil. They can be divided in spring, and will flourish best in sun, although useful in semi-shade also.

The George Robert White Medal of Honor

An important event in the horticultural world the present year is the establishment of the George Robert White Medal of Honor for the maintenance of which a suitable fund has been given to the Massachusetts Horticultural Society, and the medal is to be awarded by the executive management of that organization.

George Robert White, of Boston, in his deed of trust accompanying the fund, states that he has long thought that there was an opportunity for broadening the field of influence of the Massachusetts Horticultural Society and of extending the interest in its work if some suitable recognition were

Prof. C. S. Sargent.

Honored by Being the First Recipient of the George Robert White Medal of Honor Awarded by the Massachusetts Horticultural Society.

made of those persons who have accomplished important results in horticulture; the award to be made independently of or in addition to any prizes or certificates of merit that may be bestowed by the Society in the course of its regular schedule of premiums.

He has, therefore, founded the George Robert White Medal of Honor fund, the income of which is to be devoted annually for the specific purpose of providing a substantial gold medal to be awarded to the man or woman, commercial firm or institution in the United States that has done the most during the year or in recent years to advance the interest in horticulture in its broadest sense.

The first award of the medal has just been made to Professor Charles

S. Sargent, director of the Arnold Arboretum, whose eminent service in horticulture is generally recognized both in this country and abroad. His great work has been the introduction of many desirable ornamental trees and shrubs and the testing of their hardiness in this latitude.

The George Robert White Medal of Honor will take rank in its own field with the Victoria Medal of Honor of England and the medal of the Legion of Honor of France and will have a strong influence in promoting the horticultural activities of this country.

The medal itself was struck at the United States mint in Philadelphia from twenty-four karat gold; is two and three-fourths inches in diameter, five thirty-seconds of an inch thick and weighs between seven and eight ounces. On the face, the figure symbolizes, not the ordinary horticulturist as much as the scientific intellect, whose aim is to improve nature, even to create, if that is possible. The trees in the background represent the allied branch of arboriculture. On the reverse, in the inscription, the name is so designed that it can be replaced by another name each time the medal is awarded.

The George Robert White Medal was executed by John Flanagan, a native of Newark, N. J., and a student, first of Augustus St. Gaudens, later, in Paris, at the Academy Julien under Chapu, and the Atelier Falguiere, at the Ecole des Beaux Arts. During the course of three years of study, Mr. Flanagan was awarded many coveted prizes, and acted as an assistant to MacMonnies on his fountain for the Chicago World's Fair of 1893. Since then, he has received commissions for many medals, portrait busts, and other works, among the best known being the Brinton Medal, the Langley Memorial, and the Hudson-Fulton and Pennsylvania Society Medals. Several of Mr. Flanagan's medals have been acquired by the Musee de Luxembourg, the Metropolitan Museum, New York, and recently by the Museum of Fine Arts at Ghent.

THE ROSE.

Cultural Notes.

Great care should now be taken all around—an even temperature should be maintained in the rose houses at night and the fires banked as soon as the houses reach a temperature that will not be too greatly reduced by syringing. Syringe thoroughly and only on bright sunshiny days three times per week if properly done will be often enough for most of the forcing roses

American Beauties which have filled the soil compactly with feeding roots. In this case a rather green mulch of cow manure can be applied covering it lightly with good fresh soil to prevent spotting the foliage when the manure begins decomposing. Killarney and Richmond, My Maryland, etc. can be mulched or top dressed with pulverized sheep manure from time to time, using just enough to cover the soil; Well rotted cow manure will also do for this work. The Christmas holidays are rapidly approaching and it would be well to remember that there will be

sometimes doing much injury to the plants from over-cropping.

Anyone thinking of doing grafting should lose no time now in ordering Manetti stocks. English or Irish stocks are considered preferable to the French-grown Manetti, yet we have had excellent results with the French stocks at different times, though for the very best results we would suggest using the English or Irish stocks, even at an extra cost of \$2 to \$3 per 1,000 over the cost of the French stocks, as the wood is firmer and the sizes more uniform as a rule in the English-grown stocks. Have plenty of good sharp sand in readiness also for the propagating bench, which will soon be called into use. Manetti stocks should be kept in a cool, shaded house after potting—temperature about 45° until they begin to make roots. E.

Greenhouse Heating.

ED. AMERICAN FLORIST:

I intend to heat a new house with hot water and would like information regarding same in your columns. I want to put eight 2-inch pipes on each side wall of the house and wish to know how to connect these up into headers. I enclose rough sketch and would like to know if this would work satisfactorily.

J. R.

The sketch shows a coil of eight pipes carried along the side and around the end of the house to the door in the center, where they are connected by a manifold. The upper four pipes are flows and the lower ones are returns. The pipes have a total length of 97 feet. The water will circulate provided the lower end of the returns is three or four feet above the top of the boiler, but better results can be secured if the flow pipes run down hill. The question gives no idea of the size of the house, but supposing that the radiation mentioned is sufficient it will be better to use three 2½-inch flow pipes on the plates and under the ridge and 12 2-inch returns. There could be a coil of four returns on each wall, arranged as shown in the drawing, and four more under the middle benches.

L. R. T.

WHITE KILLARNEY ROSES AT POEHLMANN BROS. CO.'S, MORTON GROVE, ILL.

excepting American Beauty; twice a week for the latter, spraying them thoroughly, will we think, be sufficient, and Richmond may be also handled in this way, providing, of course, there isn't any red spider lurking around. There should not be any of these pests in evidence if the syringing has been done carefully and extra spraying must be carried on, of course, to prevent the spiders from getting the upper hand. A little sulphur should always be left on the pipes in order to keep out all mildew and from the time firing starts it is only through carelessness that mildew amounts to anything. The plants should be kept tied up carefully and the stems kept nice and straight. All extremely short growths should be pinched back before the buds begin to show colors; if this work is handled right two or more growths can be obtained resulting in a grade of good stemmed stock especially at this time in pinching back the growth of the Killarneys. Fumigating should be done with some regularity. We find about every ten days, using the fumigating papers, keeps the aphids in check and much is saved by fumigating as a preventive rather than as a cure. Try always to keep ahead of the insect proposition.

From now on until after the first of the year we would suggest the use of liquid manure water in preference to using a heavy green manure mulch, if only for the fact that the watering can be under better control at all times—at the same time it is often necessary to mulch a house of early planted

some demand for good stocks before and after the holidays, therefore do not be too anxious to have a full crop of everything at once. A general cut from day to day after December 15 will be found to average up well all around, and for the plants it is much better than to have them cut back hard right in mid-winter, often holding them back until February and

HOUSE OF CATTLEYAS AT POEHLMANN BROS. CO.'S, MORTON GROVE, ILL.

WITH THE GROWERS

Poehlmann Bros. Co., Morton Grove, Ill.

A visitor to Chicago that is interested in the growing of flowers for commercial purposes will be sure to include in his itinerary a visit to the noted establishment of Poehlmann Bros., Company, at Morton Grove, a station about fourteen miles north of the city. Two or three years ago a number of growers were talking of the magnitude to which greenhouse con-

Admiration was sending forth some splendid blooms. In reds there were Beacon, Victory, O. P. Bassett and Scarlet Glow. Victory was producing an immense crop and Scarlet Glow was in excellent shape with flowers of the brightest scarlet and a good quality.

Beyond the carnation houses were the houses of orchids. Here were fine plants of cattleyas just coming into bloom, and on each side were splendid plants with their nice large sheaths protruding from the strong healthy growths. Passing through the tall houses in which are grown the long

We are next conducted to the range of houses devoted to American Beauty roses and house after house is passed through with long canes bearing the beautiful large buds and clothed with luxuriant foliage. The north sides of these houses are partitioned off and here the thousands of the lily of the valley of unsurpassed quality are forced and they were seen in all stages from the newly planted pips to the beds producing the spikes of bloom. After inspecting this range we were ushered across to the new range where more American Beauties and, if possible, even better than we have just seen, are found, and at the end of the range are three houses of sweet peas, just commencing to bloom and showing unusual vigor and growth.

After inspecting this large range we are shown the new structure at the head of the range, a large brick building some four hundred feet long in which are installed the boilers for this range with room for the additional ones that will be added as soon as the new range of houses now in process of construction are erected. Looking out we see the posts and gutters are already in position for the new structure and when completed this range will have thirteen houses 500 feet long and 27 feet wide. The manure tanks in this building are very interesting. All the manure that is used for top-dressing is thrown into a large vat and sterilized in order to kill all the weed seed and vermin and is then transported in iron cars that run on a specially built track through the houses where it is easily spread upon the benches. While in the other ranges the coal cars are shifted to the boiler houses on spur tracks and the coal thrown into the bins, here it is intended that the cars will run into the building on an elevated track and the coal dumped right in front of the boilers. The boilers here are equipped with automatic stokers, which are giving great satisfaction. Under the floor of this immense building has been constructed a cement reservoir thirty feet in diameter and thirty feet deep which will supply the water for this range.

HOUSE OF CALLAS AT POEHLMANN BROS. CO.'S, MORTON GROVE, ILL.

struction had grown, and one prominent grower, himself the owner of one of the largest single houses in the country, said, "If you haven't seen Poehlmann Brother's houses you have no idea of a real large greenhouse plant." So it was with a great deal of interest that we alighted from the train at Morton Grove with the intention of inspecting this renowned place.

But a few steps from the station is seen the splendid administration building, containing the offices and other necessary rooms and hither we wended our way. We were particularly interested in the greenhouses so we immediately passed through this to later return, and entered the large range of houses devoted to carnations. Here we found 250,000 carnation plants, in the pink of condition, the picture of health and with not only a good cut of excellent blooms at present, but with the promise of a very heavy cut for the holidays and after. A look around found all the best commercial varieties and many of the novelties all doing nicely. In whites there were White Perfection in grand shape, White Enchantress and White Lawson. In the pinks a large assortment which were all looking fine: Enchantress, Winsor, Mrs. Thomas W. Lawson, Pink Lawson, May Day, Admiration and Dorothy Gordon and Sangamo. May Day was particularly promising, producing large quantities of beautiful large flowers and promising a very heavy cut for the future. Dorothy Gordon was doing nicely and the flowers were of great size and the stem very good.

strings of asparagus plumosus, we are suddenly transported into a California garden for before us is a large house of callas in full bloom, an innovation at this establishment. Beyond this are the houses in which are grown the immense quantity of lilies, for which this firm has acquired a great reputation for the quality of its product.

CARNATIONS AT POEHLMANN BROS. CO.'S, MORTON GROVE, ILL.

On our journey back we are shown the mechanical part. Here we find a concrete mixer for concrete benches are being made to supplant those of wooden construction, a thoroughly equipped blacksmith shop where are made the trusses for the houses and the irons to reinforce the concrete, a fully equipped electric light plant and the pumps which compress the air with the water to give the necessary force for watering, and in the administration building we are shown the refrigerating and cold storage plants. In this building are also the splendidly equipped offices, rooms for the employees, lavatories, and the large refrigerators as well as the room for the automobiles.

We have spent the afternoon inspecting this plant and are then told that we have as yet seen but one part, which is called Section A, over which August Poehlmann so admirably presides, and everything that we have seen, the quality of the stock and the manner in which the work is carried on, is a fitting testimonial of the executive ability of this member of the corporation. As the evening shades are approaching, we are hurried over to Section B, which is under the charge of Adolph Poehlmann. Here we are conducted into a range of houses as large as the one we have already visited, in which are grown the other roses and we pass through house after house of Killarney, White Killarney, My Maryland and Richmond roses, all in the pink of condition. As we pass down the center aisle for the day is so fast waning that we have to hurry in order to reach the end, which we can just see a long way ahead of us. The stock is in perfect condition showing the finest of cultivation, and the cut which we saw was of the highest grade. The mechanical appliances here are in keeping with the other section but it is getting so late that a closer inspection is impossible, but perhaps at some future time it will be our privilege to more closely inspect this section and more fully describe it. We cannot help feeling that words are inadequate and our vocabulary too limited to thoroughly describe this immense greenhouse plant. But we were particularly fortunate in having for a guide one of the assistant foremen, Anthony Gabel, who so gladly showed us the various features and patiently answered our numerous questions.

What becomes of the immense output of such a range of glass? This is a most natural question. It is shipped to the store at 33-37 Randolph St., Chicago, from whence it is distributed to their innumerable customers all over the country. John Poehlmann is the busy man who has the charge of this branch of the business and the continued trade of their customers is the guarantee of the faithful and efficient manner in which it is conducted.

BLOOMSBURG, PA.—The shipping season for verbenas has commenced at the establishment of J. L. Dillon and will continue until June. This firm's new seedling verberna, Columbia, with pink and white variegated flowers, is said to be of unusual size and beauty.

HACKENSACK, N. J.—Frederick Kuhnert, the florist, has invented and built an aeroplane which is so constructed that it will not fall or collapse in the air after the engine has stopped. He has several minor inventions to his credit.

The John Young Co., Bedford Hills, N. Y.

Here among the hills of Westchester county and surrounded by the palatial homes and estates of millionaires, is located the immense growing establishment of The John Young Co.

Mr. Young has been known for a good many years as one of New York's leading wholesalers. Being the son of a grower, it is not surprising that he has become a grower himself; family traits are bound to eventually crystallize and break into action sooner or later, hence, after a long period of time in the wholesale branch of the trade, we now find Mr. Young devoting all his energies to overseeing and directing the extensive industry, the foundation of which he laid but a few short years ago. In the management of the concern Mr. Young is ably assisted by his son, R. W. Young, and by his brother, William, formerly a rose grower for himself at Clifton, N. J. American Beauty is the only rose grown and the stock is all in the very pink of condition, with prospects for a very heavy crop around the holidays. One house, 54x701 feet, is filled with young stock; the other, a house 54x560 feet, contains plants in their second year; all are doing exceedingly well, however, though Mr. Young does not thing carrying over stock is really

matter to assemble enough good material to fill the house. Some of the stock received arrived in very poor shape, being small and ill-conditioned and requiring very careful nursing to bring them through. However, a good crop is now in sight and all indications point to a long and continuous cut of blooms from this house.

We must say a word about the office building. This is of rough stone, handsomely finished and built to last forever. The packing and tool sheds are on the main floor, a commodious flower cellar underneath and dormitories for the men on the second floor, Mr. Young's office being also on this floor. Taken altogether, the establishment is about as well arranged as it is possible for any commercial place to be; there is lots of room for further development (the area of the estate is 95 acres) and in the future we expect to see this range of glass one of the largest in the country.

John Reardon's Chrysanthemums.

One of the old standby exhibitors at the Chicago shows was missing this year. The fine chrysanthemums and decorative plants annually staged by John Reardon were not in evidence and the old-timers all missed him and his plants.

CHRYSANTHEMUM PLANT DR. ENGUEHARD.

Grown by John Reardon Agricultural College, Ames, Iowa.

the best thing to do. Carnations are being grown here for the first time, a house 22x570 feet being devoted to them. Among the varieties are Enchantress, white, pink and variegated; Victory, Winsor, White Perfection and Beacon; these are in quantity and are already giving good long stemmed blooms. Some varieties being tried out are Shasta, O. P. Bassett, Pink Delight, Sangamo, May Day, Mrs. Ward and Snowflake. As all the carnation stock had to be purchased for this season's planting, it was no easy

He is still growing plants, however, and growing them better than ever, but this is a superfluous remark, as we all know that he could not keep away from this work if he would, and so long as his hands retain their cunning, just so long will the approach of the chrysanthemum season see him busy over his specimen plants.

A short time since the writer had the pleasure of dropping in on him at the greenhouses at the Agricultural College in Ames, Iowa. No one was visible upon entering the front houses,

but away at the rear was a great show of chrysanthemum color and one did not need to be a clairvoyant to know where to find our friend. As we entered the rear house, his kindly face rose up from behind the big specimen Doctor Enguehard, shown in the illustration herewith. After a hearty handshake and the first rush of questions back and forth, an inspection of the plants and houses was in order. The chrysanthemum plants were certainly fine and the specimen shown in the cut and several others would have caused a redistribution of the prize money if they could have been shown at Chicago.

The houses are good though small and of the regulation college type. One continually wonders why these college people will not take a few lessons in building greenhouses from the commercial men, but they all seem more concerned about the effect of the houses in the landscape than they do about their effectiveness for growing plants. The situation is further complicated in this case by a tall brick building having been erected a little way south of the houses, shutting off a good portion of the winter sun. The whole place is as neat as wax inside, and the miscellaneous lot of plants are all in prime condition. The bulk of the space, of course, is given over to growing material for students' use, but more particularly to experimental plants. The house in which the chrysanthemums were being grown was half of it occupied by tomatoes, and however the old wizard ever did it I don't know, but the chrysanthemums were of a quality which would be in the money in any show, and the tomatoes were equally good.

After inspecting the houses we adjourned for some much needed refreshments which were produced in ample quantity and of a quality equal to the chrysanthemum plants. After an all too short visit we tore ourselves away and went at the less attractive business of the day. Our friend seemed to be happy in his work and the University authorities certainly should be well satisfied, as the Ames College greenhouses under the management of John Reardon are the best kept and the stock is the best handled of any of the college greenhouses which the writer has seen. W. N. R.

The Tree Dahlia.

What is known as the tree dahlia in California and is in bloom in several places around Los Angeles is a hybrid raised by an amateur in that city. Its seed-bearing parent is *D. arborea*, the male parent being *D. imperialis* and in habit it is about intermediate between the two. It grows to a height of about 20 feet and has more or less woody stems that are persistent for a few years but gradually die off and have their places taken by new ones. Its flowering season is in November and it is in magnificent condition now (November 25) at E. D. Sturtevant's garden in Hollywood. Mr. Sturtevant's plants are about 18 feet high, crowded with flowers and form a very imposing picture owing to the great mass of mauve which is visible at a considerable distance. There are two forms of it, one having broader petals than the other, but possessing not so truly a perennial habit. The individual flowers are about nine

inches across, of a pretty rosy mauve by day that, under artificial light, turns to almost a true pink. It is surely a magnificent plant in the landscape and one from which loads of flowers can be cut for decoration after the bulk of the outdoor chrysanthemums are over. If this only flowered earlier or was hardier in the east it would be a fine subject for cutting. H. R. R.

OBITUARY.

Charles P. Braslan.

Charles P. Braslan, the senior member of the Braslan Seed Growers' Co., San Jose, Calif., died of pneumonia at his home in that city December 3, in his 47th year, after an illness of 10 days. Genial, diplomatic, far-seeing and aggressive, few men in the seed trade were better known at home or abroad, and on lines all his own he pushed his way to the front from a very humble beginning, surmounting by sheer force difficulties that would have snuffed out men of far superior commercial training.

Mr. Braslan was born at Cambridge, Mass., July 1, 1863. He entered the employ of Jos. Breck & Sons, Boston, Mass., when 15 years of age, attending a commercial school evenings. He started on the road as traveling representative at the age of 17, remaining with the firm six years, the last year as manager of the seed department. In 1884 he formed a partnership with Jesse E. Northrup and Frank W. Brown, starting in business at Minneapolis as Northrup, Braslan & Co., Mr. Brown retiring after a few months. A. H. Goodwin, of New York, later acquired an interest in the firm, which was incorporated as the Northrup, Braslan, Goodwin Co. In 1894 a branch house was started in Chicago, Mr. Braslan assuming charge of same. In 1896, after reorganization of the firm, with which Mr. Braslan did not become again interested, he remained at Chicago for a short time in charge of the interests of Jos. Breck & Sons, his former employers. Realizing the great possibilities of California as a seed-growing center he located there, at first taking the agency of several seed growers and later establishing the Braslan Seed Growers' Co., at San Jose, where, in a comparatively few years, he succeeded in building up a large business.

Mr. Braslan was appointed by the governor a major in the Minnesota state troops while at Minneapolis and was commonly known by that title among many friends. There were six children, one brother and four sisters, of whom survive Mrs. Elizabeth McKeown and Anna Braslan, residing in Cambridge, Mass., and Mrs. Mary J. Mulcahy, residing in Minneapolis. Mr. Braslan's mother died in Cambridge in 1879 and his father, who had served in the civil war, died in Cambridge, 1902. The major was married three times, a son and daughter by his first wife, who died in Minneapolis, are both married, the former living in San Francisco, the latter in Minneapolis. His second wife, Georgia Lincoln, from whom he was separated, and a son 18 years old, live in New York. Mr. Braslan's wife and daughter, Olga, about 2 years of age, are at his late home in San Jose.

Major Braslan enjoyed a wide acquaintance east and west among leaders in many professions and lines of business and was cordially liked by thousands. He knew politicians, judges, senators and congressmen, professional people, railroad leaders, hotel men, musicians, players and singers and was the companion and on terms of good fellowship with the ablest with whom he came in contact. Few men pass from life who will be more generally missed and whose departure will be more sincerely deplored.

An Appreciation of Mr. Braslan.

We are shocked to learn of the death of Mr. Braslan and, especially, as the last time we saw Mr. Braslan he looked the picture of health, we thought. We have had no information since to lead us to think he was not enjoying his usual health.

Mr. Braslan came to us when a boy, in our seed department, and through his energy and ability, he advanced rapidly, through the various stages of stock man, salesman, representative on the road, until he was appointed manager of our seed department, a position which he held very creditably for a number of years. In 1883, he left us to go to Minneapolis, Minn., and shortly afterwards, the house of the Northrup-Braslan, Goodwin Co. was formed.

Mr. Braslan was a good seedsman. He had a thorough knowledge of the business in every department, from the time of putting out the seed stock, through the production and care of the crop; while its preparations for the market and detail of work connected with distributing it to the trade and consumers after its arrival in store, such as cataloging, advertising and care and manipulation of the seeds in every particular, were at his fingers' ends.

As a business man, as differentiated from a seedsman, he was brilliant in thought and rapid in execution.

He re-entered our employ in 1896, as manager of our Chicago warehouse, and continued with us there for about three years, until we closed out that branch of our business, at which time, if we remember rightly, he went to California.

We regret exceedingly to hear of Mr. Braslan's demise and his family and associates have our kindly sympathy in their bereavement.

CHARLES H. BRECK.

A Minneapolis Tribute.

Northrup, King & Co.'s store was closed between the hours of 12 m. and 2 p. m., December 6, out of respect to the memory of the late Chas. P. Braslan, former member of the firm, funeral services being held at San Jose, Calif., at that time.

William Kennedy.

William Kennedy, a well-known florist and landscape gardener of Greenfield, Mass., died at his home, November 23, after an illness of about a year's duration. He was born in 1841, in the north of Ireland, and came to America some 40 years ago. Before coming to America he had been employed upon the estates of the Duke of Argyle of Scotland, and Sir Richard Wallace of Ireland. Since coming to America he has had charge of several large estates and for seven years was superintendent of the estate of R. C. Nickerson of East Brewster. For a time he conducted a florist business in Greenfield.

Mr. Kennedy leaves a widow and six sons: Isaac, of Cleveland, a well-known florist of that city; Thomas, of Philadelphia; William, of Brookline; Sherrard and John, of Greenfield. The funeral was held November 25 at St. James church.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1910

Subscription, United States and Mexico \$1.00 a year; Canada \$2.00; Europe and Countries in Postal Union, \$2.50. Subscriptions accepted only from those in the trade.

WARM PACKING for both plants and cut flowers is necessary after this date in all northern cities.

The Garden Beautiful.

Apparently there will be excursion trains from Chicago to Detroit before long. Mayor Breitmeyer has invited Mary Garden to come along with her "Salome" and Chief of Police Downey says he personally can "stand a good bit of art."—Chicago Inter Ocean.

American Carnation Society.

By Clyde Carnationary, Clyde, Ohio.
—E. G. Gillett—Prosperity x Maceo; color scarlet; size of flower, three and one-half inches. Strong and vigorous grower. Never burst the calyx. Extra long and stiff stems. Free and continuous bloomer.

A. F. J. BAUR, Secy.

WHERE plantings are not yet completed, mulch the ground to keep it open.

Our Christmas Number will go to press early next week, December 14. Advertisers and correspondents will therefore oblige by sending in their copy as promptly as possible.

The National Flower Show.

At a meeting last week in Horticultural Hall, Boston, the various committees of the National Flower Show, which will be held in that city March 25 to April 1, in connection with the Spring Convention of the Society of American Florists, the American Rose Society, The American Carnation Society, The American Gladiolus and the Massachusetts Horticultural Societies, the progress made up to the present time was so encouraging that those present were more confident than ever that this exhibition will prove not only the greatest ever held in the history of the florist trade, but will be of incalculable benefit to the trade in general.

The Committees of the Rose, Carnation and Gladiolus Societies were in attendance and submitted schedules for premiums, which will be placed in the hands of the printer and distributed at the earliest possible date. The following day at the meeting of the Show Committee and the Board of Control, several matters of general interest were brought up and the report of General Manager Chester I. Campbell was read. With the show still several months away, Manager Campbell has already disposed of a large amount of the space allotted to the trade exhibits and at the present writing practically more than double the revenue has been realized than at any previous convention or show ever before held. Every greenhouse construction concern of any prominence in the country has already taken space, and the heating apparatus, fertilizer, pottery and accessory manufacturers are giving such grand support as would warrant the assumption that at the opening of the exposition every available foot of exhibiting space will be utilized.

The Board of Control by unanimous vote have advanced the opening date to Saturday, March 25. This was deemed advisable owing to the fact that it will greatly assist those exhibitors from distant points. This of course gives the exhibitors the advantage of an extra day at no additional cost. Special efforts are being made to interest the owners of both large and small estates in New England, and the response has been most gratifying. Many concerns who have never before exhibited on similar occasions have taken space, notably the fertilizer companies and the gardeners and farmers of New England have been invited to bring samples of their soils and the experts of the companies will analyze the same and give their opinion as to what is required to improve the yield. In fact this is only one of the many novelties that will be introduced, the committee in charge being determined to make the coming exhibition one that will long be remembered by the trade as well as the interested public.

Following is a partial list of those who have already taken space, and, different from any previous convention and exhibit, it will be available for those until the eleventh hour, as preferred

positions are rapidly becoming scarce:

Pierson U-Bar Co., United States Radiator Corporation, Lunt-Moss Co., Means & Thacher, Kroeschell Bros., A. H. Hews Co., Lord & Burnham, Hitchings & Co., Geo. M. Garland Co., Hammond Paint and Slug Shot Works, The Foley Mfg. Co., Boston Plate and Window Glass Co., Revere Rubber Co., A. T. Stearns Lumber Co., Quaker City Machine Co., New England Mineral and Fertilizer Co., American Auxiliary Heating Co., American Agricultural Chemical Co., King Construction Co., Best Oil Co., Boston Belting Co., McFarland Publicity Service, H. Bayersdorfer & Co., H. M. Robinson & Co., Arthur T. Boddington & Co., Henry F. Michell Co., Thos. Grey & Co., Schloss & Co., Wertheimer Bros., R. & J. Farquahar, Wait Interlocking Steel Co., Welch Bros., Knight & Struck, F. R. Pierson Co., A. N. Pierson, Inc., John Lewis Childs, The C. W. Brownell Co., Aphine Mfg. Co., J. Jarndahl, J. G. Harrison & Sons, B. H. Tracy, Robt. Craig, The Advance Co., Bowker Fertilizer Co., Bradley Fertilizer Co., J. Q. Admans & Co., and Pennock-Meehan Co.

Lord & Burnham Co.'s Catalogue.

The catalogue issued by The Lord & Burnham Co., which they have titled "Some Greenhouses We Have Built," is the most complete book on this subject which they have ever issued. It is replete with beautiful illustrations of the different styles of greenhouses which they have erected, showing both interior and exterior views of iron frame houses built for different purposes. The book is chaptered so that the busy man can easily find the subject for which he is looking and yet every detail is concisely and clearly described. The chapters devoted to the planting, locating and making estimates on iron frame construction and the equipment for completely erecting these structures is especially interesting. The three standard types, the straight roof, curved eave and curvilinear, have been arranged in groups and every subject given a plan number which with views and ground plan makes each one complete by itself. The chapters on fruit growing and the broader uses of conservatories and glassed-in porches very fully describe these features. The book is printed on extra quality paper and beautifully bound, and made very attractive in every manner.

American Gladiolus Society.

The American Gladiolus Society has offered the following list of premiums, open to all, for forced gladiolus to be exhibited at the National Flower Show:

For best dinner table, set for four, decorated with forced gladioli—1st prize, \$10; 2d, \$6; 3d, \$3.

Most artistically arranged basket of blooms—1st, \$5; 2d, \$3; 3d, \$2.

Best center piece—1st, \$10; 2d, \$5; 3d, \$3.

Best twenty-four spikes not less than four large flowered varieties—1st, \$5; 2d, \$3; 3d, \$2.

Best display of named gladioli, to occupy twenty square feet space—1st, \$12; 2d, \$8; 3d, \$5.

Best display of gladioli, Colville type, to occupy 20 square feet space—who contemplate exhibiting not to wait 1st, \$10; 2d, \$5; 3d, \$3.

Ferns, asparagus, smilax or foliage may be used for effect in all classes.

H. YOWELL,

Chairman Exhibition Committee.

Washington.**FAIR BUSINESS.**

The business of the past week was very fair, with greater expectations for the opening of congress. The most notable event of the past week was the debut of Miss Helen Taft, daughter of the President. Orders were received by nearly every retail florist in this city for floral pieces in honor of the event. Noteworthy were those executed by Geo. H. Cooke, A. Gude & Bro. and J. H. Small & Sons. Z. D. Blackstone, F. H. Kramer and Geo. C. Shaffer also sent fine designs. The white house was literally banked with flowers that were sent as tributes of appreciation. In addition to these the house decorations executed by the florists of the United States Propagating Gardens added greatly to the effect.

NOTES.

Archibald Small, a brother to J. H. Small and C. A. Small, retail florists of this city and New York, who has a farm at Silver Spring, is in a very critical condition at his home on account of an attack from a vicious hog. He went into the brute's pen to rescue a little pig, and being a fearless man he did not take even a stick with him. The fierce animal rushed at him, knocked him senseless and was tearing him to pieces when one of his employees arrived with a pitchfork and after a fierce fight drove the beast away. Expert surgeons were at once called from this city and an operation was performed. The fear now is that blood poisoning may set in. "Archie" Small, as he is well known to many, both in this city and New York, is a trained florist, but in recent years he has taken up farming. He has always been a genial and kindly man and has a host of friends, and the result of his injuries will be awaited with anxiety and sympathy.

F. H. Kramer, in addition to the many floral attractions at his F street store, has recently added a lot of waltzing mice from Japan. These little fellows by their peculiar antics keep a crowd constantly in front of his show windows. A. F. F.

Wants, For Sale, Etc

THE GEO.

Cincinnati.

SUPPLY INCREASING.

The supply of stock increased considerably the past week, in fact faster than the demand; still there was nothing worthy left over. This may seem a peculiar statement, but the facts are these: The buyers are ordering just as heavily this week as they did at last writing, but their orders are generally filled in full, while last week they got only a substantial part of what they wanted. The increased demand from out of town also takes its share of stock on hand. The prices in general are about the same as they have been since Thanksgiving with prospects of

immediate advances on some lines. Roses of all kinds, especially white, are coming in stronger and according to advices from some of the growers will continue so for the next fortnight or two. Carnations have not increased in supply and the prices are going up. Single violets are still backward, double violets and lily of the valley are sufficient for every demand. Lilium Longiflorum, callas, stevia and narcissus are also offered. Middle Jeanne Nonin, W. H. Chadwick and Mrs. Jerome Jones are the best of the chrysanthemums on the market. There is a good demand for green goods and an ample supply. All of the wholesale houses report heavy advance bookings for the holidays.

NOTES.

Wm. Gear and a party of friends including Albert Sunderbruch and Charles Hoffmeister took an automobile ride November 29, visiting Bloomhurst. They reported everything in tip top condition. The carnations are easily some of the best on the market.

R. Witterstaetter has practically all his glass which is devoted to carnations planted to his new seedlings, which are all looking promising. His house of Boston and Harris type of Boston ferns are fine.

"Sprinkleproof" Samuel Seligman of Wertheimer Bros., New York, was one of our well pleased callers. His ever increasing personality shows the good results.

Other Decorative Stock

Wittbold's stock will surely please both you and your customers.

WEST GROVE, PA.—An impromptu reception was tendered P. J. Lynch and his bride on their visit at the Lynch sisters' residence on Nursery hill. The inclement weather did not deter the friends, relatives and the employees of the Dingee & Conard Co. from assembling and extending hearty congratulations.

SPRINGFIELD, O.—The Reeser Plant Co. was incorporated November 23, with a capital stock of \$12,000, the incorporators being H. C. Reeser, John M. Good, J. F. Businger, C. A. Schafer and Arthur Todd. The new company will take over the plant formerly conducted by Reeser & Youngstrand. Mr. Youngstrand has sold his interest and will move to Chicago.

Notice! The Expressman's Strike Is Now a Thing of the Past.

Have your mind now on business. Be wide awake and

PREPARE FOR THE HOLIDAYS

It won't pay to let others get ahead of you. Don't look at what is behind, but go right straight forward. Make a break for **Godfrey Aschmann's Greenhouses**, to the old reliable firm who has always looked after your interests and who protects you.

We Have No Department Store Customers. We Sell Strictly to the Trade Only.

If you have room, now is the time to purchase your supply while the weather is mild and shipment can be made more safely, and while we have a big stock of everything at bargain prices.

A HOUSE FULL OF BEGONIA GLOIRE DE LORRAINE. WHO CAN BEAT THAT?

Begonia Gloire de Lorraine

**Begonia Gloire de Lorraine
to Beat the Band.**

This is another specialty of ours. We have a secret in growing them to perfection, only known to us giving them a rich deep pink color. They stand shipping well, traveling 2,000 to 3,000 miles without injuring or killing them in transit, if properly handled. We have a big housefull in 6 to 7 in. sizes, in bud and partly in bloom, ready

AZALEA INDICA.

Already forced for Christmas, showing color now, and put away in colder houses ready for shipment. Deutsche Perle, pure double white; Simon Mardner large double pink; Vervaneana, double pink variegated. Price: 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each. Remember, only the best and healthiest stock should be selected for Christmas, as poor, weak Azaleas won't force successfully for Christmas. Don't order many 75c ones, because we won't have them. Larger sizes and also white ones must accompany the order.

For Easter Forcing we have only the well known standard American market varieties, such as Mme. Van der Cruyssen, pink, very scarce this year in Belgium. 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Niobe, double white, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Deutsche Perle, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Helena Thielman, light pink, \$1.00, \$1.25, \$1.50 to \$2.00; President Oswald de Kerkove, \$1.00 to \$1.50; Schryveriana 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Empress of India, double variegated, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Professor Wolters, 75c, 1.00, \$1.25 to \$1.50; Vervaneana, 60c, 75c, \$1.00, \$1.25 to \$1.50; Apollo, 60c, 75c, \$1.00 to \$1.25; Simon Mardner, 50c, 60c, 75c, \$1.00 to \$1.50.

Remember, small sizes of Azaleas are scarce this year in Belgium; therefore I had to buy mostly large sizes.

Remember it is the wide awake man that is not afraid to invest a dollar that makes the money. **Jerusalem Cherries**, or Solanum 6-in. pots, 25c, 35c, 50c; full of ripe berries. **Cocos Weddelliana**, 3 in. pots, 15c, 18c and 20c.

for immediate sale or for the holidays. Everybody knows that last Christmas we had the best Begonia Gloire de Lorraine on the market. They were crackerjacks indeed! We have the deep pink and the light pink (Lonsdale) varieties, 6 in. pots, 50c, 75c to \$1.00; 7 in., \$1.25 to \$1.50; 3 in. (if transplanted soon will make good 4-in. for Christmas), 15c each \$15.00 per 100. If you have room you should order now because they are always scarce at Christmas. Other sizes must be taken in connection with 50c sizes.

Begonia Rex, 4-in., 20c.

LEADER in **LEADER** in
FERNS **Begonia Gloire de Lorraine,**
Scottii, Scholzei, Whitmani, Boston. Six houses stocked with the choicest, were never better than this year, 5, 5½, 6 and 7 in. pots, 35c, 40c, 50c, 60c, 75c to \$1.00.

LEADER in
Azalea Indica.

Our Ferns this year are exceptionally very fine **Boston, Scottii, Whitmani and Scholzei**, 5½ and 6-in., 35c, 40 and 50c; 7-in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

Neph. Glatrasii, a new beautiful fern, an improvement on Scottii, much shorter and bushier than Scottii, 5½ in. pots, 50c; 3-in. pots, 25c.

Please look at our special low prices for superior stock in

Rubber Plants, 6-in. pots, 35c, 40c and 50c; 5-in., 25c.
Asparagus Sprengeri, 2½ in., 3c; 4-in., 10c.
Asparagus Plumosus, 2½ in., 4c.
Primula Chinensis, 5¼ in., \$2.50 per doz.
Primula Obconica, finest strain, 5½ in., 25c 6-in., very large and extra fine, 35c.
Hydrangea Otaksa, 6-7 in. pots pot-grown (only pot-grown will force successfully for Easter); price, 25c, 30c, 50c to 75c.
Cineraria Grandiflora Hybrida, Aschmann's well-known strain, 2-in. pots, \$3.00 per 100; 4-in., 10c.
Dracena Bruanti, 25 to 30 in. high, 6-in. pots, 40c to 50c. Highly recommended for store and house decoration; stands heat cold and dust.
Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.
Adiantum Hybridum, 6-in. pan 25c to 30c.
Cyclamen Grandiflora, best strain, 4-in., 25c 3 in., 15c, in bud only.
Kentia Forsteriana, in fine shape 6-in. pots, 30 35 40 45 in. high, 4-5 6 years old, 75c \$1.00 \$1.25 \$1.50, \$2.00 to \$2.50 each.
Kentia Belmoreana, 25 30 35 40 in. high, 5-5½ 6-7 in. pots, 5-6 7 years old, 75c, pots large enough for 5 in., 25c; 5¼ in., 35c; 3-in., large enough for 4 in., 15c, \$1.00, \$1.25, \$1.50 to \$2.00 each.; 5-in., 20c.
Kentia Belmoreana, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots \$1.00, \$1.25, \$1.50 to \$2.00; 4-in., 20 in. high, 20c to 25c.

Poinsettias, 4 in. pots, 25c.
Pteris Wilsonii, 3 large bushy plants in 6-in. pan, 30c to 35c per pan.
Ferns for Dishes, big assortment, 2½ in. pots, at \$4.00 per 100.

Araucarias

OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the **Araucaria Excelsa, Robusta Compacta and Glauca**. 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½ 6-7 in. pots, 12-15 18 20-25 30 in. high, 3-4 5-6 tiers, 2 3-4 5 years old, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elegant 6-in. pot, 4 years old 4-5 6 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6-in. pot, 5 years old, 25 in. and over, as wide as a bushel basket, 5-6 tiers for only \$1.00; and what do you think? a holy terror 30 in. and over, 5-6 7 tiers, worth \$1.00, for only \$1.25 to \$1.50.

Robusta Compacta, Excelsa Glauca, 6-in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest **Araucaria Robusta Compacta and Excelsa Glauca**, a house full, good enough to decorate the White House, kings and emperors, bankers and merchants, suitable for the cosiest corners of their residences as well as the poor man's Christmas table, for only \$1.15 to \$1.50, worth double.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

DARK WEATHER.

The short dark days are now here, and for the last week the weather has been cloudy and cold with many snow flurries and consequently the quantity of flowers has reduced considerably. Still the trade, as is usual at this season, is not calling for any great abundance and while in some lines there is an apparent shortage, yet with the exception of carnations and short stemmed roses there is plenty to fill all the orders received. Some of the large rose growers appear to be on the start of a grand cut for the holidays, but others look as if they were backward, and if the weather continues the dark aspect of the last few days it now looks as if the buyer who orders early for the holidays and gets his stock promised will be the only one who will succeed in getting it filled, and the one who waits until the last minute in placing his order will find too late that the stock will not be forthcoming. Chrysanthemums are practically at an end, there being but very few seen on the market, and the chrysanthemum season of 1910 is practically closed. Roses are being received in good supply except in the shorter grades. American Beauty in the long stemmed grades are superb and plentiful enough to supply the demand. Killarney are in good supply and of good length of stem, but are showing the effect of the dark weather and lack the brilliant color which they had some weeks ago. Richmond are in good supply at the present demand, but being the Christmas color the demand will be heavy for the holidays, and the supply will have to increase to meet the increased call at that season. Carnations are decidedly short and are not being received in normal quantities for the season. Whether it is owing

to the poor summer growth or some other reason the cut is not equal to other years, and a great shortage of this popular flower may be expected. Orchids are in fair demand and cypripediums are quite plentiful. Violets are coming in a little more plentiful and are the only flowers which appear to be in over-supply. Paper white narcissus, Roman hyacinths, stevia and other smaller flowers are in quantities enough to meet the demand. Christmas greens are seen on every side, boxwood is having a good sale, and the early orders for holly are being booked. Bouquet green is very scarce and the price is high. The potted plants are being shown in the windows of the retailers and Christmas preparations are in progress.

NOTES.

The incoming of the new officers at the Cook county buildings on December 5, the last election resulting in an almost complete overturn by the dominant parties, was a happy occasion for the florists of the city. The rooms of the various offices were resplendent with floral beauties and many beautiful and fantastic arrangements were ordered and executed by the different retail houses beside the large quantities of cut flowers furnished for the occasion.

Having experienced difficulty in obtaining a good stock of lily of the valley to meet the demand of their trade, J. A. Budlong have concluded to grow their own, receiving the first stock at the store this week. They have named their stock Blue Ribbon valley and expect to be bountifully supplied. The roses are just coming into crop and the grade now being received is excellent.

Clifford Pruner of E. H. Hunt's supply department escorted us into their large show room December 6, where

they have on exhibition a fine assortment of baskets of every description and in all shades and colors. Miss C. Burkart of this department is on the sick list, suffering from a severe cold.

A. L. Vaughan of Vaughan & Sperry has been visiting his growers and reports the stock to be in fine condition. A large cut of American Beauty roses, mostly of a long-stemmed grade, is assured for the holidays. Some extra fine mistletoe was seen at the store this week.

Manager A. T. Pyfer of the Chicago Carnation Co. reports a fine advance sale for rooted cuttings of their new carnation Washington. We saw at the store three new carnation seedlings that were sent in by the Wm. Blackmann Floral Co. of Evansville, Ind., that looked very promising.

Raichart & Krejci, 3250 West Twenty-sixth street, have installed a new solid oak ice-box which was built to order by Buchbinder Bros., 516 Milwaukee avenue. The ice-box is very attractive and adds greatly to the interior appearance of the store.

J. E. Lapes, of Cedar Rapids, Ia., spent the greater part of last week in the city on business, returning home December 2. Mr. Lapes informed us that J. G. Crozer has opened a floral department in Denecke's department store in that city.

Wietor Bros. have just installed a Superior hot water boiler at their establishment on High Ridge. Henry Wietor is enjoying a few weeks' hunting at Cascade, Ia. This firm is now cutting a fine grade of American Beauty. Killarney, White Killarney and other roses.

C. L. Washburn has been suffering the past week from a severe attack of the grip and has been under the care of a physician. We noticed a large quantity of American Beauty roses at the store this week and were informed

BEAUTIES

We are now receiving extra large shipments of American Beauty Roses which include **Wm. Dittman's famous New Castle, Ind., stock**, which needs no introduction to the trade as it is the finest stock in the Chicago market.

POEHLMANN'S FANCY VALLEY EXTRA FINE HARRISII LILIES

We make these a specialty.
Can supply them all the year.
Once tried you will have no other.

that their daily cut is now 1,000 blooms.

Anton Then, Sr., died December 1 at his home on Western avenue, at the age of 82 years. The funeral was held from the residence Sunday, December 4. The interment was at St. Boniface cemetery. He is survived by the widow, three sons and a daughter. The floral offerings were very numerous and beautiful.

Peter Reinberg is cutting heavily in Killarney and White Killarney roses of good quality. This firm will be particularly well fixed on red carnations, the leading Christmas color, and are now booking orders for the holidays.

Chas. W. McKellar is receiving a fancy grade of yellow oncidiums that are finding a very ready sale. We also noticed a large quantity of bouvardias of good quality now included in the daily shipments.

August Jurgens, 2241 Herndon street, returned November 30 from a three weeks' trip in the south. The time was spent traveling and visiting in Tennessee and Mississippi and an enjoyable time is reported.

Stollery Bros., the Wilson avenue florists, report a very busy season. They have a very fine lot of plants for the Christmas trade, including poinsettias cyclamen and Jerusalem cherries.

William P. Craig of Philadelphia was a visitor to the city the last week, calling on the various retail houses, and pushing the fine Christmas stock for which the Philadelphia house is noted.

H. W. Buckbee of Rockford paid this city a visit on December 1, returning home the same evening. Business is good and the outlook for a lively Christmas trade is very promising.

Hoerber Bros. are cutting a large quantity of roses, with Killarney, White Killarney and Richmond remarkably good. This firm is filling many large orders for carnations.

It was a great pleasure to be welcomed by John Risch when we entered the store this week and found him sufficiently recovered from his recent illness to be back at the store.

E. J. Fancourt, of S. S. Pennock-Meehan Co., Philadelphia, Pa., was in town this week showing blooms of Double Killarney and Melody, his firm's new roses.

The J. B. Deamud Co. is receiving good consignments of carnations of very fine quality. The Christmas

greens are now beginning to arrive in splendid shape.

The renovations to the building occupied by the Chicago Rose Co. are nearing completion. A new entrance on Wabash avenue was finished this week.

The Poehlmann Bros. Co. is receiving superb American Beauty roses and the lily of the valley maintains the high quality for which it has acquired note.

Zech & Mann are receiving a large quantity of all the different flowers of the season. Killarney and White Killarney roses are in fine condition.

J. W. Starrett is kept very busy at the Hotel La Salle arranging the decorations for the numerous banquets held at this noted hostelry.

C. C. Taylor, representing the Kentucky Tobacco Product Co., of Louisville, Ky., is calling on the local growers this week.

Kyle & Foerster are receiving an extra fine grade of W. H. Chadwick and Golden Chadwick chrysanthemums.

J. B. Opitz, 3626 Cottage Grove avenue, had an exceedingly busy day December 3, with funeral work and other orders.

Louis Wittbold is erecting a three-flat building on Buckingham place, one block east of the Geo. Wittbold Co.'s store.

W. W. Fuller, 4526 West Ravenswood Park, is enjoying a very busy season and reports a record-breaking sale of chrysanthemums on November 24.

E. E. Pieser of Kennicott Bros. Co. has been confined to his home the past week with a severe attack of lumbago.

The A. L. Randall Co. is filling a large number of orders for a fancy grade of carnations which they are handling.

At John Kruchten's the Killarney and White Killarney roses which we saw are of exceptionally good quality.

J. A. Mendel, who was elected county commissioner at the recent election, took his seat of office December 5.

A meeting of the Florists' Experiment station advisory board will be held at Urbana December 8.

H. Van Gelder is receiving a fancy grade of roses, carnations and double violets of good quality.

The F. C. Amling Co. is receiving a large shipment of American Beauty roses every day.

Does all that is
claimed for it.

It has proved itself to be one of the cheapest and most effective insecticides known today.

Aphine does not alone destroy the insects, but also contains excellent cleaning qualities, in fact, some experts claim it invigorates plant life.

HAVE YOU TRIED IT?

\$2.50 per gallon, \$1.00 per quart.

Get it from your Seedsmen.

MANUFACTURED BY

Aphine Manufacturing Co.
MADISON, N. J.

A baby girl was born to Mr. and Mrs. D. J. Murphy at St. Joseph's hospital December 2.

Visitors.—E. J. Fancourt, representing Pennock-Meehan Co., Philadelphia, Pa.; Wm. P. Craig, Philadelphia, Pa.; J. E. Lapes, Cedar Rapids, Ia.; E. A. Feters and wife, Detroit, Mich.; Frank X. Gorley of Grimm & Gorley, St. Louis, Mo.; C. C. Taylor, representing Kentucky Tobacco Product Co., Louisville, Ky.; L. R. Taft, Agricultural College, Michigan.

SAN ANGELO, TEXAS.—The Nussbaumer Floral Co. has turned its attention to orchids and has converted a portion of the palm houses to their culture. They have acquired the entire stock of the Chatogue Greenhouse of Mobile, Ala., consisting mainly of Cattleya trianae and C. mossiae.

Am. Beauties

Our American Beauty Roses are arriving in splendid condition, on long stems, with splendid foliage and color, and in such quantity that we are able to fill all orders.

WIETOR BROS., L. D. Phone Randolph 2181. 51 Wabash Ave. Chicago

Chicago Florists' Club.

The regular meeting of the Florists' Club was held December 1, President Asmus in the chair. The various flower show committees presented their reports and the following were elected to membership: Max A. Wizzus, 511 North Seventh avenue, Maywood; Wm. A. Starrett, 3537 Cottage Grove avenue; H. C. Wuhlbrandt, 5315 West Madison street; T. Matchen, 35 East Randolph street (care of Peter Reinberg); E. R. Farley, 60 Wabash avenue (care of Percy Jones), and Geo. Klehm, Arlington Heights, Ill. Several were proposed for membership.

The nomination of officers for 1911 was then in order, and the following were named: H. E. Philpott, president; A. C. Kohlbrandt, vice-president; A. T. Pyfer, secretary; E. F. Winter-son, treasurer; H. N. Bruns, Alex. Henderson and John Degnan, trustees; Michael Fink, sergeant-at-arms. The treasurer's report for the year was then presented, showing a substantial balance in the treasury, and adjournment followed soon after.

Manager Pyfer, of the Chicago Carnation Co., exhibited a fine vase of Washington, his firm's new carnation.

Nominee Philpott, after the meeting, surprised all present by ushering them into an adjoining room where a bountiful luncheon was served. Miss Kohlbrand rendered a number of selections on the piano during the repast, and when the coffee and cigars had been served President Asmus took the chair as toastmaster, calling for remarks from the various nominees and others identified with the club's work.

It was a very pleasant occasion all around and everyone voted Mr. Philpott "the man of the hour."

Chicago Bowling.

The Florists' Club Bowling League resumed playing November 30, after a week's intermission. The Carnations won two games from the Orchids and the Roses three from the Violets. The Orchids still lead with the Carnations and Roses tied for second and the Violets in last place. The following table shows the number of games won by each team to date:

Won.	Lost.	Won.	Lost.
Orchids.....16	8	Roses.....12	12
Carnations.....12	12	Violets.....8	16

The following table shows the individual and team scores for games played November 30:

Our Carnations Are Superior

That Is Why We Win So Many Prizes at Every Exhibition

AWARDED HIGHEST HONORS

At Chicago, Milwaukee, St. Louis and Minneapolis Flower Shows.

Exhibition blooms for these shows were taken from our regular daily cut, which is the best in the Chicago market, all the same superior quality every day. That is why we please our customers. If you are not acquainted with us, send in a trial order. We guarantee satisfaction. We also have strictly High Grade 'Mums, Roses, Sweet Peas, Valley, Violets, Greens, Etc., at Lowest Market Prices.

St. Louis.

STOCK SCARCE.

Stock continues very scarce, especially carnations. Roses have also shortened up and some very fancy sweet peas are seen. American Beauty roses are of fine color and prices have advanced. The retailers have their

windows very beautifully decorated with blooming plants.

NOTES.

M. M. Ayres has a grand display of blooming and foliage plants, also the choicest cut flowers the market can produce. As an artist Mrs. Ayres can not be excelled and her assistants are all up-to-date.

The Burns Floral Co., under the management of Miss Mae Burns, will open up at 1049 North Grand avenue. Miss Burns is well known and all wish her success.

The Foster Floral Co. have vacated their store in the Century building and it will now be occupied by Otto Sander, who at present is located in the Maryland hotel.

A fire took place Monday morning at a studio adjoining the Burns Floral Co.'s store. But little damage was done.

W. J. Pilcher is now cutting some extra fancy violets from his special variety, the new Missouri violet.

W. C. Smith Wholesale Floral Co. are handling some extra fancy long-stemmed lavender sweet peas.

Geo. Waldbart had the decorations at the St. Louis Club reception given by Rolla Wells.

Visitors were: Martin Reukauf and Wm. P. Craig of Philadelphia, Pa.
W. F.

Valley! Valley! Valley!

We grow our own Valley. From now on we will be able to take care of regular orders, as we shall have a continuous supply.

A BIG CUT FOR THE HOLIDAYS

Besides We Offer Daily our Prize Winning ROSES AND CARNATIONS

Pronounced by judges at the Chicago Flower Show as exceptionally good we securing **19 Awards**. Stock exhibited was taken from our regular cuts and as such we are able to supply customers with the selfsame stock which in turn will surely satisfy your customers. Heavy supply of

Beauties, Maryland, Jardine, Richmond, Pink and White Killarney, Field, Kaiserin, Maid and Bride. They are sure to give satisfaction. None better in the market.

Carnations. All the leading varieties. You will find them to be large sized flower and long stem grade, and of a quality far above the average to be seen in this market. Try them and be convinced.

Violets. Fragrant home-grown singles, you will find these hardy enough to stand long distance shipments. Can also supply the New York or Hudson River Violets, but owing to length of time required for these to reach Chicago, we can only fill orders for such Violets at buyers' risk.

Plenty of other Seasonable Stock, the best in the market.

We

WHOLESALE
GROWER OF **CUT FLOWERS**

Plenty of
Stock to
Meet all
Needs.

Milwaukee.

EVERYTHING SCARCE.

Everything scarce in this market. Carnations are being demanded regularly and selling at very good figures. The majority of growers are hoping for sunshine as they say that they do not expect to cut any where near what they cut last year with the prevailing conditions. American Beauties are becoming a little more plentiful, mostly of a long grade. Roses are about the only thing that remains in the market to be picked up by the buyers, especially white. Violets are very scarce bringing good figures and not near enough to supply the demand. Lilies are practically out of the market.

NOTES.

At the monthly meeting of the Milwaukee Florists' Club the annual election of officers took place with the following result: H. V. Hunkel, president; A. Leidiger, vice-president; G. Mueller, secretary; J. G. Heitman, treasurer; Aug. Kellner and F. H. Holton, trustees. The chairman of the executive committee of the Flower

Show made the report which was certainly a very encouraging one to the guarantors, as they announced that they would pay a 25% dividend to all subscribers of the guarantee fund. This ought to make things encouraging toward raising a subscription for next year's show, which the club voted to hold in November, 1911. C. C. Pollworth gave the members a fine treat, serving them with a fine venison lunch at the meeting, and much credit is due Mrs. Pollworth for the tasty way in which it was prepared. The attendance at this meeting was very large and it would be much to the credit of the club to have same continued. The entertainment committee announces that everything is in readiness for the dance which takes place Thursday evening.

Home Bros. announced the sad news of the death of Miss Alma Wolgast, who has had charge of their floral department for a number of years. Miss Wolgast was very popular among the trade and will be greatly missed.

Nic. Zweifel says that he expects to cut as many carnations for Christmas

as he did last year and at the present time is cutting heavily of Bright Spot.

Holton & Hunkel Co. are cutting some fine long-stemmed American Beauties which are being disposed of at a good figure.

C. C. Pollworth Co. say stock is scarce. They are cutting some nice Killarney and White Killarney roses.

Aug. F. Kellner was busy decorating at the Auditorium for the annual Charity Ball.

Manke Bros. are cutting some fine Enchantress and Beacon at the present time.

Gus Pohl has a large quantity of stevia which he is cutting at the present time.

J. M. Fox handled quite an amount of orchids and gardenias for the Charity Ball.

Mueller & Schroeder expect to cut a fine lot of Beacon for the Christmas trade.

Visitors: M. Reukauf, Bayersdorfer Co., Philadelphia; Mrs. Miller, Racine; L. Turner, Triesdell; Louis Hartung, Two Rivers.

DO YOU KNOW ARMADILLO BASKETS

They Are The Most Unique And Best Selling Novelty Ever Produced

Fashioned with ingenious skill from the armor-like shell of that curious animal of Old Mexico, the Armadillo; they are at once the oddest, prettiest and most sought-for flower baskets ever shown in a Florist's window.

Also made with bright colored silk lining, a beautiful work basket. Get this novelty, show it to your customers, and it will not only sell itself but make much other trade for you.

Pittsburg.

STOCK SCARCE

The scarcity of stock is more marked than ever, and only advance orders for carnations and roses are being filled complete. The out of town trade, which generally have their own carnations, are continually calling for this flower, and mostly lose their telephone calls as town buyers are on the spot to pick up anything that turns up. Violets and sweet peas have eased up a little. Lilies are coming in right plentiful. A few chrysanthemums arrive but there is no demand except for funeral work. A fine lot of stevia is on the market with demand good.

NOTES.

Both stores of Randolph & McClements have had quite a run on debutantes, Mr. McClements coming down town every morning to pick up any novelties lying around.

A. W. Smith Co. have been having some very fine window displays—a bamboo hut with appropriate surroundings attracting much attention.

Jos. Jones has vacated his Liberty Street store, and the same will be occupied by Wm. Loew with his Christmas greens.

From the way the retailers are buying Christmas supplies they anticipate a very good holiday trade.

Gilbert Weaklin states he is very well pleased with the amount of business done so far.

Chas. Erhardt, of the Allegheny Market, had the Elks Memorial decoration.

E. C. Ludwig also has a broad smile, stating business is very brisk. J.

Buffalo.

TRADE GOOD.

Trade has been very good the past week with an apparent scarcity of flowers, more particularly roses and carnations, and advance orders for Christmas are very encouraging. Violets, Bon Silene, lily of the valley are very much in demand. Receptions and weddings have kept the trade busy and a great many more are in sight.

NOTES.

There have been several changes in business places the past week. S. A. Anderson has purchased from J. H. Rebstock his Elmwood avenue property which was a part of the property acquired by him four years ago. It now gives Mr. Anderson three more houses and a piece of land 50x500 feet. Mr. Anderson has also taken over the

flower department in the Hotel Ironquois.

There will be an important meeting of the Buffalo Florists' Club on December 6, when the final settlement of the recent flower show will be made and a possible decision made as to whether another will be held. It is earnestly hoped that the club will see fit to have another show, as the in-

quiries and regrets from those who did not get to the last one will almost make the next one a success.

The Florists' Bowling Club is having a remarkable revival and many of the bowlers of a few years ago are in regular attendance. Anticipation of the games with Rochester or Cleveland no doubt spurs them on.

GOOD BUSINESS.

For the past week trade has shown some activity. The weddings are by no means over, whilst it is the season for dinners and celebrations. This involves flowers and floral decorations in almost every case, and the florist is as necessary as the caterer. And of funerals and of hospital demands there is never any end. The chrysanthemum season ended, practically, with November, and only a few late varieties are straggling in. Carnations remain comparatively short, but roses and violets there are enough for current demands. Christmas stocks are in good shape generally and there will be enough material for all calls. The first Monday German of the season will be held on December 12 and will be full of work for the trade, this being the event for the introduction of the debutantes. The occasion is a brilliant one, the hall where the dance is held being lovely with bright colors, gleaming lights and stately plants.

NOTES.

The annual meeting and exhibition of the Maryland State Horticultural Society, held in the great armory of the 5th regiment, was a great success. The display of fruits, of ornamental and flowering plants, of cut flowers and nursery stock reflected credit upon it and upon those who busied themselves in the preparation. Richard Vincent, Jr., of White Marsh, the president, was energetic and ubiquitous, having general oversight, presiding at the meetings, delivering lectures and acting as press agent, and was well seconded by many workers. In the center of the

THE LEO NIESSEN CO.,

Business Hours: 7 a.m. to 8 p.m.
1209 Arch St.,

Philadelphia, Pa.

Philadelphia.

At this writing this city is experiencing the first snow of the winter. There have been a few flurries but there is now a depth of about four inches and it is still falling. The past week has been a fairly busy one, quite up to the usual business of the season, there being several important weddings and a number of debutante teas which used up about all the good stock in sight. Orchids, particularly cattleyas, were in good demand. Gardenias were bought up on sight. Choice Killarney and American Beauty roses were cleaned up each day. White violets and lily of the valley were away behind the demand. High-grade lily of the valley brings \$5 a hundred without a protest and is scarce even at that. A welcome addition is stevia, which is always popular with the average cut flower buyer. Poinsettias are also seen, the Robert Craig Co. cutting some very fine bracts. Killarney roses are making great strides, some excellent stock being seen, with stems four feet long. They are preferred by some buyers to American Beauties. The general excellence of the White Killarney to both the Bride and Kaiserin is noticed by all handlers of flowers and grand flowers should be seen later on. It is wonderful that, being but a sport, it should so far excel the Killarney, the parent plant. The buds of the new variety are considerably larger and have so much more substance. It is certainly the standard white. Chrysanthemums are about done. There are still a few Timothy Eaton, Mdle. Jeanne Nonin, W. H. Chadwick, Rosette and Mrs. Jerome Jones and Yellow Jones. These are held at good prices with a good demand. Chrysanthemums have been a good crop this season, the demand having been equal, or a little ahead, of the supply at all times. The prospects for a holiday trade are good. The plant men have been feeling the impulse for some time and a visit to the greenhouses sees most of the choice stock already set aside and roped off as sold. The Robert Craig Co., W. K. Harris, Godfrey Aschmann, Jacob Becker, J. Wm. Colflesh and other growers all say their advance orders are ahead of last season. The wholesale dealers in florists' supplies, H. Bayersdorfer & Co. and M. Rice & Co., are very much rushed and say that their customers are buying more freely, showing that they see business ahead warrants their laying in large stocks.

NOTES.

Ed. Reid has been making a hit with special chrysanthemums of No. 1 quality. They have gone off like hot cakes. Mr. Reid's business has so in-

creased that he will move December 15 to 1619-21 Ranstead street, about one block farther west of his present location, where he will have a splendidly fitted establishment, up-to-date in every respect and about twice the size of his old store.

The Leo Niessen Co. are much pleased with the way advance orders and inquiries are coming in. The special carnations that are seen here are a revelation. No such stock has ever been seen in this market before. Choice American Beauty, Killarney and Richmond roses are leaders, the specials being exceptionally fine.

The S. S. Pennock-Meehan Co. turn over a lot of stock every morning. It looks more like a market here than a commission house, only it is Mr. Meehan now instead of Superintendent Meehan. Of course, S. S. Pennock is also on the job and this combination, with their long years of experience, is hard to beat.

Berger Bros. are handling very choice My Maryland and Richmond roses. They will be strong on Christmas greens, holly, boxwood and holly wreaths.

Thanksgiving business was very good here, reports coming in from all the florists are very satisfactory. The volume of business done was about the same as last year.

We regret to announce the death of W. Gilbert Stover, the son of N. B. Stover. He was 29 years old and had been a cripple for the past fifteen years and has been gradually failing. He took cold a short time ago, which left him very weak and he did not rally.

FAIR BUSINESS.

The condition of the flower market is as follows: Chrysanthemums are coming in in smaller quantities at this season for this beautiful and very popular flower is drawing to a close, and roses, carnations and violets are coming in in quantities which guarantee a ready sale and consequently the stock on hand each morning in the market is readily cleaned up at prices which ought to make the successful grower feel happy, for certainly, if he has any quantity to sell, he can get all that they are worth, and if the trade at large were doing a rushing business it would be almost impossible to supply the demand, but Christmas is only four weeks off and the supply will have to increase, as it probably will, for at this time the florist would sell all the flowers of the various kinds that he can get. The stores are taking on a Christmas look even at this early date. Flowers are of fairly good quality though Killarney roses are very light colored as yet, not having taken on that deeper shade of pink for which they are so much prized during the winter months, My Maryland being of very much better color at the present time. Red roses are very scarce and bring a good price. Violets are also scarce and hard to obtain in large quantities. The retail dealers report a fair trade with the usual amount of funeral work and the added condition that each day they are able to use up about all the stock on hand and do not have to carry over very much from day to day.

NOTES.

Miss Frances Elizabeth Breck, daughter of Charles H. Breck, was married on Wednesday evening at the home of the bride's parents on Fairmont avenue, Newton, to John Benbow of Norwood. The house was decorated with chrysanthemums.

W. H. Elliott is bringing in his usual stock of Mrs. Aaron Ward roses, for the growing of which this establishment has become noted.

Arnold & Pedro report that they are doing as good a business as they could expect for a new concern just starting in.

H. C. W.

ELMIRA, N. Y.—Peter Makres, proprietor of the Oriental flower store, was married in New York November 16 to Elizabeth Marango, an Athenian young woman, who traveled all the way from Greece to meet the young man she had loved in their native land.

Lenox Horticultural Society.

The Lenox Horticultural Society held their monthly meeting on December 3, the chief business being the election of officers for the ensuing year and to review the position of the society. This has been the most successful year since the society was first organized, 16 years ago; the finances are in a very healthy condition, and the membership on the hundred mark.

All the officers were unanimously re-elected for 1911, they being G. Foul-

SUPPLY SHORTER.

There was a decided falling off in the cut flower business commencing about the time we went to press last week and it was Saturday, December 3, before things became active again and it was more owing to a general shortening up in the supply in some few items than anything else that caused the healthier tone in the market at that time. It is generally conceded that the few weeks just preceding Christmas are usually quiet in cut flower circles owing, no doubt, to the increased quantity of flowering plants that become available so that a shortage in flowers just at this time is not looked upon as a very serious calamity. American Beauty roses are not over plentiful. Brides, Bridesmaids, Richmonds, Killarneys and My Maryland all are selling fairly well in the shorter grades, but the extra and special grades are a rather difficult proposition and prices do not seem proportionate to their value. Owing to their scarcity carnations are bringing very satisfactory prices. Chrysanthemums are diminishing in supply and prices remain fairly firm. Supplies of violets have increased perceptibly, consequently there has been a reaction in values. Cattleyas are yet quite scarce and good blooms of C. trianae are bringing \$1.00 each while C. Percivaliana is fetching 60c each. There is quite a supply of cypripedium insigne coming in for which there is not much demand. Lilies are quite plentiful, as also are narcissus and Roman hyacinths, with little if any change in prices. Sweet peas are increasing slightly and more long-stemmed flowers are seen among them. Lily of the valley is always in supply but the demand is erratic. Asparagus in bunches is meeting with a fairly steady call but that coming in strings, together with smilax, does not sell satisfactorily.

Tuesday, December 6.—A severe snowstorm has raged all day with the consequence that business has received a hard check and severe cut-down in all lines.

NOTES.

The Postal Progress League, at a meeting on Wednesday, November 30, decided to send a committee to Washington, D. C., to work for parcels post. The appointment of the committee came after a speech from Congressman W. Sulzer, who said: "If your organization will send representatives to Washington at once and they will bring enough pressure to bear on the Committee on Post Offices to report the Parcels Post bill, I will promise that the bill will become a law before the end of the present session." We may yet get parcels post, it seems.

At Thorley's Twenty-eighth street store some very attractive bridal bouquets were shown in the window this week. They were made in a rather old-fashioned way, a few violets in the center, a row of Roman hyacinths next, then a row of sweet alyssum followed by a row of red roses. All were arranged with geometrical precision and the whole embedded in a cream colored lace paper carton and tied with cream chiffon. They were very pretty indeed and attracted no little attention.

The firm of Badgley, Reidel & Meyer, Inc., who succeeded to the wholesale florist business of A. T. Guttman, 34

WILLIAM H. KUEBLER

Telephone 1202 Madison Square.

West Twenty-eighth street, on September 15 last, are enjoying a fair share of trade. This firm is working hard and are increasing their business daily. They bought out their predecessor's fixtures, good will, etc., entirely, Mr. Guttman having retired absolutely from the wholesale commission business.

Kretschmar Bros., West Nyack, have placed an order with the King Construction Co. for an iron frame greenhouse, 200x35 feet. This will be used for carnations. The contract calls for the house to be finished May 1, 1911. The same building company is also erecting a curvilinear graperly for W. F. Fray at Elkins Park, Pa.

Mrs. McNiece is supplying many of the retail stores with partridge berries for filling the little glass bowls that have become so popular for table decoration within the last few years. This lady, besides supplying the berries, visits the stores and arranges them in the homes, when desired.

The next meeting of the New York Florists' Club will be held in the club's rooms, corner of Twenty-third street and Eighth avenue, December 12. At that meeting election of officers for 1911 will take place so we shall, no doubt, have a very interesting session.

Wernz & Koehne, retailers at 61 Fifth avenue, keep a very well appointed store and enjoy a steady residential trade, one that does not fluctuate so much as is the rule in some other parts of the city.

Leslie Morse, of the C. C. Morse Co., San Francisco was in town November 28. Mr. Morse reports crops good in California, with the exception of some varieties of peas.

Stephen Dombrowsky, gardener to H. B. Duryea, Westbury, L. I., has accepted the position of superintendent for J. P. Morgan at Highland Falls.

Wm. P. Ford, wholesale florist, 45 West Twenty-eighth street, is handling in addition to cut flowers, a nice line of geranium plants in full bloom.

At the Broadway store of J. H. Small & Sons green tiny baskets filled with Begonia Gloire de Lorraine have been attracting much attention.

The safety razor offered as a prize for the highest scores at the New York Bowling Club on November 25 was won by J. B. McArdle.

Reports from Michigan presage a shortage in the supply of the familiar red berries Ilex verticillata.

R. T. Irwin, Philadelphia, Pa., was a recent visitor.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

VISITED CHICAGO: L. M. Kimberlin, of the Kimberlin Seed Co., Santa Clara, Calif.

DENVER, COLO. It is reported that no holly stands will be permitted on the streets this season.

W. J. FOSGATE, Santa Clara, Calif., has started on his eastern trip and is due in Chicago about December 15.

A. H. GOODWIN, Chicago, is planning to sail from New York for Algiers on the S. S. Carmania, January 7.

CHAS. P. BRASLAN died at San Jose, Calif., December 3. For further particulars see obituary elsewhere in this issue.

CHICAGO.—Prices on the board of trade December 7 for grass seed were noted as follows: Timothy, \$8.50 to \$10 per 100 pounds. White clover, from \$22 to \$28.

THE Haven Seed Co. is changing its postoffice address from Lodi, Calif., to Santa Ana, Calif. This firm's stocks have been good and separations are being made to increase the acres the coming season.

VISITED SIOUX CITY: F. H. Hunter, representing Waldo Rohnert, Gilroy, Calif.; L. M. Kimberlin, of the Kimberlin Seed Co., Santa Clara, Calif., and L. W. Wheeler, of the Pieters-Wheeler Seed Co., Hollister, Calif.

BOUQUET GREEN is not to be had, and Chicago winders of this article have not the bulk stock to make wreathing or even for wreaths. Whether boxwood, laurel or holly will be in increased demand as substitutes can not be told, but the lack of the ground pine must have a bad influence on next season's trade.

CHICAGO holly is coming in slowly and eastern stock is very scarce. Eastern packers say there is none compared with former years, and the carloads which have reached the seedsmen at Chicago are all needed for advance orders. Southern holly is expected in better supply than the eastern, but so far there is but little in sight and the quality of the stock yet to be shown.

Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale
Trade Only.

SAN JOSE, CALIF.

J. Bolgiano & Son's New Warehouse.

On one of the finest water front properties of the city of Baltimore, J. Bolgiano & Son have erected a mammoth new pier and warehouse. This property is conveniently located near their main offices and directly opposite the new \$10,000,000 city docks. It extends along Montgomery street for almost 500 feet west from Ruppert street and has 375 feet of private dockage. All the railroads and steamship lines will deliver freight to their piers without extra charge, saving all drayage. The new piers and warehouses contain 5,000 square feet of floor space, and here are located the onion set, the po-

The Late Chas. P. Braslan.

And Miss Olga Braslan, the Youngest Daughter. His Latest Photograph Taken About a Year Ago. See Obituary.

tato seed, the bulk seed, and grain warehouses and the new poultry food manufacturing plant, and is equipped with automatic machinery by which it is possible to weigh, clean and reload a car of seed or grain very rapidly.

The new poultry food plant is capable of producing 3,000 bags of "Square Deal" poultry food a day, which is about fifteen times their former capacity, which enables them to fully take care of their increased demand for these well known products which are cleaned, milled, scientifically-propor-

tioned, weighed and bagged and conveyed to the cars by automatic machinery under the careful supervision of their expert specialists.

An up-to-date seed analysing and testing laboratory has been established and an expert from the United States Department of Agriculture has been placed in charge, and they are now able, not only to supply the purest and truest seed stocks, but are also prepared to supply accurate and scientific information to all who are interested and to comply in the purity and cleanliness of seed with the seed laws of the various states of the Union.

W. W. Johnson & Son's Novelties.

Among the novelties and specialties offered by W. W. Johnson & Son, Boston, England, the following are noted:

New pansy Johnson Giant, a truly wonderful strain, remarkable for its range of color and extraordinary size. The flowers are of fine substance and stand up well above the foliage.

Sweet Williams-Johnson's Giant, an extraordinary novelty, the individual pips being larger than a half dollar with a range of colors that are not to be found in other strains. Johnson's Diadem, a grand deep rich crimson, with a well defined white eye. Pink Beauty, massive trusses of the most delicate and pleasing pink color. Sutton's Scarlet, a selection from Pink Beauty of vivid scarlet color.

Dimorphotheca aurantiaca, a very showy free blooming annual, with flowers like a marguerite, but of a golden orange color with a striking black centre.

New hybrid gerberas, distinct and beautiful hybrids embracing the most exquisite and delicate shades of yellow, rose, cherry red, salmon, terra cotta to crimson and white.

Lupinus polyphyllus rose, a fine new color in this old fashioned and easily grown perennial.

Aster Blush Queen, a new and very striking novelty of the Victoria section. The flowers are a delicate blush and borne in great profusion.

Sweet Peas-Dodwell F. Browne, a magnificent novelty of Eckfords, a King Edward Spencer of large size and fine color. E. J. Deal, a mammoth white Spencer. Queenie, waved blush ivory or cream. Mrs. Townsend, white, flushed and edged blue. George Stark, a rich scarlet of splendid form. Winsome, a lovely rosy heliotrope. Mrs. R. W. Pitt, crushed strawberry shade. Picotee and Satin Queen.

An assortment of novelties in vegetable seeds including Silver Bell onion, Perfection Red radish, Perfect and Remarkable pea, Perfect long pod bean and Perfect tomato.

THE Chicago Tribune of December 4 names Thomas M. Hunter, long-time operator in field seeds on the board of trade, former alderman and now chief bailiff of the municipal court, as possible republican candidate for mayor of the western metropolis. In this connection the Tribune remarks: "The facility with which men in the seed business become interested in politics—at the recent election Candidate Vaughan, who ran against Congressman Mann, is a seedsman—suggests the query whether there is not some affinity between that business and public affairs which finds its manifestation in the practice of the national government, which uses its members of congress to distribute all sorts of seeds among their constituents whether they want them or not."

N. J. WESTERMAN
Contract Onion Seed Grower.

BETCHEL, KY.

In Japan there are two kinds of Giganteum grown, the "flathead" and the tall bulb. The former is planted near the top of the soil, where the hot sun can bring it to size very quickly (at the expense of its vitality and quality). Of course all Giganteum cannot be the best, and growers are obliged to sell the inferior article for three reasons: first, because many people buy an article just because it is cheap; second, because dealers must buy very cheap from importers to make a profit; third, because many people don't know the difference.

The grower who wants to make money and maintain a modern shop, must buy economically; that means he must buy stock which will net the most profit. The profit is in the blooms of the Lily Bulbs, and so he must buy the bulbs which net the most blooms on the average. That's *Horse-shoe Brand* Bulbs---they will average the highest cut per thousand bulbs of any brand known.

Prices Reasonable.

Market Gardeners

Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa. President;
H. F. Hall, Grand Rapids Mich., Vice-President;
S. W. Severance, 508 Illinois Life Building, Louisville Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.
Annual meeting at Boston Mass., 1911.

Prices of Indoor Fruits and Vegetables.

Chicago, December 5.—Mushrooms, 15 cents to 25 cents per pound; cucumbers, \$1.10 to \$1.50 per dozen; tomatoes, 5 cents to 12½ cents per pound; radishes, 40 cents to 50 cents per dozen bunches.

New York, December 3.—Mushrooms, 60 cents per pound; cucumbers, 15 cents each; lettuce, \$1.25 per dozen heads; tomatoes, 25 cents per pound; radishes, 60 cents per dozen bunches; asparagus, \$9 per dozen bunches; grapes, Gros Colman, \$1 per pound; cauliflower, 25 cents per head.

Lettuce Plants.

We believe each grower should produce his own plants, as buying plants from any source is a great risk. We sell a good many plants, and the demand seems to be constantly in excess of the supply. This indicates that a large percentage of the growers fail at one time or another to raise good plants. Generally the last two months in the year are the most unfavorable for plant production. The main cause for this may be found in false economy of heat and lack of air. If operators would learn to heat and carry open ventilators in fall they could almost ignore weather conditions.

We make it a practice to start the seeds in the coolest part of the range; transplant into as low a temperature as possible; that is, the seed bed and the plant beds should both be lower in temperature than the growing houses. Plants thus grown will take hold at once after moving, which is the main point.

Seedlings, dibbled out 2½x2½, should make excellent plants; just before the leaves touch we use a sharp knife and cut the rows backways and crossways, deeply. This is at one operation a cultivation and a blocking out for removal. After a week or ten days such plants are as good as pot-grown ones at a fraction of the cost. Too much moisture either root or leaf is undesirable, as it induces soft growth and mildew.

MARKETMAN.

Forcing Outdoor Rhubarb.

An English writer commenting upon the various devices in use whereby a succession of rhubarb may be obtained, states that the most economical and most effective system that has come under his notice is to plant the roots in special beds raised slightly above the ground surface, and having wide alleys between. These are dug out sufficiently deep to allow of manure and leaf beds being made to a depth of eighteen inches to two feet, slightly covering the adjacent soil around the pots. The heat generated acts directly on the roots to their whole depth, which naturally brings about a much quicker response than that following the more common practice of heaping on the open surface about the pots. These beds have two rows of plants in them, their width about three

feet, and trenches between them two feet wide. It must be said that duplicate beds are necessary, so that they do duty every alternate year, a practice that is followed in the case of ordinary cultivation. It might be suggested that in adopting this particular course for the purpose of early outdoor forcing short beds, say, twelve feet in length, that would accommodate a dozen plants, would be more convenient for the private garden. If this could be formed on the frame ground it would be more readily accessible both for application and removal when the heat is exhausted. It would be advantageous to allow the manure to remain in the trench during the summer, as this would obviously lessen the need for applied moisture to sustain them in their growing period. The removal of this manure to the whole depth of the trenches would expose the whole surface of the bed to the action of frost, air and sunshine, all tending in turn to assist maturity of crown, conditions so essential to economic forcing. Specially made beds reserved for the earliest supplies will, by the rotative course of forcing, submit more readily in course of time, and supply daily gatherings. Those readers who may not have adopted this course, and have

pressing demands made upon rhubarb supplies, may find it advantageous to prepare such beds as a possible provision for future requirements.

Chrysanthemum Novelties

THE varieties I send out from year to year always lead at the exhibitions. Note the wonderful flowers of Mrs. D. Syme, Howard Gould and W. Woodmason, of last year's set. For next year I will have Lady Carmichael, a beautiful white; Mrs. G. C. Kelly, pink; E. M. Byrnes, a lovely scarlet; F. T. Quittenton, a fine crimson, and others. :: :: :: :: ::

IN NEW CARNATIONS

I will send out White House and Princess Charming, two kinds you will need in your business. White House won the silver cup for the best new variety at Morristown, Nov. 2nd, and bronze medal at Carnation Society meeting at Pittsburg. My catalogue will be ready in December. Send for a copy. ::

CHAS. H. TOTTY,

Madison, N. J.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June 14 to 1911.

ALVIN, TEX.—The Alvin Japanese Nursery Co. are erecting a large frame building to be used as a warehouse and show room for their nursery stock.

NEW HAVEN, CONN.—Ernest F. Coe, president of the Elm City Nurseries, sails from San Francisco December 13 for Japan. The winter will be spent in travel and study of Japanese gardens.

American Association of Nurserymen.

The thirty-sixth annual convention of this association will be held June 14-16, 1911, in St. Louis, Mo. The headquarters of the convention will be The Southern hotel, a hostelry with a record which we have every reason to believe will demonstrate the wisdom of the choice made by the committee charged with the responsibility of making the selection. We are assured that this hotel was built especially for convention business, with every convenience for meetings and committees, with the largest lobby in the world, and 400 rooms for guests, each room having an outside exposure. If summer weather prevails at the time no better place could be found for comfort.

The secretary is already laying plans for a vigorous canvass for new members, and is hopeful that not less than one to two hundred will be obtained. The work done at the last meeting of the association in Denver, was such as should challenge the attention of every man claiming to be a nurseryman. The report of that meeting, containing papers and discussions, is worth several times the cost of membership, to say nothing of other valuable privileges secured by such membership. It is not too early to write the secretary for information regarding membership. His address is, John Hall, 204 Granite Bldg., Rochester, N. Y.

Cornus Officinalis.

The general appearance of Cornus officinalis is much like C. mascula. The last species is a native of South Europe and Asia Minor, and the first is a native of Japan. They both flower about the same time in early spring. Cornus mascula has flowers with shorter pedicels than Cornus officinalis, but the leaves of Cornus officinalis are much paler beneath and with prominent tufts of dark hairs in the axils of the veins. The oblong bright scarlet fruits are at present hanging without loss of color on Cornus officinalis and are highly ornamental and are not quite as large as the fruits of Cornus mascula. The fruits of Cornus mascula ripen much earlier and are highly colored in August, and usually fall in September, but occasionally an individual may hold its fruits until October. On account of the fruits of Cornus officinalis hanging so late in the season its decorative value is highly unbalanced. Any hardy shrub with decoration showing fruit in November and December is important.

JOHN DUNBAR.

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Send for description and price.

NEW YORK OFFICE: 258 Broadway, Room 721
T. MELLSTROM, Agent.

Tarrytown Horticultural Society.

The regular meeting of the above society was held in the society's rooms on November 25. The secretary read a report of the November show which was very satisfactory. The number of entries was considerably larger than in former years, and in spite of the inclement weather on the last day the attendance was quite up to the average. The following honorary members were elected: Mrs. Stuyvesant Fish, Garrison; Robt. Clowry, Tarrytown, and Frank A. Vanderlip, Scarborough, and Wm. Marver, Larchmont; Henry Wagner, Tarrytown; Wm. Brock, Tuxedo, and Jas. Corrigan, Mamaroneck, were elected as regular members, while several names were proposed to be voted on at the next meeting.

The prize for this month for the best six roses, any one variety other than American Beauty, was won by James Stuart, gardener to Mrs. F. A. Constable, Mamaroneck, with a splendid vase of Killarney. Wm. Roberts, gardener to Frederick Potter, Ossining, was awarded a first-class certificate for a scarlet seedling carnation.

Nominations for officers for the ensuing year were made, and committees appointed to arrange for the annual dinner and to make inquiries regarding a hall for the next fall exhibition. The election of officers will take place at the December meeting.

WILLIAM SCOTT, Cor. Sec'y.

Surplus Shrubs, Roses Dahlias and Other Stock

We have the finest lot of large-sized, strong, lusty shrubs you ever laid eyes on, which we will be glad to convert into ready cash at the following ridiculously low prices:

E. G. Hill Co.'s New Forcing Hybrid Tea

Rose Queen

Color—This new rose has the startling shade of pink found in *Rodocanachi*, or in a perfect *Testout*, with yellow standard at the base of the petal, which is a guarantee that the flower will never "blue" with age, and that it will not fade in bright sunlight.

Form—The bud is very long, slender, and pointed, and opening shows a heart glowing with color.

Stem—One of its strongest points is the freedom and quickness with which it makes long stems, which hold the fine buds quite upright, producing high-grade blooms earlier than any other rose on first year plants.

Petalage—It is fuller than *Killarney* and opens readily even in dark weather.

Its **Keeping Qualities** are remarkable; it has carried in fine condition to all the shows, and has stood up well after arrival.

The **Foliage** is decidedly handsome, while not too profuse.

It has a strong **Constitution**, is healthy and free from mildew and blackspot; does not drop its foliage as *Killarney* does, and never takes on the faded appearance that so often mars the beauty of the latter.

Management—The average grower will have no trouble in producing high grade blooms, for the variety has no ugly tricks of growth or faults of constitution; takes same temperature as *Killarney* or 'Maid. It **Propagates** readily.

Rose Queen won the prize at the Chicago Show, November, 1910, as the best undisseeded seedling.

Ready March 1.—50 cents each. \$35 per 100 (25 at 100 rate. \$300 per 1000 (250 at 1000 rate). \$5 per 100 additional for grafts ready during March.

New Carnation Bonfire

Exhibited as **Mrs. Beckwith**, but the lady's choice being a pink carnation, we are reserving her name for one of her favorite color.

Color intense velvety scarlet; a nice, clean grower, with beautiful blue grass, indicating a strong constitution; habit, excellent, free in growth and bloom, stem long and stiff, with a strong calyx; this is a first-rate commercial scarlet, a fine companion for **Beacon**, which is now practically our only red variety.

It is early, and opens its bloom quickly; an unusually good traveler and keeper. Each year of its trial has confirmed our estimate of its value.

Won **Silver cup** (Sweepstakes) at Chicago Show for best seedling of 1909.

First in Class of Red Seedlings at Chicago Show, 1910.

First at Indianapolis in 1910, for best 50 Red in open class; winning over eight entries of Standard and Novelty varieties.

\$12.00 per 100; \$100.00 per 1000.

Mrs. Aaron Ward

THE NEW YELLOW FORCING ROSE.

This rose is a real joy to the grower, and absolutely distinct; if it never bore a flower, the plant would still be an object of beauty with its close-set foliage, dark and glossy leaves, long, slender pointed, with maroon reverse.

The habit is admirable, very freely branched, making a perfect shrub in form, and rustling with health.

Every shoot produces a flower—

And the color! Coppery orange in the opening bud; golden orange when partly developed; pinkish fawn of lovely shade when fully open. when it looks like a full, fluffy silk rosette. No wonder that flower-buyers have fallen in love with it.

Any grower wishing novelty in his cut roses, any florist needing something beside pink and white and red, will be delighted with the lovely **Mrs. Ward**.

\$ 12.00 per 100 Own root.
100.00 per 1000 January delivery.
\$25 per 100 for strong grafts in March.

HENRY EICHHOLZ, Originator, Waynesboro, Pa.
Mention the American Florist when writing

Wichita, Kans.

The Thanksgiving trade was up to expectations, which means that it was enough better than last year to keep up with the record for the reasonable increase which this year is showing over last. The chrysanthemum held the center of the stage. There was also a good call for roses and carnations. The prices on carnations advanced about 25 per cent—owing to the higher wholesale prices. A good sale of potted chrysanthemums is reported by those who had them in supply. The weather was perfect—the nights not even freezing cold—and was a great help towards making the week's business satisfactory to the florists.

Ralph Culp and Miss Grace Whitlock were married on Thanksgiving day.
W. I. CHITA.

A Grand New Carnation

Bright Spot

Outclasses everything heretofore grown in the dark pink class. Won first honors in the 100 class for best dark pink at the A. C. S. meeting, Pittsburg, January, 1910, also at the Chicago Flower show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Gold Letters

Gummed Gold, Silver and Purple Letters, Gold and Purple Script Names for inscriptions on Floral Designs. Best and Cheapest on the Market. Send for Samples and Prices.

J. Lichtenberger, 1564 Ave. A, NEW YORK, Telephone Lenox 5644.

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

DARK WEATHER.

There is very little change in the market as far as stock is concerned, if anything the amount is decreasing. The dark weather still continues and the outlook for Christmas none too good unless we have some sunshine. Stevia, Paper-White narcissus, callas, and a few sweet peas are arriving daily, but not nearly enough to meet the demand. Carnations continue about the same, and of pink and white roses the supply is short. American Beauties are having a good call and the quality is exceptionally fine. Greens of all kinds are plentiful except ground pine, which is too high in price and retailers are waiting for a break before buying, box-wood is having a good call and the quality is of the best; immortelles and moss wreaths and Christmas supplies of all kinds help to keep the market strong.

NOTES.

At the meeting of the Florists' Club held on November 28, there were about eighteen members present. After the regular business was completed President C. Schmitt spoke about the starting of a new club of which several florists had talked in Cleveland and Mr. Renard followed as spokesman for the new club, but after much discussion nothing was accomplished. Mr. Friedly made a motion to suspend the rules so as to give all visitors a chance to join the club, with the result that

To Tell All the Good Points of Our Construction

**Greenhouse Construction, Benches, Frames,
Interior or Exterior Use.**

Inquire of your local dealer, or write us.

BAKER-WAKEFIELD CYPRESS CO., Ltd.
Manufacturers, PLATTENVILLE, LOUISIANA

Mr. Renard and about six others were admitted to membership. Mr. Friedly's idea is to rejuvenate the old club and not to start a new one and all present seemed to think that this was the best way. Every member has pledged himself to bring in at least one new member at the next meeting.

The Smith & Fetter's Co. had one of the best and largest casket covers of violets with an 18-inch border of lily of the valley that has ever been seen at this place on December 5, and a very large wreath arranged entirely of cattleya orchids, which was magnificent.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,**

and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

Less Work— Better, Earlier Crops

Sunlight Double Glass Sash reduces to a minimum the labor connected with hot-bed and cold-frame gardening.

You never have to cover Sunlight Double Glass Sash

All the hard work of handling and the expense of buying heavy boards and mats—all the time spent in covering and uncovering the beds are eliminated.

The double layer of glass does it
(See diagram above.)

Between the two layers is a $\frac{3}{4}$ inch layer of dry still air—a transparent blanket that is better than mats or boards because it never shuts out the light. The plants get all the light all the time. As a result, they will grow faster and become sturdier, will be ready for the market earlier and bring the big prices.

Glass is held in place without putty. Can't work loose, easily replaced.

Agents Wanted
Write us for details.

Get these two books

One is our free catalog giving all the details of the Sash and of our freight prepaid and guaranteed delivery proposition. The other is a book on hot-beds and cold-frames by Prof. Massey, an authority on the subject. This book is of vital interest to every professional grower and florist, etc. in stamps will bring Prof. Massey's book in addition to the catalog.

SUNLIGHT DOUBLE GLASS SASH COMPANY, INC.

Arthur Vandennes, Ft. Marion, Pa., writes: "I had lettuce under Sunlight Sash before most people were thinking about sowing it."

Toronto.

BUSINESS GOOD.

The weather conditions have been so very unfavorable for stock that in all lines and grades it has been found decidedly scarce. Business has been very good, and with the limited supply of stock it is at times very difficult to fill orders. The roses coming in, are generally of very fine quality, although not nearly plentiful enough to go around. Carnations are also scarce but of excellent quality. Chrysanthemums are about done for the season, although there are a number of the later varieties still coming in. They are as a rule not very satisfactory unless used up for quick sale. Mignonette, Roman hyacinths and Paper White narcissus are again to be had in quantities. The outlook for Christmas stock is very promising and with favorable weather there should be a very heavy cut in all lines. Christmas greens have been arriving in quantities. There is a great scarcity of bouquet greens for wreathing, and \$10.00 per case is being offered for it now. Holly is arriving in fine shape and some splendid mistletoe is seen.

The Connen Floral Co., of Hamilton, report business as very fine in their section, and they are looking up stock and extra help to handle the holiday rush.

Harry C. Martin, late of the Hennessey Co., has opened up a flower department at 2 King Street East.

Uncle Ananias.

His words were magic and his heart was true.
And everywhere he wandered he was blessed.
Out of all ancient men my childhood knew
I choose him and I mark him for the best.
Of all authoritative liars, too,
I crown him loveliest.

How fondly I remember the delight
That always glorified him in the spring;
The joyous courage and the benedict
Profusion of his faith in everything!
He was a good old man, and it was right
That he should have his fling.

And often, underneath the apple-trees,
When we surprised him in the summer time,
With what superb magnificence and ease
He sinned enough to make the day sublime!
And if he liked us there about his knees,
Truly it was no crime.

All summer long we loved him for the same
Perennial inspiration of his lies;
And when the russet wealth of autumn came,
There flew but fairer visions to our eyes—
Multiple, tropical, winged with a feathery
flame,
Like birds of paradise.

So to the sheltered end of many a year
He charmed the seasons out with pageantry,
Wearing upon his forehead, with no fear,
The laurel of approved iniquity.
And every child who knew him, far or near,
Did love him faithfully.

Edwin Arlington Robinson.

SUGGESTIONS FOR THE HOLIDAY TRADE.

Plant Baskets.

An important feature of the Christmas trade for the last decade has been the continual increase in the sale of potted plants, both blooming and decorative, and the many beautiful ways in which they have been made attractive to the customers by the florists. The use of baskets and hampers the last few years has greatly augmented the sale, and has added many fold to the attractiveness of these beautiful greenhouse products. Almost any form of basket is applicable to these arrangements, and the manufacturers and supply houses now have an immense assortment of shapes and sizes made of different materials, and in all the colors, from which to make a selection, and every retail florist should have a supply and make up various assortments for the Christmas trade.

The tendency for the present and of the past has been to fill the baskets as full as possible, and sometimes, in our opinion, far too many plants are arranged in the baskets, for it makes them a very expensive offering, and where fine specimens are used their graceful form and individuality is entirely lost. The customers, however, as a rule are partial to those arrangements which have the largest number and the greatest variety in them, and as they are the ones that pay the bills their wishes must be catered to and gratified. Nevertheless, it is well to arrange some more loosely and have some baskets with a handsome single plant in them, for there are sure to be all kinds to serve, and some buyers will prefer the simpler arrangements.

One thing that is necessary in making these baskets, especially those that contain a variety of plants, are nice small ferns. The pteris, adiantums, aspidiums, lastreas and polystichums are all fine for this kind of work, and the nephrolepis in small sizes, both the old Boston and the crested forms, are very useful and add a great deal to the baskets when finished. In the palms both Cocos Weddelliana and Phoenix Roebelenii in the smaller sizes are very fine plants to use in arranging baskets, their graceful leaves being very ef-

fective. The dracenas and pandanus are also much used, especially Dracena fragrans, D. terminalis, D. Massangeana, and the newer varieties are very effective with their red and variegated leaves. Pandanus Veitchii, as a center plant, adds a great deal to any arrangement. Crotons are much used for their brilliant reds and yellows. In the blooming plants nearly everything that the market supplies can be employed and azaleas, Begonia, Gloire de Lorraine, ericas, cyclamen, poinsettias, primulas, especially obconica, daphne, lily of the valley, Roman hyacinths, are all valuable plants for this purpose. In the fruit and berried plants Otaheite oranges, ardisias, aucubas, and Jerusalem cherries are splendid subjects for this work.

Great care should be taken in the arrangement of colors. There will, of course, be a great demand for the reds, and it is in these and in the shades of pink that the greatest oversight should be maintained. A good rule to follow is to never arrange two shades of pink or a pink and red in the same basket, but use white and white and green variegated plants where the bright colors are dominant, which will form a strong contrast. Simon Mardner azaleas, for instance, are beautiful plants for baskets, but of that peculiar shade of pink that does not blend or harmonize with other bright colors, and the same can be said of Gloire de Lorraine begonias, which should be very carefully placed in assortments. With these should be arranged plants of light variegated foliage and white or light blooming plants. In the use of the bright colored dracenas, care should be taken that they do not clash with the other colors used. There is ample opportunity in the making up of these baskets, for the designer to apply the best of his artistic ability. The same care should also be exercised in the selection and use of ribbons. In many cases this feature is much overdone, but there has been much improvement in regard to this in the last few years. There is no reason, and it is entirely out of place to make the plant or basket look like a doll in

a new silk gown, yet properly decorated the ribbons and bows are valuable additions to both. The proper selection and tying of these auxiliaries seems to be an inborn faculty, yet practice is a great factor, for we have always noticed the ladies who learn to make bows of ribbon in girlhood and later in life use these features so much for trimming and adorning their gowns, are usually much more proficient in making handsome knots than are the male portion of the human family. A handsome bow with short ends of the same color, or of one that harmonizes with the others, is generally all that is required, and if good taste is shown in the selection, and properly tied, it will prove a great and remunerative addition to this class of holiday stock.

The baskets which we illustrate, show what can be done along these lines with the different forms and shapes and the material at hand. The flat gathering basket filled with *Vancouveria hexandra*, the handsome green now being sold on the market as Mexican ivy, adorned with handsome branches of *ilex verticillata* (winter berries) is very simple and attractive. The basket containing the *Ardesia crenulata* is an example of the single specimens which are ornamented by the use of these receptacles to hold them. Poinsettias are much used in this class of work at this season, but they should be accompanied with some light white flowers and light airy greens. The *ericas*, lily of the valley and Roman hyacinths are splendid plants to arrange with these large Christmas plants and the light airy ferns add the necessary grace to the arrangements. The handle basket illustrated is a beautiful example of these plants. The antique brass box of poinsettias, *dracænas* and *nephrolepis* and the bark basket of *Gloire de Lorraine* begonias, *Primula obconica*, *crotons* and ferns are samples of more elaborate arrangements. The tall handle basket of poinsettias, *dracæna terminalis* and Boston ferns, while very simple, yet is a very rich Christmas gift.

Plant Salesman.

The salesman has a great opportunity to show his ability at Christmas time. It has often come to our mind that flowers, to a great extent, sell themselves, and the majority of the customers know what they want when they enter the store or see the floral beauties. But when it comes to handling plants, a different proposition confronts the salesman. We have seen men who could hardly wait upon customers in the flower line, yet when it came to showing off a plant, seemed to have reached their forte. They watched the customer to acquire the length of his pocketbook and also to discern what plant took his fancy. They immediately lifted the plant, always keeping the best side toward the buyer, and set it down in surroundings where it made the best showing by contrast and where it stood out by itself. A little knowledge of plant growing and the history and culture of each variety is a great asset at this time, and a few instructions as to the care and culture will greatly assist in making the sale.

PITTSBURG, PA.—The Allegheny Cemetery has been granted a building permit for the erection of a greenhouse to cost \$4,000.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Christmas Wreaths.

SEE SUPPLEMENT WITH THIS ISSUE.

There is always a call for handsome wreaths at the Christmas season, and with the wealth of material at the command of the florists at this time, very beautiful arrangements can be made of the various greens, as well as with the assortment of highly colored foliage that can be obtained. While the larger majority of sales will be of the cheaper grades, yet the progressive dealer will have samples of more elaborate and expensive arrangements for the inspection of the customer, which should occupy a prominent place in the store or office, where they will be sure to show to the best advantage and attract the attention

Box Trees in Miniature.

Eighteen Inches High.

of the buyers. These handsomer wreaths should be made of the best materials, the selected pieces of the holly, boxwood or other greens, and the arranging done in the most artistic manner. The common tendency is to adhere too closely to the form and to make the wreath too compact, but a loose light arrangement with a few sprays here and there extending beyond the mass looks much lighter and is more effective and handsome. Holly well-berried of course, one must have, Boxwood also makes a very beautiful wreath, and to the latter, in order to make more pronounced the Christmas festival, may be added some highly colored foliage, sprays of winter berries, *ilex verticillata*, or Christmas peppers. A handsome bow of holly red ribbon is also a very effective addition, and a loosely arranged bunch of velvety artificial poinsettias are sometimes used to great advantage.

Pine cones are very beautifully arranged in some of the wreaths with very telling effect. The wreath which we illustrate is a very handsome arrangement of boxwood with selected well-berried sprays of *ilex* and tied with a holly ribbon, making a very striking and beautiful piece of work for the Christmas season.

Box Trees in Miniature.

New and novel features are continually springing up in the arrangement of plants and greens for the holiday season and it is sometimes interesting to hear how they originate and what they are. The customer will often express an idea or drop a hint that may be used to great advantage and become quite remunerative. A few years ago we were in the back office arranging our Christmas greens and knowing there would be more or less call for balls made of box and bouquet green we were making them up to have them ready for the trade when they would be needed. To hold the ball of moss in place we had chosen an ash stick with the bark on and to hold it erect had placed it in a pot of sand. We were suddenly interrupted in our work by an exclamation from a customer who had appeared at the door,—one of those particular customers who will only talk to the proprietor and hearing our voice had advanced to the inner door. "What a pretty little box tree!" was the remark which interrupted our work. We tried to explain that we were not endeavoring to make trees grow in a few minutes but tree she would have it, and before she left had placed an order for four of the made-up trees for her Christmas dinner table. We immediately grasped the idea and made up samples which were placed in the office and had a good sale of these for the holiday season..

These small table ornaments which we illustrate are very easily and cheaply made. Take a good straight stick about one-half to three-quarters of an inch in diameter and 14 to 18 inches long, with the bark on it,—ash or chestnut makes the best, for they can be obtained of this length without having any large branches to remove,—and tie securely on the smaller end a bunch of wet moss. Cut the boxwood sprays into short lengths three or four inches with a sharp point and insert them into the ball of moss, making a globular tree similar in shape to the globe bay trees, but a miniature of this well-known decorative plant. To hold the tree erect, the best method, we have found, is to cut out of thin board, or heavy cardboard, two discs the size of the bottom and top of the pot. Make a hole in the center of the smaller one large enough to hold the pointed end of the stick, but not large enough for the stick to slip through, and a hole in the center of the other large enough to allow the stick to pass through it. These discs can then be pressed firmly into the pot and the stick with its boxwood can be inserted in the holes and firmly held erect. A nice bunch of green moss, if obtainable, on top of the upper disc will be a great addition and the pot should be enclosed in a pot cover if it is to be placed on the dining table. A handsome bow of ribbon of Christmas color can be tied on the bare stem for further decoration. This same idea can be carried out through the season, making the little balls of roses.

carnations and other flowers, and using fancy white china ware for the receptacles to hold them.

A Floral Rooster.

Among the many floral designs that were sent to the Cook County Court House, Chicago, on the occasion of the inauguration of the new county officers on December 5, the piece of work that attracted the most attention was a floral rooster made by Strail & Hahn, and was sent to the newly elected county treasurer by the Wm. L. O'Connell Booster club. Mr. O'Connell being the treasurer-elect. This design, which we illustrate, stood ten feet high when finished and was placed in the north corridor of the county building close to the treasurer's office and was admired by the thousands who visited the building that day.

The design was very handsomely made, every detail being as true to nature as was possible. The head was made of red immortelles with a comb of red ruscus, the bill being made of plaster of paris and the eyes were of brown glass about as large as a half dollar, and were very lifelike. The neck and hackles were of yellow chrysanthemums and the body of white chrysanthemums. The tail, which was shaped quite true to that of chanticler, was of red ruscus and grasses. The legs and spurs were wound with yellow cloth. The noble bird stood on a white birch log which was ten inches in diameter and this rested on a base that was four feet high and five feet square, made of ferns, yellow chrysanthemums, ruscus and stevia. Directly in front of his feet were two large showy bunches of red ruscus. It certainly was a very faithful reproduction of the proud barnyard fowl and it looked as it stood in the corridor that he was ready to proclaim his announcement to the multitude admiring him.

Evergreens.

Evergreens should be separated into various lengths; choose good bold sprays, as many an ugly wreath is the consequence of a bad selection. It is almost impossible to form a graceful wreath from small sprays—a fair length of stem should be chosen, that a firmness may be obtained, but thick and bare stems should be avoided, as they add greatly to the weight and make the garland or wreath stiff and unwieldy. Endeavor to place the leaves alternately and imitate as nearly as possible the way in which the leaves should fall naturally. By way of finish small sprigs of variegated shrubs, bunches of berries, etc., may be added. The berries should be placed at intervals and against the darker colored leaves for effect.

In making festoons for capitals of pillars a little taste should be exercised to make the wreaths assimilate as near as possible to the carving of foliage.

A. E. K.

Strung Holly.

Strung holly can be used most effectively and all non-usable berries can be put to good service. Thread a packing needle with the required length of twine and string the largest and finest holly berries upon it, taking care to pass the needle through the

exact center of the berry. These fallen holly berries can also be strung on wire and made into rings and slipped over the leaves and are most effective and pretty. Thick glue can be used where berries are to be massed in a cluster when they are difficult to fasten in any other manner. All kinds of holly are equally useful in floral decorations. The berries should be taken

The Little Things That Count.

Keep your temper during the holidays. Nothing is to be gained by letting it get away from you, and the man who is able to control it during the rush is sure to keep the wheels well oiled.

Formulate a system now, whereby you will know whether an order is de-

A DEMOCRATIC ROOSTER IN FLOWERS AT CHICAGO.

off each sprig in making wreaths and replaced where they are more likely to be most effective.

Ivy is useful for wreaths—also make a good relief—and the somber yew and arbor vitae; the Irish ivy is best; laurel is also good or the single leaves placed around a text border for a neat, effective edge; also good are boxwood, fir and laurel.

A. E. K.

livered as the customer wants and at the time and place promised.

Don't let a customer get away from you at this time of the year. They have come in with the intention of buying and it's up to you whether they make a purchase or not.

Mistakes are bound to happen. Watch them carefully and note the cause, so as to prevent their recurrence.

Always have attractive samples of all the stock, where they can be easily observed. Customers, at this season, have no time to wander over the place hunting for what they want.

Be sure and keep all the plants in the store and office well watered and in presentable condition; a wilted plant in poor shape is an unsalable article and a poor advertisement.

Wrap the plants up warm enough to be sure of reaching their destination safely. Old newspapers are cheap, and a few extra thicknesses are nothing compared to the cost of the plant and the disappointment of the customer.

Don't send out any old or pickled stock. Every dealer is sending plants and flowers to new people, at this season, and now is the time to attract a new customer by the quality of the stock and the manner of handling the business.

Under no circumstances allow the customers to get the idea that you are too busy to serve them. They demand courteous treatment at this season, as well as at any other.

Keep the greens where they will be fresh and clean; a few samples in the office hanging or placed where they will get dry are enough, and these before they get too dry should be replaced with fresher ones.

Funeral work is sure to come at this season. Don't let this ruffle you in your holiday rush. It is a part of the business, and remember people have no choice in their time of passing away. So do this work to the best of your ability.

Be sure and have all the pots washed and an assortment of pot covers and baskets for ornamentation. Many people object to bare pots.

Keep the offices and the houses clean. Customers, ladies especially, do not like to wade through a lot of dirt or litter that is thrown upon the floor during the work. Keep the office swept.

Plants of each kind blocked together save time, and prevent the walking back and forth, for a fussy customer to select the one she thinks is the best.

Watch the waste, the careless handling of both plants and flowers at this season will eat into the profits unless carefully looked after.

Houses for Carnations and Bedding Plants.

ED. AMERICAN FLORIST:

We desire to construct two greenhouses, one for carnations and one for general bedding plants, each house to be 300 feet long. Please answer through your columns what width is best and number of beds.

Washington. A. S. N. C.

The width for the houses would be governed to some extent by the amount of space desired. Ordinarily it should not be less than 28 feet, and not more than 42 feet, although there would be no particular objection to wider houses. Use four beds in 28-foot houses and proportionately more for wider ones.

L. R. T.

SYRACUSE, N. Y.—W. E. Day, who for the last five years has been manager for Quinlan & Co., will open a modern flower shop in the Onondaga hotel.

JOLIET, ILL.—Albert C. Rott had a beautiful Thanksgiving window display. A prominent feature was a handsomely arranged dining table of yellow chrysanthemums.

The First Quarter.

The end of November with Thanksgiving day marks the turn of the first quarter of the florists' year for the year to the florist practically ends in July instead of December and begins when the early frosts cut off the out-door flowers in the fall. While Thanksgiving day cannot be classed with the greater days, Christmas, Easter and Decoration Day, yet it is the end of the chrysanthemum season, which makes a turning point in the management of the houses. The cultural work in the benched crops, that is the roses, carnations and violets, should have now reached a stage where they do not require the constant labor that has been necessary during the fall. The beds should all be free from weeds, the plants tied up and enclosed within the wires, and the growers should now have an opportunity to give the other crops the necessary attention and to really give the stock an overhauling and clean up the houses. The Christmas plants will demand the first attention. These should be given more space, if, as usual, they are unnecessarily crowded together and should be cleaned, tied into shape, and put in salable condition. The chrysanthemum stock plants should be selected, dug and placed in their winter position and the beds or benches cleaned out for the next crop. It is a good

time now to look over the sales and note what varieties have sold well and what ones have not been readily taken by the buyers. And in selecting the stock plants be sure and have stock enough of the good sellers. It really doesn't make so much difference whether a variety appeals directly to the grower or not but remember that he is working for the return which the greenhouse will give and what the trade wants is what will bring the best returns. We well remember hearing one of the most successful growers of the country, when another grower had called a certain flower a cabbage, say: "Well, if the trade wants cabbages, that is what I will grow." So always keep in mind when planning for another year just what the trade demands. The chrysanthemum stock plants should never be left standing around under the benches, as is so often seen, but should be benched up closely together, care being taken to keep each variety by itself, and properly labeled. It is folly to think these plants can be thrown around and left to dry out and obtain good strong, healthy cuttings from stock that is treated in this manner. If in a part of the country where the winter is not too severe, the ideal place for this stock is in a cold frame that can be made tight enough to exclude all frost and the young plants obtained in the

CHRISTMAS BASKET BY THE FLEISCHMANN CO., CHICAGO.

Poinsettias, Dracena Terminalis and Nephrolepis Bostoniensis.

CHRISTMAS BOX BY THE FLEISCHMANN CO., CHICAGO.

Poinsettias, *Dracena Terminalis*, *Nephrolepis Whitmani* and *Bostoniensis*.

spring from stock that can be wintered in this way will be far better than that from plants which have been grown in a greenhouse. The chrysanthemum is naturally of a herbaceous character but the modern varieties will not stand any freezing temperature and the cold frame method comes the nearer to being ideal than any other. The crops that are to follow the chrysanthemums should rapidly be gotten into the beds or benches. The top soil should be first removed and new soil added. In our experience we have never been able to obtain first class results when a succeeding crop was planted in the same soil in which the chrysanthemums were grown, whether the chrysanthemum exhausts the soil, or leaves something behind, that is deterrent to further culture, we have not yet made up our mind, but it is far better if good results are desired to throw out the soil that the chrysanthemums have been growing in and replenish with fresh soil. If the benches are to be used for pot plants remove all the soil and spread an inch of sifted ashes upon the bottoms, which is far preferable to old soil left in the bench which, as soon as the pots are stood upon it, will begin to grow sour.

The propagating bench will now demand attention and how often at this time have we seen the bench filled with cuttings that have been rooted, for more than a month standing still, no, going back, the wood hardening, and to expect strong, healthy plants from such cuttings is foolish. They should be potted at once, if worthy, and if not, thrown away. Such stock will never make satisfactory plants and after the winter's care will prove to be worthless for the spring's sales. Pot up all that are of use and clean out the old sand, whitewash the bottoms

and supports and fill with good fresh sand and immediately start the propagation of the next season's stock. A great many growers think it unnecessary to empty and refill the propagating bench every time a new batch of cuttings is put in, but after sand has been in the bench for four weeks and kept saturated with water, some of the cuttings having decayed in the meantime, a condition for the rapid production of fungus now exists and to immediately place therein another lot of soft-wooded cuttings is tempting fate and, some would say, suicidal. The prominent growers have made thorough tests of both ways and they all are now replacing the sand every time that the cuttings are taken out. The propagating bench should never be idle from now until spring. It is the best time of the year to take the carnation cuttings, better tips are obtainable and they root more readily now than at any other time. The rose cuttings can now be started so that by January the larger part of this propagation will be done or on the way and all the slower growing plants and those of which large quantities are wanted should be propagated as rapidly as possible.

The Easter lilies, if they are buried outside, should now be brought into the houses and placed in the cooler end, where the root action will be accelerated, for good roots are an absolute necessity with all bulb stock, and here they can remain until after the holiday sales have made room in the warmer houses when they should be brought into more heat in order to have them in the best condition for the Easter sales. The Easter azaleas should now be looked over if they are in one of the houses, to see that they are not advancing too rapidly. Of course, if they are in a cold pit they will be all right

until the end of the year. Hydrangeas or any other stock that have been under the benches should now be placed upon the tables and be given the benefit of the ventilation and necessary care. It is yet too early to bring up the Dutch bulbs except *Ducvon Thol* tulips or very early hyacinths but paper white narcissus, Roman hyacinths and French trumpets are easily forced and can be brought forward now very easily and plans to have a regular cut should be formulated.

Effective Plant Arrangements.

The flower shows have come and gone, the excitement is all over, but before we settle down to preparations for the coming holiday trade, perhaps just a look backward may be desirable.

The trade press and the daily newspapers have descanted upon all the beauties of all the shows, and upon some beauties which upon examination did not seem so beautiful after all; so, possibly, a few good natured raps at some things which were bad, or at least no where near so good as they should have been, will be in order. One can say frankly, and with a clear conscience, that the grouping of chrysanthemum plants for effect has greatly improved and now leaves little to be criticised, but oh, you groups of decorative and foliage plants arranged for effect! They are mostly just as bad as can be, just as bad as they always have been, and bad just in the same way they always have been. One wonders why the trade papers make new cuts of them every year. They could just as well take the cut of Smith's exhibit of last year, or Brown's of 1892 and put Robinson's name on it and who could deny that it was an ac-

curate representation of this year's prize winning arrangement. They all look alike. They are without form and void. If in the center of the hall they are a cross between an inverted ice cream cone with the point bitten off, and an Esquimaux igloo. If at the side of the hall they are the same thing, split in two.

Occasionally there are bright and shining exceptions, things which are looked back longingly to, for years, but they are few. The general plan is to jam just as many plants, of just as many different forms and colors into as compact and symmetrical a mass as possible. If any plant by chance gets so placed that it can be seen as a whole, it is at once shoved back into the mass and two or three more jammed in against it. The man who is bossing this butchery stands back, and if he can see a hole as big as one's fist in the dense mass of crowded foliage, it's "Bill, bring me another of them small palms," and in it goes. When he has succeeded to the best of his ability in making it as smooth and characterless and uninteresting—after he has spoiled the individual beauty of each individual plant—on goes the card, and the judges come around and give it the blue ribbon, simply because the other groups are arranged just as badly and the one in question has a few more or better plants. Arranged for effect, to be sure, but what kind of an effect?

Take the most beautiful of decorative subjects, *Cibotium*. Anyone should surely see that it must stand up and out from the group where one can get the light through it, and all the filmy grace of its delicate fronds be revealed; and yet, how often we see it squatted down over and among a lot of miscellaneous plants, like an old dominic hen trying to brood too many chickens—"and half of 'em ducks, too, bedad."

The arrangement of orchid plants is usually very good or very bad, although some of the good ones are a little tree-trunky—the artificialness is too apparent. How often, however, do we see them jumbled into a mixed-up crowded mass! Now if there is one plant in this world that will not bear crowding or massing it is the orchid. It is the one plant the public wants to see, and to see closely. If one has not the time or the ability to develop a tropical jungle to hang them in, well and good; put them on a bench, but spread them out—separate them and cover the space between with moss or ferns or any other unobtrusive material.

All this brings us down to the meat in the coconut. Why can not we growers understand that the arrangement of plants is not our trade—unless we have studied it long and faithfully? We have mastered that difficult art, the growing of beautiful plants and the production of beautiful flowers, by a lifetime of study. Why can we not learn that the other art, the effective and beautiful arrangement of plants and flowers, is an equally difficult one and only to be mastered by long years of study? Why can we not frankly own up, and call in the man who knows, to help us and advise us as to what the arrangement shall be?

When we can do this, when the arrangement is as perfect in its way as the plants are in theirs, then will the cry of monotony in the shows cease,

then will there be more dollars going into the box office, and then, also, more dollars going into our own private strong boxes.

W. N. RUDD.

Neglected Spring Bedding Plants.

Spring is the season of the best beloved, if not of the fairest flowers; after winter's long, almost colorless reign, it is a joy indeed to see flaming tulips and crocuses, rainbow-tinted hyacinths, and golden daffodils decking the garden. No wonder that the vivid bulbous flowers are chiefly popular, yet it is a pity that better use is not made of the countless lovely spring-blossomed perennials for bedding.

Experiments were made last autumn with various herbaceous plants as bedding subjects, with wonderful success; they were put out in October where required to bloom in March, April, and May, and, after giving their harvest during those months, were removed to give place to the more fragile beauties of summer. Critics prophesied that good flowering could not be expected from October moved plants, also that the roots would suffer by being lifted

to receive them at once. *Geum Hel-dreichi* is a glorious subject, beginning in April in sunny gardens. A bed of this, planted alternately with *narcissus poeticus*, and widely edged round by *Myosotis alpestris* *Victoria*, will give a copper-orange, white, and blue mass that will be regretfully remembered during summer. Another orange-scarlet *avens* that will blossom early is *Geum chilense* *miniatum*.

A bed of the bleeding heart flower is beautiful indeed; the clumps can be removed to a semi-shady bit of reserve ground afterwards, and bedded out once more next winter. If desired, the small reddish-crimson *Dicentra eximia* can be used as a border to *Dicentra spectabilis*, or double *arabis* combines well with the latter. For a perfectly harmonious edging plant nothing can rival *Aubrietia Leitchlini*. Double red daisies tone well with the pinks if preferred. A good display of *auriculas* is always admired, especially in a front garden, and experience shows that they can be lifted without injury. For a tall centre mass the common purple *honesty* is suitable, while the latter should be tried in a

CHRISTMAS BASKET BY E. WIENHOEBER CO., CHICAGO.

Mexican Ivy and Winterberries.

in May; both predictions proved wrong. The perennials were rather more than a year old when used, and in the rich deep soil given them they produced sheaves of blossom. This autumn they are fine clumps, and no doubt will excel their former triumphs next spring.

There is a secret about removing plants of this size and kind, according to a writer in *The Gardeners' Magazine*. It is to water them the day before, and give afterwards a further soaking with weak liquid manure or soot water. If the spade cuts them out next morning, with a square of solid soil all round the roots, there will not be the slightest flagging. Needless to say, the holes must be dug ready

semi-shady bed by itself all but for a belt of *Alyssum saxatile*.

Uncommon but charming are the fumitories, *Corydalis alba*, and *Corydalis lutea*. No gardener would regret giving these a trial, perhaps around a centre mass of fine columbines. The white and yellow will tone with all the aquilegia colors, and, although the plants will begin in April, they will be still fair in June. If the columbines are replaced by *heliotrope* the *corydalis* will continue as a floral edging until September. The old-fashioned double yellow rocket, *Barbarea vulgaris* *plena*, commences also in April, and the fragrant rich gold blooms arouse much interest, so completely has the plant

CHRISTMAS BASKET BY S. MUIR, CHICAGO.

Croton, Begonia Gloire de Lorraine, Primula Obconica, Whitmani and Other Ferns.

died out of popularity. It has an exquisite effect if given a surrounding belt of the pasque flower. *Anemone pulsatilla*, another April bloomer. *Aubrietia deltoidea Columnæ* is an attractive lilac-mauve edging subject for this bed, or, if the pasque flower is not used, all the surrounding might well be of *Alyssum saxatile citrinum*, the lemon of which shows up the rich gold of the rocket. Then there is bugle, one of the familiar woodland spring flowers. *Ajuga osmafera* has evergreen foliage, a spreading habit, and such a hardy nature that it can do with light or heavy soil, sunshine or shadow, but in shade it grows tall. Many gardeners are confused between this plant and *Ajuga reptans*, but the latter creeps over the soil and does not begin until May to give the blue blossoms, which unlike those of the other, are flushed with rose. The variegated form is of considerable value also, but it reaches a foot high instead of the six inches of the green-leaved type. The mass of deep blue that bugles offer is of real value in the spring lawn beds.

Alyssum Benthami is little known. The blossom is white, and has a much softer effect than that of the arabis, the height varying from nine to twelve inches. *Achillea millefolium Cerise Queen*, cherry-red, and often two feet high, is one of the perennials that may be used as a spring bedder, then removed to a sunny border to continue

in bloom all the summer and autumn. *Nepeta italica* is a tall purple flower that attracts notice because it supplies a needed note of color in the April garden. Dwarf yellow wallflowers could accompany this, and the edge might be of *Lamium maculatum*, also purple, whose white-striped dwarf foliage has a neat appearance.

Dahlia Storage.

For 20 years I have grown the dahlia, and if everyone has had as much trouble and tried as many different receipts for keeping them through the winter as I, they have my sympathy. From my first beginning until three years ago, it was always, every spring, a race between the ash barrel and the garden, which would have the best collection. I tried packing in garden soil, sawdust, ashes ground cork—in fact, according to a correspondent of the *Dahlia News*, most anything that anyone would tell me. I was perfectly willing to swallow any and all prescriptions, thinking that perhaps I would be able to find one that would enable me to keep a few of the good ones. Did you ever notice how you lose the good ones, and those we are not fussy about come through their rest quite refreshed?

Three years ago I began on Calvin Titus' rule for keeping, and that it was a complete success is putting it

mildly. Last season, in fact, ever since I have tried it, I have lost less than two per cent, which I call very good. There is a furnace in the cellar, and I pile the roots from three to four feet high, within three feet of it, making two piles of my seventeen hundred roots; cover them over with newspapers, a dozen or so thick, tuck them well in all around the bottom, keeping out all the air possible; would say that I have a dirt bottom in my cellar, so could not say how it would work on cement. If I think that towards spring they are drying any, I sprinkle the papers with a fine sprayer. They will absorb the moisture and come out plump and generally well started. Now, perhaps in some other cellar this would not work as well, but it has been elegant for me. Many winters, before trying this, I have lost as high as fifty per cent of my roots. Anyone who is successfully keeping the roots now, will not wish to try anything new, but if you are having trouble just try this for one season and I think you will exclaim, as I have many times, "Hurrah for Cal. Titus of Marblehead!"

NAPERVILLE, ILL.—Philip Strubler, one of the oldest settlers, a notable gardener, and sheriff of Du Page county during the county seat trouble, died at his home in this city December 10 at the age of 78 years.

THE CARNATION.

W. N. RUDD's new crimson seedling carnation, exhibited as No. 2807A at the Chicago show November 11, and awarded the sweepstakes prize at that exhibition, has been named Mrs. A. E. McCrea.

Propagation and Culture.

The march of the seasons once more brings about the time for the propagation of carnations for another season, for where there is a large number of plants required, it becomes necessary to begin propagating early in the season. The latter part of November is a good time to begin this operation, for prior to that period it is hard to get cuttings that are large enough for the purpose, and unless it may be in the case of some new variety, one does not care to take pips at this season for that means the loss of blooming growths. A thorough cleaning will have been given to the propagating benches before filling them with sand fresh from the pit, and a good coat of whitewash on the framework of the benches will help to prevent fungus. Fresh sand should be used for each batch of cuttings, thus avoiding in a great measure the danger of damping off in the cutting bed, for after the sand has been kept constantly wet for three weeks there is always some risk in using it over again, and the cost and labor of refilling is fully repaid in the better results gained by this practice. Everyone has not the same facilities for propagating but where the choice may be made, the north propagating house is decidedly the best, from the fact that a more even temperature and atmosphere may be maintained in such a house than in an even span house, or on a south bench, and in the north house there is no need of shading until toward spring.

Given an even temperature of 50 to 55 degrees, and sufficient water to prevent wilting at any time, and the percentage of loss ought to be very small among the carnation cuttings at this season. This is taking for granted that the cuttings have been made from soft young shoots broken off the blooming wood, and so well protected from the sun and wind that they are perfectly fresh when put in the sand. When the roots are about half an inch long the cuttings are ready for potting, and from the fact that carnation roots are fine it is generally understood that they should be potted firmly, it being an old-fashioned rule, but still a good one, that a plant with fine hair-like roots grows best when potted hard, while a coarse rooted species will make better progress in a more open compost. If the weather is bright at the time the cuttings are potted off, they should be protected from the sun for a few days, until the roots have a chance to take hold of the soil, but shading should only be continued for this short period, after which the young plants need all the light they can get. Some growers avoid the labor of potting by picking out the rooted cuttings into shallow benches of soil at once, letting the young stock remain in this soil until the time of planting in the spring, but others hold to the opinion that the

potted plant retains its ball of roots better at the future planting than does the plant that has been dibbled out in a bench. But as the consistency of the soil has much to do with this question it is a wise plan to try both methods, and then to note results.

There is always something to be done among the flowering stock at this time of year, and after the daily cut is finished, there is weeding, cultivating, training or tucking-in, disbudding, and other matters to be attended to, so that the average grower does not find time hanging on his hands very heavily. Ventilation requires more attention from the fact that the weather changes so rapidly, and during the short days a house cools off very rapidly if the sun be obscured for but a very short time. A temperature of 65 degrees on a bright day gives a good atmosphere to open flowers and keeps the plants in a good growing condi-

parts of benches will dry out quite rapidly, and this necessitates frequent examinations of the soil, in order to water intelligently, for it is worse than useless to water a wet bench, but a dry one should be watered thoroughly.

W. H. TAPLIN.

Carnation in the South.

Attention should now be paid to maintaining a steady night temperature in the houses. A temperature that can be maintained in the coldest weather with fire heat and during the warmer spells with plenty of air in the houses is the proper one to maintain. This will vary according to locality from 50° to 60°. Those plants which have had the higher temperature have been giving fair flowers but the ones that so far have had no fire heat are making a great showing of buds that will just be right for the

CHRISTMAS BASKET BY E. WIENHOEBER CO., CHICAGO.

Poinsettias, Erica Melanthera, Dracena Terminalis and Adiantum Farleyense.

tion, but such a temperature on a dark day would tend to making both flowers and growth too soft, a condition that sooner or later would create trouble with both plants and customers.

As has been frequently remarked before, there are great differences in soils, and consequently more feeding is needed in some places than in others, but provided the compost has been properly prepared, there is seldom any real need for liquid manure or special fertilizers until after January 1st, for excessive feeding is very likely to result in sleepy flowers. With the increased fire heat that is required on these frosty nights, some benches or

holidays. As even a temperature from now on as can be maintained will lessen the damage from split calyces. As the plants keep growing keep adding wires so that they can be tied up in good shape before getting sprawly. It is always well to keep a little ahead in this respect. At least once every week the plants should be gone over and put into their proper spaces. Disbudding must also be practiced regularly. This should be done as soon as the buds are big enough to handle and not when the flower is about ready to open. All short and deformed shoots should also be removed and let new growths come on. When watering

CHRISTMAS BASKET BY S. MUIR, CHICAGO.

Crotons, Primula Obconica Jerusalem Cherry and Nephrolepis Whitmani.

give a good soaking and then wait until the beds have dried out well before giving any more. A weekly syringing for red spider may still be necessary. This is best done with a nozzle throwing a fine spray. Quality of spray rather than quantity is what counts in this operation. In watering the beds it is not injurious to wet the foliage on clear days. The pressure used in watering is never strong enough to wash the "bloom" from the foliage. Only be sure the plants are dry before night. Outside of stem rot fungus disease of any kind is rare. It is nearly always possible to ventilate freely day and night so that these diseases cannot gain a footing. I would not advise the use of liquid manure unless very rarely until after the turn of the year, when the short days are over. Better to keep the roots working for a living until then.

WM. LEAR.

Dahlia for Mail Trade.

ED. AMERICAN FLORIST:

When is the proper time and what is the best way to separate dahlias for the mail trade? I. H.

Dividing field roots of dahlias, care should be taken that each division has at least one eye, otherwise the roots will not grow. The eyes are not on the tubers but on the crowns which the tubers are attached to. It is best to start the eyes by placing the roots in a warm, moist place a short time before dividing. If the tubers are too large and heavy a portion of it can be cut away. W. S.

WITH THE GROWERS

Peter Reinberg, Chicago.

It has often been remarked by people of European birth visiting this country, that Americans take pleasure in pointing out and extolling the immensity of the different objects which they show to their guests, and, certain it is, we all like to see the biggest, and look with great interest upon every thing that is renowned as being the largest of its kind. We journey to Niagara Falls to see the largest cataract in the country, the Mammoth cave and the Grand Canyon of Arizona and are enraptured with their vastness. So it was with a great deal of pleasure that we visited the greenhouses of Peter Reinberg, on the northern side of Chicago, which is probably the largest greenhouse establishment in this country, or, at least, the largest establishment on one piece of ground devoted entirely to the culture of roses. Here we find 112 greenhouses, arranged in blocks, ranging from 250 to 265 feet in length all devoted to the culture of roses for commercial purposes, and as we pass through house after house of splendid roses of the different varieties we cannot help having the same feeling that has come over us, when viewing other objects of immense size. There were 34 houses, 265 feet long, planted to American Beauty roses; 19 houses, 250 feet long, to Killarneys; 15 houses, 255 feet long, to White Killarney; 14 houses, 255 feet long, to Richmond, 19 houses containing Brides,

Sunrise, Perle des Jardin, Mrs. Marshall Field, My Maryland, Uncle John and Ivory and seven houses of asparagus.

The American Beauties, of which there are more grown than any other variety, are in superb condition. Long, strong stems, reaching nearly to the glass in these tall houses, with handsome luxuriant foliage, bearing flowers of extra large size, and of as brilliant color as it is often our privilege to see. A look at the cut, in the storage room, showed us that the quality is of the best, and the growth and thriftiness are certainly a sight worth going a long distance to view. The crop is in elegant condition for the holiday season, and a splendid cut for the next few days is assured.

The Richmond roses which, of course, are bound to be in demand at this season, being the Christmas rose, next attracted our attention, and here we found them in splendid shape, with a great crop coming in. The plants are in fine healthy condition, with large beautifully pointed buds of the darkest crimson, borne on long stiff stems, with especially fine foliage. The illustrations do not do these houses justice, owing to the failure of photography to distinctly portray the flowers of the colors of American Beauty or Richmond, but we can assure the reader that it was an exceedingly beautiful picture, to see these houses so full of fine blooms and buds.

Killarney was in splendid condition also, and the block of houses devoted to this popular variety were certainly a grand sight, and the White Killarneys, as seen in the illustration, were a perfect picture with their pro-

fusion of bloom. The Sunrise and Perle des Jardin were in the prime of health, as in fact were all the varieties grown. Mrs. Marshall Field here, in its own home, was in as fine condition as we have ever seen it growing.

The carnations which are grown by this grower in great quantities are in the new range of 19 houses located some four or five miles away from this

feet, planned by the Lord & Burnham Co. of New York, which include everything that modern engineering science has contributed to greenhouse building. One of these houses is planted to carnations, and all the principal commercial varieties are seen in the 16,000 plants growing in splendid condition which this house contains. The house of chrysanthemums was a beautiful

water is obtained from a driven well which furnishes an inexhaustible supply. A gasoline engine pumps the water into a 10,000-gallon tank, where, with the air which is pumped in at the same time, a pressure of seventy-five pounds is maintained, which gives the necessary force for syringing and other watering. Another house of the same size is projected and will be erected next year which it is intended to devote to roses.

Cut Flower Folding Boxes.

The folding cut flower, design and shipping boxes have become very popular with the florists and a necessary auxiliary to their business, and there has lately come to our notice a very superior grade manufactured by the Climax Manufacturing Co., of Castorland, N. Y. The boxes are made of very heavy stock which is a wood pulp board, and no chip or waste stock is used in its manufacture, and by working in close connection with their mills this company is able to secure at all times a very uniform and satisfactory quality of board. The "Favorite" cut flower design and pillow boxes are all full telescope and are made of heavy manilla board in all the popular sizes on die cutting presses, the style of which does not allow the corners to unhook or the hooks to interfere with one another in putting on the lids. This firm is also manufacturing a very fine grade of white patent coated board in the cut flowers and violet sizes and also a deep rich shade of green board in the cut flower sizes which are of an equally fine grade of stock and very attractive. The covers in these materials being of the lid formation, 2½ inches deep. This company is fully equipped for the printing of the dealers' names, which is gratuitously done on good sized orders, and for a nominal fee in small quantities. A large assortment of sizes is always in stock and prompt shipment is the aim of this concern.

JAMESTOWN, N. D.—A. L. Woodbury has sold his interest in the Wheeler Floral Co. to E. A. Williams and the latter has assumed his new duties with Mr. Wheeler. Another new greenhouse is in course of construction.

AMERICAN BEAUTY ROSES AT PETER REINBERG'S CHICAGO.

large plant but the propagation is done here and the thousands of cuttings are now being placed in the sand, an example of the patient and care-taking work which is so admirably performed by Foreman Collins and his efficient force. Everything that we saw was in splendid condition and betokened the painstaking effort that had been expended and the splendid culture which everything had received.

The immense cut from the houses is shipped daily to the store at 35 Randolph street where it is taken in charge by T. Matchen and his able corps of assistants and again carefully packed and shipped to their many customers over the country whose continued trade is a testimonial of the quality of stock and the manner in which it is handled.

In leaving this great plant we could but turn around, and, seeing the smoke pouring out of the many chimneys, the thought came to our mind, that we really had been inspecting what has so often been aptly termed a "rose factory."

Mark Aitken, Springfield, Mass.

One of the largest and most up-to-date greenhouse establishments in Western Massachusetts is the newly erected plant of Mark Aitken of Springfield, Mass. Eighteen years ago, with his father, Mr. Aitken came to Springfield and started in the florist business, having purchased the old Hersch greenhouse on Osgood street, and by diligent work and the handling of a high grade of flowers his popularity with his trade has steadily increased, until he has far outgrown his quarters. About a year ago he purchased a farm in Agawam of twenty-two acres which he has devoted entirely to the florist business, and this year he has erected thereon four new greenhouses, each 30 by 300

sight, the majority of which are grown to a single flower and promise some extra grade blooms. A large quantity of lilies and Dutch bulbs are grown to be forced in this house when the chrysanthemums are cut. The violet house is in fine shape, with its 10,000 double and 2,000 single violet plants all beginning to produce their beautiful flowers. The fourth house is devoted to palms, ferns and other decorative stock and is filled with very fine plants, both of saleable sizes and for decorative work. A nice lot of azaleas for the holiday and winter sales were looking exceptionally fine.

Two large steam boilers have been installed to furnish the heat necessary for such a range of glass, and the

WHITE KILLARNEY ROSES AT PETER REINBERG'S CHICAGO.

St. Louis.**GOOD PROSPECT FOR PLANTSMEN.**

The weather has turned warmer with bright sunshine and should these conditions remain with us another week a fair supply of stock can be expected. Violets, owing to the bright days, have already increased in supply. The retailers are in many instances encouraging their customers to purchase

nual event that attracts much attention. In addition to the banquet hall decorations of palms, ferns and foliage plants, there was a magnificent table decoration of American Beauty and tea roses and other flowers.

A notable feature of the market at present is the splendid stock of American Beauty roses that are being handled by A. Gude & Bro. In addition, these people have about everything else

At his new store on P street, John Robertson reports constantly increasing business.

Alex. B. Garden is sending in the finest Killarney roses seen in the market.

A. F. F.

Los Angeles, Calif.**FLORISTS' CLUB MEETING.**

There was a very good attendance at the first meeting of the season of the Florists' Club held November 28 at 107 North Main street. Promptly at eight o'clock Dr. Howton called the meeting to order. J. Dietrich gave particulars of several halls suitable for the meetings of the club but for the present it was agreed to remain in the same quarters. J. Reeves spoke of the necessity of members keeping in good standing, and while not decrying the social side of the club, he insisted that the real aims of the society should be educational and for the benefit of the trade generally. A discussion took place respecting the order given by the park department for bulbs; there was considerable criticism on the action of the board in sending east for bids and not inviting any from local seedsmen. No action, however, was taken as it was the feeling of the club generally that an oversight on the part of a minor employee was the cause of the local trade being neglected. Theodore Payne, C. Winsel, J. Reeves and Herbert Goudge all spoke in favor of holding exhibitions in connection with the club and also of admitting amateur growers to membership, thus broadening the scope and usefulness of the society.

Sundry other business matters being disposed of, Doctor Howton gave a most interesting talk on the botanical features of interest noted in his recent Mexican trip. The doctor was particularly impressed with the beautiful appearance of the antigonon hanging from the trees which he described as most lovely. Several of the aroids noted were also remarkable, as were the many tropical fruits encountered. Plumerias 30 feet high and fine Cocos oleracea were also noted by him as being very striking, while his adventures in search of botanical curiosities and his encounters with various animals and the natives were given in his own inimitable style and caused great amusement. Hearty applause greeted him at the close of his excel-

HOUSE OF RICHMOND ROSES AT PETER REINBERG'S CHICAGO.

plants rather than high-priced cut flowers.

NOTES.

The Florists' Club met December 8, 25 members being present. John Houlshan, Jules Bourdet and John Held made application for membership and Otto Sander was elected. R. H. Smith and — Grossart made application for the Shaw Garden scholarships, which are at the club's disposal.

Otto Sander opened his Olive street store December 10 with one of the most artistic window displays ever seen in the downtown district.

The regular meeting of the retailers' association was held December 12. The credit system, and its drawbacks, was discussed.

The Foster Floral Co. is now the Paris Floral Co., at Fifth and Olive streets.

A. McPherson, Litchfield, Ill., will have two houses of late white chrysanthemums for the holidays.

Hugo Gross is now bringing in some very fancy violets. W. F.

that will be needed for Christmas. Their gardenias are superb and their great variety of all other stocks put them in the front rank among the florists of this country.

Z. D. Blackistone on December 10 executed a large amount of work for the funeral of Mrs. Dr. Owsley, late of Greenfield, Va. There was a casket cover of orchids, lily of the valley and violets. In addition there were many other fine designs in which over 100 American Beauty roses and other flowers were used.

J. R. Freeman, who has not been in the best of health of late, is now, we are glad to state, much improved, and makes frequent visits to his store.

Geo. H. Cooke has been very busy of late. He made a flying trip to Philadelphia on December 10 and secured a lot of fine plants for Christmas.

Washington.**SHORT SUPPLY.**

It is ten years since the "oldest inhabitant" has seen so much snow and cold weather at this season. There has been several heavy falls of snow with stiff freezing at nights. As a consequence there is a decided shortage in the visible supply of stock. Some stock in the way of cut flowers is arriving from Philadelphia, but much of it shows evidence of being shop-worn. The price of carnations has taken a jump to from 5 to 8 cents, wholesale, and at that many of them are very poor. Any grower who can ship fresh carnations to this city will get good value. There is talk of a shortage for Christmas, but that is what they always say.

NOTES.

J. H. Small & Sons had the decoration for the dinner of the Gridiron Club at the New Willard Hotel on the night of December 10. This is an an-

KILLARNEY ROSES AT PETER REINBERG'S CHICAGO

lent extempore lecture and a most enjoyable evening was spent by all.

NOTES.

Charles Brazee of Wilmington had the misfortune to injure himself while handling a case of bulbs recently, but the injury fortunately proved slight and Mr. Brazee is now about his work again.

The first azaleas appeared in the retail stores December 1, M. Goldenson showing some fine Simon Mardner from the El Reah Nurseries, Hollywood. H. R. R.

Pittsburg.

The demand for all flowers far exceeds the supply at present, in fact, there is not much change from last week, excepting possibly American Beauties, and for these it seems as though they are held for so much money that the people let them alone. Prospects for a supply of cut stock for Christmas is not very encouraging, as we have had only two days of sunshine for over a month. There is a very fine line of blooming plants being offered, cyclamen and begonias being exceptionally fine. Dried Christmas supplies are moving nicely, all the retailers starting to make them up.

NOTES.

The Zieger Co. is very busy at both stores making up Christmas stock.

James Pogue, who formerly had a florist store in Washington, and recently settled in Oklahoma, has returned to this city.

It is reported that wedding bells will be ringing shortly after Christmas at the McRae-Jenkinson Co. Mike Steiner is the only unmarried man there, so "nuf-ced."

Geo. Wehrheim is exceedingly busy and states that he expects this Christmas to be the best he has ever had, and is buying accordingly.

Mrs. E. A. Williams has had a very heavy run of work lately and you could see the lights burning very late, almost every night.

Basie McQuiddy, formerly with the South View Floral Co., is now at the Baum street store of Randolph & McClements.

Wm. Loew has returned from the Maine woods, and is busy in the same old way at his Liberty street store.

The Superior Decorating Co. is the title of a new firm, which announces they are ready for business.

I. E. Butler, New Kensington, has sold his greenhouses to the McRae-Jenkinson Co.

Lilies were much in evidence and demand at the Pittsburg Cut Flower Co.

The McCallum Co. is handling a quantity of stevia.

Sam McClements has been laid up with the gripe.

W. H. Carney spent several days in the east.

J.

Montreal.

Prospects for a good Christmas trade are very bright, there is a continual demand for plants which has already taken much of the stock intended for the holidays. The local growers in former years have been well able to fill the demand for Christmas plants but, if the present call for this stock continues, we shall have to look to outside growers for our supply, which will be a serious problem if the weather conditions are unfavorable. Most of our cut blooms have been received from the west the year around, but within the last year or two some have come from Boston. This entirely reverses the conditions, for not many years ago Canadian growers exported largely to the United States but now regular orders or shipments are received from the United States by nearly all the leading retail stores in

Canada. Christmas prices went into force with the wholesalers the beginning of the month, which leaves the retailer with no profit, for he can not charge higher prices until Christmas week. Roses and carnations are scarce and not very good. Chrysanthemums are about over, a few stragglers are to be seen but the people are tired of them. Violets are very scarce and high.

The Montreal Gardeners' and Florists' Club held its annual meeting December 5. The report of the secretary-treasurer was very satisfactory, the membership is increasing, now numbering 67 with an average attendance of 26 at the meetings, and the financial report showed a balance on hand of \$198.74. The following officers were elected: Jas. A. West, president; R. W. Whiting, 1st vice-president; H. J. Eddy, 2nd vice-president; W. H. Horobin, secretary and treasurer; A. C. Wilshire, R. Turner, E. Hayward, J.

The Late Jos. F. Klimmer.

Walsh, W. J. Watts, T. Gillespie, committee; D. Russel, J. Pidduck, A. Wilshire, Chas. Byford, games committee.

Adam Shand of St. Johns, N. B., is the latest wholesale grower shipping to the Montreal market.

Mepstead of Ottawa was a visitor last week, creating quite a speculation as to the object, baseball being over and the ice sport has not yet commenced.

LUCK.

N. Y. & N. J. Ass'n of Plant Growers.

The annual meeting of the New York & New Jersey Association of Plant Growers was held at the office of the secretary, William H. Siebrecht, Jr., on Tuesday, December 6, 1910. In spite of the snowstorm a large attendance was at hand. Very important business was transacted and the election of officers for the ensuing year also took place. The following officers and directors were elected for the year 1911:

A. L. Miller, Brooklyn, president.
Herman Schoelzel, New Durham, N. J., vice-president.

Herman C. Steinhoff, Hoboken, N. J., treasurer.

William H. Siebrecht, Jr., New York, secretary.

C. W. Scott of the Hinode Florist Co., and the Yokohama Nursery Co., John H. Fiesser, North Bergen, N. J., and David McKenzie, executor of estate of John Scott, Brooklyn, directors.

W. H. SIEBRECHT,
Secretary.

OBITUARY.

Joseph Frank Klimmer.

Joseph Frank Klimmer, the well known Chicago florist, died at his home in Forest Park December 12, after a protracted illness. Mr. Klimmer was born in Munich, Bavaria, October 1, 1854, and came to Chicago in 1868 when he started to learn the flower business with Adam Blumenschein on Cottage Grove avenue. He married Augusta Dorstewitz and there were three children, Minnie, Frank and Lily, the latter now Mrs. Zander. He located first at the triangle at the corner of Ashland avenue and West Madison street, managing the store for August Dresel. He later started a store business for himself at 258 West Madison street and after occupying that and two or three nearby locations, in 1883 he entered the greenhouse business at Harlem, now Forest Park. About 1892 he gave up the city store and devoted himself entirely to the Forest Park establishment, marketing his surplus cut flowers at wholesale.

Mr. Klimmer was an exceptional man of marked ability in many directions and a thoughtful student of the various sides of human life. He had excellent business judgment, was an accomplished grower and an expert with several classes of plants, particularly carnations and chrysanthemums. As a member of flower show and other trade committees he was always present and dependable in the work assigned to him. He was elected village trustee of Harlem and president of the village board, and was a justice of the peace for a number of years. In all official positions and among his neighbors he was admired for his ability and honesty and as a candidate for office always had the strong support of the best element in the community. A democrat in politics, he was an exceptionally fluent, forceful and interesting speaker, either in German or English. He made many speeches during the presidential campaign of 1900. He was a staunch and sympathetic friend, greatly esteemed by a host of friends in the trade and as a member of the Chicago Florists' Club, which he served as trustee from 1905 to 1909, his counsel and opinions were always warmly welcomed and given the closest attention.

Funeral services have been arranged for Thursday, December 15, at 3 p. m. Anton Then, H. N. Bruns, A. H. Schneider and J. C. Vaughan will represent the trade as pallbearers.

Archibald Small.

Archibald Small, who, as previously reported in these columns, was seriously injured by a vicious hog on his farm at Silver Spring, Md., near Washington, D. C., died of his injuries on the evening of December 6. Though the most skillful surgeons were in constant attendance, their efforts were fruitless, gangrene having set in.

Mr. Small was a son of the late John H. Small of Washington, and a brother to John H. Small of Washington and Charles A. Small of New York, who now compose the firm of J. H. Small & Sons. Archibald Small was born in Washington 47 years ago. He received the training of a florist and followed that occupation until recent years. He was, at various times, employed by his father and brothers, but was never, so far as we are aware, an active member of the firm of J. H. Small & Sons. He was at one time in the retail business in New York, on his own account, but his business was greatly injured by the work consequent to the construction of the subway in front of his store and he relinquished it. Within the past few years he has been engaged in other pursuits.

"Archie" Small was well known to many in the trade, was genial, frank and kind hearted, and his sad and untimely death has caused many expressions of regret and sympathy. In addition to the brothers, he is survived by a wife, an aged mother and several sisters.

His funeral was held at the Church of the Epiphany, Washington, D. C., at 2 p. m., December 9. The solemn rights of the Episcopal Church were performed by Rev. Dr. Randolph McKinn. All the family and many friends were present. A. F. F.

William A. Appleton.

William A. Appleton, a florist and landscape gardener of Providence, R. I., died at his home on Tobey street, that city, December 7, having suffered since last March from a complication of kidney troubles.

Mr. Appleton was born in Providence in 1855, and after attending the public schools, at 18 years of age entered the employ of Walter Hogg, at the green-houses on Benefit street. He next worked at Swan Point cemetery, under Superintendent McCarthy, finally becoming head gardener, and many of the beautiful effects to be seen at this cemetery are due to his taste in landscape work. In 1888 he bought out the florist business of Robert Hogg, at 294 Broadway, and has conducted a flourishing business at that place ever since.

He was one of the charter members of the Florists' and Gardeners' Club of Rhode Island and served as president of the society. He was vice-president of the Rhode Island Horticultural Society and until this year had charge of the arranging of the flowers at the society's shows. He was a member of the Knights of Columbus, Foresters of America and Order of Heptasophs. He is survived by a widow, six sons, three daughters, five sisters and two brothers.

Mrs. Isabella P. Whittet.

Isabella P. Whittet, wife of Alexander Whittet, died December 3, at her home, 31 Wentworth street, Lowell, Mass., aged 70 years, having been ill with heart trouble since last August.

She was born, Isabella Proudfoot, in Perth, Scotland, in 1840, coming to Lowell as a young woman, and in January, 1867, was married to Alexander Whittet. She was one of the oldest living members of the High Street Congregational Church and active in all its charities and a member of Washington commandery U. O. G. C. She is survived by a husband and three sons, William D., Charles A., and Rufus M.; two daughters, Misses Isabella E. and Edith A. Whittet and two sisters in Scotland.

Chrysanthemums Outside in the South.

This being my first attempt to raise chrysanthemums of any size I will explain my treatment and success attained in the open air. The only protection against rain, wind and frost is a frame built around the beds, one side being high enough so that when the canvas is rolled down water will not stand upon it but will run off and also giving protection against wind and frost. Chrysanthemums have been cut measuring 10½ inches across and the flowers and varieties from these beds are from two to three weeks earlier than are those raised under glass. The flowers and foliage are perfect and the stems strong and of good length. The beds are prepared in the winter so as to get rid of all plant life and then the plants are set about the middle of May after they have been cut back so as to get two or three good leads. G. L.

Prices given are for this date only, for A No. 1 stock, delivered in pots at N. Y. stores.

Scottii and Boston ferns continue in great demand.

Phoenix Roebelenii in smaller sizes should be grown for "center plant use," for which they are specially adapted.

Large size Pandanus utilis very scarce.

Ficus pandurata sell well and should be grown in all sizes.

Livistona rotundifolia exceedingly scarce.

THE next meeting of the American Breeders' Association will be held at Columbus, Ohio, February 1, 2 and 3, 1911.

A NEW pink is advertised by a Chicago seed concern as "the exact color of Mrs. Thomas W. Lawson at all times of the year." After the bath?—Chicago Tribune.

To Prevent Frosting of Windows.

The following recipe for preventing the frosting of shop windows may be given in good time, so as to be at hand when needed: Paint them with a solution of glycerine in 63 per cent spirits of wine. Glycerine, like chloride of lime, has the property of absorbing water, and this action serves to entirely overcome the difficulty.

Forest Nurseries for Schools.

Farmers' Bulletin No. 423, issued by the United States Department of Agriculture, entitled Forest Nurseries for Schools by Walter M. Moore and Edwin R. Jackson, contains suggestions particularly valuable to rural school teachers, as they distinctly describe a form of school garden work or elementary agriculture which is applicable to all parts of the country, and is replete with directions how to make preparations and to conduct such a work.

A House of Flowers.

John Breitmeyers' Sons of Detroit have issued a very attractive booklet entitled "A House of Flowers," a name which they have adopted as appropriate to their store and business. It is splendidly illustrated with views of their store and artistic decorations. Their work and capabilities, the culture of the different house plants and the care of cut flowers are interestingly presented to the reader. It is beautifully printed and an ornament for the ladies' desk or table.

Foley's New Greenhouse Ventilator.

The Foley Mfg. Co., Chicago, has been testing a new ventilating apparatus in the greenhouses of the Poehlmann Bros. Co., at Morton Grove, Ill., during the past few days, with highly satisfactory results. The device involves a principle which is new, we believe, in greenhouse ventilation, namely, that of counter-weighting, which seems eminently practical and quite desirable in the long greenhouses now so commonly employed in commercial horticulture.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high grade work.

Forger Wanted.

The Greenville Floral Co., Greenville, Mich., wishes to advise the trade at large to be on the lookout for one W. E. McLaughlin, claiming to be a rose and carnation grower, from Seattle, Wash., former home, Middletown, O. On Saturday, December 10, 1910, he forged checks to the amount of or about \$65 on the above named company. He is about five feet six inches tall, dark, sharp features, blue eyes, has a scar over the bridge of his nose about one inch long, dark hair, both arms tattooed, one with the three links of the Odd Fellows, of which he is a member, or claims to be a member, the other arm has a sailor girl and above her four roses.

If seen arrest at once and notify the above company.

GREENVILLE FLORAL CO.

Society of American Florists.

DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the Chrysanthemums, Smith's Advance, Unaka, Chrysolora, Paper White, Minta, Morristown, Oceanic, Glen Cove, Lenox, Tarrytown, Poughkeepsie, Madison and Dick Witterstaetter, by Elmer D. Smith & Co., Adrian, Michigan, becomes complete.

REGISTRATION OF GERANIUMS.

Public notice is hereby given that F. H. De Witt, of Wooster, Ohio, offers for registration the geraniums described below. Any person objecting to the registrations or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registrations, the same will be made three weeks from this date.

RAISER'S DESCRIPTION.

Panama.—Originated in 1909 by F. H. De Witt, being a cross between Dryden and Pamela. It is a strong grower and much brighter in color than Dryden. The trusses of bloom are very large and have long, stiff stems. Very free in bloom. Single flowers.

White Cloud.—Originated in 1909 by F. H. De Witt. It is a cross between Mlle. Anastasie Lecardre and Pamela. Growth of medium height. Clusters large, foliage of medium size. Color pure white. Single flowers.

Ruby.—Originated in 1909 by F. H. De Witt. It is a seedling of S. A. Nutt crossed with Pamela. Growth similar to S. A. Nutt. Large clusters on long stems. Color dark currant red suffused with violet. Semi-double flowers.

General Wooster.—Originated in 1909 by F. H. De Witt. A seedling of S. A. Nutt crossed with Jean Viand. Plant of dwarf habit, thick foliage, large trusses borne on heavy, rigid stems. Color, rose pink. Semi-double flowers.

Barnaby Rudge.—Originated in 1909 by F. H. De Witt. It is a cross between S. A. Nutt and Red Wing. Very strong grower. Free in bloom. Compact trusses. Color rich carmine. Double flowers.

Bright Eyes.—Originated in 1909 by F. H. De Witt. A cross between Jules Lametre and Jean Viand. Of the Cyclops type. Growth dwarf and compact. The florets are very large. The trusses of medium size and freely produced. Color, bright red shading to violet with an unusually large white eye. Single flowers.

H. B. DORNER, Sec'y.

December 8, 1910.

Chrysanthemum Society of America.

WORK OF EXAMINING COMMITTEES.

Boston, Mass., November 26.—Pink sport of W. H. Chadwick, scored 80 points commercial scale, exhibited by A. N. Pierson, Cromwell, Conn.

Philadelphia, Pa., November 26.—Pink sport of W. H. Chadwick, scored 86 points commercial scale, same exhibitor as above.

Chicago, December 3.—December Gem, incurved pink, scored 89 points commercial scale, exhibited by Elmer D. Smith & Co., Adrian, Mich.

Cincinnati, O., December 3.—December Gem, pinkish white Japanese incurved, scored 81 points commercial scale, exhibited by Elmer D. Smith & Co., Adrian, Mich.

Meetings Next Week.

Boston, Mass., December 20.—Gardeners' and Florists' Club of Boston, Horticultural Hall.

Bright young man with experience in a wholesale and retail Seed Business; one competent to put up bulk orders, also wait on counter trade. Address with particulars, giving experience and reference. P. O. Box 1594, Philadelphia, Pa.

Advertiser

has good opening for a man competent to take charge of several greenhouses, stock, decorative plants, and attend to decorations and general retail work. Good opening for hustling man. Address Key 354, care American Florist.

Rose Grower Wanted

Young man to work under foreman; must furnish the best of references. Greenhouses 11 miles from Philadelphia. No one but a steady, sober and industrious man need apply. Address THORN HEDGE GREENHOUSES Newtown Square, Pa.

For Sale

Established seed store stock and fixtures, all kinds of field and garden seed and implements, poultry supplies, etc. Invoice about \$2,000.00 will take \$1,500.00. The only seed house within 100 miles. Reason other business, L. E. WESTERFIELD, 307 East Broad St., Texarkana, Ark.

Head Gardener

33 years old; single, with 20 years' experience on private estates and commercial places from Germany, Switzerland, Sweden, France, England and United States with first class references from each place, is now open for engagement on private estate until April 1, 1911. Address Key 352, care American Florist.

Manager or Superintendent of Commercial Greenhouse

A thoroughly competent grower of all classes of commercial greenhouse plants and cut flowers desires a position as manager or superintendent of modern commercial plant. Advertiser can show the highest credentials. State salary. Address Key 351, care American Florist.

A Golden Opportunity

A good practical grower of greenhouse and outdoor crops can take over at a nominal rental a greenhouse plant of about 16,000 square feet of glass; a fine heating plant with 100 tons of coal in the cellar; houses well stocked with Carnations, Sweet-peas, Freesias, Parsley, Asparagus Plumosus and Spengerii. A good cottage is a part of the plant; with from 10 to 20 acres of the very best land. Fine location. Markets for crops already established. Plant has been conducted as a semi-commercial establishment; owner now wishes to be relieved of all responsibilities.

For further particulars apply to

John T. Withers, 1 Montgomery St., Jersey City, N.J.

ASSISTANT CURATOR.

DIVISION OF PLANTS, NATIONAL MUSEUM.

JANUARY 7, 1911.

The United States Civil Service Commission announces an examination on January 7, 1911, to secure eligibles from which to make certification to fill a vacancy in the position of assistant curator, Division of Plants (National Herbarium), National Museum, Washington, D. C., at \$1,600 per annum and vacancies requiring similar qualifications as they may occur, unless it may be decided in the interest of the service to fill the vacancy by reinstatement, transfer, or promotion.

Competitors will be assembled for any of the tests:

The examination will consist of the subjects mentioned below, weighted as indicated:

SUBJECTS	WTS.
1. Undergraduate work particularly in botany, Latin, French, and German (the competitor will be required to submit a statement indicating definitely the amount of work done in each of these subjects in his college course).....	10
2. Postgraduate work (rating to be determined upon the amount and character of postgraduate work done in botany, which must be shown by a statement indicating the college or botanical institution in connection with which and under whose supervision the work was done, the amount of field work done, and when and where. The statement should also show any degrees received and indicate the experience the applicant has had in caring for a large herbarium).....	30
3. Botanical papers published (the applicant will be required to file a list of all papers published by him and copies of one or more papers on the subject of systematic botany).....	30
4. Original thesis on care, arrangement, and development of a large herbarium.....	30
Total.....	100

The thesis may be either typewritten or in the handwriting of the applicant, and on any size paper most convenient. If a competitor fails in the examination, the thesis will be returned to him upon his request.

Age limit, 20 years or over on the date of examination.

This examination is open to all citizens of the United States who comply with the requirements.

In accordance with a recent act of Congress an applicant for this examination, to be eligible for a position in the apportioned service in the Department at Washington, D. C., will be required to show in his application that he has been actually domiciled in the State or Territory in which he resides for at least one year previous to the date of the examination.

This announcement contains all information which is communicated to applicants regarding the scope of the examination, the vacancy or vacancies to be filled, and the qualifications required.

Applicants should at once apply to the United States Civil Service Commission, Washington, D. C., for application and examination Form 304 and special form. No application will be accepted unless properly executed and filed with the Commission at Washington prior to the hour of closing business on January 7, 1911. In applying for this examination the exact title as given at the head of this announcement should be used in the application.

THE GEO.

Cleveland.**VERY COLD WEATHER.**

Winter weather prevails, with a little snow every day and the weather cloudy and dark. This is probably the coldest weather experienced here at this season of the year for some time. Stock is quite scarce, large shipments of sweet peas should be coming in, but so far but few have arrived. Carnations are a little more plentiful, but still short of the demand. Paper white narcissus are slowly coming along, stevia is plentiful, lily of the valley is abundant with a good call, but violets and callas are moving slowly, and calendula and marguerites have made their appearance. A few good white chrysanthemums are coming in but

mostly for orders. Greens are plentiful but the shortage in ground pine for wreaths and wreathing is making the demand for boxwood and southern smilax exceptionally good. Moss wreaths are having a good sale.

NOTES.

The Cleveland Florists' Exchange is receiving several cars of southern wild smilax which enables them to sell at a figure very much lower than heretofore. Several cars of boxwood have already been disposed of, and another lot is coming for this firm. A car of cedar plant tubs in all sizes also arrived this week. These tubs are just the thing for palms, etc., and are especially adapted for the nursery trade.

C. F. B.

Cincinnati.**PRICES ADVANCING.**

Prices are gradually advancing to their Christmas goal. The market as a whole is listless. Heavy out-of-town buying helps clean up everything worthy from day to day. Roses are increasing in numbers and usually meet all requirements, and American Beauties are good in quality and ample in numbers. Carnations are as plentiful as a quarter of 1853 and, as that coin is selling at a premium, they too are bringing stiff prices. Other lines are coming into the market and lilies, narcissus and stevia are increasing in supply. Plenty of New York double violets are here to meet every request. Last week the business in them was

Graceland 1112 **CHICAGO**

slow; this week it improved considerably and lily of the valley are offered every day in quantity. Boxwood, owing to the very heavy demands, because of the entire absence of lycopodium, is getting scarce. It is being sold as fast as it comes in, but there is an ample supply of other greens. The holly so far this season has been uniformly good. The leaves are green and the holly is well berried. Laurel roping is also very good in quality.

NOTES.

The Florists' Society held a very enthusiastic meeting December 12. In less than five minutes \$4,000 was pledged for the \$10,000 guarantee fund for the flower show next fall. Wm. Murphy extended a kind invitation to

hold the next meeting of the society at his wholesale depot on Main street. Mr. Murphy and C. E. Critchell will "set 'em up" and there will be a general house warming after the meeting.

C. E. Critchell has been receiving large shipments of chrysanthemums from Robert Buck & Co. of Washington, C. H. Mr. Critchell has offered a box of cigars to the individual bowler making the best average in the championship games Monday evening, December 19.

C. C. Murphy has almost his entire place in a new red seedling carnation, and is very fortunate in having a good crop in every house for Christmas.

Michael Matchen, of Peter Reinberg's, inspected the heating system at

P. J. Ollinger's greenhouses at New-castle, Ind.

F. J. Farney, representing Rice & Co., and Martin Reukauf were both in Cincinnati December 12.

Gus Meier of the Hyde Park Rose Co. is seriously ill with bronchial pneumonia. H.

SOMERSET, PA.—The Gladehurst greenhouses, of which Mrs. Luella Parkhill is proprietor, is enjoying a nice business. There is 4,600 square feet of glass of Lord & Burnham construction in which the growing under the care of J. W. Ogilvie is carried on, the specialties being carnations and ferns.

Notice! The House of Godfrey Aschmann has no connection with any other house.

PREPARE FOR THE HOLIDAYS

It won't pay to let others get ahead of you. Don't look at what is behind, but go right straight forward. Make a break for Godfrey Aschmann's Greenhouses, to the old reliable firm who has always looked after your interests and who protects you.

We Have No Department Store Customers. We Sell Strictly to the Trade Only.

A HOUSE FULL OF BEGONIA GLOIRE DE LORRAINE. WHO CAN BEAT THAT?

Begonia Gloire de Lorraine

Begonia Gloire de Lorraine
to Beat the Band.

This is another specialty of ours. We have a secret in growing them to perfection, only known to us giving them a rich deep pink color. They stand shipping well, traveling 2,000 to 3,000 miles without injuring or killing them in transit, if properly handled. We have a big housefull in 6 to 7 in. sizes, in bud and partly in bloom, ready

AZALEA INDICA.

Already Forced for Christmas, put away in colder houses, ready for shipment Deutsche Perle, pure double white; Simon Mardner, large double pink; Vervaneana, double pink variegated. Price: 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each. Mme. Petrick, pink, 75c, \$1.00, to \$1.25. Remember, only the best and healthiest stock should be selected for Christmas as poor, weak Azaleas won't force successfully for Christmas. Don't order many 75c ones, because we won't have them. Larger sizes and also white ones must accompany the order.

For Easter Forcing we have only the well known standard American market varieties, such as Mme. Van der Cruyssen, pink, very scarce this year in Belgium, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Niobe, double white, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Deutsche Perle, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Helena Thielman, light pink, \$1.00, \$1.25, \$1.50 to \$2.00; President Oswald de Kerkove, \$1.00 to \$1.50; Schryveriana, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Empress of India, double variegated, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Professor Wolters, 75c, \$1.00, \$1.25 to \$1.50; Vervaneana, 60c, 75c, \$1.00, \$1.25 to \$1.50; Apollo, 60c, 75c, \$1.00 to \$1.25; Simon Mardner, 50c, 60c, 75c, \$1.00 to \$1.50.

Remember, small sizes of Azaleas are scarce this year in Belgium; therefore I had to buy mostly large sizes.

Remember, it is the wide awake man that is not afraid to invest a dollar that makes the money. Jerusalem Cherries, or Solanum 6-in. pots, 25c, 35c, 50c.; full of ripe berries.

Asparagus Sprengeri, 2½-in., 3c; 4-in., 10c.

Asparagus Plumosus, 2½-in., 4c; 3-in., 7c; 4-in., 15c.

for immediate sale or for the holidays. Everybody knows that last Christmas we had the best Begonia Gloire de Lorraine on the market. They were crackerjacks indeed! We have the deep pink and the light pink (Lonsdale) varieties, 6 in. pots, 50c, 75c to \$1.00; 7-in., \$1.25 to \$1.50; 3 in., 15c each \$15.00 per 100. If you have room you should order now because they are always scarce at Christmas. We have only a limited stock of 50c sizes; other larger sizes must be ordered in connection with 50c sizes.

Begonia Rex, 4-in., 20c.

51 Wabash Ave., CHICAGO

Chicago.

The weather for the week has been very clear, and although very cold for the season, just about what the grower would like to get the best results. The sun has shone brightly and the houses have received as much sunshine as can be expected on these short days. This has kept the grade of stock up and the supply at present is fully adequate to the demand. The market is in about the usual condition for this season of the year. Society functions wane for a week or two before Christmas and the demand slackens, the buyers are spending their money on other things and their minds are intent upon the holidays. The florist hardly begins to feel the Christmas trade until a few days before the great day arrives, and then everything comes with a rush. The quality of the roses is all that could be asked and expected and some very fine blooms are coming into the market. The American Beauties are grand, and although the cut will be of good size, the early orders are being rapidly booked at the wholesale stores. Richmond are good and are bound to be in great demand, and the supply for the holidays will probably fall short of the call. Carnations are of first class quality but short in quantity. Some of the growers claim they are not cutting more than one-half their usual cut at this season, and it looks as if the demand next week would far exceed the supply. There are still some few chrysanthemums to be seen, but in no great numbers. Lilies, lily of the valley, Paper White narcissus, Roman hyacinths and stevia are all in good supply. The stock of violets has shortened up and the price advanced. Orchids are being received in larger quantities, but the price is steady. The Christmas plants are making a great show in the retail stores, and beautifully grown

Our Carnations Are Superior

AWARDED HIGHEST HONORS

**At Chicago, Milwaukee, St. Louis and Minneapolis
Flower Shows.**

Exhibition blooms for these shows were taken from our regular daily cut, which is the best in the Chicago market, all the same superior quality every day. That is why we please our customers. If you are not acquainted with us, send in a trial order. We guarantee satisfaction. We also have strictly High Grade **Roses, Sweet Peas, Valley, Violets, Greens, Etc.,** at Lowest Market Prices.

CHICAGO CARNATION CO.

A. T. PYFER, Manager.
Phone Central 3473.

35-37 Randolph St., CHICAGO

begonias, cyclamen, poinsettias, ardisias and primroses make the stores look like flower gardens and the windows are resplendent with poinsettias and high colored plants. The Christmas greens are of good quality, some fine holly is seen and the boxwood is elegant, but some greens are scarce and the call of course is large.

NOTES.

Phil Foley, of the Foley Mfg. Co., says he usually looks for a little shading off in the business at this season but that this year seems to be an exception as the usual springtide pace keeps right on, his firm's bookings last week including orders from such widely separated points as Macon, Ga.,

Vancouver, New York city and Texas, and is now shipping material for the new Poehlmann range. Phil says he has a number of surprises up his sleeve for the trade in 1911 and everybody knows Phil has some sleeve.

The crops of roses and carnations at the J. A. Budlong Co.'s range were splendidly timed this year. The cut of Richmonds and Killarneys is very heavy for the season, and a good supply of these, as well as carnations, is assured for the holiday trade.

The Geo. Wittbold Co., 737 Buckingham place, is enjoying a brisk shipping trade and is filling a large number of orders for *Dracena fragrans*, *kentias* and *araucarias*.

BEAUTIES

We have a magnificent crop of long-stemmed Beauties for Christmas. Much the largest cut we ever have had for the holidays and the same quality as won First Prize at the Chicago Show the last two years.

Buy your Beauties from Us--Direct from the Grower--and be sure of fresh stock

Well packed to reach you in the best condition.

ZECH & MANN,

WHOLESALE FLORISTS,
Long Distance Phone Centr-13284
51 Wabash Ave.

Chicago

P. M. Palez, of Vestal's, Little Rock, Ark., was in town this week, looking up holiday stock, the same old dynamo of industry and cheerfulness. Laughter still rings through southern woods, violets still bloom in rank profusion on the banks of the Arkansas river, the genial current of the Palez Soul remains unfrozen, but he sings no more in churches. The chill, unthawing northerner cannot understand the incompatibility of church choirs and wanton joyousness.

Philip C. Schupp, the manager at the store of J. A. Budlong Co., is the possessor of a collection of Indian weapons and utensils of the Chicago region, which is probably the most complete in existence. This collection was an important exhibit at the meeting of the Chicago Historical Society held December 13 and was kindly loaned to the society by the owner.

Miss Helen Kruchten died December 8 at her home at the age of 24 years. The funeral was held Sunday, December 11; the interment was at St. Henry cemetery at High Ridge. The young lady was a cousin of John Kruchten and a relative of Peter Reinberg. The funeral was largely attended and the floral offerings were very numerous and beautiful.

The Chicago Carnation Co. is receiving a fancy grade of carnations in all the leading varieties. Manager Pyfer has been calling on a few of the large growers on the local market the past week and has booked a number of orders for rooted cuttings of Washington, this firm's new carnation.

Hoerber Bros. cut the first stock in their new range of houses this week and are now receiving a larger quantity than ever before. Killarney and White Killarney roses are fine and Richmond extra good. Harry Mannheim, the manager at the store, reports tip top business.

Bassett & Washburn are finding ready sale for their American Beauty roses which are of A 1 quality and mostly of a long stemmed grade. They are receiving much praise from their customers in regard to the quality and the condition in which they reach their destination.

B. E. Eldredge of Belvidere intends to increase his greenhouse plant from 90,000 to 130,000 square feet of glass in the near future. Mr. Eldredge is the president of the Eldredge Sewing Machine Co. of this city which manufactures a machine which he originated.

Is Proving as Successful as It Is Now Well Known.

You can depend on it for positive results without fear of failure or dissatisfaction.

It destroys Green, Black and White Fly, Red Spider, Thrips, Mealy Bug and Scale.

\$2.50 per gallon; \$1.00 per quart.

"FUNGINE"

An Infallible Remedy for Mildew and Other Fungus Diseases

A clean, safe and easily applied fungicide which does not stain the foliage. Used as a spray at 1 part to 50 parts water.

Particularly adapted for use in greenhouses against Mildew on Roses, 'Mums, etc.

\$2.00 per gallon; 75c per quart.

MANUFACTURED BY

APHINE MANUFACTURING CO.,

Madison, N. J.

Due to increasing business, the firm of Percy Jones has leased the entire second floor of the Fairbanks building and will take possession May 1, 1911. Mr. Van Gelder informs us that he has secured a three-year lease for which they paid \$12,900.

A sale of a single 100-pound crate of bulk bouquet green was made by a commission man to a maker of wreathing for \$19, December 8, a new high record. At that the buyer figured that he could make a profit of \$25 on winding the stock.

Mrs. K. N. Cooper of the Auburn-dale Goldfish Co., 920 West Randolph street, returned December 3 from a business trip to St. Louis and Springfield. This firm is giving to its customers this year, in place of a calendar, a large-sized gold fish for a fountain display.

John Kruchten is enjoying a very busy season. The shipping trade last week was very good and exceeded that of the month before. This firm is looking for consignors to secure sufficient stock to fill the many orders received.

Christmas

Means a Big Business
and Large Profits

IF YOU ARE THERE WITH THE GOODS

You will not get either unless you have the right stock at the right price. We can supply you if you will let us know what you want.

JOHN KRUCHTEN,

Wholesale Florist,
L. D. Phone Central 6269

**51 Wabash Ave.,
Chicago.**

T. Matchen, the genial and able manager at Peter Reinberg's store, is a fine entertainer and a well posted guide to have in visiting the large range of glass of the concern with which he is connected.

The Killarney, White Killarney, Richmond, Bride and Bridesmaid roses that Zech & Mann are receiving at the store are exceptionally good. This firm is also handling a fancy grade of lillies and carnations.

J. B. Deamud Co. expect to have a good supply of grand stock for the holiday trade. The first yellow trumpet narcissus on the market made their appearance at this house during the week.

Vaughan & Sperry are disposing of an extra fine grade of American Beauty, Killarney and White Killarney roses. A fine grade of mistletoe was seen at the store this week.

Poehlmann Bros. Co. are well supplied with a large quantity of stock for the holiday trade. American Beauties are fine and Killarney and White Killarney extra good.

Wietor Bros. are cutting very fine roses. The long stemmed American Beauties are magnificent, the Killarney and White Killarney are also in splendid condition.

Frank Kral, 1907 Halsted street, informs us that his little son, Richard, who broke his right arm about two weeks ago, is getting along nicely.

Weiland & Risch are cutting a fine grade of carnations and the Killarney and White Killarney roses are remarkably good.

Raichart & Krejci, 3250 West Twenty-sixth street, are selling a number of Christmas trees to the residents of the West Side.

The Raedlein Basket Co., 713 Milwaukee avenue, is filling a large number of orders for baskets for the holiday trade.

Mrs. N. C. Moore of the Flower Growers' Market is handling as fine a grade of stevia as is seen in the market.

O. Johnson of the Flower Growers' Market is receiving a quantity of American Beauty roses of good quality.

Our attention was attracted to a large quantity of sweet peas at the Chicago Rose Co.'s store this week.

The American Beauty, Killarney and White Killarney roses that Geo. Reinberg is cutting are of A-1 quality.

J. F. Klimmer passed away December 12 after a protracted illness. See obituary elsewhere in this issue.

Clark W. Johnson, formerly known to the trade of this city, is reported in legal trouble in Indiana.

Peterson's Nursery has given the contract for its new propagating house to the Foley Mfg. Co.

Chas. W. McKellar received a large shipment of cattleyas and other orchids December 15.

Miss Then Fells Thieves.

How to catch a robber.

Take a carnation, a dash of roses, a pretty girl with natural blooms in her cheeks, a big policeman and plenty of determination on the part of all concerned, mix well together and bake in a warm police station.

That's the very combination that led Miss Josephine Then, daughter of Anton Then, a florist at 2239 Winne-mac avenue, into a robber chase today that ended in the arrest of two men she declares robbed her father's store of \$100 worth of cut flowers.

Miss Then started out from her home, 2333 Hamilton court, early today, determined to catch the flower thieves. She began making the rounds of flower stores, and at State and Van

Buren her search was rewarded. She saw two men trying to sell some flowers to the proprietor.

"Those are stolen flowers. I know that those carnations in the bunch were raised by my father, as they are the only ones of their kind in Chicago, and are seedlings," said Miss Then. She called a policeman, and the two men were arrested. The prisoners are Joseph Schals, 5843 Central street, and Julius Gunther, 320 Clark street. The latter is said to have been formerly employed by Then.—Daily Newspaper.

Philadelphia, Pa.

Philadelphia.

SUPPLY SHORTER.

The snowstorm of last week has lengthened out and real winter has set in, the thermometer registering a temperature of almost zero last Friday and Saturday in the country districts and there is also a foot of snow. Such weather conditions have shortened the crops up very perceptibly and prices have stiffened accordingly. The demand has fallen off a little as is usually the case the early part of December, although there has been considerable work for the coming out teas and a few fashionable weddings. Carnations appear to be the scarcest item in the cut flower line and anything worth having brings five to six dollars, with specials considerably above these figures. The rose stock promises to be of fine quality for the holidays, particularly in American Beauties, Richmonds and White and Pink Killarneys, as the flowers show great improvement over that of a few weeks ago. Lily of the valley is more plentiful and is used extensively. Cattleyas are still scarce and in good demand at top prices; cypripediums about equal the demand.

NOTES.

The vases of new roses from the meeting of the Florists' Club exhibited by the E. G. Hill Co. of Richmond, Ind., were shown the next day at Pennock-Meehan's and a number of the rose-growers who were not at the meeting called to see them. There were vases, of fifty flowers or over, of each of three varieties, Mrs. Aaron Ward, Rose Queen and Sunburst. The latter two were particularly fine and called forth the admiration of all who saw them. Rose Queen is a very fine large flower of a Caroline Testout color, with a good long stiff stem; it is beautiful in form in all stages from a bud to the open flower, although many of the flowers were from three to four days old they were in splendid color and condition. The Sunburst is a beautiful flower of coppery shades of yellow, not so double as Perle or Sunset but with

strong stems and a large flower, the bud being long and full before it opens. Mr. Hill has two winners in these new ones, which are sure to increase his already famous name as a rose breeder. What a genial whole-souled man is Mr. Hill and what great good he has done and is doing for the trade both in this country and Europe. His enthusiasm is contagious; one cannot listen to his interesting talks of his work and the good results of his careful study and scientific handling of the many varieties he uses in his work, without recognizing him as a genius and one of the most successful hybridizers of the present day.

FLOWERS SCARCE.

All flowers are scarce in the markets, but the demand is not large, and consequently the growers are able to dispose of what they bring in each day, at very good prices. The quality is of the usual excellence, although the of the usual excellence, although the chrysanthemums are not of the best quality and do not sell as readily as other flowers. There is a universal complaint among the violet growers that they are not picking as many as usual at this time of the year. They think it is the result of the long dry spell last summer, and the frosts having held off so long this fall. The growers of plants for the Christmas trade are beginning to show their samples, and another week will make quite a difference in the looks of the retail stores and the flower market benches, which now look almost empty after the morning trade is over.

NOTES.

Considerable interest is being taken in the National flower show, which is to be held March 25-April 1. The entire Mechanics' building has been engaged, and over ten thousand dollars will be offered in premiums, and it is expected that prominent florists and growers all over the country, as well as the private gardeners, will compete in the trade exhibits. Greenhouse construction, pottery, fertilizers and garden supplies will all be represented by the prominent dealers and much space has already been taken. It is said that a number of leading concerns are going to a great expense in their exhibits, three, in particular, involving an outlay of nearly five thousand dollars each. These will present a typical Holland or Dutch garden, an old English garden and an Italian garden.

WHOLESALE FLORISTS,

54 West 28th St.

NEW YORK.

Telephone 3559 Madison Square.

New York Florists' Club.

The meeting of the Florists' Club, which was held December 12, being the annual election of officers, brought out a large attendance, there being upward of 75 members present, with President A. L. Miller in the chair. After the minutes of the previous meeting had been read and adopted, P. O'Mara, as chairman of the committee appointed to further horticultural affairs at the state capitol, particularly in getting an appropriation of \$50,000 to construct greenhouses for an experiment station, reported progress and urged that every club member get in touch with his district representative and bring all possible weight to bear in order that when the bill comes before the authorities at Albany, providing for the appropriation, it may be passed.

F. R. Pierson, commenting on the passage of the proposed bill, advised that a delegation of members go to Albany and confer with the legislative committee who will have charge of the bill before it is finally presented to the house of representatives.

Frank H. Wilshire and J. F. Slinon were elected members of the club, both gentlemen being called to the platform and introduced by the president.

The outing committee were discharged with the thanks of the club by a standing vote, H. A. Bunyard, chairman of that committee, responding.

E. G. Hill, Richmond, Ind., was present and gave a short talk on the newer roses. He referred modestly to the varieties he had brought with him, and which were on the exhibition

tables, and told something of their pedigrees and their general demeanor as forcing roses. He deprecated the fact that retailers were not so diligent in obtaining and placing new roses before the general public as they might be. He drew attention to the European methods of eliminating the unsatisfactory new varieties. He spoke feelingly of the dangers that attended a western man when visiting New York, from over-eating. Quite a discussion on the merits of various roses for bedding purposes followed Mr. Hill's remarks, participated in by R. Schultze, W. A. Manda, P. O'Mara, F. R. Pierson, R. Simpson and others.

President Miller appointed C. B. Weathered, F. H. Traendly and H. A. Bunyard as a committee to draw up suitable resolutions on the death of F.

A. Manda, a brother to three of our respected members.

For the election of officers President Miller appointed W. F. Sheridan judge of the election, W. Duckham and J. Fenrich tellers. When the votes were all in it was found that the election had resulted in the choice of:

John B. Nugent, Jr., president.

H. A. Bunyard, vice-president.

John Young, secretary.

W. C. Rickards, treasurer.

F. H. Traendly, Chas. H. Totty and Charles Weber, trustees for two years.

To fill the unexpired term of H. A. Bunyard, resigned owing to being elected vice-president, T. S. Hendrickson was elected trustee for one year.

The voting for the president was very close indeed, J. B. Nugent, Jr. receiving 37 votes and J. A. Manda 36. On motion of Mr. Manda, the election of Mr. Nugent was made unanimous.

There was a splendid exhibition of flowers at the meeting. The E. G. Hill Co. showed the yellow rose Aaron Ward, which was awarded the thanks of the club; Sunburst, a beautiful yellow, and Rose Queen, a very decided and dazzling pink. The two latter each scored 90 points and were each awarded a preliminary certificate. F. R. Pierson staged two bunches of Imperial Killarney, a sport from White Killarney, a fine full flowered, pleasing pink color, for which he received a preliminary certificate. Chas. H. Totty showed two carnations, White House and Princess Charming, the former being granted a preliminary certificate, the latter having already been awarded the club's certificate was given the thanks of the club. Chas. Lanker was awarded a cultural certificate for an improved form of stevia, or perhaps it was eupatorium—botanists will have to decide. W. A. Manda received the club's thanks for an exhibit of red flowering begonias, a resultant of crosses between B. semper-

COLD, WINTRY WEATHER.

We have been favored with some real winter weather, snow and wind in plenty, and Saturday, December 10, was the coldest day of the season so far, the thermometer registering 16°. Insufficient lining of paper to flower boxes was responsible for damage by freezing to some flowers on invoicing, so packers of cut flowers may be on their guard from now on. Supplies are not heavy by any means and it is just as well, as trade is not what may be called brisk at all. Flowering plants are coming more to the front, as the holiday season approaches, and, with so much of this nice stock available, and which makes such brilliant effects for display purposes, there is naturally a lesser demand for cut flowers. However, there is something doing every day and the fact that supplies in most lines are not heavy tends to keep prices fairly steady, if not very high. Roses of all kinds have a rather wide range in values, the price depending chiefly upon the number required, the extra and fancy grades sell the slowest. What demand there is seemingly calls more for the short grades. The incoming crop of carnations is only just about even with the demand consequently prices for these may be classed as quite firm. Cattleyas are still short in supply and there is little change in their value; some dendrobiums are coming in occasionally, for which 35 cents each is asked; cyrtipediums are selling very fair, good flowers being offered at \$12 per 100. Violets are plentiful enough and the demand is very erratic; they are going quite a little cheaper than they were one week ago. Paper White narcissus is one of the staples that are plentiful, too much so, in fact, and they are beginning to accumulate in the hands of the dealers. Lilies have made a slight advance over last week's figures. Callas are beginning to come in more numerous; there are various grades of them, however, and while some will fetch as high as \$2 per dozen, there are others that do not average more than 10 cents each. Lily of the valley seems slightly more plentiful and the price is somewhat weaker than one week ago. There is still a fairly heavy supply of white and yellow chrysanthemums; the pink varieties are scarce. For the big blooms prices remain about the same; small blooms are going decidedly cheaper. Sweet peas are not moving quite so well, especially the short-stemmed ones. Stevia, bouvardia, wall-flowers, marguerites, cut poinsettias and gypsophila are among the incidentals that are coming in, all of which are cleaned out at some figure or other. Asparagus in bunches is still meeting with the best call in the cut green line; smilax sells very slowly and there seems to be too much around.

NOTES.

One day last week Phil. Kessler, wholesale florist, received an invoice of a shipment of bulbs from Japan on S. S. Protesilaus, 66 cases in all. The invoice was followed by requests from a firm of customs brokers to handle the matter for him, but as Mr. Kessler is not in the bulb business, has never ordered any from any Japanese firm, has no use for bulbs any way, he is somewhat at a loss to know why such a shipment was consigned to him.

BROOKLYN, N. Y.

partments at Loesers and Bloomingdale's mammoth stores, has introduced a section devoted to Japanese miniature gardens and landscapes. A Japanese gardener is in charge of this work and many beautiful pieces are on exhibition. As a new feature it is proving quite a success.

Chas. H. Totty, Madison, N. J., who has been on a visit to the E. G. Hill Co., Richmond, Ind., speaks with a great deal of admiration of the new yellow rose Sunburst being grown by that firm. Mr. Totty is so much impressed by the rose that he has made arrangements to participate in its introduction to the trade, which will be in 1912.

A glance through the houses of the Keller Co., Bay Ridge, Brooklyn, revealed a splendid array of flowering and decorative plants just right for the holidays. Among the newer azaleas that is coming in grand form is Veraneana alba, a beautiful white and seemingly of splendid habit in every particular.

The well known greenhouses of Weirs, located at Senator street and Fifth avenue, Brooklyn, are now empty, and will be torn down within the next few days. The property has become very valuable for residential purposes, being in the very heart of the Bay Ridge district.

The final bowling games of the match series between Astoria and New York were played on the alleys of the latter mentioned club on Dec. 9, resulting in victory for the Astorians. Six games have been played in all, the Astoria team winning five of them.

E. G. Hill, Richmond, Ind., was a visitor this week; also J. A. Peterson, Cincinnati, Ohio, who has been showing to the trade his new begonia, Glory of Cincinnati, and Mr. and Mrs. W. Palmer, Buffalo, N. Y.

J. Fleischman opened a flower store in the Pennsylvania station on December 1. He is also increasing his floor space in the Hudson Terminal building by moving into one of the larger stores there.

The award committee of the New York Florist Club will visit Philadelphia in the near future to examine the new rose Melody that is being disseminated by S. S. Pennock-Meehan Co.

CHRISTMAS STOCK.

Christmas activity with all and ideal
winter weather. Christmas plants are
in fine shape, more especially Gloire
de Lorraine begonia, poinsettias, prim-
roses, azaleas and cyclamen. All will
be in good flower. There seems to be
a big call for boxwood wreaths and
red trimming for windows, which are
very rich in fine stores.

NOTES.

The regular meeting of the Buffalo
Florists' Club was held December 6.
Considerable business of importance
was transacted regarding the past
flower show. All bills were audited
and the treasurer instructed to pay
them. The unanimous sentiment of
those present was to have another
show next year. Larger and to run
one week, the date to be picked out by
the special committee to be appointed
by the president. From the reports of
those present the Buffalo flower show
will be the event of the season from
the next one on.

All stores on Main street from Pal-
mer's to Scott's are more busy than
in other years with advance orders.

Miss Edith Christey, formerly with
A. L. Jones, Tonawanda, is now with
S. A. Anderson.

Store decorations are more numerous
than usual.

BISON.

UTICA, N. Y.—The greenhouse of
William Matthews at York and Warren
streets, caught fire on the morning of
December 1, the fire being found in
the partition near one of the boilers.
The damage to the building was slight
but considerable to a fine lot of carna-
tions which were in bloom.

I can always supply the best of everything

BODDINGTON'S catalogue is the first of the 1911 crop to reach us.

HOLLY at Chicago, florists' fancy stock, is selling at \$4.50 to \$6 and low grade material on the street at \$3.75 to \$4.

VISITED CHICAGO.—W. H. Grenell, Saginaw, Mich.; L. W. Wheeler, Hollister, Calif., and W. J. Fosgate, Santa Clara, Calif.

J. BOLGIANO & SON'S new warehouse at Baltimore contains 75,000 square feet of floor space and not 5,000 as stated in last issue.

CHICAGO.—Prices on the board of trade December 14 for grass seed were noted as follows: Timothy, \$9 to \$10 per 100 pounds. White clover, from \$22 to \$28.

PACIFIC COAST seed growers are planning to invite the American Seed Trade Association to San Francisco in 1915 if the Panama Exposition is held in that city.

A BRISK demand is reported for late varieties of sweet corn, Stowell's Evergreen and Country Gentleman being in demand at good prices, especially among the canning trade.

BINGHAMPTON, N. Y.—At a meeting of the stockholders of the Binghampton Seed Co. it was voted that of the \$25,000 capital stock, \$20,000 should be classified as common, and \$5,000 as preferred stock.

THE Currie brothers, William, Adam and James, of Milwaukee, Wis., have the sympathy of the trade in the death of their mother, Mrs. Anne Boyd Currie, which occurred at the home of the former December 11.

E. NEUBERT, of Wandsbek, near Hamburg, says his recent consignment of 769 cases of lily of the valley pips to H. Frank Darrow, New York, is the largest single shipment that ever crossed the Atlantic.

BOUQUET GREEN RECORD PRICE.—At Chicago, December 8, a single 100-pound crate of bulk bouquet green was sold by a commission man to a maker of wreathing for \$19, a new high record. At that the buyer figured that he could make a profit of \$25 on winding the stock.

SAN JOSE, CALIF.

LINCOLN, NEB.—Articles of incorporation of the Griswold Seed company were filed with the county clerk November 25. The incorporators are W. B. Griswold, Frank L. Everts, H. J. Whitmore and E. S. Gunn. The capital stock is fixed at \$200,000, \$50,000 preferred and \$150,000 common. It is stipulated that at least \$105,000 of the common stock is to be paid in at the beginning of business.

The Late Charles P. Braslan.

AN APPRECIATION.

The death of Charles P. Braslan at San Jose, Cal., Saturday, December 3, has brought sorrow to hundreds of his friends all over the land. To few it is given to number friends by the hundred, but this was literally true as to him.

While his loss will be felt most keenly by those who knew him intimately, yet his personality was such as to draw closely to him, even on slight acquaintance, all with whom he came in contact.

His industry, energy and natural abilities were so exceptional as to command the admiration of all, but it was the essential sweetness of his nature that drew all hearts to him and made all men his friends.

In every undertaking in which he engaged he threw himself with all the enthusiasm of his nature. Always in the fore-front, giving and taking blows, it would be strange, indeed, had not those antagonisms which always follow closely contested vantage points, been aroused; but with his death, whatever of this may have existed has entirely ceased, and foremost among those who pay his memory heartfelt tribute are those with whom in life he most strongly contended.

And now that his activities have ceased, the hand which was ever open to the needs of others is still and the kindly heart that beat for all his friends no longer throbs, to us has come the realization that no more shall we feel the sunshine of his presence, we begin to more fully appreciate our loss and to realize that life will seem more narrow now that his generous spirit has taken its flight.

Someone has expressed the beautiful thought that "According to the degree of love which follows the departed soul, so shall that soul be borne to greater heights in Heaven." If this be our hope, may we not feel assured that the spirit of our friend has already entered into scenes of greater and nobler activity?

How to Sue a Seedsman.

When a farmer starts to sue a seedsman or nurseryman for selling impure seeds or trees not true to name, he must be prepared to prove that damage was really caused by the particular seed or that the trees were the identical ones originally sold. The defendant, in such a case, will try to show that the farmer cannot be sure of the goods.—Rural New Yorker.

[How would it do for the Rural to assume that the planter of the seeds could and should examine the seeds before planting and if not satisfactory return to the seller as instructed by the seedsman's disclaimer.—ED.]

Imports.

During the week ending December 3, imports were received at New York as follows:

McHutchison & Co., 458 cases bulbs, 211 cases lily of the valley pips, 53 packages and five cases trees, 16 cases plants.

Henry Nungesser & Co., 400 barrels seed.

Wm. Hagemann & Co., 225 cases lily of the valley pips.

Aug. Rolker & Son, 188 cases lily of the valley pips, 41 cases plants.

H. Frank Darrow, 80 cases lily crowns, 30 bags seed, 14 cases trees, nine cases shrubs.

Julius Roehrs Co., 76 cases trees and shrubs, one case fertilizer.

Anton Schultheis, 62 cases lily of the valley pips, three cases plants.

P. Ouwerkerk, 57 cases trees.

Vaughan's Seed Store, 48 packages express goods and seeds, 23 cases shrubs and trees, four cases bulbs, one bag seed.

J. M. Thorburn & Co., 33 cases bulbs, 15 barrels seed.

A. T. Boddington, 23 bags manure, 10 cases plants.

Wadley & Smythe, 14 cases trees.

Weeber & Don, 12 cases mushroom spawn.

Ralph M. Ward & Co., 10 cases trees.

Reed & Keller, four cases dried plants.

Stump & Walter, three cases trees and shrubs, two cases plant wash, two cases roots.

Peter Henderson & Co., two cases bulbs.

O. V. Zangen, one case bulbs.

To others: 2,853 bags, 667 packages, 83 barrels and one cask seed, 2,506 cases and 379 barrels lily of the valley pips, 198 trees in tubs, 124 packages, 16 cases and one barrel trees, 118 cases and seven packages plants, 14 cases bulbs and roots.

C. C. MORSE & Co., California, had 1,500 acres in garden peas this season and O. L. Coulter, now with this firm, who has the garden peas in hand, is specializing with a view to extending the firm's operations with such kinds as can be grown most advantageously in that section.

You may have heard about the little fellow who stole very cautiously up to the letter box and when no one was looking, slipped a letter in without a stamp on it, thinking he had saved two cents. Well now that's just about the way some growers buy lily bulbs. They think it is smart practice and good business to "jew" down a salesman; but gentlemen, its not. It is not good for either the buyer or the salesman. In lily bulbs you are going to get just what you pay for and no more. It's the same in many other bulbs, plants etc. and the wise buyer is the man who pays a fair price for the article he wants and insists upon getting what he buys. We have the most direct connection possible in the Japanese bulb business and we know the value of the bulbs; and by costly experience we have learned that it dont pay in the long run to buy cheap lily bulbs--excuse us, we prefer others handle that part of the business. Good lily bulbs at reasonable prices, we can supply in any ordinary quantity for immediate delivery or for shipments during 1911 from cold storage. Write Us.

Annual meeting at Boston, Mass., 1911.

Spawning Mushroom Beds.

After mushroom beds have been properly filled with the right kind of material, the temperature generally increases for a few days. This is the reason why it is unsafe to spawn new beds at once after filling. The operator should watch his temperature carefully by plunging thermometers into the beds. Supposing a newly made bed should register 130 degrees a few days after filling, it is in very good condition, and as soon as the heat declines to 90 degrees it will be in shape to plant the spawn. It is generally safer to use larger pieces of spawn—cutting a brick in six or eight pieces is about right; small pieces are too easily injured by excesses of heat and moisture. To plant the spawn just tear up a spot with the fingers, insert the piece and tamp down tight. Dibbled holes are undesirable as they permit air to circulate around the spawn. The next danger is too early casing with loam. This may induce a rise of temperature again, enough to kill the spawn. Generally a week or ten days after spawning the loam casing may go on. MARKETMAN.

Storing Celery in Cold Frames.

Celery to keep sound must be kept growing. This fall I had three varieties—Golden Self Blanching, Winter Queen, and Giant Pascal, the first being an early kind and the others late. About October 1 I topped them quite severely so that they would take up the least possible room in their winter quarters and in a few days their wounds had healed over and they were growing rapidly again. October 22 I took the plants up roots and all with as much soil as would come with them, tying the stalks to keep them straight and to keep the dirt from sifting in, and planted them in the cold frame. The roots were held in a bucket of water about five seconds and then set in rows almost touching each other and covered firmly with hotbed dirt, care being taken to keep the foliage dry. The bed was at once covered with Sunlight double glass sash, which I

used for two reasons: first, because it would not be necessary to do any covering or uncovering, but mainly because they allow the rank, moist air to escape, instead of condensing on the glass and dripping back on the leaves and stalks. Within a few days they had all made new roots, and I am now pulling as perfect Golden Self Blanching as that variety ever gets to be. The later varieties are not yet ready but there is no doubt they will keep perfectly sound. I have been trying new ways to keep celery with varied

success, but with the double glass sash I think I have hit the right idea, which is to keep the plants alive.—J. C. Pearce in the Weekly Market Growers' Journal.

Six Months of Chrysanthemums

We have enjoyed Chrysanthemums from July into December.

We are offering a collection of Commercial novelties that have covered this long period of flowering.

Beginning with **Smith's Advance**, white, cut July 25th. **Unaka**, Bright pink, Oct. 1st. **Chrysolora**, Yellow, Oct. 15th. **Dick Witterstaeter**, Bright crimson, Oct. 25th. **Roman Gold**, intense Yellow, Nov. 1st. **Thanksgiving Queen**, White, Nov. 20th and **December Gem**, White, Dec. 1st.

There has never been a collection offered including all four of the important colors for Florist's use and covering a flowering season of six months. Others may tell you they have just as good, but ask for proofs. All of these have been awarded First Class Certificates by the Chrysanthemum Society of America. We also have a very strong set of Exhibition varieties. None better.

WHEN INVESTING IN NOVELTIES IT PAYS
TO BUY THE BEST

ELMER D. SMITH & CO., Adrian, Mich.

NEW IRISH ROSE MELODY

FOR several years we have made a study of the Pedigree Seedling Roses of Messrs. Alexander Dickson & Sons. We have visited their Nurseries when from 3000 to 5000 Seedlings were in bloom, and our earnest endeavor has been to select varieties for Winter Forcing in America that will flower as freely during the Winter as Killarney. We have tested several beautiful Roses that the retailer would gladly buy, but they would not produce enough flowers during the winter months to be profitable to the Grower. In Melody we have the freest flowering Winter Forcing Rose yet introduced; it is a Yellow Pedigree Seedling of Messrs. Alexander Dickson & Sons, Newtownards, Ireland; and is the fourth Rose they have given us for Winter forcing, their former introduction being Killarney, Liberty and Mrs. Jardine.

Melody has a strong, willowy growth, unlike any other forcing variety with rich glossy foliage. Flowers are of perfect form, of a beautiful yellow, shading toward the center to deep apricot yellow, and very double. It will be particularly valuable to florists from the fact that it produces such quantities of flowers for winter, when other varieties are apt to be shy. With us in Sharon Hill it is as free in winter as My Maryland is in summer; and from one two-year-old plant, last December, we cut 26 flowers, and from the same plant on the next crop in February we cut 27 flowers. We offer only Own Root Plants, as, like most yellow Roses, Melody does not take kindly to Manetti stock. **PRICES: \$6 per dozen; \$30 per 100; \$70 per 250; \$250 per 1000; 2½-inch pots; delivery during March.**

NEW IRISH ROSE MELODY.

Double Pink Killarney

THIS Novelty originated in our own place. Some years ago we had a White Sport from Killarney, and after working it up to a house of 1700 plants, we sold cut flowers from it. One of these plants sported back to pink, but instead of the ordinary Killarney we found that the habit of growth was much stronger, and the flower had from 10 to 12 more petals than Killarney, some having as many as 35, and were a shade lighter in color. Every florist who has seen this Sport likes it, as it is a better shipper and a larger flower than Killarney.

PRICES: Own Root Plants, 2½-inch pots, Spring Delivery, \$4 per dozen; \$20 per 100; \$40 per 250; \$150 per 1000.

GRAFTED PLANTS: \$30 per 100; \$250 per 1000. Orders filled strictly in rotation.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June 14-16, 1911.

IN the twenty-fifth line of John Dunbar's article on *Cornus officinalis* in last week's issue read enhanced for unbalanced.

A. KOSTER, of Boskoop, Holland, who discovered Koster's blue spruce among his seedlings of *Picea pungens* 30 years ago, died October 13, aged 80 years.

Soupert & Notting's New Roses.

Soupert & Notting of Luxemborg are distributing three new roses this season which are described as follows:

Reuerdo de Antonio Peluffo, a splendid tea of light yellow pink edged petals, a seedling of Melaine Soupert and Mme. Const. Soupert. A large flower, very double, of irreplaceable form, with long fine buds and very free flowering, combining the delightful qualities of the parents. A fine exhibition and forcing rose.

Manuel P. Azevedo, a hybrid tea, bearing a seedling of Etoile de France and Ulrich Brunner. A large double cerise red flower, of ideal form, with stiff petals and sweetly perfumed, the plant having the hardiness of Ulrich Brunner and as floriferous as Etoile de France. The coloring is an intermediate shade between those of the parents.

Hugo Maueroff, a rambler seedling, a cross of Crimson Rambler and Mrs. Wm. H. Cutbush, a small double flower of warm carmine color and regular form, produced profusely in large elegant clusters. Free growing, floriferous and hardy.

Western Association of Nurserymen.

The twenty-first annual meeting of the Western Association of Nurserymen was held December 14-15, 1910, at the Coates House, Kansas City, Mo., and was called to order on the morning of the first day and the routine business transacted, after which the following topics and papers were considered and discussed: Additional by-law governing the reporting of members, by E. P. Bernardin; Report of the test of adverse laws, A. J. Brown, B. E. Fields and W. P. Stark, committee on legislation; State laws, C. Sonderegger; Co-operation of nurserymen, J. Moncrief; What constitutes a nurseryman, A. L. Brooks; The value of the nursery industry, R. J. Bagby; Nursery interests and conditions by states; Pioneer trees for the northwest, George H. Whiting; The grading of forest seedlings, J. H. Skinner; Propagation of the apple and its culture, A. Willis; Supply and prices, H. B. Chase; How may our inspection laws be improved, John S. Kerr; The retail end of the nursery business, E. H. Balco; Time and place and the remedy to apply for woolly aphids, C. A. Murphy; What of the Denver meeting, J. W. Hill; Entertainment for the nurserymen's convention at St. Louis, F. A. Weber; National Association Exhibit, J. W. Schuette, and The National Association meeting at St. Louis, W. P. Stark.

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

White Wonder Gloriosa

Two New Carnations For 1911

We consider these the best varieties in their colors we have yet introduced. Both are up to the high standard of quality and strictly commercial in production of bloom.

White Wonder.

The largest and most productive white variety we have yet produced. A white carnation for all growers.

A 1906 seedling of White Perfection having all its good qualities so greatly improved that it is far superior to that variety. The flower is some larger, the stem is stronger and the growth is all that White Perfection lacks making nearly double the size plant and thereby increasing its productiveness nearly one-third.

Like White Perfection it is easy to root, makes a quick upright growth transplants readily; flowers early and without a break; produces a full continuous crop the entire season. Another of its strong points is its calyx, the percent of bursted ones is so small that it cannot be classed as a defect.

Like White Perfection, Winona and Pink Delight, these two varieties are true commercial types, having all the good points to make them valuable to every grower. Our very large stock will give us quantities of good select cuttings early and throughout the season. *Notwithstanding our large sales of over 200,000 rooted cuttings we are prepared to take good care of your order if placed now.* Large or small we will make every effort to make your order satisfactory.

PRICE OF ROOTED CUTTINGS.—\$12.00 per 100; \$100.00 per 1000; 2500 for \$237.50; 5000 for \$450.00. 25 at 100 and 250 at 100 rate. For larger quantities prices on application.

Gloriosa.

An attractive and pleasing shade of pure light pink. It is darker than Pink Delight without the salmon cast and the color is distinct from any variety in commerce.

Its stem, clean, healthy foliage, habit of growth and its exceptionally good calyx is an advance on the varieties now in cultivation. It is another that has that early free and continuous flowering habit. The size is large with a full center; the form is perfect and keeping qualities are of the best.

The cuttings root easily and make a quick shapely growth. It lifts and transplants readily; is very active; quick to produce new breaks that run to flower stems in a very short time.

The A. C. S. Judges gave GLORIOSA first honors in competition with Pink Delight and Enchantress.

Rooted Cuttings Dec. and Jan. Delivery and Later.

	Per 100	Per 1000		Per 100	Per 1000
Pink Delight	\$6 00	\$50 00	Golden Ray	\$6 00	\$50 00

A TRIP TO STOCKTON.

A number of the members of the Pacific Coast Horticultural Society had a most delightful excursion to Stockton a few days ago. Leaving on Saturday evening on the river steamer they arrived in Stockton early Sunday morning, everybody feeling very much refreshed after a good night's rest, with the exception of Wm. Munro, the popular superintendent of the Crocker estate, San Mateo. He complained of the continuous sounding of the fog whistles during the night. There being no fog during the night it was rather a puzzle to the rest of the party why he should have heard these whistles, until investigation proved that the cabin occupied by himself and wife was above the ones occupied by the heavyweights of the society, Dan MacRorie and Dan Raymond, who are in the habit of sleeping rather loud, in fact it is rumored that the steamship company are seriously thinking of discontinuing the fog whistle in the future, and engaging these two alternately. Upon their arrival in Stockton the party visited the different greenhouse establishments, as well as the city parks and grounds of the State Insane Asylum. Messrs. Schmitz and Dobner, who had invited the members to spend the day with them, entertained them with their well known hospitality. Their French cook had prepared a sumptuous meal which everyone enjoyed most heartily. Of liquid refreshments there was variety, quality and quantity, the only regret of the members being that they could not stay long enough with it. Schmitz & Dobner's greenhouse establishment was in a very prosperous looking condition; they were just installing a new 45 horse-power steam boiler their old boiler being too small, as they have been

adding considerable to their glass area lately. At the San Joaquin Floral Company's greenhouses they also found things looking prosperous. They found Manager Shaw just recovering from a serious illness. Head gardener Roecklein at the State Insane Asylum, is keeping the grounds and greenhouses in as fine a condition as it is possible to do with only asylum patients as assistants. After having spent a most enjoyable and instructive day everybody was sorry when it was time to embark on the Southern Pacific train after thanking Messrs Schmitz and Dobner for their kind hospitality.

NOTES.

Flower seeds to children. Seeds and bulbs are to be distributed to the pupils of LaFayette School next week by the members of the California State Floral Society, which requests that its members meet at Red Men's Hall, Leavenworth and Hyde streets, for the purpose of considering the plan of interesting school children in the art of floriculture. Plans are also to be formulated for a spring flower show. The recent autumn flower show at the Fairmount was such a great success that a spring show is to be given at which California roses and the wild flowers are to be featured.

J. A. Carbone of Berkeley is sending to the market many nice varieties of orchids. He will have thousands of blooms of phalaenopsis for the holiday season.

ARTUS.

MONTICELLO, FLA.—The Jefferson County Seed Co. has been organized here with R. L. Eaton president and G. C. McCall secretary and treasurer. They have one thousand acres of land well stocked and will grow watermelon seed for the trade only. The Cape Girardeau Nursery of which R. L. Eaton is owner will make budded pecan trees a specialty.

Surplus Bulbs

Easter comes April 16, and you will need blooming

Hyacinths, Tulips, Narcissi, Etc.

at that time. There is plenty of time to force them for your Easter trade, and we have a fine lot of bulbs for the purpose—the surplus left from our fall trade. We'd rather sell these below cost than throw them out, and now is the time for you to get a real bargain. You know how low these prices are:

	Per 1000
Named Hyacinths.....	\$35
Named Tulips.....	12
Named Narcissi.....	12
Monster Yellow Crocus.....	6
Large Named Crocus.....	4
Mixed Hyacinths.....	20
Mixed Tulips.....	12

If you are in need of a large quantity of any of these or other bulbs, write us—we can quote you prices that will interest you.

Write us also if you are interested in
Asparagus and Maidenhair Ferns
for house plants. We have a fine lot of them
at very attractive prices.

Heller Brothers Co.

Specialists 917 South Main St., New Castle, Ind.

SALT LAKE CITY UTAH.—The Salt Lake Floral Co. opened their greenhouses to the public from two to four o'clock on the afternoons of November 18-19, that they might inspect the beautiful chrysanthemums and other flowers.

"Dorothy Gordon"
Natural Size

Double Your Carnation Money With "Dorothy Gordon," the Most Profitable Commercial Variety on the Market Today

Yes, you can do it, with your present equipment and without an extra penny of expense; just plant "Dorothy Gordon" this year and take the same care of them that you do the carnations you're growing now.

Here are two ways: First, you can get **one-third more commercial flowers**; in other words, when a given number of ordinary plants bear 100 flowers, the same number of plants of "Dorothy Gordon" will yield 133.

Second, you can get 50% more money for "Dorothy Gordon." We used to grow Enchantress and we sold the flowers at \$6.00 per 100; at the same time we sold "Dorothy Gordon" at \$9.00. More than that, the extra amount of flowers that "Dorothy Gordon" always produces brings the total up to \$12—**just double** what an equal number of Enchantress will yield.

**50,000 rooted cuttings already sold
this fall without advertising.**

This magnificent flower has a lot of other splendid features—size, fragrance, substance, etc., but the thing we want to "hammer home" to you right now is the fact that "Dorothy Gordon" is a **real money-maker**. We quote strong rooted cuttings at the reduced price of

\$6 00 per 100; \$50.00 per 1000.

When in Philadelphia, Be Sure to Look Us Up

Washington Beautiful Cerise : :

SPORT of Enchantress; the same shade as Lawson; shown at all the Flower Shows in the same class with Afterglow, Aristocrat and Lawson, winning highest honors in every competition which proves its quality. The color is a beautiful dark pink or cerise, all the other characteristics the same as Enchantress from which it is a sport.

How many new ones come out every year that do not make good? We offer you a sure thing in Washington one we all know has made good.

Rooted cuttings, guaranteed satisfactory, \$10.00 per 100; \$20.00 for 250; \$75.00 per 1000.

CHICAGO CARNATION CO.,

A. T. PYFER, Manager
Phone Central 3373.

35-36 Randolph St., Chicago.

Toledo, O.

The business has again been satisfactory and since chrysanthemums are on the decline, pot plants are forging to the front. The call has been good, locally as well as shipping. In fact it is hard to keep blooming plants long enough to have them just right and then some must be reserved for the approaching holidays. The demand for chrysanthemums Thanksgiving week cleared up everything that was good and no good. Many flowers had to be cut that would have been better with two more weeks on the plants. Carnations are more plentiful and the quality is getting better as well, but what will we have for Christmas if the weather keeps up as it has been for the last six weeks? We have forgotten the looks of the sun, snow has been falling steadily and the thermometer down to 14 is certainly not encouraging. Our seedsmen are busy with their catalogues and some new seeds have come to hand, though very few so far. J. L. Schiller has his price list in the hands of the printers and expects mailing some early in January. A line of seeds of those most necessary to every florist has been added while cyclamen and primulas are again the leading feature.

FLORISTS' CLUB MEETING.

The flower show of flowering pot plants held by our club on December 6, at the store of S. N. Peck, for the benefit of the members, was a great success. There were a good many more plants exhibited than expected, the number of competitors was larger and the quality was good to very good, though the very good applies to out-of-town exhibitors and stock bought out of town and exhibited by the buyers, a very easy and convenient way of taking prizes and certainly not very commendable. This show had attracted several out-of-town visitors, who were well repaid by what they saw and the general good time they had in our midst, so good that all joined the club right then and there. Liberal cash prizes were offered for cyclamen, *Primula chinensis*, begonia (Lorraine type) and cinerarias, the latter being a special prize given by our local pot manufacturer, F. W. Ritter. S. N. Peck received the prize on cinerarias. The first prize for *Primula chinensis* was given to J. Barrow for a fine specimen of the variety Caruncle, a deep brilliant crimson, a color that sells on sight. The second prize went to S. N. Peck for a single white. The first prize for begonias was taken by C. Winterich, Defiance for a very well grown Gloire de Lorraine, while the second went to S. N. Peck for Glory of Cincinnati. The prizes called for the best begonia of the Lorraine type, and while the flowers of G. Cincinnati are decidedly larger, the habit of the Gloire de Lorraine seemed so much better that the decision was undoubtedly just. Lorraine was simply a ball of pink, while Cincinnati had all its flowers on top of the plant. Of course it is said that Cincinnati is the better keeper, but that was not to be decided. C. Winterich also carried off the first and second prizes for cyclamen, his cyclamen were magnificent specimens, as good as I have seen anywhere in my experience. The other exhibitors were Krueger Bros. and J. L. Schiller, the first with cyclamen and the latter with cyclamen and double chinese primroses. Our next meeting will be held the coming week and prizes will be awarded for the best pots made up of foliage and flowering plants to be retailed at a price within the reach of most people. SCH.

NEW YORK.—Plans have been filed for the erection of three greenhouses in the Bronx Botanical Gardens near Bronx boulevard and Bleeker street, to cost \$23,700.

Baltimore.

A snow storm, which the weather bureau's local officials declare a record of severity for December, prevailed on Monday and Tuesday, followed later by lighter ones, making about twelve inches of snow on the ground. During the storm, fortunately, a very low temperature did not prevail, but afterward there were two or three mornings when the mercury touched the zero mark. Naturally, the effect on business was very detrimental and the street vendors beat a retreat and were not to be seen, though one of the enterprising papers of Saturday had a photograph of one purporting to be "selling flowers with the temperature near zero." At this writing, due to the weather, all cut flowers are scarce.

The season of social activity is in full blossom. Some zest has been given to various affairs by a visit for a few days of Miss Helen Taft, daughter of the President, who came for the first german of the season, which caused a day of great activity and interest in the stores, demanding the highest grade of flowers for the occasion, heavy drafts necessarily being made on other cities for orchids, gardenias, lily of the valley and American Beauty roses, of which the local supply was insufficient.

John Cook and Mrs. Cook left on December 7 for a winter in Florida and Cuba, having been unable to get railroad reservations earlier, their intentions having been to start about December 1.

Charles L. Seybold determined to resign his place in the service of the Park Commission and surrender without waiting for legal pressure the house which he occupied in one of the parks.

S. B.

A Grand New Carnation

Bright Spot

Outclasses everything heretofore grown in the dark pink class. Won first honors in the 100 class for best dark pink at the A. C. S. meeting, Pittsburg, January, 1910, also at the Chicago Flower show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

NOW READY—New 1910 Edition

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

THERE are times, You Know, When Price is Not the Only Factor in Landing a Job

Every once in a while a man realizes that it's good business to **spend money to save money.** There is much to be said in favor of a repair free house like these iron frame ones of ours are.

Write to us.

Hitchings & Company

1170 BROADWAY

NEW YORK

Plan 105

Just another one of those splendidly proportioned Curvilinear Palm Houses that we have been building so many of lately.

It has a raised vestibule lobby and the sunken garden effect for the rest of the house.

It is, to our way of thinking, the ideal way of treating Palm Houses.

Our New Catalog shows several interiors of Palm Houses that are arranged with the raised vestibule or lobby. If you have this catalog, look on pages 54 and 55. If you haven't a copy, send for one. We want every Gardener and Superintendent to have one.

Lord & Burnham Co.

Irvington, N. Y.

New York Boston Philadelphia Chicago
St. James Bldg. Tremont Bldg. Heed Bldg. The Rookery

Brampton, Ont.

The annual flower show held in connection with the Ontario Horticultural Society's exhibition in Toronto last week hardly came up to the standard of previous years. The reasons would be interesting to learn; meanwhile the fact remains that the bulk of the prizes came to Brampton as usual. The Dale Estate exhibit practically monopolized the space with eight first prizes out of eight entries in chrysanthemums, eight first and one second out of nine entries in carnations, and four firsts and two seconds in roses as the result. No doubt this feat can be performed again, but in the interests of floriculture we shall all hope for a little more competition next year.

NOTES.

In your second issue of November your Toronto correspondent remarked that the growers were "boosting" the price of violets. One does not remember anything having been said six weeks ago by the same writer when these innocent little blooms went from their beds to be slaughtered at 40 cents per hundred. In Canada, at least, violets are very much off crop after the first big picking in the fall, and the grower is very lucky whose weather conditions are favorable to gathering at Christmas—the time when they are most wanted. In the meantime, somebody "has to pay the piper."

The extraordinary pressure of business this year at the Dale greenhouses has resulted in extended hours for the men outside, many of whom will be feeling the cold if all the building operations undertaken are to be completed before 1911. Everything inside is in first rate condition, and prospects very hopeful for the holiday rush.

The town's water supply was cut off for nearly a week on November 14,

There is not a house built today, that has the extreme lightness, beauty and practicalness of our U-Bar Curved Eave.

through an accident to the intake at the lake, and all the greenhouses in this vicinity were severely taxed during that period. Extra hard work and vigilance on the part of the engineers, however, together with water pumped from the creek, helped to tide over the difficulty.

Mark Henderson and Walter Calvert are enjoying the first fruits of their respective ventures this season, the former having just cleared his new greenhouse of a splendid crop of chrysanthemums and the latter of a very satisfactory harvest of violets.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,

and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

Garman's Antipest

INSECTICIDE AND FUNGICIDE

For the Garden, Orchard and Greenhouse

Non-poisonous and harmless

to vegetation.

Kills Green Fly, Aphides, Bark Lice,
Thrips, Mealy Bug, Red Spider, Scale,
Wire Worms, Ants and Sugs.

This is the Grower's Friend. Handy to
use, cheap and effective, mixes readily in
water. Destroys all insect pests and
keeps down filth. Circulars on appli-
cation. \$1.50 per gallon. Also in
quarts, half gallons and in bulk.

Holiday Books

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. \$1.00.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. \$3.50.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. \$1.50.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; post-paid, \$1.21.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.

MANUAL OF THE TREES OF NORTH AMERICA (Sargent).—The most complete and authentic work on the subject. The pages number 826, with over 600 illustrations. \$6.00.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. \$6.00.

THE GOLDFISH (Mulertt).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. \$2.00.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. \$1.50.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. \$1.25.

DWARF FRUIT TREES (F. A. Waugh).—Their propagation, pruning and general management, adapted to the United States and Canada. It has 45 illustrations and 123 pages. 50 cents.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

YARD AND GARDEN (Baker). An excellent book treating on the method of making home gardens attractive. The author covers a wide range of subjects in quite an able manner and the book is full of interest for the amateur gardener; 140 illustrations, 420 pages, \$2.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.

THE CULTURE OF WATER LILIES AND AQUATIC PLANTS (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.

EVERYBODY'S PAINT BOOK (Gardner).—The author has given in this book easily understood instructions for painting anything from a board fence to a fine room and so well is it illustrated that almost every tool a painter needs is shown and described. The perusal of this book will save much money to those who have a bent for this kind of work. It contains 180 pages. \$1.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. \$1.50.

HOW TO MAKE MONEY GROWING VIOLETS (Saltford).—This is by a practical grower who has made a success of the business. No grower of violets can afford to be without it. 25 cents.

BEAN CULTURE (Seyce).—An excellent practical treatise on this important crop containing instructions on all phases of culture from seed sowing to harvesting and marketing. Profusely illustrated, 144 pages. 50 cents.

THE PRINCIPLES OF FRUIT GROWING (Bailey).—The entire subject of fruit culture is treated very thoroughly in this illustrated volume of 516 pages. It is a book that no up-to-date fruit grower can afford to be without. \$1.25.

HOW TO LAY OUT SUBURBAN HOMES (Kellaway).—Contains many useful hints and practical plans as to improving and laying out suburban homes and grounds. There are 112 pages, 38 half-tone illustrations and 15 plans and maps. \$2.

THE BOOK OF WATER GARDENING (Bisset).—A most complete and excellent work on this fascinating subject. It is written by a thoroughly competent cultivator and is up-to-date in every particular. It contains 200 pages and 139 fine illustrations and is equally useful to the amateur and professional. \$2.50.

GINSENG (Kains).—At the present time, when so much interest is taken in ginseng, it will be interesting to peruse this volume, which tells all about the plant in a way that all may understand. The 144 pages are freely illustrated. 50 cents.

THE ORCHARD AND FRUIT GARDEN (Powell).—One of the most complete works we have seen on this subject for a considerable period. It is divided into three parts, the orchard, the fruit garden and cultural directions. The volume is well illustrated and the author is a practical man who knows his subject. The book contains 321 pages. \$1.50.

LANDSCAPE GARDENING (Waugh).—This is a very useful little book on the art of landscape gardening. It will be found exceptionally valuable to amateurs, as it covers in detail the numerous problems that come to the owners of small gardens. It is freely illustrated and the pictures have been chosen with a view to informing the reader rather than decorating the book. 50 cents.

Our Supplements

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue as otherwise they may miss some of this high grade work.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Chrysanthemum Stock.

The chrysanthemum grower should by this time have his stock plants selected and blocked up where they are to be grown for the next season's cuttings. There were many novelties exhibited this year that are going to make good commercial varieties, and if it was impossible to visit any of the fall shows, attention must be given to the opinions that are being and have been expressed regarding the merits and demerits of these varieties, by unbiased and uninterested writers. These should all be weighed carefully and the opinions and judgments of the committees of the Chrysanthemum Society of America noted and if any variety looks as if it may fill a want the purchase of a limited quantity will not cause a heavy outlay, and if it does not come up to expectations, no serious loss. But if, on the contrary, it proves a good thing, there will be a great gain, for next year the stock can be greatly augmented and to the grower who has a retail business will be a great feature to show his customers. Of the varieties that were introduced this year, much has been written, and where a stock of any of the varieties is desired, it is not too late to purchase a few stock plants and raise the spring stock oneself, which will certainly be a great saving over waiting until spring and buying the young plants. Beside the grower knows what he has when he handles his own stock, which, in the majority of cases, is apt to be fully as good, if not better, than any he can buy.

Bulbous Plants.

The bulbs of the earlier varieties of narcissus and tulips, if procured early in the fall, should now be well enough rooted to produce good flowers. Those that are first brought into the greenhouse will require more heat than they will later on, and should be shaded to obtain the necessary length of stem. Where there are hot water pipes under the benches the grower has an ideal place to force these bulbs early in the season. The pots or flats should not be placed directly upon the pipes but an inch stick two or three inches wide

can be laid upon the pipes, and the pots or boxes placed upon these, which will allow the heat to reach the soil and yet not burn the roots as might be the case were they placed directly upon the heating pipes. If placed close to pipes they must be carefully watched for they dry out very rapidly and should be well watered frequently. A few papers or other shade hung on the light side of the bench will give the necessary shade until the plants have attained the requisite height when they should be given full sunlight that the foliage may assume its proper color. The Von Sions and early trumpet varieties of narcissus can be easily brought into bloom as well as the earlier varieties of tulips, but be sure that they are well rooted and that the receptacles in which they are grown are filled with roots. If the bulb stock is still out of doors, and the grower has a cellar where they can be held cool until wanted, it is much better to bring in the stock that is to be forced during the severe winter weather, and store it in the cellar where it can be easily procured during the cold season. It is a very hard and disagreeable job, and sometimes almost impossible, to dig outdoors during the hard winter, and get the boxes and pots necessary for a continuous crop, and just as good results can be obtained if they are stored in a good cellar after the roots have formed.

Sweet Peas.

The sweet peas that were planted in the fall and are now in bloom, or approaching the blooming stage, should be kept tied up and growing erect. The beds or benches will have to be gone over very often and the vines caught into the strings, for the plants grow very rapidly and if they get away from the supports the growths hang over and the blooms will have crooked stems, making them of much less value. The plants that are now in bloom will be greatly benefited by an occasional stimulant. A weak solution of nitrate of soda will be of great assistance, resulting in longer stems and better flowers. It is now time to plant the seeds of the winter blooming varieties in order to have a good crop for

Easter, when the earlier plantings are beginning to get through blooming. These can be planted directly in the bench, placing four to six seeds six inches apart and about two inches deep, the rows far enough apart that the flowers can be easily picked and so the vines will not get entwined with the adjoining rows, three feet being a good average distance between rows. If the benches are not yet ready the seed can be sown in three or four-inch pots and later transplanted into the benches. Great care must be taken in the watering of the seed and the plants when they first come up. They should be kept on the dry side until they are at least six to eight inches high or the seed will rot and the plants damp off. Light fumigations or spraying with nicotine solutions should be followed up continuously in growing these popular flowers.

Violets.

The violet plants should now be gone over regularly, and all the old leaves that are showing decay should be carefully picked off and burned. At this season of the year all the air possible should be given these plants, never mind if the temperature runs low, take advantage of every chance to give the violet house ventilation. The violet is a cool-growing plant, and does not take kindly to artificial heat, so the heating pipes should be taken off at the earliest possible moment and as soon as the sun warms up the houses in the morning, the ventilators should be opened a little. Careful watering should be done now, for with the soil covered with foliage the evaporation is very small and it is very easy to overwater. The soil should be kept well scratched up on the surface, to allow the air to get in and keep it sweet. Everything that can be done to keep a bright, clear, cool atmosphere during the dark, short days should be the aim of the grower for the violet cannot be successfully grown in a stuffy, close and damp atmosphere. Black aphids are sometimes very troublesome in violet culture but ordinarily do not get a hold, unless the houses have been run too warm. Where they obtain a foothold, they are very hard to get rid of by fumigation with tobacco, for they get into the crowns and under the foliage, where the fumes do not reach. The most efficacious remedy is fumigating with hydrocyanic acid gas and this should be followed up at least once a week for two or three weeks. Where this remedy cannot be used a weak solution of tobacco liquor dropped on the crown of the plant, if continued every few days, will keep these pests down. Aphine is spoken very highly of by those who have tried it, and any grower troubled with these insects should give it a trial.

CALAIS, ME.—Ernest G. Young has purchased a one-half interest in the floral business of J. R. Sederquest at 173 Main St., and the business is to be carried on under the firm name of Ernest G. Young Co.

ELDORA, IOWA.—The Pollard Floral Co. has erected two new houses 150 feet in length of Lord & Burnham construction, making the area of the plant 15,000 square feet. These houses are situated on a beautiful piece of property consisting of thirty or forty acres, much of which will be planted to fine nursery stock.

THE RETAIL TRADE

Conducted by Robt. Klft, Philadelphia, Pa.

Basket of Statice and Red Ruscus.

SEE SUPPLEMENT WITH THIS ISSUE.

There are always corners or places in the store or office where a little ornamentation is necessary that require something either lighter or of more color than a decorative plant and the dried grasses and flowers and prepared foliage now manufactured, arranged in handsome baskets, make very attractive features for these locations. They can also be placed in many drawing rooms or halls, being very decorative features in dark corners where no decorative plant would either live or show

Christmas Basket by E. Weinhoeber Co.,
Ardisia Crenulata in Bark Basket.

to advantage. Among the dried flowers, the statice is one of the finest for this purpose. It is light and showy and will keep in handsome condition for a long time, and arranged with the dried grasses or perpetuated leaves and boughs is very ornamental. In the grasses, the plumes of pampas grass, and the spikes of eulalia, or the old Arundo donax are very useful and ornamental in the arrangements. There are many dyed leaves, boughs and vines now manufactured and carried in stock by the supply houses, such as the beeches, oak and red ruscus and the greenhouse products, are colored and perpetuated, very beautiful sprays of adiantum and asparagus plumosus are now to be obtained that add materially in these decorative features. Any of the products arranged in handsome receptacles and placed in prominent locations in the store are very decorative and sure to attract the attention of the customers.

The basket which we illustrate with this issue is a very handsome and simple arrangement in a beautiful basket and shows what an attractive feature can be made of these materials.

Harvest Wreaths.

Plait the three different kinds of grain—wheat, barley, oats—into separate little bunches, of about a dozen heads in each bunch; and cut off the straw so as to leave it about a foot long.

The wreath of evergreens, etc., should be wound with fine wire upon a strong string, the required length of the wreath, and the little bunches of grain woven in at regular intervals, and in proper rotation oats, wheat and barley, so that when the wreath is fixed up, the grain hangs out a fringe along the bottom. Into the top of the wreath flowers may be studded as thickly as possible. A. E. K.

Suggestions for Decorations.

The decoration of a buffet sideboard forms an important part in the floral arrangement of the dining room. Across the back of the sideboard nothing is better than an artistic arch formed of flowers and foliage of the prevailing flower used in the decoration. Tall growing plants and palms can be arranged and the wire for the arch placed in the pots, the pots being concealed with ornamental cases or fern fronds; common ivy forms a good foundation.

A silver epergne filled with cut flowers placed in the center. Flowers for stands on the sideboard should be large and arranged with as bold an effect as possible.

A rough block of ice with ferns and flowers around the base—a few stems of blooms inserted in the ice (little holes having been drilled for that purpose), a few light sprays of creeping ferns lying over the whole has a charming effect. But when this style of decoration is used there must be some vessel employed into which the water from the ice can drip; small neat plants should cover this.

It may not be amiss at this time to state that one of the most talked about and most oddly artistic effects was shown in a ball decoration which my late father made for James Gordon Bennett at his Bellevue avenue residence in Newport, R. I. It was an outdoor affair—a platform having been built on the lawn. In this temporary ballroom a huge mass of ice blocks were placed at side in the middle center of the long platform; the blocks of ice were so placed that a square opening appeared between the blocks in which miniature electric lights were placed, covered with green catgut; these were surrounded with small rosebuds and their foliage, while asparagus vines fell from the aperture, covering the larger part of the ice cakes. A huge garland of these same roses finished the lower part of the ice mound; and a loose spread arrangement of roses fell in uneven folds over the top of this mound of ice. The main color scheme was pink. From the four corners large hanging baskets were suspended, filled with American Beauty roses and asparagus vine. These were caught below with wide green sash ribbon and extended to the center of the dancing floor, where it was attached to an immense

ball of American Beauty roses surrounded with miniature electric lights covered with green. Pink rose garlands were draped in artistic fashion along the middle of the walls, or rather the side awnings. Palms were placed where necessary. The souvenirs for the ladies were leghorn hats filled with pink moss roses tied with immense pink sash ribbon to carry over the arm; a large round boutonniere of pink carnations were given the men. It was conceded to be the most picturesque ball and garden party that was ever given by a private individual and one of the largest both in expenditure and number of guests entertained.

A. E. K.

A Christmas Window.

The holiday window displays of H. R. Hughes, Van Buren street, Chicago, always show a great deal of thought and originality and the picture he presents this year in his window for Christmas, which we illustrate, represents one of the features of the garment workers' strike now existing in this city. The poorly-clad child, with her small dinner box in her hand, entering the shop, and the other poor girl trying to sell the papers, which were issued in the aid of the strikers, with the story of the hardships and poverty of the underpaid help, under her arm. Mr. Hughes always issues a card or folder picturing his window displays and the following story is printed this year in the folder entitled, "What the Big Chief Thought of Chicago":

"A number of years ago an old Indian chief, who, in his day, had been quite a power among the western tribes, and had caused the government a little trouble, came to Chicago to see the big city, about which the cattlemen and ranchers had told him. He had letters from army officers to influential men in the city, and these men took great pains to show him about and impress him with the wonderful superiority of the white man over the red. They showed him the stock yards, the department stores, the high buildings, the parks and driveways and the great manufacturing plants, and, when it was all witnessed, they set him down in a comfortable chair in one of the clubs, and asked him what in all Chicago had made the greatest impression upon his mind. His reply was, 'Little children working.' In his native state he had never known of such a thing as children doing hard labor. They had always been free to play at will, developing their sound and strong bodies to do the work, or fight the battles of mature years.

"Since that time I have never considered the Indians quite so uncivilized as they are commonly thought to be, and I have never viewed our boasted civilization in quite the same light as before. We are a wonderful people, there is no doubt, and we have achieved some very wonderful things—in fact, some are fearfully wonderful. One of these exploits is the harnessing to a long day's work, children fourteen and sixteen years of age, thus stunting their growth, making them unfit to breed another generation when their time comes, and thereby handicapping the republic fifty years from now.

"The streets recently filled with striking girls, driven to desperation in their efforts to compel the clothing manufacturers to pay increased wages

was a sad spectacle and a deplorable state of public feeling. If we must work the children, let us thoroughly supervise their work by state or municipal authorities, and see that they are given a fair chance, and that their work is not too hard nor their day too long, and that their compensation is sufficient.

"We are all believers in religion, and religion embodies the Golden Rule. Any creed is good enough to help things along wonderfully, if it is only practiced seven days a week. It seems to me that the greatest need of our great city of Chicago is not a beauti-

the Japanese air plant, which was supposed to be gathered on the eastern shores of the Pacific ocean, then sent to Germany where it was treated with chemicals to make it everlasting, and afterwards coming to us all ready for the various purposes for which it has become so well known, circling the globe almost before reaching us, this same weed is now being gathered in Jamaica Bay, N. Y., and is being prepared in Mr. Netschert's factory in East New York, thus doing away with the tedious round about methods of securing the air plant and also reducing materially its cost.

CHRISTMAS WINDOW AT H. R. HUGHES, CHICAGO.

ful lake front, nor more automobile driveways nor a big harbor, but a little more morality for six days of the week in business and politics.

"Just to focus a little attention to the children's side of the recent strike, I have put up a scene in the windows of my flower shop on Van Buren street, and printed the folder to tell you why I have done so."

Prepared Plants.

At Frank Netschert's, 39 Barclay street, there were to be seen many things in perpetuated green material that would interest anyone, grower or retailer. We appreciate the fact that the regular dyed-in-the-wool florist abhors everything that is of an artificial nature, yet there are times and seasons when even the most conservative stickler for the real thing will dip just a little into the sea of artificiality, for have we not seen the pseudo-poinsettias carefully intermingled with the choicest of palms and decorative plants in some of the very swellest of our retail displays? Of course we have, and with a stock of the real flowers for selling purposes, and the imitation ones used to help the display, the results necessarily are beneficial all around.

What we started to talk about was not the artificial things, anyway, but the prepared natural things. For instance, that now well known accessory,

Asparagus plumosus, adiantum, holly sprays, oak leaves are all used for perpetuating purposes, and from the extent of the samples on view in the show rooms, and the number of young ladies who are showing the various products to intending buyers, it is quite evident this branch of our trade has grown to immense proportions. The prepared natural Christmas trees were an item of interest to us from the fact that in their preparation they are rendered absolutely fireproof; they cannot burn under any circumstances, and this particular feature should make them popular for certain occasions. We saw them in various sizes, some glistening as though a touch of frost was there among the pinne, and the fact of their being the real thing and yet fireproof impressed us with the notion that for store decoration, as for the home, they should prove to be an acquisition when tried out.

Akebia Vine in Basket and Chair Making.

Consul-General Thomas Sammons, of Yokohama, writes of the various fancy and useful articles, such as baskets, chairs, valises, etc., made of the akebia vine of Japan, and which are now being exported from that kingdom, 14,034 pieces, valued at \$2,360, having been sent to the United States in 1909. The vine produces a fruit which is considered wholesome and palatable.

Christmas Preparations in Chicago.

The retail stores of the city are resplendent with beautiful plants and flowers and festooned with holiday greens, tied with bright holly ribbon, and the handsome window displays are a grand sight at this season. The stores are draped with quantities of holly, boxwood, laurel and other greens artistically arranged on the walls, and the ceilings hung with Christmas bells, tied with bows and knots of bright red ribbon. Beautiful specimens of blooming, berried and decorative plants in the stores are made especially attractive by being placed in handsome baskets and boxes, and the bright and cheery appearance is a grand sight, as one passes by, at this, probably the most decorative season of the year, not only to the florist, but to all tradesmen. Quantities of artificial poinsettias and the highly colored dyed ferns and palms and the bright beech boughs and red ruscus are used in various ways to brighten the scene. While this may be objected to by some, who always abhor anything pertaining to the artificial in the florist's business, yet it gives the store man an opportunity to make a grand display, that attracts

the beautiful specimens of ardisia. The whole is sprinkled with white, causing a light snow effect. It is a beautiful picture and attracts a great deal of attention. In the store is a beautiful display of well-grown Christmas stock.

W. J. Smyth has his windows very prettily arranged. A forest scene on the Michigan avenue side is well gotten up. The group of evergreens with the small electric lights shining through make a beautiful picture. In the other windows were some very fine araucarias with small bows of red ribbon that were very attractive. Poinsettias in pots and ardisias were used in profusion. The beautiful baskets of plants were a feature and also some smaller baskets of statice and the colored perpetuated ferns were nicely arranged and attractive. This store has had an exceptionally good fall trade, and the new auto delivery car is bound to get a good tryout during the rush.

At the Ernest Wienhoeber Floral Co. was seen a beautiful display of Christmas stock. The show house leading from the office has been transformed into a beautiful salesroom. The sides were covered with bark and the

and sides into which is entwined poinsettias and hanging from the ceiling are balls of boxwood and red ruscus. A fine assortment of plants in baskets with arrangements of ruscus complete this fine show window. The store is also beautifully decorated with greens and Christmas bells, and a profusion of fine plants are shown.

John Mangel's store is exceedingly brilliant with high colored plants and Christmas offerings. The doors are banked with evergreens and wreathing and a fine assortment of Christmas plants are shown. Poinsettias, both cut and in baskets, are very prominent. A very pretty feature noticed here were the Christmas bells, arranged in groups hanging from the ceiling, tied with bright red ribbon with a spray of mistletoe entwined.

H. C. Rowe has a very bright attractive store and the baskets of boxwood and red ruscus are prominent features and very attractive, as well as the nicely arranged baskets of the highly colored adiantums.

Bohannon has a splendid assortment of blooming and decorative plants and a staging has been erected to properly display them. Beautiful specimens of azaleas, begonias and cyclamen are to be seen, and in the decorative plants especially noticeable were some fine Pandanus Veitchii, that were very well grown and highly variegated.

At Fleischmann's, highly colored crotons were a great feature, the plants were large and brilliant and with their matt pot covers made a beautiful display.

Andrew McAdams, on the south side, has some very well grown Christmas plants, the primulas were as fine as one often has the pleasure of seeing, and the azaleas were also very fine. The houses were all in splendid condition, and everything in tip-top shape.

Ranunculus.

A bulb that is not as generally grown by the florist having a retail trade as it should be, is the ranunculus, especially the Persian and turban varieties. The bulbs are very cheap, and the flowers in the late winter or early spring are very attractive, and a great change from the flowers that have been in bloom all winter. One reason that they are not more generally grown is the many failures that have resulted, mainly from a lack of knowledge in starting the bulbs, that is, in watering them before they reach the growing stage. The bulbs are very dry when received and have a claw-like appearance, a crown in the center and the small fleshy roots spreading downward from it. They should be planted in a shallow flat, from one to two inches apart, in a fairly damp soil and then soil enough placed over them to just cover the bulbs. The flats should then be placed under the benches in a cool house. Under no circumstances should they be watered until growth has started, for if this is done the bulbs will rot. The boxes should be covered with heavy paper, to prevent any drip from the bench falling on them, and to prevent evaporation, as well as to keep them dark. In two or three weeks the tops will begin to grow, and the new roots make their appearance. They can then be taken from the flat and planted in pots or deeper boxes, or as is the

CHRISTMAS BASKET BY SAMUEL MURRAY, KANSAS CITY, MO.

Poinsettia Pulcherrima.

the eye of the Christmas shopper without danger of great loss of perishable stock, which is to be taken into consideration at a time when the prices of everything are soaring so high. The majority of the stores are using the Christmas stock for their window displays, but a few special features were noted at some of the stores.

Freidman has a beautiful window decoration. On the left, looking in, is a representation of an English church placed upon a hill with a walk of stone steps up to the door, around the church are arranged small evergreen trees, and on the sides of the hill, which are of green moss, are nice plants of ardisias hanging full of red berries, and at the door of the church stand two small figures, representing a man and woman about to enter. At the right is another hill, upon which are also evergreens and ardisias, and in the dell between which is also of green are more of

roof of the greenhouse hung with cloth over which is draped Southern smilax, from which hang quantities of Christmas bells, and glittering everywhere are small electric lights, making a very beautiful arrangement. Beautiful baskets filled with poinsettias, azaleas, begonias and cyclamen are on every side. A very handsome basket of cattleya plants in bloom was a beautiful offering for some purchaser.

At Muir's, on Michigan avenue, were seen very handsome plants, azaleas and poinsettias were in fine condition, and the baskets of plants were splendid features. The holly wreaths were prominent and they were very artistically arranged. Very fine decorative stock was to be seen in the houses. Trade has been very good at the store all the fall and an elegant Christmas trade is predicted.

C. A. Samuelson has a gorgeous window display. Holly draped at the back

custom with many growers, set along the edges of the carnation benches, and they will give very beautiful flowers during the last of March and April, when they will make a valuable addition to the spring-blooming stock.

THE ROSE.

CARDINAL, while flowering freely and bringing flowers of good substance, has been found of poor color in many southern points during summer.

A **LITTLE**, dry, air-slacked lime is of assistance in sweetening the surface, but if used too abundantly, it is apt to fine down the surface soil too much.

RADIANCE is a worthy successor to **My Maryland**, stronger in growth, making an immense number of shoots and a fine clean grower. It stands the summer heat well and the flowers are a delightful shade of rose, pink, borne on good, erect stems.

Roses in the South.

With the holiday season at hand the crop should be pretty well advanced. Constant watchfulness is needed at this time to have the crop in perfect condition. The weather man is liable to dish up a great variety, consisting of specimens torrid and arctic, with a few Scotch mists or miniature London fogs thrown in for good measure. The atmosphere during a warm, cloudy spell is generally surcharged with moisture and great care is needed to ward off mildew. A few inches of air should be kept on the houses all night and a little fire heat used in the early morning hours. Even if the temperature runs up a few degrees, this treatment is better than trying to keep it at normal without fire heat. The heat keeps the air moving and dry and prevents any condensation from falling on the foliage. A light dusting of sulphur and air-slacked lime applied to the foliage in such spells is efficacious as a preventative. While it is always better to have ventilation on both sides of the range I have never seen any harm resulting from opening those on the south side with a south wind blowing. The south winds are generally balmy and cause no mildew.

Liquid manure every ten days will be enough fertilizer to carry the plants over the holidays, if the beds lately had a mulch or top dressing of manure and bone flour. The beds may not require water every day but they still need a good quantity. If allowed to get too dry during a cloudy spell the foliage is liable to burn on the sun's appearance. Killarney is the most touchy subject in this respect and should have first attention.

Any leaves affected with black spot and dead leaves on the beds should be regularly removed and the surface of the beds lightly rubbed with the palm of the hand. The hybrid teas are the more likely to show traces of black spot. Picking off the affected leaves, keeping the plants tied up so that the air circulates freely through them, syringing early enough so that they dry off thoroughly before sundown, and proper ventilation is about all the treatment necessary to prevent this fungus from spreading and is better than all the dope that can be applied.

WM. LEAR.

Potting and Liquid Manure.

Now is the time to get in some good sod soil for potting. If this work has not been looked after it should be attended to at once before too much frost gets into the ground. A good rick of potting compost prepared in the fall and protected is much better for potting off **Manetti** stocks and the young rose stock than to use the soil that is left over from the spring composting—as it contains more fibre and is fresher in every way. Be sure to get a good stiff clayey soil and a soil full of fibre for all own-root plants. A lighter soil will do perhaps to pot off **Manetti** stocks but it must be a good sod in either case. If one prefers, the soil can be piled up, mixing the manure with it in layers, using about one part manure to three of soil, and it should be turned as often as possible until

grow roses successfully is a manure water system. Last fall about this time I made some suggestions about the benefits derived from the judicious use of liquid manure, describing the installment of manure tank, pumping outfit, etc. For the benefit of those that wish to arrange a simple system to carry on this work that will save much time and expense I will describe a practical outfit which can be arranged and should be installed (we think) in any rose-growing establishment, great or small, but it is for the small growers just starting out that may be somewhat benefited. First of all the tank should be large enough to hold enough manure water to water all the roses on the place. It should be built in the boiler room for convenience' sake and to prevent freezing, allowing plenty of room to fill

CHRISTMAS BASKET BY STUMPP, NEW YORK.

Raffia Basket with Cyclamens, Cocos and Ferns.

it is needed; more manure can be added later if necessary when screening it for the potting. Add about one-fourth peck of ground bone to every cubic yard of the compost and keep the soil protected from the weather, especially rain or snow. Freezing will not matter if the soil is not too full of moisture; at all events it should be in good shape to handle at any time on the potting bench after the December 20. It puts the grower at quite a disadvantage to have a consignment of **Manetti** stocks arrive with nothing but a lot of sticky soil to pot them off in.

Another matter we are inclined to believe of considerable importance to

and empty the tank of manure. The tank should be about three feet deep and can be built of concrete, leaving a corner of the tank lower by several inches than any other part of the bottom, so as to drain all the liquid to one spot. This is where the pump suction pipe should be placed. Two removable screens should be provided and three would be better (if the tank is to be a large one), using one-half-inch mesh galvanized wire screen next the manure and one-fourth-inch mesh for the second screen. The screens should be placed far enough apart to prevent clogging. See to it that the liquid when ready for use does not contain anything coarse enough to

CARNATIONS ALMA WARD AND MRS. C. W. WARD AT HENRY M. WEISS & SON'S, HATBORO, PA.

Alma Ward in the Foreground.

stop up the faucets or pump valves, for this will cause a great loss of time which can be easily avoided by screening properly at the start.

For a range of glass, say from 15,000 to 20,000 feet, a two-horse power gasoline engine will furnish sufficient power to run a rotary pump, requiring a one and one-fourth-inch flow and intake pipes. A Fairbanks-Morse two-horse power engine and Gould pump belted to same makes an excellent combination. We have been using such for over five years without a dollar for repairs. The same pipe line that is used for fresh water can be used for the manure water, first arranging the water pipes so that the boilers can be filled and water obtained for the cut flowers while using the manure water, otherwise you will foul the boilers and make a mess of things generally. This can be arranged by supplying the boilers and flower cellars or any other clear water pipes with a line of pipe coming from the water main and separated from the manure water system by a "cut-off." We think this plan would be the most satisfactory one, considering the expense of extra piping just for manure water alone. An overflow at the tank should be arranged so as to work automatically as soon as the man with the hose closes the faucet or in chang-

ing the hose, going from one house to another, etc. The overflow can be arranged the same as a safety valve is arranged on a steam boiler, so it will lift when pumping directly against it and close when the water is being used, adjusting this with weights until all overflow is cut off as soon as the line is in use. The grower will have to use his own judgment in reference to locating the tank and other little arrangements, as there are seldom two establishments planned alike. We mention this make of engine and pump because it has worked perfectly; there are many outfits on the market combining engine and pump—it is up to the grower to make his own selection. As to power, etc., this outfit allows for one man using the hose—for two men at the hose we would suggest double the power all around, but taking everything into consideration the gasoline pumping outfit for manure watering (or for fresh water pumping where the town supply cannot be used) we have found it the best of investments and a great labor-saving device.

As for the benefits derived from the use of liquid manure there are many. First of all there is no waste of the manure as in mulching, and mulching during the late fall and mid-winter has its drawbacks, for even a man skilled

in the art of watering will find it a difficult matter to keep the beds just right under a mulch, and again much dirty and laborious work is done away with. Just a few suggestions regarding the strength and use of the manure water: Cow manure we prefer to any other in making the liquid as it can hardly be made too strong. Sheep manure is good also, but must be used with care, using only half the quantity of good sheep manure as you would cow manure to the same quantity of water. If the plants require feeding, which they usually do about the middle of November, start up with the liquid cow manure and apply it at least once in every ten days. Clean the tanks regularly and always allow the water to stand at least four or five days before using it, and water on clear days, early in the day. Avoid wasting the manure water by pressing the soil firmly at the edges of the beds, so the water cannot run off before soaking in. Give the liquid manure a fair trial and stick to the best fertilizer we have yet found for rose growing—unadulterated cow manure. E.

ST. LOUIS, MO.—A new corporation has been organized and incorporated as the Allegetti Floral Company, with a capital stock of \$500, the incorporators being Bernard P. Barasa, E. S. Berdine and Edmund J. Rice.

THE CARNATION.

The New Varieties.

The new varieties of carnations for 1911 are now being largely advertised and exploited. Intending purchasers, if located within easy distance of the home of any of the novelties, should endeavor to visit the place and judge for themselves, of the qualities and possibilities of the variety under consideration, also, if satisfactory, and a trial is decided on, place the order early, to enable the disseminator to make an early delivery, and to give the variety every possible chance to make good. A short review of the novelties now being offered, so far as they have come under our observation, may be of some help to buyers located a long distance from the place of distribution.

Washington.—The dark pink or Lawson colored sport of Enchantress, has been exhibited in magnificent form during the last two months, first at the Chicago flower show and again at the Chicago Florist Club meeting. It is best described as a well grown Enchantress bloom of the same color as Mrs. T. W. Lawson. The stem, form of flower, and growth are identical with Enchantress. Taking this into consideration together with the beautiful color should make this a good addition to our list of standard varieties.

Bright Spot.—Also a dark pink variety, very bright glistening color, with good long wiry stems holding the flower erect. The fine color, form and general makeup of this variety promises well for its commercial qualities.

Bonfire (Mrs. Beckwith).—Color bright scarlet, has the appearance of possessing fine commercial qualities, the form of flower is good, the size is of good commercial standard, and the stems strong enough to carry the flowers erect. The color is particularly bright.

White House.—A very large white of the White Enchantress form and make-up. This variety was shown in fine form at the carnation meeting in Pittsburg. It is a very large flower, good clear color and has fine long, stiff stems.

White Wonder.—Style of White Perfection but a fuller flower, fine form, good color, large size, with stem long and strong, holding up the blooms in fine shape. We have seen this variety at several shows and in our opinion it is a worthy addition to the white varieties.

Gloriosa.—A beautiful shade of true light pink, fine large flower, good form, strong stem. One of the most promising of any that we have seen.

We are now able to judge of the qualifications of the 1910 novelties, many of them showing up well to date and increased plantings will be arranged for another season.

Mrs. C. W. Ward has made good growth and is now showing a good crop of buds and blooms. It is a fine large flower, good even color of bright pink, and the stems are long and strong, holding the flowers erect, a very promising variety for the commercial standards.

Alma Ward.—A magnificent white of the largest size and elegant form, strong calyx, borne on long stiff stems, the habit of plant is good, but so far the blooms have been few and for ordinary commercial purposes it will

have to do better as regards freedom.

Dorothy Gordon.—Beautiful rose pink resembling Rose Pink Enchantress, but with us very much larger in size and more even in color, good, easy grower, a promising variety.

Shasta.—A good addition to the commercial whites. Our plants were very small and it took them a long time to make growth in the field, so that we cannot be a fair judge as to the blooming qualities, but the blooms we have had have been fine, good clear color, fine form and large size, the stems are stiff and wiry, carrying the flowers upright.

Scarlet Glow.—The brightest of all the scarlets and of extra fine form, its only drawback being a weak stem. If we can only grow this one with stem enough to carry the flower erect,

Carnation Buds Turn Black.

ED. AMERICAN FLORIST:

The leaves on the ends of my carnation plants curl up and stick together and the bud turns black. I cannot find any insects upon them. Can you inform me what is the matter?

M. K.

The curling up of the leaves indicates the presence of thrips. But the cause of the buds turning black would seem to come from the soil or from spraying. I would advise regular spraying of the plants once a week with one of the nicotine preparations, also fumigate regularly. I would also examine the roots of the plants to see if the reason of the buds turning black cannot be traced to soil conditions.

C. W. JOHNSON

CHRYSANTHEMUM DECEMBER GEM.

this would be a winner, owing to its abundant freedom.

Admiration.—With us this is a very large well formed flower, but we cannot get the plants to do anything. They made a poor start and they have not got over it yet.

Sangamo.—A very free, medium sized commercial pink, throws plenty of flowers, of good even color and equally good form, fine easy grower, with strong erect stems; habit of plant very good.

C. W. JOHNSON.

Chrysanthemum December Gem.

December Gem.—A ball-shaped Japanese white, with pink stripe on edge of petals giving a pink or pearly tint to the blooms. Buds selected September 25 were cut December 1, while later ones will give succession to Christmas. Strong stem and ample foliage, 3½ feet high. First Class Certificate December 3. Elmer D. Smith & Co., sponsors.

OBITUARY.

Robert Buist II.

Just before midnight on Tuesday, December 13, Robert Buist, the well known seedsman of Philadelphia, passed away in his eighty-third year at his apartments in the Bellevue-Stratford in that city, having been ill with pleuro-pneumonia.

Mr. Buist was born in Philadelphia September 15, 1837, being the son of Robert Buist, who, in partnership with Hibbert, established the first notable florists' business in Philadelphia and who also acquired note for his successes with roses, the introduction of plants, and as a horticultural author.

In 1855, Mr. Buist started in the seed business, his father having bought the piece of property on Market street for \$35,000. This business was so successful that in two years time he paid back to his father the money expended to acquire the property, and eight years ago sold this property for more than one hundred thousand dollars more than he paid for it. He still continued in business until his death, his present office being on Front street, near Market.

He was a virile example of an upright merchant, devoted to the interests of his business, and, none the less, to the high principles upon which he conceived his business should be carried on. A tireless energy, together with a sincere desire to be of service to those with whom he dealt, enabled him to build up a large enterprise, and to win for himself the honor and respect of his fellows.

It was his desire that his death should not affect in the slightest degree the continuance of the business in which he was so deeply interested. Under the terms of his will, it will be continued under corporate form for the benefit of his estate and of his three leading men who were associated with him for so many years. Harry C. Stahler, associated with Mr. Buist for nearly thirty years, will continue to direct the business as general manager; Edward J. Flood will take entire charge of the sales department and A. B. Kochersperger charge of order and stock department.

He married, in 1861, Miss Herminia Matthieu, who died four years ago, and born to them were a son and a daughter, the former not living to reach manhood. The only surviving relatives being a sister, Mrs. Helen Buist Redford, and a granddaughter, Roberta de Jannon.

Anthony Wiegand.

Anthony Wiegand, the well known florist of Indianapolis, Ind., died at his home, 1620 North Illinois street, December 19, having suffered a stroke of paralysis.

Mr. Wiegand was born April 25, 1832, in Germany. He received his education in his home country, where he remained until he was twenty-two years old. Coming to Indianapolis in 1859, he opened a greenhouse on Kentucky avenue. Here he was so successful, that in 1879, larger quarters being found necessary, he removed to 1610 North Illinois street. The business in this location prospered and in 1900, he took his sons into partnership and adopted the present name of Wiegand & Sons.

Mr. Wiegand was a great lover of flowers and a noted grower. He was greatly interested in everything that tended to benefit and uplift the vocation which he had chosen as his life work and always ready to give his personal assistance to anything that would help the florist business. He was one of the early members of the

Society of American Florists, joining in 1886, and this membership he has always maintained being a constant attendant at the earlier conventions, and he was also a member of the American Carnation Society. In his home city he belonged to the Columbia Club, the Independent Order of Odd Fellows and Royal Arcanum. In business affairs he was noted for his uprightness and integrity, and by hard and persistent labor built up a flourishing business.

In 1865 he married Miss Katherine Kreiss, a native of Germany, and there were born to them two daughters and two sons, Homer L. and George B., who all survive him. The funeral was held Wednesday afternoon, December 21, and the interment was at Crown Hill. A. W. B.

J. W. Colflesh.

In the death of J. William Colflesh, aged 58, which occurred on December 15, the Florists' Club of Philadelphia loses one of its charter members, and one who from the first took an active part in all its work. For a number of years he was treasurer, and was often called to serve on important committees. Deceased was also an active member of the Pennsylvania Horticultural Society, taking great interest in its exhibitions, being one of the committee on arrangements and in later years a judge. He was also a member of the Masonic fraternity.

Mr. Colflesh was very popular with the trade, who were much shocked at his sudden death, which was caused by an operation for some internal trouble and from which he did not rally. He leaves a wife, three sons and one daughter. The business will be continued by Mrs. Colflesh, with the assistance of her sons, who have been for some time taking an active part. The funeral, which was held on Monday, the 19th, was largely attended by the members of the trade. There were numerous handsome floral offerings banked about the casket. The interment was in St. James Churchyard, Kingsessing.

FLORISTS' CLUB RESOLUTIONS.

At a special meeting of the club, held December 16, 1910, to take action on the death of J. Wm. Colflesh, the following resolutions were adopted:

Whereas, Our beloved and esteemed fellow member, J. Wm. Colflesh, has been taken from us by death, therefore, be it

Resolved, That the members of this club desire to put upon record their sense of loss and to extend to his family their deepest sympathy.

J. Wm. Colflesh was one of the charter members of this club, and for many years its valued treasurer and always a diligent and faithful worker for the advancement of the club's interests. In his intercourse with the members of the club he was always courteous, kindly, and modest, and so had endeared himself to us all. He was an ardent worker in horticulture and always willing to do his share to advance the general interest of the cause.

Resolved, That a copy of these resolutions be sent to his family.

ROBERT CRAIG,
JOHN WESCOTT,
F. HAHMAN,
Committee on Resolutions.

Mrs. Mary E. Mergen.

Mrs. Mary E. Mergen, wife of Peter Mergen of Maryville, Mo., died December 15, after an illness of several months at the age of 56 years. She was born Mary E. Hogan, a native of Illinois. She was naturally fond of flowers and plants, which made her a pioneer in this business in northwest Missouri. Starting in a small way in 1884, which was successful from the first, about five years later Mr. Mergen

gave up his other vocations to devote all his time to the floral business, established by Mrs. Mergen, and adopted the firm name of Peter Mergen & Co. She is survived by her husband.

A. E.

Mrs. F. W. Bruggerhof.

After an illness of only one week's duration Mrs. F. W. Bruggerhof, wife of Mr. Bruggerhof, president of the J. M. Thorburn Co., died at their city residence on December 14 at the age of 76 years. The funeral was at Noroton, Conn., where the family's summer residence is located, on December 16. The sympathy of the trade will go out to Mr. Bruggerhof in his sad bereavement.

Morris Co. Gardeners' and Florists' Society.

The Morris County Gardeners' and Florists' Society held the annual election of officers for 1911 on December 14, with the following results:

John Downing, president.
Robert Tyson, vice-president.
Wm. H. Duckham, treasurer.
Edward Reagan, secretary.
Robt. M. Schultz, assistant secretary.
Arthur Herrington, Thos. Stokes, Geo. Harvey, C. H. Totty, John Dunn, Wm. Muhlmichel, Ernest Wild, G. F. Neipp, H. B. Vyse, J. C. Elliott, Joseph Manda, David Falconer, executive committee.

The evening's exhibit consisted of three vases of roses from E. G. Hill Co., Richmond, Ind.; Sunburst, a grand yellow, in fine shape, considering that it was over a week out, every petal perfect; awarded certificate of merit. Rose Queen, a beautiful deep pink; looks like a grand acquisition; certificate of merit. Mrs. Aaron Ward, distinct and attractive; vote of thanks. The judges were Joseph Manda, W. H. Duckham, R. M. Schultz, A. Herrington. Carnation Princess Charming, shown by C. H. Totty, showed up fine, with stems four feet long and blooms to correspond, a beautiful light pink; was awarded a certificate last year. If we were sure of growing it as Totty does, some of us would throw a whole lot out next year. It looks now as though our annual smoker would be a dinner this year. Some of our patrons, I understand, wish to "set 'em up for us" this time. E. R.

The Scent of Roses.

Considerable notice has been taken in Scotland of some remarks made by the Countess of Wemyss on the occasion of the opening of the annual show of the East Lothian Horticultural Society, at Haddington, on September 9, according to the London Gardeners' Chronicle. The Countess offers a prize every year for the sweetest-scented rose. In her opening address she referred to the subject, saying that she understood that some people laughed at her for offering this prize, thinking it must be difficult to distinguish the best among so many. After referring to the expression of Shakespeare, "that which we call a rose by any other name would smell as sweet," she said that the rose Frau Karl Druschki had no scent at all, and therefore the rose of this particular name did not smell sweet. She considered that the quality of scent was by far the highest attribute a rose could possess, for a rose was nothing to her if it did not possess perfume.

TRENTON, N. J.—The New Jersey Horticultural Society held its thirty-sixth annual meeting in the State House, December 14-15. There was a fine display of fruit and many interesting papers were read and discussed.

CHRISTMAS pleasures come late to most florists, but we sincerely hope all the greater joy may be theirs when the hurry is ended.

Personal.

T. Mellstrom, well known to the trade as representative of Sander & Sons, has taken over the management of his firm's Bruges establishment. David Cameron will take Mr. Mellstrom's place as American representative.

P. J. Lynch and bride, of West Grove, Pa., and New Castle, Ind., are in Jamaica for a brief stay.

Elmer D. Smith and wife of Adrian, Mich., will make a California trip after the holidays.

RENEW subscriptions promptly so that no copies of the papers may be missed.

THE date of Easter next year is April 16, practically three weeks later than last Easter.

THE Society for Horticultural Science will hold its next annual meeting at Tampa, Fla., December 9, 1911.

WE are in receipt of Bulletin No. 1 of the American Gladiolus Society, giving an account of the first meetings of the organization, with list of members, etc.

FIRES damaging greenhouses are being reported from many quarters. Great care and watchfulness should be maintained at this season to prevent such catastrophes. Everything dry and inflammable should be kept away from the boilers, and all woodwork well protected, and extreme care taken with the lanterns and lights.

BELGIUM growers of azaleas and other plants are cautioned against shipping to America any plants infested with any kind of living insects or their larvae. Many states require all such plants to be fumigated before they can be released and this is very apt to destroy the flowering buds of the azaleas. If such plants are found to contain larvae, insects or mites they will have to be fumigated in this country even if the plants are accompanied by the Belgian entomologists's certificate of inspection.

Society of American Florists.

DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the Canna, Olympic, by The Conard & Jones Company, of West Grove, Pennsylvania, becomes complete.

CARNATIONS REGISTERED.

By A. Jablowsky, Olivette, Mo.—Variegated Enchantress—sport from Enchantress, color, white with rose pink stripes; habit, the same as Enchantress.

By J. R. Walling, Keyport, N. Y.—J. R. Walling—sport from Enchantress; color, shell pink with deeper markings; habit, the same as Enchantress.

Both of the above registrations are only provisional, being sports. Blooms must be shown at the next meeting of the American Carnation Society to allow judges to pass upon them as to their distinctiveness.

A. F. J. BAUR, Sec'y.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the every-day florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high grade work.

Experiment Stations and Horticulture.

Commenting upon the paper by W. N. Rudd on the "Value of the Experiment Stations to Ornamental Horticulture" which was read before the Society of American Florists at Rochester, N. Y., August, 1910, and printed in THE AMERICAN FLORIST, issue of October 15, page 569, the following has been received:

I have read the interesting article in your issue of October 15 on "The Value of the Experiment Stations to Ornamental Horticulture;" it gives me pleasure to say that I am heartily in sympathy with the writer's point of view. It is directly in line with the gist of some remarks which I made before the New York Florists' Club at one of their meetings last spring. It is also in accord with the views which I have entertained on the subject for the last ten years.

One of the reasons that experiment stations have not been more useful to florists is that the latter have apparently not needed their help. Florists are notably independent and resourceful. They have grown accustomed to the necessity of fighting their own battles and solving their own problems. They have largely followed the principle that if difficulties appear unsurmountable by the application of practical and common sense methods, the best solution is to avoid them by ceasing the attempt and directing energy into some other avenue. I would not for a moment suggest that this spirit of resourcefulness and independence has amounted to undue self-sufficiency, but it is barely possible that in some instances such has been the case. In that event, the individual has overlooked the fact that as each plant industry becomes more and more intensified, its attendant difficulties increase. The florist is the most intensive soil cultivator of all. His plants are under distinctly artificial conditions, and his troubles, therefore, may be expected to be relatively numerous; and they are.

Instead of giving up the growing of a certain crop, or the practice of a certain system because of unlooked-for difficulties, why should he not ask the assistance of the specialist in soil physics or chemistry, in plant pathology, in plant physiology, the assistance of the horticulturist in planning experiments and investigations, aimed to throw light on the solution of practical greenhouse difficulties? The florists of the country have been notably diffident in coming forward and stating their needs. As Mr. Rudd very properly remarks, the farmer, the dairyman, the orchardist, have sent out a vigorous cry for assistance, and it has been freely answered. With one or two notable exceptions, the florists of the country have not asked, and therefore have not received. Again, I think it may be very properly said on the other side of the question, that the interests of the experiment stations have been directed more prominently into the fields of general farm husbandry than they have into floricultural enterprises. This is partly due to the reasons already stated; but also due to a considerable extent to the fact that the floricultural interests in colleges and experiment stations are not represented as fully as they ought to be. Both of these factors act upon

each other. A demand from without is met by increased equipment from within. On the other hand, good facilities in the station and college develop confidence on the part of the florist that co-operative assistance is available, should he desire it.

However this all may be, the fact remains that a new era is coming in floriculture; for there is an evident coalition of forces and interests on the part of the practical men in the business and the technical men or investigators in the experiment stations and colleges. The florists are beginning to test these establishments, notably in Illinois and Maryland, and other states are commencing to take on a thoughtful study of the question. Here in New York we are glad to observe that our leading florists are agitating the question, and it will only be a short time before close and, I trust, efficient co-operative association exists between the Departments of Horticulture and the florists of the Empire State. A bill was introduced in the legislature at Albany last winter, asking for an appropriation for a range of houses to be devoted to commercial floricultural interests, which would certainly have become a law had it been presented somewhat earlier in the session. Already steps are being taken to push the same measure the coming session, early enough to ensure its passage.

The florists of the country should feel that the officers of the experiment stations stand ready to further their interests by using to the fullest extent such facilities as are available, in their respective stations. The Society of American Florists is to be congratulated on its affiliation with the technical side of floriculture through its efficient and energetic secretary, Mr. Dorner.

JOHN CRAIG.

Hemphill-Stehlin Co., Indianapolis, Ind.

Nashville.

The fine weather of the past few weeks has had a splendid effect upon the growing flowers, and there is a promise of an abundant crop of the very finest of both cut flowers and plants for the holiday trade. There has been a fine trade all season and there is no let up now, rather an increased demand, and flowers were never better. A peep into the refrigerators of the leading florists show a wonderful supply of flowers. The roses are coming in now in rare perfection and have hit the holiday demand to a nicety.

NOTES.

The Geny Bros. are delighted with their new location in the up-town shopping district, and say their change which might possibly have been the occasion of the loss of some trade has had just the opposite effect, and while they have held their old customers, have acquired many that are new. This was especially true of the Thanksgiving trade which, they say, was the best they have ever known. Since their removal they have added several new clerks to wait on the trade. Their new McCray refrigerator was filled with a magnificent supply of fine flowers. The roses are in best of shape, and there was an abundance of Killarney, both white and pink, the ever popular Richmond and excellent American Beauty, all raised at the new houses out of the city. Violets will be rather scarce for the holidays, but there will be plenty of narcissi, Roman hyacinths, carnations and poinsettias.

Many of the growers in this section, both large and small, have turned their attention this year to poinsettia culture, with the result that there is a most beautiful supply at hand for the season. They have been grown in pots and have been put with other plants

We Can Still Supply

IN FIRST-CLASS CONDITION:

Araucarias

OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the *Araucaria Excelsa*, *Robusta Compacta* and *Glaucæ*. 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the *Araucarias* in the future.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots, 15 18 20-25-30 in. high, 3-4 5-6 tiers, 2-3-4-5 years old 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant, 6 in. pot, 4 yrs old, 4-5 6 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6 in. pot, 5 years old, 25 in. and over, as wide as a bushel basket, 5-6 tiers for only \$1.00; and what do you think a holy terror 30 in. and over, 5-6 7 tiers, worth \$1.00, for only \$1.25 to \$1.50.

Robusta Compacta, *Excelsa Glaucæ*, 6 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest *Araucaria Robusta Compacta* and *Excelsa Glaucæ*, a house full, good enough to decorate the White House, kings and emperors, bankers and merchants, suitable for the coziest corners of their residences as well as the poor man's Christmas table, for only \$1.15 to \$1.50, worth double.

Primula Chinensis, 5¼ in., \$2.50 per doz.

Cineraria Grandiflora, Aschmann's well-known strain 2 in. pots \$3.00 per 100; 4 in., 10c.

Jerusalem Cherries, or *Solanum* 6 in. pots, 25c, 35c, 50c.; full of ripe berries.

Azalea Indica

Already Forced for Christmas, put away in colder houses ready for shipment. Deutsche Perle, pure double white; Simon Mardner, large double pink; Vervaneana, double pink variegated. Price: 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each. Mme Petrick, pink, 50c, 60c to 75c; Simon Mardner, 50c 60c to 75c.

Kentia Forsteriana, in fine shape, 6 in. pots, 30 35 40 45 in. high, 4-5-6 years old, 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

Kentia Belmoreana, 30 35-40 in. high, 5-5½-6-7 in. pots, 5-6 7 years old, \$1.00, \$1.25, \$1.50 to \$2.00 each.

Kentia Belmoreana, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00; 4 in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine. *Boston*, *Scottii*, *Whitmani* and *Scholzeld*, 5½ and 6 in., 35c, 40 and 50c; 7 in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

Neph. Glatrasii, a new beautiful fern, an improvement on *Scottii*, much shorter and bushier than *Scottii* 5¼ in. pots 50c; 3 in. pots, 25c.

Pteris Wilsonii, 3 large bushy plants in 6 in. pan, 30c to 35c per pan.

Ferns for Dishes, big assortment, 2½ in. pots, at \$4.00 per 100.

Dracena Bruanti, 25 to 30 in. high, 6 in. pots, 40c to 50c. Highly recommended for store and house decoration; stands heat cold and dust.

Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

Adiantum Hybridum, 6 in. pan, 25c to 30c.

Asparagus Sprengeri, 2½ in., 3c; 4 in., 10c.

Cocos Weddelliana, 3 in. pots, 15c, 18c and 20c.

Poinsettias, 4 in. pots, 25c.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

JACKSON & PERKINS CO.

Wholesale Florists and Nurserymen,

NEWARK (Near Rochester), NEW YORK

Lilacs

Imported, pot-grown, for cut flowers; bushy, suitable for 7 or 8 inch pots, 50c each; \$5.00 the dozen. Charles X only.

Half-Standard Roses

Baby Rambler and *Mrs. Cutbush*, 50c each; \$5.00 the dozen. No better at any price. Full Standard *Baby Rambler*, same.

Bush Roses

Fine assortment leading H. P.'s, like *Brunner*, *Charla*, *Druschki*, etc.

Also Hybrid Teas, *Ramblers*, *Dorothy Perkins*, etc.

in the long handled baskets which strike a popular chord. Some are grown in shallow pans and as they are so lasting all are in great demand, and there is no doubt all the growers will have good sales on their poinsettia plants and flowers.

The Joy Floral Company always has a fine up-to-date supply which is now in its full glory. They are cutting

Richmond with stems four feet long and American Beauty the same with glorious well developed flowers. Their carnations are large and fine and they have everything one could think of in other flowers. They have large double violets grown in the greenhouses.

None of the growers seem to be long on violets, and there is a greater demand than supply. M. C. D.

GOOD CHRISTMAS WEATHER.

Good, bright, cold Christmas weather prevails and the market is in that peculiar condition that always exists for the few days before this busy holiday. It being almost impossible to state which way the market will turn. Some dealers assert that all kinds of stock are going to be short, while others are just as confident that the supply will be fully equal to the demand. Roses are in good crop and supply and the stock is in elegant shape. The bright weather has kept the grade up to the highest notch for this season, and indications are that in most varieties there will be enough good stock to meet the orders. There may be a scarcity of the shorter lengths but the medium lengths are of far better grade and in good supply. Carnations are going to be far short of the demand, many of the growers are having a light cut, and it is doubtful if any are cutting their usual quantity. It is highly probable, that at the last minute, some stock will appear on the market that has been kept back too long, but there has been a good steady demand for these flowers for the last few weeks, and there has been no occasion for holding them back. Violets will, as usual, be one of the scarce and high-priced flowers. Paper white narcissus and stevia are plentiful and will be of great service in filling orders for cut flowers. Lily of the valley is in good supply, and there will probably be plenty, enough to fill all the orders received. Orchids are a little more plentiful, some of the growers are having a good cut and good sized shipments are being received. Sweet peas, marguerites and Roman hyacinths are to be obtained in good quantities. There is plenty of holly, but boxwood has had a great call, and the supply is running short. There is practically no bouquet

green on the market. In the greenhouse greens there is good stock of both kinds of asparagus and smilax. The blooming plants are the center of attraction and beautiful specimens are to be seen everywhere, as well as good decorative stock.

NOTES

The E. C. Amling Co. have leased the main floor of the building located at 19-21 Randolph street, and expect to take possession about January 10, 1911. The new location is an ideal one in the midst of the cut flower district. The store is 40 feet wide and 160 feet long, well lighted and newly decorated. An aisle will extend from the main entrance on Randolph street to the rear doorway, through which the stock will be brought in to be placed on the tables on either side. The office will be on the right as one enters the main entrance, and the refrigerators on the left. A new ice box, 30x10x8 feet 3 inches, is now being built, which will be an addition to the one now in use. The floor is already marked off where the fixtures will stand, and the removal from the old store will be so arranged that it can be done without interfering with the general routine of business.

C. L. Washburn is still suffering from an attack of the grip but is seen at the store busy as usual looking after the rushing holiday business. This firm has had to reject more orders for O. P. Bassett carnations than they have accepted; the customers all wanting this one variety. Shipping trade has been very good and the number of advance orders, already received, exceeds that of last Christmas.

The stock that J. A. Budlong is receiving at the store is of splendid quality. Killarney, White Killarney and American Beauty roses are fine and My Maryland of extra good grade. This firm is cutting a choice grade of lily of the valley and are receiving

plenty to fill all orders. Business is very good, and Phil. Schupp and his assistants are kept busy filling the many orders that are received.

The Chicago Carnation Co. had on exhibit, December 17, a vase of the new carnation, Princess Charming. It is of a very pleasing flesh pink color and the blooms shown were of extra large size on good strong stems. It is said the calyx never splits and the keeping quality is of the best. This carnation originated with Henry Eichholz of Waynesboro, Pa., and Manager Pyfer of this company has secured the western agency. An automatic telephone was installed in the store this week.

Vaughan & Sperry are daily receiving large shipments of American Beauty roses of A-1 quality; the color, foliage and stem being all that can be desired. A large shipment of California holly was received December 19, the express on which amounted to \$100. The holly was exceptionally well berried and sold immediately upon being shown.

The Geo. Wittbold Co., 737 Buckingham place, have purchased two new auto delivery cars, which will make three now in use. Three of the old delivery wagons will be sold as soon as possible to make room for the autos. Six large cases of cattleyas were received by express at this establishment December 19.

The Killarney and White Killarney roses that were seen at George Reinberg's are of extra good quality, mostly of short and medium lengths. Rob Northam, the manager at the store, says that the shipments were never so large as at present.

At Kyle & Foerster are to be seen a particularly fine strain of pansies and sweet peas. A large quantity of boxwood, of good quality, was received at the store this week.

Am. Beauties

Our American Beauty Roses are arriving in splendid condition, on long stems, with splendid foliage and color, and in such quantity that we are able to fill all orders.

RICHMONDS

Our Richmonds, the Cream of the Market, are really magnificent --fine long stems, with beautiful foliage and long buds of the deepest crimson.

If you are looking for stock that will please your customers and increase your sales, send in your order for Richmonds today.

All other stock at lowest market rates. No charge for packing. Prices subject to change without notice.

Hoerber Bros. are cutting a fancy grade of roses, with Killarney and White Killarney exceptionally good, fine buds on long stems with splendid foliage and color. Carnations in all the leading varieties are included in the daily shipments and move readily at top notch prices. Will Hoerber, during the absence of the regular book-keeper, is attending to the office duties, while Fred looks after the range at Des Plaines. Harry Manheim is well pleased with the advance orders already booked for Christmas and says they are still coming.

Poehlmann Bros. Co. is now cutting 200 to 300 cattleya blooms a day and some magnificent specimens of these exotics were seen at the store this week. August Poehlmann says that it is the intention to increase the amount of glass devoted to orchids to three times the space now occupied. One collector in the employ of this firm is now in Venezuela, and another leaves December 26 for Colombia, South America, to procure plants for this establishment.

Peter Reinberg is cutting a large quantity of splendid stock of all kinds. American Beauty, Mrs. Marshall Field and Richmond roses are especially worthy of note, for they are as fine a grade as are seen in the market. A visit to the greenhouse a week ago found the stock in splendid condition and a heavy crop, which assures them a splendid cut for the holiday trade.

M. I. Weil of the Chicago Pump Co., 1061 Fulton street, has been calling on the growers in Indiana, introducing their new system of intermittent vacuum heating. A. C. Durdin, the secretary of this concern, is the inventor of this new pump, which has recently been placed on the market.

Henry Wietor returned December 17 from a two weeks' hunting trip to Cascade, Iowa, where he succeeded in bag-

ging a number of rabbits. The American Beauty roses that are received at the store this week are extra fine and rival any seen in the market.

Henry Van Gelder, of Percy Jones, is this week filling a large order for an out-of-town customer that equals the sales of the two best days of last year's holiday business. The customer is the proprietor of three large stores and is receiving the stock in five different shipments.

E. E. Pieser, of Kennicott Bros. Co., is again on the job, after being confined to his home with a severe attack of lumbago. G. H. Pieser is now, unfortunately, on the sick list and is reported to be in a critical condition.

W. J. Smyth has a new Studebaker auto delivery car, which will be a much needed addition and get a good trying out during the Christmas trade.

The Chicago Rose Co. this year broke all former records for the manufacture of wire rings for holly wreaths when 500,000 were manufactured.

C. L. Huffert opened a store at 4011 North avenue and is now prepared to handle the holiday trade.

Zech & Mann are well supplied with excellent seasonable stock for the holiday trade and are in a position to fill all orders for Christmas.

Mrs. Wm. Starrett is seriously ill with pleurisy at her home on Cottage Grove avenue and is under the care of a physician.

Vaughan's Seed Store received a car of Japan lilies and a car of lily of the valley this week for shipping and storage.

George Perdikas, corner of Dearborn street and Jackson boulevard, is enjoying a brisk holiday business.

Chas. W. McKellar is receiving a fancy grade of cattleyas, vandas, oncidiums and other choice orchids.

Ed. Misiewicz on December 19 opened a store at Thirty-second and Halsted streets.

Messrs. Scott Brothers, Elmsford, N. Y., say: "Aphine is an effective and easily applied spraying remedy for insects of all kinds in which we have absolute confidence. We dipped all our cuttings in this insecticide last year before putting them in the cutting bench and again before potting into first pots, and we were never freer from insects of all kinds, particularly those troublesome little thrips on chrysanthemums. It is an effective remedy for scale on palms, crotons, etc."

\$2.50 per gallon, \$1.00 per quart.

Fungine

An infallible fungicide for mildew and other fungus diseases. Particularly adapted for greenhouse purposes. A clean, safe and easily applied spraying material which does not stain the foliage.

\$2.00 per gallon. 75c per quart.

VAUGHAN & SPERRY

LONG DISTANCE PHONE
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

Boxwood is very scarce, so much so that it is reported stolen in front of the doors of the wholesale houses in broad daylight. Three cases of boxwood were deposited in front of Vaughan & Sperry's, December 17, and were being taken in the store immediately after arrival. When the young man who had already taken two down went after the third, it had disappeared. An expressman, who was standing nearby, said he saw it vanish in a westerly direction, but no clue to the thief has been found.

The mid-winter show at Garfield Park is attracting crowds of visitors. The greenhouses are open from 8 o'clock in the morning until 10 at night, and the exhibition will continue until January 2. There are large quantities of poinsettias, azaleas and begonias, as well as rare and beautiful orchids to be seen.

There was a large representation of the trade at the funeral of the late Joseph F. Klimmer, who was laid to rest at Forest Home cemetery, December 15. The funeral offerings were very numerous and many of them were quite elaborate.

L. Hoechner has opened a store at 3810 Grand avenue which will be under the management of R. Troost. Mr. Hoechner needs no introduction to the trade as he is a valued employe at the Peter Reinberg store.

Fred Klingel, having recovered from his recent illness, is back at the desk, keeping the books at John Kruchten's. During the holiday season Charlie Kruchten is assisting his brother at the store.

At the J. B. Deamud Co.'s store we noticed a fancy grade of carnations, sweet peas and all other seasonable stock. This firm is now receiving some fine Merry Xmas chrysanthemums.

Wm. Timme, 4016 North Forty-second court, is with Vaughan & Sperry's

"The Busiest House in Chicago."

We are issuing a weekly price letter that keeps you in touch with this market all the time. If you are not receiving this weekly letter, let us know and we will see that you do. We wish you a Merry Christmas and a Prosperous New Year.

J. B. DEAMUD CO.

this week, assisting them in looking after the brisk holiday trade.

H. W. Rogers of Weiland & Risch has been confined to his home the past week with a slight touch of pneumonia.

Funeral work is keeping H. L. Keun very busy at his store at 6847 Wentworth avenue.

The E. F. Winterson Co. is offering some fine blooming azaleas and excellent mistletoe.

Visitors: E. P. Farney, representing M. Rice & Co., Philadelphia, Pa.; H. A. Fischer, Battle Creek, Mich.

Chicago Bowling.

On December 14, the Roses won three games from the Carnations, and the Orchids, two from the Violets. No games were bowled this week, but on December 28 the Orchids will play the Carnations, and the Violets the Roses. The following table shows the number of games won and lost by each team to date:

Cole Bros. have a nice crop of American Beauty and other roses for the holidays.

Chas. Loveridge's redecorated store is one of the most attractive in town. D. U. Augspurger has just returned from an extended business trip and says his sales have been very satisfactory.

Jas. C. Murray reports business good.

For All Occasions We Offer Our Prize-Winning ROSES and CARNATIONS

Pronounced by judges at the **Chicago Flower Show** as **exceptionally good** we securing **19 Awards**. Stock exhibited was taken from our **regular cuts** and as such we are able to supply customers with the **selfsame stock** which in turn will surely satisfy your customers. Heavy supply of

Beauties, Maryland, Jardine, Richmond, Pink and White Killarney, Field, Kaiserin, Maid and Bride. They are sure to give satisfaction. None better in the market.

Carnations. All the leading varieties. You will find them to be **larged sized flower and long stem grade**, and of a quality far above the average to be seen in this market. Try them and be convinced.

Valley We grow our own valley; hence we are able to take care of regular orders for large or small quantities. **Quality is equal to the best** brought to our market. Order some of our Valley and be convinced.

Violets. Fragrant home-grown singles, you will find these hardy enough to stand long distance shipments. Can also supply the **New York or Hudson River Violets**, but owing to length of time required for these to reach Chicago, we can only fill orders for such Violets at buyers' risk.

Plenty of other Seasonable Stock of excellent quality

 **We Grow our own Stock,** which insures you getting the freshest possible. The fact that our large plant is located within 30 minutes ride from the store, as well as all depots, **enables us to fill late orders where others fail.** Give us a trial and you will find our stock and prices right.

Washington. TRADE FAIR.

The trade of the past week was very fair, considering the fact that the people are saving their money for Christmas. The weather has been cold and the streets are in an abominable condition. This situation is so bad that it has attracted the attention of President Taft. He has asked the District Commissioners why they do not clean the streets and they have replied that there is no money available to do the work. Enough said. While Uncle Sam is spending millions on the Panama Canal, the Philippine Islands and dreadnaughts, the poor

old capital must worry along with its streets in such a condition that the life of no man or woman that uses them is safe. But doubtless from the Congressional viewpoint, this is as it should be. P. P. Campbell, who was born in Nova Scotia, is a member of the House District Committee. If Mr. Campbell does not know something of ice and snow, who does?

NOTES.

The Centre Market florists are making great preparations for Christmas. Their wreaths and decorations are very fine. Considering the fact that the Centre Market is one of the coldest places south of that which Doc. Cook reached, the florists who do business

there deserve great credit for their perseverance and energy. Noteworthy among them are M. J. McCabe, Harry Roby, Frank Sly, Milton Thomas, John R. Morgan, C. Ponnet, John Boyle, Robert Bowdles and Hammer & Sons.

In cut flowers the most noteworthy features are the fine stocks that are arriving from the greenhouses of A. Gude & Bro., A. B. Garden, J. R. Freeman, M. J. McCabe, Robert Bowdler and other district growers.

Frank Schultz has recently opened a flower stand in the new market at Fourteenth street and Park road.

George Field, as usual, will have a good supply of orchids and roses.

A. F. F.

ROSE STOCK FOR 1911

It is an undisputed fact that the quality of the plants which are sent out by us is above question. We grow what we sell and sell only what we grow. We are planning for 1,250,000 Rose Plants for the spring trade and expect to be able to fill all orders, whether large or small. This is all stock for forcing, and not nursery stock. We want your patronage and can give you in return the best plants that can be produced. Our leaders will be

Dark Pink Killarney Double Pink Killarney Prince de Bulgarie
Radiance Mrs. Aaron Ward

The best of the Standard Varieties:

Killarney White Killarney Richmond
Kaiserin Augusta Victoria My Maryland

Our catalogue is ready. If you do not receive it, send us a postal.

A. N. PIERSON, Inc.,

Cromwell, Conn.

Cincinnati.

BUSINESS GOOD.

Last week the market cleaned up nicely on almost everything according to the condition of the stock. At the beginning of this week there has been little or no holding back for Christmas so far. In fact, there has been no reason for doing so, the stock, with a few exceptions, now and then, has moved out as fast as it came in, and has brought uniformly good prices. Indications point to a fair supply for the holidays in most lines. In roses, American Beauties, Killarney and Richmond are holding their own in quality. There will be about half of the normal cut of carnations of other Christmas years at this time. New York double violets continue in steady supply while promises of a crop of single violets for the holidays are good locally. Poinsettias are coming into the market regularly. The wholesalers are arranging with the growers to send them direct to the stores and they save extra handling. The supply of Liliun Longiflorum is shortening but narcissus and stevia are becoming more plentiful every day. In green goods there is a large demand for Asparagus Plumosus and Sprengeri. There is an ample supply of other decorative greens on hand with the exception of boxwood; laurel is getting scarce and the prices are going up; holly promises to be cleaned out in a few days and southern smilax is selling fast.

The Bloomhurst Floral Co. of Lockland has a crop of Richmond roses that is up to the usual standard of the stock from that establishment.

Henry Smith, of Grand Rapids, has mailed E. G. Gillett a post folder of that town. Among other cuts shown is one in colors of his store.

Geo. Magrie had little trouble in disposing of a carload of holly.

Mrs. P. J. Ollinger has gone to New Castle, Ind.

Tom Jackson suffered loss by fire December 12. The flames consumed the boiler room, shed and parts of the houses.

Chas. Pfeiffer and Wm. Speck have purchased automobiles. The former has an Overland roadster.

Wm. Murphy has cleaned up on all his holly and laurel roping. The former was of excellent quality.

J. A. Peterson has about cleaned up his Begonia Glory of Cincinnati and cyclamens.

Visitors: Ed. Fancourt, representing Pennock-Meehan of Philadelphia and John A. Keller of Lexington, Ky.

Nassau County Horticultural Society.

The regular meeting of the Nassau County Horticultural Society was held in Pembroke hall, Glen Cove, December 14. There was a large attendance, the Westbury boys turning out in force and the meeting was most enthusiastic. Geo. Angier, Supt. to B. Stern, Roslyn and Robert Marshall, Glen Cove, were elected members and three applications for membership received. Judges for the night were C. F. Bertanzel, J. F. Johnston and McKenzie and their decisions were as follows: Society's prizes: Best 100 violets, T. J. Trepass; best 25 sweet peas, Paul Reul, who also received honorable mention for vase of same; best three cut poinsettias, James McDonald. The Hitchling's silver cup, a beautiful specimen of art, was presented to Alex. McKenzie, another proof of his being past master of growing chrysanthemums, and the Lord & Burnham gold medal was presented to Robert Marshall for growing roses so well; both prizes were won at our last fall show. A few sprays of stevia, an improvement over the old, were shown by Chr Lenker. It has many points in its favor and we will no doubt hear more of it at some future exhibit. T. J. Trepass was the winner for the yearly prize competition, with Geo. Wilson second.

The following were elected as officers of the society for the coming year:

T. J. Trepass, president.
Jas. Robinson, vice-president.
E. Brown, treasurer.
John T. Ingram, secretary.
Oscar E. Addor, cor. secretary.

GOOD SUPPLY.

While the amount of flowers coming to this market is about the same as the previous two weeks, the demand has lightened considerably and only carnations and violets clean up daily with the wholesalers. Roses and American Beauties of fine quality are bringing low prices for the week preceding Christmas. Lillium Harrisii and callas, as well as stevia and Paper Whites, move out well. There are some Roman hyacinths around but they seem slow. Cattleyas have been bringing Christmas prices for the last two weeks, that is, a dollar each. For Christmas, carnations will be very scarce, while in roses we are promised an exceptionally large supply. Violets, sweet peas and primroses will be in fair supply, with prices tending a little lower than in other years. The boxwood market here has been very strong, due to the scarcity of bouquet green; but the quality is good. Red ruscus is being eagerly bought up from the wholesalers. The street fakirs have taken up immortelles, boxwood wreaths and baskets, and are moving out quite a lot of them, even if they do have to be sold in the dark to cover their defects. These people are disposing of more toys, etc., than in any other year. The retail stores are taking on their Christmas window decorations which one has to see to appreciate and describe, and I would have to have more space than is allowed me.

NOTES.

Paul M. Pierson was a caller December 16 and states that he will have 10,000 special American Beauties for Christmas, his crop hitting this holiday exactly right. Mr. Pierson supplies two local commission houses with these roses.

Harris Bros. are now settled in their new place and it certainly makes a wonderful change when one doubles their storeroom. They are quite right when they state that they run a store now, instead of a stand.

William Loew has more than his hands full taking care of his retail and wholesale holiday trade.

American Beauties and violets of fine quality are being received by the McCallum Co.

Visitors: C. A. Blaukensop, Washington; Geo. L. Huscroft, Steubenville, O.; Jos. Thomas, Greensburg; Martin Reukauf, Philadelphia. J.

Philadelphia Notes.

Christmas greens are very scarce, particularly ground pine, which is hardly to be obtained at all. There is no loose and scarcely any wreathing. The heavy fall of snow so early in the season was unlooked for and caught many of the gatherers napping so that they have none to ship. In fact, all kinds of greens will be higher, as it is so much harder to handle this class of goods along country roads and through the woods, where there is so much snow.

Ed. Reid is handling some superb violets, about the finest ever seen in this market.

John Westcott celebrated his birthday December 16.

COLD WEATHER.

For the past two weeks there has been record-breaking weather in this section, with low temperature, high winds and heavy snows. For the mercury to range morning after morning from five above to five or even more below the zero mark is an experience never before encountered and not craved for again. The effect on the flower growers has been keenly felt, and unless we have a quick turn, the holiday crops will be greatly diminished and considerable embarrassment is experienced in marketing the stock. Flowers have been scarce, carnations especially so, and it looks as if the supply of Christmas products will be shorter than for many years. There has been a good trade during the past week, many social events contributing to an all-round activity, and those who keep posted declare this will be one of the gayest seasons for years.

NOTES.

About thirty years ago the writer of these notes formed and organized the annual exhibitions at Timonium of what is now the Baltimore County and State of Maryland Agricultural Society. Amongst the very first to take an interest was Alexander McCormick, a florist of Fullerton. At a meeting last week of the society Mr. McCormick, now 69 years of age, who has been a trustee almost from the start, and its president for eight years, was present. It was ascertained that he has never missed a meeting of the board for thirty-one years, and has never been absent a day from the fair grounds during an annual exhibition. He is active and industrious, always prompt and alert, and is an example for younger men of civic pride and public spirit.

The first german of the winter proved a great success. One Charles

street store had orders for about one hundred bouquets, besides bunches of violets, lily of the valley and orchids. George A. Black, who had charge, says he never saw so many flowers on any one occasion. In arranging the room the walls were covered with loose wire netting, covered with sprays of green, and the debutantes, the fair recipients of the flowers, as the burdens they carried became too unwieldy, placed them in this netting, so that the scene was a great bower of lovely blossoms.

Chas. Akehurst & Son, of White Marsh, one of the largest producers of carnations for this market, are much behind the customary quantity of shipments this season. Their plants, however, are making fine growth and without doubt will soon catch up.

UNUSUALLY COLD WEATHER.

The past week has been very cold, with the mercury hovering around the zero point and with very little sun, consequently the supply of flowers has shortened up until the prices on some kinds have almost reached the point usually obtained at Christmas time, and the old story that there will be a short supply for Christmas is heard on every hand, while others will tell you that they have heard that for so many years that they do not take any stock in it, and are confident that there will be plenty of flowers in the market when Christmas comes. The violet growers state that their flowers are coming very slowly and as they cannot be forced with any degree of success feel that the supply will not be up to the demand and will surely bring an extra price as is always the case when the supply is short. Carnations have been scarce this week, particularly red and white. Roses are the most plentiful flower in the market. The growers are bringing in stevia, which helps so much in making up the beautiful Christmas boxes. Flowering plants are in good supply, and are selling at the usual prices. The retail stores have taken on their Christmas dress and with azaleas in full bloom and the red poinsettias, certainly present an appearance that is very beautiful at this season of the year, when the weather is so cold. A week of sunny weather, for which the florists are anxious, will make a material change in the conditions.

NOTES.

Thomas Roland of Nahant is sending in some very nice plants, among them some of the best cyclamen that have been seen in this market for a long time.

A. Leuthy & Co. of Roslindale are sending in the usual supply of plants, for which their establishment is noted.

A. M. Davenport of Watertown is marketing a great variety of plants, including fine begonias and ferns.

W. E. Walke has some very nice poinsettias, with extra large flowers, that are finding ready sale.

Pierce Bros. of Waltham are offering their thousands of azaleas which they annually grow.

H. W. Vose of Milton has a fine lot of Trumpet Major narcissus for the Christmas trade.

The first freezia was brought in from the Sutermeister estate on Saturday, December 17.

AMERICAN FLORIST CO., 324 Dearborn St., Chicago**New York.**

Twenty-three degrees of frost came along unexpectedly one morning and naturally several lots of frozen flowers was the result. We have been having some bitterly cold weather, accompanied by high winds and the flower trade in general has suffered thereby. With Christmas so close upon us, stock of all kinds increasing in quantity and prices dropping owing to bad weather chiefly, the prospects for very high prices during the holidays does not seem very bright. Still, changes can occur so suddenly in this market that he who prophesies market values is very apt to make mistakes. Roses of all kinds are getting more plentiful and they are good. Prices obtained vary according to the number purchased, the averages must necessarily be low, however, for, while the quoted figures may not seem abnormally cheap, there is a general slashing made of those prices wherever a chance occurs to unload. It is very evident from the size of the present consignments that there is going to be a heavy supply of extra grade flowers of such kinds as American Beauty, White and Pink Killarney and My Maryland. Carnations have been doing so well for several weeks that it seems too bad that at this time they should begin to accumulate and decrease in value. It is a fact, nevertheless, they have become too numerous for the regular demand and are selling much cheaper than for several weeks past. Violets have stiffened slightly in value from some cause or other. Dame Rumor says there will be plenty for all for Christmas, and no fancy prices reached. The real fresh article is generally an unknown quantity until the actual holiday arrives and the sweet smelling ones will, of course, bring the price. *Cattleya trianae* is evidently off crop entirely, there are so few of them in evidence. There is a much better supply of the smaller flowered *C. Percivaliana*, and in many instances this makes a good substitute but it never really can take the place of old *trianae*. There is a limited supply of *oncidium* which sells easily; *cypripediums* are not in much demand, there is a constant supply on hand. Lilies have taken a tumble in price, the supply is heavier and there are now several grades of them on the market so that the prices have quite a wide range. The first tulips of the season came in this week. Both pink and white colors are represented and the asking price is 25c per bunch of six, considering the time of year, they have excellent stems. *Stevia* is very plentiful indeed and is going at five or six bunches for one dollar. *Narcissus* has begun to crowd the market and has dropped nearly one-half in value. Roman hyacinths not coming in so heavily as yet, maintain fairly steady prices. *Chrysanthemums* are few and far between. They are nearing the end of their season and from the poor demand there is for such as are available it is quite evident there will be no regrets when they are entirely gone. Sweet peas do not get so very numerous, the weather must not be favorable or they are not planted so heavily as in some former years. *Gardenias* and daisies are only in moderate supply. *Smilax* is a drug in the market, too much of it coming in altogether for what demand there is. Lily of the valley is selling slow with a marked tendency to lower prices. As the

Siebrecht & Siebrecht

Wholesale Florists

136 W. 28th St., New York City

week advanced the weather took a decided turn and became quite warm, which proved a great blessing to growers who had plants to deliver. It gave us added impetus, to the cut flower trade however, supplies continued in excess of the demand and accumulations of stock were offered at sacrificial prices and still clearances could not be effected satisfactorily.

NOTES.

In elevating J. B. Nugent, Jr., to the president's chair the members of the New York Florists' Club have deprived themselves of a first class caterer. As chairman of the house committee, which office he has filled for a number of years, Mr. Nugent always provided a sumptuous repast at each meeting of the club.

The many friends of Edw. C. Horan, wholesale florist, 55 West Twenty-eighth street, will learn with regret of the death of Mrs. Horan, which occurred December 11, after a short illness. The funeral took place on the Tuesday following. Besides the husband, a son and two daughters are left to mourn their loss.

S. S. Pennock-Meehan Co., at their store, 109 West Twenty-eighth street, has installed a ribbon case with glass front that displays the stock of this florist's necessity very advantageously. This firm is carrying quite an extensive line of ribbons in all grades and patterns.

The steam boiler that furnishes the heat for Young & Nugent, 42 West Twenty-eighth street, and for James McManus, who is located in the same building, gave out during one of the coldest days, causing some discomfort until the necessary repairs were made.

Charles Carlin, the well known buyer for Thorley, celebrated his sixty-fourth birthday last week. Rain or shine Charlie is always on the job and it is few good things indeed in the flower line that reach this city that escape his notice.

Flowering plants are demanding the attention of retailers to a great extent and that is one reason why the cut-flower business drops a little just previous to Christmas. Indications point to a clean sweep on all good plants.

The Draper Mfg. Co., 152 Front street, are putting out a recording thermometer that is very useful to growers who like to know just how the temperature in the greenhouses fluctuates.

John F. Sharkey, retail florist, Forty-sixth street and Sixth avenue, is happy over the fact that his wife presented him with a fine boy. The stranger arrived on December 6.

Harry Turner, superintendent of the Castle Gould estate, sailed for England on the S. S. Mauritania, which left this port on December 19, to spend Christmas at his former home.

James McAniney recently opened a retail store at 3415 Broadway under the name of The Riverside Florist.

Chas. B. Weathered was in Newburgh, N. Y., on a business trip recently.

Kessler Bros., plant dealers at 136 West Twenty-eighth street, say the demand is excellent and everything will probably be sold out by the twenty-second.

Among recent visitors in town were P. Welch, Boston, Mass.; D. T. O'Connor, Philadelphia, Pa.; Thos. Proctor, Lenox, Mass.; Arthur Taylor, Boonton, N. J.

There was some talk about Christmas trees going to be scarce this year but we noticed the usual supply was in evidence along the river front.

Wm. Miller, of the Noe staff, wholesale florists in the Cut Flower Company, was passing cigars around on Saturday last; it's a boy.

Arthur T. Boddington, seedsman, is in Lenox, Mass., on a short business trip.

St. Louis.

FINE WEATHER.

The weather has been fine with sunshine and moderate temperature. Carnations are not being received in any quantity but narcissus is fairly plentiful and the supply of violets is increasing. The retailers are pushing blooming plants, their show windows being decorated with begonias, azaleas, poinsettias and other Christmas novelties.

NOTES.

C. Young & Sons Co.'s windows are beautifully decorated with azaleas and poinsettias, tastefully arranged with the latest pot covers and accessories.

Shortly after New Year's plans will be formed to entertain the Chrysanthemum Society of America and to hold a flower show next fall.

Alex. Waldbart & Sons have a fine stock of Christmas plants.

Kalisch Bros. have a fine display of orchids and other flowers.

A. Siegel has a fine show of wreaths, holly and mistletoe.

The Riessen Floral Co. have a fine window display.

R. J. Windler's store is a grand sight with the Christmas plants and flowers.

New Jersey Floricultural Society.

The regular monthly meeting of the New Jersey Floricultural Society was held December 9 in their rooms, 240 Main street, Orange. Election of officers was held, when by one unanimous vote all the old officers were reelected.

Albert F. Larson, president.
Dederich Kindsgrab, vice-president.
Walter M. Gray, treasurer.
William Reid, secretary.

It was decided to have two classes hereafter in the monthly competition which will be known as A and B. The B class will be for the smaller growers. The executive committee will meet on December 17 to arrange for the schedule and prizes for the monthly exhibitions for the coming year. The competition for this year will close at the January meeting. The silver cups will be given to the winners in the various classes at the annual smoker which will be held in February. Eugene Von Lombacht was elected to membership in the society; eight other new candidates' names were nominated for membership.

William Reid, gardener for Sidney M. and Austin Colgate, read a paper on "The Care of Apple Trees" before the society. He declared the apple was the king of all fruits and one of the most healthful to eat that is grown, and that it can be had all the year round and cooked in a great many different ways. In pruning the trees, the branches should be cut off close to the main limbs. The latter end of November and the early part of December was a good time to do the pruning, for, as a rule, the weather is very pleasant for the work at that

Galdwell the Woodsman Co., Evergreen, Ala.

time. In old or neglected trees that are full of holes, he advised digging out all the decayed wood and filling up with cement, so that the bark can grow over it, and leaving some of the suckers that grow from the main limbs and cutting out some of the older branches. By doing so the trees get renewed life again. Spraying for the San Jose Scale should be done in December and March, for which Scalecide was very effective. He recommended scraping all the loose bark off the trees in February and cutting off the tops of the very high trees, so as to make it more convenient for spraying, thinning and picking the fruit. Any poor or worthless varieties of apple trees he advised cutting the tops off and top grafting better varieties on them in the spring, just when the buds begin to swell. It is necessary to spray for the codling moth just when the blossoms commence to drop, at least three times, about ten days apart, for later broods using two pounds arsenate of lead to 25 gallons of water. He advised for small gardens the planting of dwarf apple trees as they take up very little space and are very interesting, and they bear the first year after planting. He was given a rising vote of thanks by the society for the paper.

The following are the awards of the judges: A. B. Jenkins, Albert F. Larson, gardener, 93 points; Thos. A. Edison, Frank Drews, gardener, 90 points; S. M. and A. Colgate, William Reid, gardener, 90 points, for roses. S. M. and A. Colgate, William Reid, gardener, 95 points; Chas. Hathaway, W. A. Schneider, gardener, 85 points, for car-

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N. Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

WANTED.—A few bags of Australian Brown. California papers please copy.

VISITED MINNEAPOLIS: A. H. Goodwin, Chicago; W. H. Grenell, Saginaw, Mich.

THE National Cannery convention will be held in Milwaukee, Wis., February 6-10, 1911.

F. W. BRUGGERHOF's many friends in the trade will regret to learn of the death of Mrs. Bruggerhof, December 14.

ROBERT BUIST, of Philadelphia, Pa., died December 13. For further details see obituary elsewhere in this issue.

CHICAGO.—Prices on the board of trade December 21 for grass seed were noted as follows: Timothy, \$9 to \$10 per 100 pounds. White clover, from \$22 to \$28.

VISITED CHICAGO: Walla Walla (Fred H.) Hunter, representing Waldo Rohnert, Gilroy, Calif.; Chas. P. Guelf, representing the Jerome B. Rice Seed Co., Cambridge, N. Y.

THE drought continues in the California seed growing districts. The seed crops have had practically no rain this season and about 25 per cent of the average annual rainfall is now past due.

THE new seed warehouse of the W. Atlee Burpee Co. is reported to be a model, light on all sides, with library, rest and lunch rooms, in which warm meals will be served, included in the innovations.

HOLLY AT NEW YORK.—The holly situation was changed materially December 20 by the arrival of 45 carloads from the south. This had been shipped on commission and resulted in glutting the docks and demoralizing prices.

THE seedsmen are certainly a patient lot. Look at the proposition of Doubleday, Page & Co., publishers of the Garden Magazine, who carry on hand and offer to mail Sutton's English catalogue to all American customers and yet solicit strenuously the advertising of American seed houses. What next?

H. F. Hall, Grand Rapids, Mich., Vice-President;
S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.
Annual meeting at Boston, Mass., 1911.

LANCASTER, O.—M. M. Wiese, the well known grower of indoor vegetables, reports that the lettuce business has been very slow thus far.

Prices of Indoor Fruits and Vegetables.

Chicago, December 19.—Mushrooms, 20 cents to 25 cents per pound; cucumbers, \$1.75 per dozen; lettuce, 35 cents to 40 cents per case; tomatoes, 15 cents to 20 cents per pound; radishes, 25 cents to 65 cents per dozen.

New York, November 17.—Mushrooms, 50 cents per pound; cucumbers, 15 cents each; lettuce, \$1.50 per dozen heads; tomatoes, 35 cents per pound; radishes, 60 cents per dozen bunches; asparagus, \$9 per dozen bunches; grapes, \$1 per pound; muskmelons, California grown, 75 cents each.

Wichita, Kans.

The lettuce growers of Wichita are complaining of poor trade conditions. Good prices and a market for all of their cut has encouraged production for some time past until a considerable area and capital is involved. But just at this time, when they are all in with a good big crop for the holiday trade, there come heavy consignments from outside growers to the commission houses which have usually provided the outlet for the bulk of the Wichita cut. The most of this cut, so it seems, comes from a large plant built at a neighboring town, which, finding their home market inadequate, has glutted the Wichita market in quantity and broken the prices so that, even at the low prices, the Wichita growers can only find market for a very small part of their cut at any price. This situation, coming so unlooked for, has found the growers here with no provision for the marketing of their cut in other larger markets outside of Wichita. An organization of the growers with a selling agent and selling direct to the grocers, or finding an outside market, or both, seems the probable and only solution. W. I. CHILA.

Forcing Cauliflower.

ED. AMERICAN FLORIST:

Please advise me which is the best method of raising cauliflower in hot houses? OLD READER.

We believe more failures result from the use of poor plants than from any other cause; and while this applies to many crops, it especially applies to cauliflower either indoors or out-of-doors. Once checked, the development is arrested, resulting in buttoning of the crop, and this again often is responsible for the various freak heads developed. Too often the seed is blamed, when really the treatment is at the bottom of the trouble. We will dwell at length upon this plant subject, because the other part of the business is more a matter of plenty of nourishment and water.

There are several types used for forcing; one may be termed the Erfurt type, the other the Snowball. The Erfurt class is the earliest and therefore much more impatient in regard to checks. This is so pronounced that expert operators never dibble this class, as they resent two transplantings. The seeds are sown thickly in good soil and the plants allowed to develop where they germinate until large enough to plant into permanent beds. Some growers pot the seedlings as soon as well up, which is an excellent method where one is a good hand at producing pot stock; but too often inexperienced men ruin pot plants easily either by overwatering, drying out, or starvation. Pot plants must be set out as soon as the roots have filled the pot. To sum up, the plants must be developed from start to finish without a stop.

Cauliflowers being gross feeders, need solid beds for best development. They are generally started among some other crop, mostly lettuce. Radishes would not do, as cauliflowers and radishes are very much subject to the same enemies and diseases and thus one would court trouble. However, this double cropping is also a risky business, as the best of plants can be choked out of life among large lettuce.

Just before the leaves close is the time for a good top dressing. A good way is to apply a coat of fertilizer and then a mulch of old manure. Nitrogen is needed as much as anything else; in fact, a fertilizer could almost be equally proportioned: 10% potash, 8% phosphates and 7% nitrogen, mostly nitrate of soda, would be a good combination, together with a coat of manure.

The nearer the crop is to the flower development, the more feed and water is needed for success. Under glass cauliflower is very sensitive to currents of air and ventilation must be more carefully given than for lettuce. If allowed to flay they are easily ruined. To bleach them the leaves are tied much the same as outdoors.

The distance apart may be 15x15 inches for Erfurt and 18x18 for Snow-

ball types. Temperature a little warmer than for lettuce.

THE December number of the Crop Reporter issued by the Department of Agriculture states the value of nursery stock exported during 1910 is \$324,136, an increase of more than \$7,000 over the previous year.

Two Fine Foliage Plants.

During the summer and fall it would be difficult to say which was the finer of two elegant large-leaved shrubs here in California, *Wigandia macrophylla* or the rice paper tree (*Fatsia papyrifera*). But now that the latter is flowering there is no question as to which is the finer. This latter, in addition to the beautiful large leaves, is now covered with the immense panicles of creamy white flowers. These are small individually but the panicles are over a yard in length, erect at first but becoming semi-pendant with the weight of the hundreds of flowers. And a tree 12 to 15 feet high with a couple of dozen of such flower spikes is certainly a noble plant in the landscape. The *wigandia* has a stiffer, harder outline and rather a somber effect if overplanted but it makes a magnificent lawn specimen where there is ample room for its full development.

H. R. R.

Rosa Rugosa.

Of all the roses, this is the hardiest, has the best foliage, is free absolutely from mildew and insect pests, grows well in ordinary soils, is fine for grouping among other shrubs, flowers freely and has very ornamental fruit.

What more can be said in favor of any plant? And yet we find that from some sources in the recent past a miserable mongrel strain of *Rosa rugosa* has been disseminated, lacking vigor, also the fine, uniformly dark green foliage, and when the seed vessels appear they are small, soon dry up and lose their beauty. The plants live and flower, it is true, that is to say, they stay with us, but as compared with the true type, are not to be tolerated except until better can be secured.

The writer has been studying closely the past summer a lot of these plants, the first symptom of doubt being caused by a close examination of the foliage which differed in each plant; later, when the fruit appeared, enquiry elicited the fact that there was a bastard strain of this beautiful Rose of Japan in the trade, and we have it.

If any reader has stock of the true *R. rugosa*, let him save the seeds now, it is not too late to gather them, and sow in boxes placed out of doors to freeze for a few days; it does not matter how little or how long, then place in warmth in a greenhouse, and it will be seen that every good seed will germinate at once. Transplant when large enough in other flats, and set outdoors next May, and it is surprising how soon these will be fit to sell, and there is going to be a demand for true *Rosa rugosa* very soon, and stock guaranteed true has already a special value. This

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

A Shrub for Steep Banks.

A very common demand made on planters is for shrubs which, besides being an ornamental character, will assist in retaining the soil on steep banks, preventing its washing away in rainstorms and floods from melting snows. There may be others as good, but there can be none better than the varieties of Snowberry, *Symphoricarpos*. The two best known varieties of these are the *S. vulgaris*, with red berries, and the *S. racemosus*, with white ones. They are among the very best of shrubs to form underground stolons from which arise shoots, so that in a very short time one bush becomes the parent of hundred, says the Journal of Horticulture. In the course of time plants set some feet apart have increased so much that one can hardly make a passage between them, the ground at the same time being so full of underground stems and roots that washings away of a bank where they are cannot occur. Coming back to the subject of the *Symphoricarpos*, the variety *vulgaris* is the one having red berries; *racemosus* has white ones. The red berried one is the best one to spread, but as the berries of both are exceedingly attractive in late summer, and into early winter, both should be used in planting. The white berried one represents the Snowberry name, the red one is generally called Red

FRANK OECHSLIN,
4911 Quincy St., CHICAGO

Boiler Heating Capacity.

ED. AMERICAN FLORIST:

I have put up a greenhouse 14x60 feet, span roof. I have 5-inch piping and a No. 4 Daisy boiler and thought of putting in one flow and return up each side. Is it best to raise the pipes a little from the starting or to lower them and how much should I set the boiler below the pipes? Of course I have to try this before I know if this quantity of pipe is sufficient. If not how much 5-inch pipe is a No. 4 Daisy supposed to heat? A. P.

If possible set the boiler so that its top will be lower than the returns. The lower the boiler the better the circulation.

If possible to use 2-inch pipe it will be found more satisfactory. The temperature desired is not stated nor does the question give any idea of the climatic conditions, but for 50° there should be one flow and one return on each side of the house and to secure 60° one and better yet two additional pipes should be used. With large pipe it is generally best to have the flow and return pipes on the same level, with the highest point at the farther end from the heater.

If the Daisy heater is the same as the Spence, the No. 4 will look after 600 feet of 5-inch pipe.

To pipe a house 14x60 feet to 60° using small pipe, take one 2½-inch flow pipe and eight 2-inch return, or six returns for 50°. In this case run the flow overhead and have the highest point near the heater. L. R. T.

A Grand New Carnation

Bright Spot

Outclasses everything heretofore grown in the dark pink class. Won first honors in the 100 class for best dark pink at the A. C. S. meeting, Pittsburg, January, 1910, also at the Chicago Flower show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price per 100, - - -	\$ 12.00	Price per 5000 - - -	\$400.00

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

SUCCESSFUL FLORISTS

all over the country are using McCray Refrigerators. The circulation of air is so strong and steady that there can be no stagnation or dampness, so that your stock will always be fresh and fragrant. Furthermore the saving in ice will more than pay for the cost.

McCray Refrigerators

will lend attractiveness to your shop. Beautifully made and finished, they are lined with white enamel, opal glass, tile, mirrors or marble, as you desire. Write today for our free catalog No. 72 which will give you ideas how to add to the attractiveness of your establishment.

McCray Refrigerator Co.,

269 LAKE ST., KENDALLVILLE, IND.

Ready Reference Section.

10 CENTS PER LINE, NET.

NOW READY—New 1910 Edition

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

Here is One Wing of a House We Built at Katonah, N. Y.

The entire house is 20 feet wide and 104 feet long, having four compartments. It is our Iron Frame Construction which makes a house that's built to last. It has the advantage over all the so-called "newer constructions" because you know it will last because it has lasted. Send for circular.

Hitchings & Company
1170 BROADWAY NEW YORK

PLAN 96

It is at Sewickley, Pa. near Pittsburgh, The straight gabled, curvilinear palm house with its single curved bay and ornamental entrance is a decided break away from the general treatment.

For attractiveness, uniqueness and balance, we doubt if it can be beaten. Wouldn't you like to know all about it? Our new catalog will tell you.

Lord & Burnham Co.

Irvington, N. Y.

New York Boston Philadelphia Chicago
St. James Bldg. Tremont Bldg. Heed Bldg. The Rookery

Wichita, Kans.

The usual ante-Christmas conditions seem to prevail. Judged by trade conditions so far this month the holiday trade will be up to the average at least. This is from a retail standpoint. In cut flowers the crop of locally grown stock is of good quality but will be inadequate in quantity, especially in roses and carnations. In Christmas plants the offerings are of wide variety and, generally speaking, of fine quality. In Christmas greens the produce commission merchants have finally taken a dip and as a consequence the grocers, meat markets, news stands, and even the street wagons are offering Christmas trees, holly, mistletoe, wild smilax, etc., with the usual fakirs' inducements. While the quality of such stock is generally damaged somewhat, owing to the care it gets in such hands, yet it is bound to find some buyers, to the detriment of the trade of the florist. The weather still continues dry—no rain since early in October. While this does not suit the farmer, upon whose prosperity so much depends in this western country, yet it has given the florist lots of fine sunshiny weather for growing, and good weather in which to do business—and if the farmers will stand for it one more week we will then say "Let it rain" in all sincerity.

C. A. Rose says the physical malady that bothers him mostly is getting hungry. Mr. Rose is in the market with a large stock of holly and evergreen wreaths, along with the usual florists' stock.

Chas. P. Mueller has added to his display space by building a pergola style of booth in the center of the store. This is especially lighted and hung over with various wares adapted to that sort of display.

J. M. Kessler, a grower of Topeka, who, with his father, has been making

Directory for 1910

Double Glass Sash

Less Work—**Better, Earlier Crops**

Sunlight Double Glass Sash reduces to a minimum the labor connected with hot-bed and cold-frame gardening.

You never have to cover Sunlight Double Glass Sash

All the hard work of handling and the expense of buying heavy boards and mats—all the time spent in covering and uncovering the beds are eliminated.

The double layer of glass does it
(See diagram above.)

Between the two layers is a $\frac{3}{4}$ inch layer of dry still air—a transparent blanket that is better, than mats or boards because it never shuts out the light. The plants get all the light all the time. As a result, they will grow faster and become sturdier, will be ready for the market earlier and bring the big prices.

Glass is held in place without putty. Can't work loose, easily replaced

Agents Wanted
Write us for details.

Get these two books

One is our free catalog giving all the details of the Sash and of our freight prepaid and guaranteed delivery proposition. The other is a book on hot-beds and cold-frames by Prof. Massey, an authority on the subject. This book is of vital interest to every professional grower and florist. 4c. in stamps will bring Prof. Massey's book in addition to the catalog.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from
start to finish.

When the machine is filled to within six inches of the top, a few strokes
of the pump will compress enough air in the tank to produce a continuous
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,**
and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

GOOD OUTLOOK.

With only a few more days until Christmas the wholesale houses have been quite busy sending out supplies. Ruscus, statice, holly and southern smilax are having a remarkably good call. Boxwood is about cleaned up and there will be no more received until after Christmas. Orders for Christmas are quite heavy and growers are preparing for a busy week, as stock is not going to be overplentiful this year. Cut flowers are not in large supply at this writing, as most growers are holding back a certain amount from day to day for Christmas orders and prices are about the same as last year. Although Christmas trees are supposed to be scarce quite a number are on the market and prices have not advanced to any great extent. Good nursery and Vermont trees are bringing about the same as last year. Ground pine wreathing is bringing fancy prices. If the weather this week is propitious, so that the retailer will be able to attend to the business that should come his way, this ought to be a banner year, as nearly all have bought heavily in supplies and cut flowers.

Our Supplements

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue as otherwise they may miss some of this high grade work.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Pelargoniums.

Where a general stock is grown there is always a demand for pelargoniums, and it is now time to look the stock over and get it into shape, for with the turn of the year, this stock begins to take on new life and start its growth. The cuttings, that were propagated during August, will now have made a good growth, and if more stock is wanted, the tops may be cut off and propagated. The stock plants can be shaken out of the old soil and the roots shortened back and potted in a pot one or two sizes smaller than they have been in and placed in a light, sunny position. Make the soil fairly rich, at least one-quarter well rotted manure, and a goodly portion of sharp, clean sand, and in potting, be sure and pot firmly. The plants potted loosely will surely make long rank growths that are soft and ungainly, and the demand is for a short, stocky plant with thickly set foliage, and besides the blooming qualities of the plant will be greatly benefited by firm potting. The plants should be spaced out, as fast as they grow, to prevent undue crowding. Get all the cuttings of this stock that are wanted into the propagating bench at once, for it is not desirable to propagate these plants much after the first of the year, with the intention of obtaining salable stock, for they grow slowly.

Pansies.

Much of the pansy seed sown in late summer and fall failed to germinate and consequently many growers are short of stock. A plan which we have adopted, when this has occurred, is to sow seed in the greenhouse about the first of the year, and we have been able to procure very salable plants for the late spring, after those grown from the fall sown seed are all sold. The germination of the seed is generally much better in the houses, for the care is under full control and if fresh seed is obtained no trouble is experienced from this cause. An ounce of seed will produce about 3,000 plants and the best strains should be procured,

divided into the best selling colors. A good mixture is one-half ounce mixed colors, one-quarter ounce yellow, one-eighth ounce blue and one-eighth ounce white. As soon as the plants are large enough to handle they should be transplanted into other flats about one inch apart, and again transplanted in March to two inches apart, or if there is plenty of room they can be first spaced to the latter distance. The flats should be placed on shelves near the glass, where the plants will not get drawn in the early stage. They can be set out in the frames the first of April, or as early as possible and covered with sashes for a short period to allow them to get hardened off and shaded for a few days after planting to prevent them from wilting, and a very fine lot of plants will be obtained for the late sales. Make the soil very rich, especially for the last plantings, and extra large flowers will be borne by these small plants.

Easter Lilies.

As soon as room can be made for the pots of Easter lilies after the Christmas sales they should be brought into the warmer houses. Easter is quite late this year, the middle of April, and the plants will not need the heavy forcing which was required last year. Thirteen weeks are necessary if the plant has broken through the ground in a night temperature of 60 degrees and with 10 degrees higher during the day to bring them into bloom in that length of time, but if given a little cooler treatment, a little longer time, with a week in a cool house at the end, a much better plant and heavier flower is the result. Too rapid forcing makes a soft, weak growth with a papery flower, that does not last long after it blooms, and is very apt to be bruised in handling. If the bulbs are in their blooming pots they should receive a top dressing of good strong soil, and if in small pots, immediately potted into the blooming size, either 5½ or 6-inch pots. In doing this, the best method we have found, is to place

the ball of the small pot on the drainage at the bottom of the large pot and fill around with new soil. If the plant has not grown high enough to fill the pot, room can be left which can be filled in later. Our reason for potting this way is because the lily throws out strong feeding roots from the base of the stem, and if the plant is potted so these grow into the soil a much better flower is secured, as well as a handsomer plant than when these roots are bare and out in the air. Regular fumigations must be followed up all the time to keep the aphid in check. Sometimes the aphid gather in the tender top of the growth and fumigating will not dislodge them. A weak solution of tobacco extract sprayed into the center of the growing plant will generally dispose of them.

Rambler Roses.

The rambler roses will need all the time between the first of the year and Easter to bring them into perfection, especially if they are field grown plants. The plants should be started in a cool temperature from 40 to 45 degrees at night and the wood syringed frequently to soften and open the lower eyes on the long canes. All the weak growths and unripened wood should be cut out. As soon as the eyes begin to swell, the canes should be tied in the form the plant is to be grown, it is far better to do this before the eyes get started, for if delayed until the breaks have begun to grow, there are sure to be many rubbed or broken off, in the tying out. The tying out may be done in the shape that suits the growers' fancy, some place sticks in the pot and wind the canes around them, carrying some canes across the center of the pot; others bend the canes into arches over the top, but whatever way is followed, it is better to have the top of the cane bent down so as to restrict the flow of sap and cause the lower eyes to open and form growths. As soon as the plants have made good growths, they should be moved into warmer quarters where they may be sprinkled every bright morning to guard against red spider, and carefully ventilated to prevent mildew. There are so many good varieties of the rambler roses that the grower can have all the shades of pink and red, and some of the newer varieties make very attractive plants for the Easter sales. Crimson Ramblers and Dorothy Perkins are, of course, well known, but Tausendschon, Lady Gay and Hiawatha are all fine varieties for forcing and give a splendid assortment for the spring.

VICTORIA, TEX.—Miss B. E. Smith has established a floral parlor in this city.

NEW BEDFORD, MASS.—A disastrous fire on the morning of December 3 destroyed the greenhouse and stock of W. E. Mosher on North street. The property was a total loss, estimated at \$1,500. Only the framework of the greenhouses remains standing.

CLARKSBURG, W. VA.—The Hayman Greenhouse Co., whose range of greenhouses is at Bridgeport, has opened a flower store in the new Goff building, on Court street. The floral design department will be in charge of Miss Mary Clemens of Pennsylvania.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

For the Communion Table.

There is a very simple plan of forming crosses or any other suitable device for vases by having a flat wire frame made in shape like a battle dore, or rather a racket bat with meshes of wire. The stalks of any flower of a light color may be placed in the meshes of the frame in any required form and the remaining parts filled up with dark leaves or flowers, making the desired figure stand out in relief, as it were. A vase is filled with wet sand and the stalk of the frame inserted. When the form will admit it a semi-globular wire frame may be made to cover the front, and flowers arranged to present the appearance of being piled in banks. The style and amount of church decoration depends, in a great measure, upon the character of the interior of the edifice. In churches where it will not admit of the possibility of safely fixing any decoration, it is well to have a frame made of the proper length and in height extending from the ground to the sill of the window above. This should be covered with canvas and over this may be spread cloth or velvet to show the decorations to advantage—the lighter the color of red the better the green leaves will stand out.

A. E. K.

Casket Covers.

SEE SUPPLEMENT WITH THIS ISSUE.

One of the most elaborate, as well as the most expensive, designs or floral arrangements, which is required

fine stock can be used for this purpose, but the nice covers are, of course, made of the most select stock, and the choicest blooms the market affords are used in the best of this class of work. Roses, lily of valley, violets and orchids are more often required in the arranging of the casket covers than other flowers, and they are used each one exclusively or in combination. Handsome greens are a necessary adjunct and asparagus, either sprengeri or plumosus, and the adiantums are freely used to give the design the necessary finish. The finest of these arrangements are made on silk netting, and the greens and flowers wired or sewn into the cloth, so when completed the cover can be laid over the casket, making a floral blanket to completely cover it. The cover which we illustrate is beautifully executed, being composed of cattleyas, lily of the valley and adiantums. The lily of the valley is put together in spray or shower form so that it hangs gracefully at the sides and ends, enough of its own foliage being used to give it proper character, and is a most beautiful piece of floral work.

Christmas in New York.

Never before, at Christmas time, was there such an elegant and alluring array of flowering and ornamental plants presented to the gaze of an admiring public by retail dealers as has been seen this Christmas. Plant growers have about reached perfection in the science of making plants flower at a given time, the lure of the nimble dollar being, of course, the chief incentive in the perfection of the art. Azaleas.

INTERIOR OF WOLFSKILL BROS.' STORE, LOS ANGELES, CALIF.

of the florist at the present time, is the casket cover or blanket, as it is sometimes called, and it is an arrangement that is meeting with a great deal of favor, and being demanded more and more each year. It is a design that cannot be made up cheaply, for it requires the best of stock and entails an immense amount of labor and time, and must bring the designer or store a good remunerative value. Any

cyclamens, ardisias, solanums and oranges were never seen in better shape and the retailers certainly had very fine material wherewith to tempt their holiday trade. New York, like all other cities of any size, no doubt, has its several distinct phases of the retail business, ranging from the men who are located in basement shops in the congested districts, to those who operate large plate-glass fronted and lav-

ishly ornamented establishments, and who cater only to the ultra fashionable society. They all have their particular kind of trade to provide for and, at holiday times, as well as at any other time of the year, they make their displays as alluring as possible, according to the demands of their particular class of trade. Flowering plants are so good nowadays that novel features in the way of receptacles to hold them are not near so many, nor so elaborate as formerly, all of which is good. Baskets are seen in plenty, but these necessary accessories for pretty arrangements did not dominate; where they were used they were not more conspicuous than the plants they contained, just a simple handle basket or hamper, of a color suitable to the plants used. A rather spectacular effect was created at one uptown store by having a number of small sized standard Bay trees which had been gilded, leaves, stems, pots and the baskets which held them. Trees of gold they were, sure enough, and, no doubt, accomplished their purpose as they were certainly very attractive even if they did look a bit artificial. Everywhere almost, Lorraine begonias were a feature, these with a touch of ribbon were about the most popular. A very few rhododendums were seen and they were very well flowered; a chiffon ribbon traced among and just under the trusses gave them a very rich effect. A limited number only of Bougainvillea were in, primulas were not seen in such large numbers but of ardisias, poinsettias and the berried aucuba there must have been a very big supply.

J. H. Small and Sons, at their Broadway store, had one of the nicest displays on record. The window had in the foreground, poinsettias in pans, the pans covered with natural sheet moss, and, there is no better combination perhaps than the red and green thus arranged; behind the poinsettias were camellias in full bloom. The other window was white and pink; lily of the valley in boxes bordering specimen plants of Begonia Gloire de Lorraine deftly touched here and there with knots of very pale pink ribbon, the effect can easily be imagined. Banks of choice flowering plants lined the interior and the staircase leading from the store to the conservatory, the whole creating a very gorgeous effect.

Alex. McConnell, 571 Fifth avenue, had innumerable combination arrangements of plant baskets. The round or tall high handle basket was the favorite, and the plants used were of the finest. In addition to flowering plants, many store ornamentals were used, which helped materially in the warmer color effects, crotons, dracæna and marantas being all used plentifully in some of the combinations.

At the House of Flowers, Forty-sixth street and Fifth avenue, each window had a separate color scheme, and both were very attractive. One was yellow, with orange and yellow ribbon; the other was red, with ardisias, and red ribbon.

A. Warendorff, Broadway, near Twenty-eighth street, made a very elaborate display, using cut cattleyas as a center for his window, they being surrounded with baskets and hampers of mixed plants together with a rather free use of the new shades of ribbon. Among the plants used were bougainvilleas, camellias, cyclamens, solanums, azaleas and poinsettias.

Young & Nugent, 42 West Twenty-eighth street, made a window feature of gilded boxes filled with azaleas and gilt boxes holding ardisias, all with a slight touch of appropriate ribbon.

John Nicholas, Forty-second street, had a very attractive display, some excellent white Lorraine begonias being among the plants. Porto Rican matting for pot covers and a liberal use of

azaleas, etc. A novelty here were small standard grown myrtles in fancy square boxes, these proved very popular. A few plants of flowering almonds were also seen here. The window scheme was of white and yellow, oranges and Pandanus Vietchii being used principally to carry out the idea.

Myer, Fifty-eight street and Madison avenue, showed an elaborate assort-

PANAMA PACIFIC EXPOSITION FLOWER DESIGN.

Exhibited by Pelicano, Rossi & Co. at the San Francisco Flower Show.

ribbon in new green and lavender shades together with a splendid collection of flowering and decorative plants made his store one of the prettiest seen in the city.

Poinsettias and ardisias in gilt baskets were the window attractions at Chas. Dard's, Forty-fourth street and Madison avenue. In plant combinations were some pretty things also, a basket filled with dark crotons, Dracæna terminalis, Euonymus variegata and Dracæna Sanderii was very fetching with its extremes in color effects. Cyclamens were encased in birch bark pot covers and ribbon was used quite freely in the oranges, azaleas, ardisias, ericas and the rest of the stock, the whole being a very fine display.

A. T. Bunyard, Forty-eighth street and Madison avenue, had an excellent array of choice plants, both flowering and decorative. A fine white rhododendron was on view in one of the windows along with camellias, ardisias,

ment of the best to be had in flowering plants and had many very pretty arrangements in birch bark baskets. Some effective combinations were made in high handle gilt baskets also. As a souvenir to his regular customers Myer sent a china fern bowl with inner bowl complete, with his name and address burnt into the pottery; the many grateful acknowledgements received from the recipients of the fern bowl are, to Myer, a very pleasant feature.

The Cable Florist, J. G. Panos, and The Harlem Florist, all located in One Hundred and Twenty-fifth street, each made nice displays of plants. Perhaps more ribbon and matting for pot covers were seen here than in any other part of the city.

David Clarke's Sons, Seventy-fourth street and Broadway, had an unique window, a birch bark mantel over an old fashioned fireplace being the centerpiece. Surrounding the fireplace were ericas and ardisias and in the fore-

ground were dwarf auracarias in china bowls, red baby ribbon trailing among the tiers of the plants and a wide red ribbon around the bowl. In their plant arrangements were many very heavy and massive baskets, large plants of oranges, crotons, Pandanus Vietchii and aspidistias being employed. A very pretty basket was one in which were ericas at each end (it was oblong in shape), the center space filled with ferns, crotons, Dracena terminalis, and English ivy wound over the handle. Birch bark boxes were used quite freely also to hold plant combinations in smaller sizes.

The Bowery has its Christmas festival, too, just as much so as does the more aristocratic quarters of the city. At Number 202, A. Le Moutt made a brilliant display. He has been located in this district for a generation and knows the needs of his patrons like a book. Elaborate and expensive plant arrangements in fancy baskets are not so much in vogue in this part of the city but single specimens of plants, neatly trimmed with ribbon and the pot surrounded with a cover of matting or wicker-work were displayed in numbers while the windows, banked with evergreens and decorative plants, upon and among which a plentiful use of red ribbon, bells and stars of red immortelles had been used, were a perfect blaze of red and green and were indeed attractive.

Foley, 226 Bowery, has also been a good many years here and commands a generous share of the Bowery trade. Flowering plants of all the seasonable kinds were displayed in profusion. Ribbon was not used as lavishly but many decorative plants were intermingled with them giving a very charming appearance both to the store windows and to the interior.

It will be seen that cut flowers play an important part in Christmas displays but there was everywhere a plentiful supply of holly and mistletoe; also a goodly array of Christmas trees at those stores located away from the fashionable districts. Cut flowers, however, came in for their share of attention at the last moment and while every year there seems to be more plants used than ever before, the same can truthfully be said about cut flowers; there are as many used now at Christmas time as ever there were, the plants may act as a balance in keeping cut-flowers from soaring to such high prices but supplant cut-flowers they never will.

Christmas in Chicago.

A splendid Christmas business is the verdict throughout the retail trade, and some of the proprietors assert that it was the best Christmas that they have ever had. The plant trade was a great factor in all the stores, and while many seemed to have gone into plants very heavily, Monday saw almost all sold and in the store where temporary stages had been erected nothing on the bare shelves was to be seen by Monday noon. The prices of the cut flowers did not soar quite as high as they have in some years, and there was plenty of stock in all lines, which was a great assistance to the retailer, for it enabled him to fill orders of first quality stock at prices that did not scare the customer away. American Beauty roses were very plentiful in the market, in fact on Friday some of the growers weakened considerably on the

prices and the retailers in many cases took advantage of the drop and bought quite heavily, but Saturday saw the prices back to the old figures. Nevertheless, there was quite a falling off in the prices that have been obtained in other years for this queen of roses, but American Beauties are always popular at this holiday season and at the prices offered this year there were large numbers sold at all the stores. Richmond, of course, was a prime favorite, and Killarney also sold well, but there was very little call for the white roses and the consequence was that many of the wholesale stores had plenty of white roses left on their hands on Monday. Orchids had a very good call and sold up very clean, and there was considerable demand for gardenias. Carnations were just as popular as ever and, in fact, the only real scarcity noted on the market was for red carnations. White were, as usual, over abundant. Violets were, contrary to all expectations, very plentiful; the word had been passed around that they would as usual be scarce, but heavy shipments arrived on Saturday and Sunday and Monday there were plenty to be had. The plant trade was, however, the big factor, and handsome specimens and baskets were shown at all the stores and found many buyers.

The best Christmas was the word at Fleischmann's, and it certainly looked as if it might be so. A large stage had been erected for the display of the Christmas plants and it was filled to overflowing with handsome crotons

A splendid Christmas trade at Muir's especially with plants, and this firm was well supplied with a fine assortment of decorative and blooming plants, which were beautifully shown both as specimens and in baskets. A good cut flower trade was also enjoyed.

Better than any other Christmas was the report of W. J. Smyth, and on Monday the store was nearly depleted of the beautiful stock which was displayed but a few days before. An accident which might have been quite disastrous but which fortunately only resulted in the loss of a plate glass window, happened during the holiday rush. Two automobiles, both going at a good clip, and at right angles to each other, collided in front of the store and one was thrown against the window. It happened to be the window wherein the forest scene was depicted and there were no expensive plants to get injured.

A fine Christmas business at the E. Wienhoeber Floral Co. was enjoyed all through the week. The trade started in early and the beautiful plants and the combination baskets were picked out and sold almost as fast as they were put together and shown. The call for nice flowers was very good and a splendid Christmas trade was enjoyed.

Everything cleaned up at John Mangel's store on Wabash avenue, and he had an immense line of some of the finest plants in the city. Large azaleas that were fine specimens were all sold and a large number of pans of poin-

MONSON'S NEW ROSE.

Unnamed Sport of Farbekonigen.—See Page 1148.

azaleas, poinsettias and other Christmas stock and on Monday noon not a plant was left, the bare shelves being mute witness of the amount of business done. There was also a good call for all kinds of high grade flowers.

Every plant sold was the greeting from the proprietor at Strail & Hahn's, and a good cut flower business. All the business that we could attend to and lots of good stock with which to fill the orders.

settias handsomely decorated were all disposed of. A very heavy business in Christmas greens was done, large sales of holly and mistletoe being made. The flower trade was also fine, American Beauty and Richmond roses taking the lead.

The downtown stores all did a rushing business. Rowe, Lange and Bohannon were all as busy as bees during the rush and a look through the stores on Monday found everything pretty well sold out.

ORCHID NOTES.

ONCIDIUM TIGRINUM is one of the sweetest scented orchids in cultivation, the flowers having a distinct violet odor. It grows freely in a cool house and is useful for cutting.

THOUGH a good deal like *Cattleya Trianae* in general appearance the flowers of *C. Chocoensis* are not nearly as useful as those of the former species owing to their habit of opening only partially.

Cypripediums in Variety.

The accompanying illustration shows that there is considerable variety in the shape of the cypripediums, making them very satisfactory for decoration. The graceful flowers of the selenipedium section are seen as well as the larger blooms of the barbatum and similar species that usually produce but one flower on a spike. There is room for both in every collection, for both have their admirers and taken all around they are among the longest lasting orchids in existence when cut.

Repotting Orchids.

From the present time on there is no better for taking such plants as need attention at the roots and fixing them up for the year ensuing. The roots of cattleyas are now dormant, that is to say, very little growth will be made at the tips, and injury is reduced to a minimum by attention at this time. Roots made outside the pots or baskets if put inside at the time of re-potting rarely make more growth, indeed they usually die, but are a source of strength while they last and may be carefully handled to save them. Before disturbing a pot plant, see that it is moist, even wet, for if dry the roots will stick to the pots and in removing them great injury results. It is well to water or dip them a day before and this is specially true of cypripedes that have been in the same pots for a long time and become root-bound. It does not pay to break the pots to get plants out, for more roots are broken in this way, and we must remember that a plant without good roots will not make satisfactory growth to flower next year.

Cattleya labiata will have done flowering and may be attended to first, for it often happens that great injury results to this fine orchid through inattention at just this time. We think they need rest and proceed to neglect at a time when recuperation is their requirement, especially after the great effort put forth so late in the year with dull cold weather following. It is probable that we have here the reason why so many of this variety perish after a few years in cultivation. Most of the others have the year before them after blooming, with increase of sun, air and moisture, the three great factors in the culture of plants under glass, including orchids. If a plant is doing well there is no reason for disturbing it except to give more room at the roots, and if these are good, pot it on. Newly established plants often need re-potting at the end of the first year. If the material is good do not disturb it; it is good for two or three years, but on the contrary, should the roots be in poor shape do not hesitate a day before giving attention. Cut

off all dead portions, even if this means all there is, put in as small a pot as possible, suspend from the roof and spray every bright day, and this sort of a hospital will soon become a pleasure to look at, even to show others. There is something about the air or probably atmosphere above the benches in a house that is better than it is elsewhere in the same structure, and the re-incarnation of orchids under such conditions is at times a revelation.

from the cult. If we had to import this material as European and British growers do, a large item of expense would be added, and we can take comfort, lay back and laugh at the time not so very long since when the experts said we must import either English peat or Belgian leaf mould to have success.

After the *C. Labiata*s are done we may begin with the *C. Trianae* if these are past blooming; if not, wait until

CYPRIPEDIUMS IN VARIETY.

To get the best results with cattleyas, firm potting is an essential, indeed most essential, for if otherwise done, too much moisture is held in suspension about the roots at times and this proves fatal if over-watering occurs. There is no better material than the osmunda root. This has been decided finally for all orchid growers, and removes a big bone of contention

they are and take the later flowering *C. Mossiae* and *C. Mendelli*, for these may be seen to safely before they bloom, as new roots will then be made in the new material and the plants well established before the strain of flowering is put on them. It is unwise to disturb the late flowering kinds after they have flowered and begun to root freely.

E. O. ORPET.

WITH THE GROWERS

Geny Bros., Nashville, Tenn.

Geny Bros., one of the leading florists of this city, have built up a fine business and are continually progressing in the extent of their plant and in the quality of their flowers, they having grown up in the floral business and are both practical growers.

In the year 1865 their father, John B. Geny, came to Nashville with his brother, Leon Geny. These Geny brothers were practical florists and horticulturists. They established each a place or truck garden and in time bought places of their own. Leon Geny purchased a place on the Hillsboro pike where he run a truck farm until his death. The other brother, father of the present Geny Bros., secured two acres on the corner of Clay and Jackson streets, which is still used by the present Geny Bros. for a part of their growing. The elder Geny was a very industrious man and an experienced grower of vegetables. He put upon the market lettuce, radishes, cucumbers, celery, all of which at that time was a rare luxury and brought fabulous prices, and his business was successful and profitable. John B. Geny, grew the finest celery ever brought to this market, not surpassed by that grown any where in the United States. At the time the first Geny Bros. came to Nashville, the floral business was in its infancy, but each of them were good flower growers and along with the vegetables, grew geraniums of all kinds, the Chinese primroses, callas, Neapolitan violets and such other flowers of that day. There was also a demand for all kinds of bedding plants and John B. Geny had always in the market an attractive display of flowers. For years he had a stall in the Market house, and had even then a large and growing trade. As soon as chrysanthemums became popular, he grew some of the best in the market. He died in 1887, leaving his two sons, Oscar and Leon, who had in the meantime grown up with a practical knowledge of the business, to carry it on.

After the death of the father the two sons turned their attention more and more to floriculture. For a while the stall in the Market house was retained and sales made from there, but they soon realized the necessity for an up-town store, and then the store in the Tulane Hotel was taken. When the up-town store was taken Leon Geny, the younger of the two brothers, took charge of it, and Oscar Geny, the elder, continued to manage the growing department, and with such success that his flowers are unsurpassed anywhere. Their trade is of the best and continually growing. The old place bought and owned by the father became too small for their purposes and was so encroached upon by the city, and by manufacturing plants that they purchased fourteen acres on the Morrow road, on which they have erected a fine range of houses, to which they are adding continually. The new place was bought in 1906, and already is quite extensive. The better conditions for raising flowers enables them to produce finer and healthier roses and carnations as well as other flowers. The old place, being so convenient to the store serves many useful purposes.

It is not favorable to the growth of white flowers, but all the azaleas, bulbous stuff, palms, asparagus and smilax are still grown there, and several houses of chrysanthemums, but no more roses nor carnations. Also all the wagons, of which there are six, with ten horses and mules, are kept there, at the old place.

There are twelve greenhouses at the old place and ten fine large ones at the new and Oscar Geny superintends the growing at both places. At the new place Rudolph Rodenhauser is the resident foreman, and lives on the place. He is the son of Peter Rodenhauser, who once was the well known maker of pots in this city. Beside the new houses at this place there are a large lot of cold frames for the growing of violets, and lean-to's for asters for summer use. Last summer some very fine asters were grown. The green-

Oscar Geny.

Of Geny Bros., Nashville, Tenn.

larney, White Killarney, Ivory, American Beauty and Richmond, with a smaller amount of other varieties. Last season the cut from the Ivory houses was 10,000 in November alone. There are 4,000 rose plants, all thrifty and of healthy, vigorous growth and promise well for the season and are even now bearing abundantly. Three houses are in carnations with 20,000 plants, including White Perfection, Enchantress, White Enchantress, Mrs. Lawson, Beacon, Winsor and others. Two houses are in chrysanthemums and contain Lynwood Hall, Golden Wedding, Golden Eagle, Golden Glow, Mdle. Jeanie Nonin, Minnie Bailey, Yanoma and other varieties. Mr. Geny had the first chrysanthemums in the market this season, which came in time for our State Fair, and so early, during such very hot weather, that some of the flowers were scorched and it was with extreme difficulty that the blossoms were kept from spoiling entirely. A fine propagating house 8x200 feet has just been added. Fifteen thousand violet plants are in the long cold frames and will give a good supply of violets through the season. They are chiefly California and Princess of Wales. The outside garden is full of bulbs of all kinds, the Emperor and Empress narcissi, peonies, Ascension lilies and other early out-of-door stuff. There is also a rose garden in which are the hardy roses, Clothilde Soupert, Mamam Cochet, Souvenir de Malmaison, W. R. Smith, Etoile de Lyon and many others. Each season these are potted up and supply the two-year-old rose trade. They will soon be lifted and put in cold frames until the season opens in the spring. There is always a great demand for two-year-old roses by all flower lovers.

The place is provided with the Skinner sprinkling system, installed in all the houses as well as out-of-doors for the field-grown flowers. The water supply is pumped from Richland Creek, a never-failing stream, is abundant as to supply, and excellent as to quality, and furnishes all the water necessary. There are large tanks as

VIEW OF GENY BROS.' OLD RANGE OF GREENHOUSES, NASHVILLE, TENN.

houses are all provided with vestibule additions which are very great protection to the houses in extreme weather, and something new in greenhouse structure in this locality. Everything is strictly up-to-date and first class and all future additions made will be of the same high order. There are ten large houses, each 50x200 feet, giving a uniformity that adds to the general appearance of the place. Three of these houses are in roses, chiefly Kil-

reservoirs, and even in the driest summer there is no scarcity of water. There are also vats for rain water and for liquid manure. The heating plant consists of three big boilers of over 100 horse power each and there is a residence for the foreman.

In 1897 the store in the Tulane Hotel was taken, and a large patronage has been enjoyed by the firm. The remodeling of the hotel made a removal necessary, and the Geny Bros.

VIEW OF GENY BROS.' NEW RANGE OF GREENHOUSES, NASHVILLE, TENN.

are now located at 212 Fifth avenue North. They have been warmly congratulated upon their selection of a store. It is in one of the most popular shopping districts, and is just opposite one of the most fashionable ice cream and lunch parlors of the city. The new store is well equipped for all business, including a large McCray refrigerator. It is very commodious and they will, without doubt, do a large and profitable business. Miss Jamie Childress and Miss Mary Brown, two young ladies experienced in floral work, stay in the store and assist in making the floral designs, in which Leon Geny himself is an expert, and they make very artistic designs of every kind. Clarence Thomas, also, is a clerk and assists generally in the store.

M. C. D.

Business Reflections.

Has it ever occurred to you that there is more in the florist business than the mere growing of flowers?

Has it ever occurred to you that there are numerous details attached to the growing of flowers and plants, all of which cost you money?

Has it ever occurred to you to stop a minute and figure the cost of a certain flower or plant from the time it entered your establishment, either as a cutting or a seed, to the time it is marketed?

If it is a carnation, rose or chrysanthemum cutting, a product of your own place it is worth the market price of that cutting, mayhap more, as the market price in this business is not a fair estimate of value, in many instances it being below the cost of production. Presuming however the market price to be a fair value we start as follows.

To value a plant or seed add value of space occupied per month until it has been matured and marketed. Value of space can be closely estimated by getting the number of square feet of growing surface you have under glass and charging up to this surface all the expenses of your establishment that contributes to the greenhouses, in most establishments this is the entire bill of expense, as the only items that could be cut out would be in cases where a nursery or landscape gardening business is done along with the greenhouse business.

Presuming a case where the latter does not figure as part of the business we have to estimate, cost of plant including all houses, barns, land and greenhouses, all tools, implements and

Leon Geny.

Of Geny Bros., Nashville, Tenn.

stock and charge up at least four per cent. on this investment to greenhouse space (this same money properly invested would bring this much income without work and must be charged up), and in making this estimate do not forget that greenhouses torn down were part of the money invested and should be added to the cost of the establishment. To this add taxes, salaries, insurance, advertising, postage, stationery, coal, manures, all supplies for greenhouses, packing rooms, boilers, stables, and outdoor culture, add all traveling expenses to and from societies, shows and florist establishments, do not forget any details, and then to this add 10 per cent. on the original cost of establishment for wear and tear, then divide the whole by the number of square feet of growing surface you have, and the answer will be somewhere near the cost of that surface to you per annum, add to this the loss by unavoidable idle space for the season, and you have your working basis to estimate cost of plant production from.

Take a carnation as an example, first the value of the cutting unrooted then four weeks in the cutting bed with three-fourths of an inch space (square) then six weeks in a two inch pot with four or five inches of space (square) then six weeks in a three-inch pot

with ten square inches of space, then to the field for eight to twelve weeks according to locality, here the cost has been previously estimated in figuring up expenses against greenhouse space. Then back to the houses where from eighty to one hundred twenty inches must be given up to it. Keep an accurate record of flowers, cut prices obtained and credit up all cuttings taken from the plant, add the two together, deduct from cost of space taken up, and you can soon see if you are making any money or not, and properly followed up this will be a revelation to you when you come to select varieties for another year's culture.

Follow the same rule up with your pot plants, take a geranium as an example, starting with September 1, charge up space for one stock plant 120 to 144 square inches, from this plant you get from twenty to twenty-five cuttings between September 1 and May 1, and you have the price of your cuttings unrooted, if stock plant is any value to you May 1 that value can be deducted from cost, charge to each cutting from two to three inches of space in the cutting bed four weeks and you have the price of the cutting rooted, add for first potting five square inches four weeks, add seven square inches to this for each re-potting until sold and you have their approximate cost ready for market. Other plants can be estimated on the same basis, rather a crude way I acknowledge, but one that can be easily carried out in any establishment and if used with good judgment is fairly accurate and will give many a grower pointers that he badly needs.

To the man who has plenty of capital, a large plant, and who can adopt the best methods of growing and cost reduction, this system is of no value, as he can intelligently and accurately follow up the cost of each of his specialties to the fraction of the cent. When this is done keep it carefully to yourself, it is a part of your business assets to have the smaller grower who does not have your facilities for estimating costs, sell his stock below cost in competition with yours and working night and day to do it. You may think he will eventually kill himself on the job, but he wont this is a healthy business excepting from a financial point of view, and it is up to the man who knows how to make it healthy financially. Then again, if you keep costs carefully to yourself and sell at any old price you can get, there is no danger of the middleman

or the retailer realizing your down trodden condition and coming out to the greenhouses with a wad to ameliorate it and thus humiliate you.

But stop a minute and think are we not pretty low down on the scale now, it is true we assist our Maker in his production and our business is high and exalted, but do we assist ourselves?

The farmers are well organized for business. The fruit men are well organized for business, every line of trade is well organized for business excepting the florist (grower), the retailer is getting there, we have good organizations for social, laudatory and cultural purposes but for business, alas and alack we are away back, even our trade papers ignore it and it is high time we wake up and get our just deserts in this world of good and great things financially, we are entitled to them giving as we do our lives and our time to beautify and make it charming.

A. M. HERR.

THE ROSE.

A New Rose.

The new rose we illustrate which is unnamed as yet, was grown by John Monson, proprietor of the Minneapolis Floral Co., Minneapolis, Minn. The photograph was taken at the Minneapolis and St. Paul flower show, November 9-14 inclusive, the exhibit having been staged on Wednesday and photographed Saturday. "Mr. Monson has been experimenting with the growth of this rose for the past six years, and every year is more satisfied with its culture and the results obtained. The rose itself is a sport from a rose imported from Germany "Farbekonigen," but, it is a freer bloomer, lighter in color, and not quite as full a rose as the parent. In bud, the outer petals are red, as the rose unfolds the inner side of petals develop a warm, brilliant, dark pink, shading to lighter pink on the extreme outer edge of the petal. The rose is full, foliage plentiful, and dark green in color, fine strong stem, very fragrant and a very good keeper, in fact, some of the trials as to its keeping qualities might sound exaggerated.

It has been a money maker for Mr. Monson the past two years bringing, on the wholesale market for 14 inch stem, 15c, 20 inch stem at 20c, and 24 inch at 25c each. For this reason, Mr. Monson is loth to part with the stock for a couple of years yet to come. Holm & Olson, St. Paul, and O. C. Swanson, Minneapolis, have been handling the stock for the past two years, and pronounce themselves delighted with its selling qualities.

The holiday crop, now being cut, is very heavy, it having been disbudded at the same time as Richmond and Killarney, is now producing great large flowers, and stems which average 14 inches to 36 inches.

Mr. Monson, now has a stock of about 3000 plants, but will have a much larger stock in 1912 when he intends to put the rose on the market.

The rose can be seen growing any time at the greenhouses of the proprietor, or at the retail stores above mentioned in the Twin Cities, as the

local florists are willing to give all the credit due to their local prodigy."

MINNEAPOLIS FLORAL CO.

Roses in the South.

The plants will probably have made a good crop at the holidays and water should be given rather sparingly for a few days until they have again made good breaks. A good fertilizer at this time is a top dressing of sheep manure followed in ten days with a light springling of wood ashes. The soil in the South is generally fairly rich in potash, supplied probably from the cotton seed hulls, but a sprinkling of wood ashes at this time will be a great help to the plants. A quick way to get results from bone meal is to put a sack of it in a barrel and add enough water to merely cover it. In about two weeks it will be well on the way to decomposition when the whole can be emptied into the manure pit and applied with the manure water.

flowers again. Keep a good strong heat on the American Beauty houses, say 60° to 62° at night to prevent bull heads and let the flowers be well developed before cutting. Keep the beds clean of all fallen leaves and the plants tied up as they require it. With the short days and harder firing red spider is likely to make its appearance, so keep syringing on every bright day and don't neglect any corners.

It is time to have the propagating table ready. Such varieties as Kaiserin, My Maryland and Killarney will root more readily now than a month later—in fact a start should have been made early in December to get the best results.

WM. LEAR.

Azalea Deutsche Perle.

While this cannot be described as a first-rate variety it is the best double which we have or are likely to have for very early forcing and it is a question whether at times growers are not, in part at any rate, to blame for the

H. W. TILFORD'S FIRST PRIZE VASE OF 26 CHRYSANTHEMUMS

At the New York Horticultural Society Show.

In the middle and northern sections Kaiserin will require less water. A partial rest for four or five weeks is what they want after which they may be again started into active growth. In the extreme southern section this variety needs no rest but produces just as well as any other variety during the whole season. Perle is now showing decided bull heads on the strong bottom canes. If the leading bud is pinched out for the next six weeks the lateral growth will make good flowers with fair length stems. After the middle of February these strong canes will come with normal

poor figure it cuts at Christmas. Deutsche Perle answers very quickly to forcing conditions and it would be far better to allow it a couple of weeks in a cool, partially shaded house before placing it in heat. We have frequently advised this for forcing azaleas and are convinced that no time is wasted but, on the contrary, better results are secured than by rushing them into heat at once. It is true the plants sometimes arrive in such poor shape that no treatment can make good stock of them but the cool treatment at first will at least maintain the foliage that is on the plants in good condition and prevent the

sunny house and forced, a temperature of 70° at night being kept up and the house closed tight with the sun shining full on the glass, the plants being first heavily sprayed overhead. They never looked black, hardly lost a leaf and certainly not a flower bud and are now, December 12, being held in a cool, shaded house hardening off for Christmas sales. The pure white of the flowers sells the plants on sight and we could have sold the stock over and over again. This cool treatment in the early stages is advisable for all and the difference in some late arrivals of Simon Mardner which had to be forced at once and early plants which had this attention is so marked as to be an object lesson in favor of the cool treatment. H. R. R.

HOLIDAY TRADE.

Christmas trade all over the country shows a good substantial gain over the preceding year, the reports received ranging from ten to sixty-five per cent increase. While the reports from the eastern section tell of inclement weather, the country generally enjoyed bright sunshiny days. While it was cold enough to require that everything should be well wrapped, yet not so cold that much of the stock was at all damaged. The roses were in splendid supply everywhere, and in most places the quality was of the highest, in fact, many testimonials are being received that they were of the best quality ever grown or received at this time of the year. Carnations were in many places short of the supply but the large supply of roses was fully able to fill the deficiency. Violets were much more plentiful than was expected and in most places there were enough to fill all the orders received at much lower figures than in many preceding years. The demand for bulbous stock was not large anywhere and in some parts the supply was far in excess of the demand. This, however, is not surprising for most of this class of stock, in bloom at this season, is white and the demand for Christmas is for colored flowers—even white roses and white carnations are not greatly demanded when the supply of colored blooms is sufficient. One very pleasing feature this year is the almost entire absence of complaint of receiving stock that had been kept too long. The plant trade was excellent everywhere and a very large factor in the season's business, as it should be, for with the beautifully grown plants that are presented to the trade, there is no better stock to push and sell that is more satisfactory to both dealer and customer. The sale of Christmas greens was fully up to the usual amount and the general quality was better than in years gone by.

LITTLE ROCK, ARK.—There was an increase of at least 25 per cent in the Christmas business of Tipton & Hurst. The flowers were of the best quality ever handled at the holiday season, the supply of roses, carnations and violets was equal to the demand and an advance of about 10 per cent in the prices obtained. The call for bulbous flowers was about the same as last year. An increased demand for flowering plants was noticeable. In our twenty years' buying from the Chicago market, we never received such fine roses and carnations, or any which were so satisfactory to both ourselves and our customers.

DES MOINES, IA.—The Christmas trade will show an immense increase this year, the two days, December 24-25, showing an advance of 65 per cent, reports the James S. Wilson Floral Co. The supply of roses, carnations and violets was plentiful and everything sold out clean, prices ruling about the same as last year, excepting red carnations, which sold at from \$2 to \$2.50 a dozen. There was no great demand for bulbous flowers. The quality of all the stock was much better than last year, and there was an increase in the call for red roses, red carnations and poinsettias. The demand for plants was away ahead of last Christmas, the first choice being poinsettias; second, Begonia Gloire de Lorraine; third, Jerusalem cherries; fourth, azaleas; fifth, primroses, and sixth, ferns. There was a large demand for boxes of assorted cut flowers for dinner tables, which was a great help in using up all the surplus stock.

The Late Anthony Wiegand.

See Page 1101, Issue of December 24.

SAGINAW, MICH.—We think that the sales for this year will show an increase of 15 per cent over last, states The Wm. Roethke Floral Co. The prices obtained on pot plants are somewhat better than last year, while the prices of cut flowers was about the same. The supply of all kinds of stock was sufficient and there was no demand whatever for bulbous flowers. The long continued cloudy weather had its effect upon the stock and the quality generally speaking, was not as good as in former years. Flowering plants certainly took the lead. It seems as if palms had had their day. The only thing in decorative plants that sold were Boston ferns. The buyers are willing to pay a good price for good stock, but inferior stock cannot be given away; for floral buyers here demand the best. The trade was good but it would have been much larger had Saginaw not recently suffered from a smallpox epidemic.

BRAMPTON, ONT.—T. W. Duggan, manager of the Estate of H. Dale, reports an advance in the amount of business of about five per cent. There was a good supply of roses and violets but carnations were short of the call. The demand for bulbous flowers was good and stock of all kinds was of the usual quality, equal to other years. It is impossible to handle such an enormous trade within such a limited time at Christmas to the satisfaction of all.

KOKOMO, IND.—W. W. Coles reports the Christmas trade has increased about 20 per cent for several years and the present season has been no exception. The prices on roses and carnations were slightly better than last year, while with other stock they were about the same. There was a plentiful supply of roses, but carnations and violets were very short, and there were more Roman hyacinths and Paper White narcissus than could be sold. The quality of all the stock was good, about the same as in other years. There was a special call for violets and red carnations, and the demand for plants was equal to last Christmas. There was an increased demand for American Beauty roses, the sales being more than 50 per cent greater than last year.

UTICA, N. Y.—A record-breaking Christmas trade, reports J. C. Bigelow & Son, with an increase in sales over the previous year of 20 per cent, and the best they ever had. The supply of all kinds of stock was good, there being no great shortage of anything. The quality was good, and the prices for cut flowers were higher than last year. In bulbous flowers nothing was handled but Paper White narcissus. There was an increased demand for poinsettias and ferns and prices of plants ruled about the same as last year. The holly this year was very poor and the wreaths thinner and poorer than ever. Excellent weather during the holiday trade was experienced.

ATLANTIC, IA.—About the same as last year is the report of the holiday trade of the Atlantic Greenhouses. The prices realized this year were a little better than last. There were plenty of roses, but the supply of carnations and violets was short, though the quality was good and of roses and carnations better than last year. There was an increased demand for colored flowers and everything in blooming plants was sold. The baskets of plants sold well and more were disposed of than ever before, and at good prices. The holly this year was extra fine and was all sold. The Christmas trees also all found purchasers.

KANSAS CITY, MO.—The business at Christmas with the Alpha Floral Company this year was much greater than last, the percentage not being yet obtainable. The supply of all stock was good, with the exception of red roses, and of excellent quality. The prices of roses were about the same as last season, but carnations were lower. There was not much demand for bulbous stock. An increased demand for red roses, red and pink carnations and orchids was noted.

PARKERSBURG, W. VA.—J. W. Dudley & Son report an increase of 10 per cent in the sales at this Christmas over last year. The supply of roses, carnations and violets was equal to the demand and there was a fair supply of bulbous flowers. Better prices prevailed although the quality was not so good as last year. There was an increased demand for both plants and flowers, nice roses having a preference. Fine holly that was well berried found quick sale.

FLINT, MICH.—The holiday trade in this city was the best that the florists have ever had. The city has grown rapidly and the demand increases in proportion to the population. There was a good demand for pot plants and there was a supply of fine stock, the majority of which was home grown. Prices were about the same as last year. There was a shortage of carnations and some call for bulbous flowers.

ORONO, ME.—J. A. Maloney is erecting a large greenhouse, as his business has outgrown the size of his present plant.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1910

Subscription, United States and Mexico \$1.00 a year; Canada \$2.00; Europe and Countries in Postal Union, \$2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earliest possible), as we go to press Wednesday.

I have finished another year, said God,
In grey, green, white and brown.
I've strewn the leaf upon the sod,
Sealed up the worm within the clod,
And let the last sun down.

RENEW subscriptions promptly so that no copies of the papers may be missed.

1911—Welcome, and may you with every one of your odd numbers carry good luck and happiness to all our friends everywhere.

THE public is acquiring the habit of fighting shy of holiday cut flowers and the deplorable phase of this condition is that the honest grower suffers with the unscrupulous.

THE Grand Trunk Railway in its "Terse Travel Talk" says the cultivation of flowers near any city in Canada will pay and that there is room for a florist near every city in the west.

American Carnation Society.

CARNATION REGISTERED.

By The Cottage Gardens Co., Inc., Queens, L. I.—Howard Gould: Mrs. C. W. Ward. Pink seedling, color, clear dark pink; size of flower, three and one-half inches; wiry stem 30 to 36 inches in length. Flower deeply imbricated and of fine form.

A. F. J. BAUR, Sec'y.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the every-day florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high grade work.

American Rose Society.

The following special prizes are offered by this society, to be awarded at the National Flower Show, to be held at Boston March 25-April 1.

The Society of American Florists' silver medal will be awarded to the best grown rose plant or group of plants, should the exhibit be judged as of sufficient merit.

The Dorrance Challenge prize for the largest and best display of cut roses, a valuable silver medal properly engraved offered by Benjamin Dorrance of Dorranceton, Pa.

The Lord & Burnham prize for the best vase of cut blooms having the highest score, offered by the Lord & Burnham Co., Irvington, N. Y. This award to be in addition to any other premiums the exhibit may have secured.

The Hitchings prize for the best fifty blooms of any variety of American origin now in commerce, a silver cup valued at \$25, offered by Hitchings & Co., Elizabeth, N. J.

Special growers' prizes, value \$10, \$7 and \$5. These prizes are offered for the actual grower of any exhibit, and not for the exhibitor, except in the case where the exhibitor does his own growing. These prizes are to be awarded the three exhibits of roses, which, in the opinion of the judges, are the best specimens of the grower's work in rose culture. The object is to recognize the man who actually does the work. The prizes are offered by Benjamin Hammond, Fishkill on Hudson, N. Y.

BENJAMIN HAMMOND, Sec'y.

Federal Insecticide Regulations.

ISSUED BY DEPARTMENT OF AGRICULTURE.

The Insecticide Act of 1910 will become effective on the first of January. Joint regulations for its enforcement have just been issued by the secretaries of the Treasury, of Agriculture and of Commerce and Labor. The act forbids the manufacture or sale in Federal territory of adulterated or misbranded insecticides and fungicides, especially mentioning Paris green and lead arsenate. It also forbids interstate shipment of such articles, and this is its most important feature.

Under the regulations, samples of insecticides and fungicides are to be collected by purchase by agents of the United States Department of Agriculture, and analyzed or examined by such chemist or examiner as the Secretary of Agriculture may designate. If a sample then appears to be adulterated or misbranded, a private hearing before the secretary or his representative will be given to the party from whom the sample was obtained and to others interested, who may ap-

pear personally or by attorney and may submit oral or written evidence. If it still appears that the act has been violated, the proper United States attorney will be informed of the facts. Provision is made for state officials to cooperate in reporting violations to the Secretary of Agriculture. The latter will ordinarily make his requests for prosecutions to the attorney general, but in special cases directly to the proper United States attorney. After judgment has been rendered by a court the judgment will be published by the Secretary of Agriculture within thirty days.

Paris green is considered adulterated if it does not contain at least 50 per cent of arsenious oxide; on the other hand it must not contain arsenic in water-soluble forms equivalent to more than 3½ per cent of arsenious oxide; and no substance may be mixed with it so as to lower its strength. Lead arsenate is counted adulterated if it contains more than 50 per cent of water, or if its total arsenic is equivalent to less than 12½ per cent of arsenic oxide, or if it contains arsenic in water-soluble forms equivalent to more than .75 of a per cent of arsenic oxide, or if any substance is mixed with it so as to lower its strength. If lead arsenate contains more than 50 per cent of water it must be labeled "lead arsenate and water," and the extra percentage of water must be plainly stated. Any other insecticide or fungicide is considered adulterated if its strength or purity fall below the standard under which it is sold, or if any substance has been wholly or partially substituted for it, or if any valuable ingredient has been even partially removed, or if it is intended to be used on vegetation and is injurious to vegetation. If the designation of an article imports the presence in it of a certain substance, that substance must be present in the customary amount.

Any insecticide or fungicide is misbranded if the label bears any statement, design or device that is false or misleading in any particular, either as to the character of the article or as to the place of manufacture. And the term "label" is defined so as to include any circulars, etc., that are packed with the article or referred to either on the label or on the circulars accompanying the article. If the contents are stated in terms of weight or measure, they must be correctly stated. If an insecticide or fungicide (other than Paris green or lead arsenate) contains arsenic in any form, the total amount of arsenic and the amount of water-soluble arsenic must each be stated on the label. The amount of inert substances (often called "filler") must also be stated.

If the name of the manufacturer is given on the label, it must be the actual manufacturer; if the name given is not that of the actual manufacturer, the phrase "packed for . . ." "distributed by . . ." or some equivalent phrase, must be used with the name.

The dealer may relieve himself of responsibility by securing from the wholesaler or from the manufacturer a guaranty that the article is not "adulterated or misbranded within the meaning of the Insecticide Act of 1910." This places the responsibility upon the guarantor. The wholesaler or manufacturer may file with the Secretary of Agriculture a general guaranty covering every package of a particular kind of article. The guaranty will receive a serial number; this number is to appear on every package of goods sold under that guaranty, together with the words "Guaranteed by (name of guarantor) under the Insecticide Act of 1910." If a general guaranty is not filed, an individual guaranty may be attached to each bill of lading.

The law and the regulations apply also to imported goods, imported lead arsenate or Paris green being treated as being intended for use as an insecticide unless the contrary is shown. The Treasury Department and the Department of Agriculture will cooperate in taking samples of imported goods. If upon examination and after a hearing it appears that a consignment may not lawfully be imported the Secretary of Agriculture will report the findings to the Secretary of the Treasury, and the goods will be refused admission.

Regulation 12 provides that "all matter required by the act to be stated on the label of an article must be plainly and correctly stated on the face of the principal label in type sufficiently clear and in position sufficiently prominent to attract the immediate attention of the purchaser." This regulation, however, will not be strictly enforced until July 1, 1911. In the meantime such required statements may be made by means of a "sticker or paster or supplemental label."

Meetings Next Week.

Albany, N. Y., January 1, 8 p. m.—Albany Florists' Club, 71-73 State street.
Buffalo, N. Y., January 3, 8 p. m.—Buffalo Florists' Club, 385 Ellicott street.

VAUGHAN'S SEED STORE,

25 Barclay St., NEW YORK. 84 and 86 Randolph St. CHICAGO. 206-208 W. Randolph St.

A Mexican Guano Enterprise.

Guano to the estimated value of \$150,000,000 gold, reckoning upon its market worth being only \$30 the ton, deposited through the centuries upon 17 islands off the Campeche coast of Mexico, will soon be exploited on a wholesale scale by a syndicate of Californians organized as the International Commercial Company and capitalized at \$150,000 (United States currency).

The company, which is a close corporation, is in possession of ten years' concession, granted by the Mexican Government, which will receive a royalty of 75 cents per ton on all the product marketed. The only restrictive clause of consequence in the grant provides that the concessionaires shall not lease the islands to a foreign state or country. In the beginning the fertilizer will be exported to Europe, notably to Hamburg.

According to engineers' reports filed with the promoters of this venture, there are at fewest 5,000,000 tons of guano within the areas thus far explored, with large tracts remaining to be exploited. The largest known deposits are upon the island of Triangulus, where the accumulations from generations of bird life have in many

places grown to a depth of 20 feet or more and where there remain millions of sea fowl adding annually to the store. Almost equal quantities of guano have been found on the islands of Arcas and Arenas, also included in the federal grant.

In the last twenty-five years the French company operating on Chichina Island, off the coast of Peru, has realized more than \$900,000,000 from guano shipped from those deposits, reputed to be the best in the world, because of the fact that there is no rainfall there. The Chichina fertilizer demands \$100 a ton.

The moving spirit in the organization of the California company is Dr. Julius Ziegner, a nephew of the President of the Argentine Republic and former consular representative of Argentina in Mexico. He is now at Los Angeles, where incorporation of the company has just been perfected and plans formulated for vigorous operations. William A. Ford is president and Frank G. Baker is secretary-treasurer of the corporation. — Daily Herald, Mexico City.

AUBURNDALE, MASS.—F. W. Fletcher has completed his new cement building which will be used for a salesroom and branch greenhouse.

SATISFACTORY BUSINESS.

Christmas has come and gone, the year is practically closed and the first half of the florist's yearly work completed. A very satisfactory Christmas business is the general comment at the wholesale stores and a fine business, and the best ever, is the hurried word with the retailers. There has as yet been no figuring up to ascertain whether or not the business has exceeded other years, but certain it is that a much larger quantity of stock was handled and even if the prices were not as high as in some preceding years, the general opinion is that the volume of business is much larger with probably full as much profit. Thursday and Friday were beautiful winter days and the retail stores were busy with their early patrons. At the wholesale stores, everything was in a rush and everybody as busy as they could be. It was like looking into a beehive to glance into any of these establishments. There seemed to be quantities of all kinds of stock, American Beauty roses being especially plentiful and on Friday the prices on some grades of stock weakened considerably. Saturday the prices stiffened up again and almost reached the earlier figures. But there was plenty of stock and the orders in almost all cases were completely filled. American Beauties were in grand crop and it is doubtful if as many handsome blooms were ever sent to the market at this season. The prices consequently took a decided drop from other years when the cut has not been so heavy. Of Richmond roses there was a good supply and large shipments of this highly colored rose were made. Killarney was in grand shape and in splendid quantity and sold well. There was very little call for white roses and there were many still left on hand Christmas Day. Carnations while not

so plentiful as roses, yet contrary to the predictions of the growers, proved to be adequate to meet the demands with the exception of the red varieties, and there were plenty of white, in fact too many. There was some little complaint of pickled stock but it certainly was a very small proportion for most of the roses and carnations seen were of elegant quality. There was plenty of good lily of the valley to meet all orders and of good quality. Orchids were not over-plentiful but enough to fill orders and the demand was good as was also the call for gardenias. Sweet peas sold well, especially the pink, and the stock was good. Of bulbous stock there was, as usual, an over-supply and while Roman hyacinths had a good sale there were more Paper White narcissus than there was call for. The violet market was a complete surprise, they having been rather short for some little time, but large shipments came in on Saturday and belated ones on Sunday and Monday morning and there were considerable left Christmas noon which, had they arrived earlier, would have found sale. The retailers all did a rushing business, many having to keep the stores open and the boys and delivery cars and wagons going all day after having put in all the night getting things ready.

The wholesale plantmen, the Geo. Wittbold Co., Vaughan's Seed Store and Frank Oechslein, disposed of everything salable quite early, flowering stock as usual having the call. Poinsettias and colored azaleas went well, also Glory of Cincinnati and other begonias of that type. Many more good flowering plants could have been sold here and the best stock brought very satisfactory prices. The weather was not sufficiently cold to damage well wrapped shipments and so far there have been very few complaints on this score. Plant baskets sold well.

NOTES.

Poehlmann Bros. Co.'s store was a veritable bee-hive during the Christmas trade. The regular store force was augmented by additional help from the greenhouses and twenty-five men on the jump sorting and packing the excellent stock grown by this firm. August and John Poehlmann were both ably directing the force and the manner of handling the immense amount of flowers was a sight worth seeing. A very satisfactory business is reported with a supply ample to fill all orders, the only shortage being on large orchids of which more could have been sold.

The Christmas trade at Bassett & Washburn's was the best ever had by this firm. The roses have never been in such heavy crop at this season and the grade was of the highest quality, and having such a large supply of roses the shortage of carnations was easily obviated. The firm remembered all the help with a munificent Christmas gift which was gratefully appreciated and the regular express help all came in for a present that granted the enjoyment of a number of good smokes.

Phil Schupp and his force at the J. A. Budlong store, assisted by A. J. Budlong, had their hands full during the week shipping out the heavy cut from the greenhouses. The Killarney roses were of excellent grade and there was an immense cut which found a good sale and the lily of the valley grown by this firm was quickly disposed of during the week.

Mrs. Henry Phillips is visiting her uncle, N. J. Wietor, at his residence at Kenmore. Mrs. Phillips is a daughter of John Muno, the well known grower on Touhy avenue, and is now a resident of Morgan, Minn.

During the holiday trade George Reinberg filled a large number of orders for Killarney roses, mostly of a short and medium grade.

The Chicago Carnation Co. is filling a large number of orders for rooted carnation cuttings and 100,000 will be ready for delivery January 1. Manager Pyfer received two large orders, one from a firm in England and another from a concern in Germany that will be delivered soon. The advance orders for Washington have been very satisfactory and some extra large ones have been booked.

A. S. Ringler, of the Ringler Rose Co., called on his friend N. J. Wietor one day last week and needless to say the meeting was a pleasant one. The gentlemen are old chums and when mere boys used to spear bull frogs and gather watercress together in the old pond on Devon avenue, back in the early eighties.

Peter Reinberg is cutting a large quantity of splendid stock of all kinds. American Beauty roses are fine and Richmond, Killarney and Pink Killarney are of extra good quality. Last week was an exceedingly busy one and Tim Matchen and his assistants had their hands full taking care of the large Christmas trade.

The J. E. Deamud Co. is receiving a fancy grade of roses and carnations in all the leading varieties. Their red carnations are particularly fine, especially the new seedling which is grown by Anton Then. This firm enjoyed a brisk holiday trade and as usual had plenty of stock to fill all orders.

George Perdikas, 286 Wabash avenue had a very pretty window display last week, consisting of cut flowers, blooming plants and greens. He did a very profitable business in potted plants, azaleas, begonias and poinsettias, all selling well and also disposed of many Christmas trees.

The congratulatory letters which are being received by many of the stores praising the high quality of

stock which was received by the customers are very gratifying and speak well for the excellent grade of the different flowers which were shipped from this city last week.

Weiland and Risch are cutting a fancy grade of Killarney and White Killarney roses. H. W. Rogers recovered sufficiently from his recent illness to be at the store last week and assist in looking after the brisk holiday trade, at a time he was greatly needed.

Hoerber Bros. were pleased with the business done last week and had plenty of stock to fill all their orders. A large crop of roses is on at their greenhouses at Des Plaines, and the Killarney and White Killarney roses received at the store are of good quality.

G. Diller, of the Imperial Floral Co., of Milwaukee, Wis., was another out-of-town florist that was seen in the local market last week. Mr. Diller has a store in the Plankinton block and has built a brisk transient trade.

Vaughan & Sperry did an exceptionally fine trade Christmas week the shipping trade being excellent. Some magnificent long stemmed American Beauty roses were a feature at the store during the week.

Zech & Mann were busy as bees last week filling the many orders that they received. We noticed a large quantity of all the different flowers of the season and a splendid assortment of greens.

Wm. Lynch and Clifford Pruner of E. H. Hunt's cut flower and supply departments report a very good Christmas trade. The demand for supplies was far ahead of any previous year.

Chas. W. McKellar disposed of a large quantity of orchids for Christmas, Cattleyas sold well and cypripediums and vandas had a good call.

Aphine
The Insecticide that
kills plant Lice
of every species

Washington, D. C., Dec 20, 1910.

VAUGHAN & SPERRY

LONG DISTANCE PHONE
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

Mrs. M. Hoff of Deerfield, Wis., is visiting her daughter, Mrs. Wm. Starrett, at her home on Cottage Grove avenue. Mrs. Starrett has been seriously ill the past two weeks with a severe attack of pleurisy, but at the present writing is improving steadily.

G. H. Pieser of Kennicott Bros. Co. is still confined to his home with the illness previously reported, but a speedy recovery is the hope of all his friends. G. C. Ware is a new employee in the office at the store. E. E. Pieser states that the Christmas business was much larger and although the prices were about 20 per cent lower there will not be more than five dollars' difference in the total sales.

The winter display of blooming plants at Lincoln Park was highly appreciated by the many residents who visited the greenhouses the past two weeks. The large collection of beautiful orchids in bloom was magnificent and contained fine specimens of these exotics which were greatly admired by those who attended the exhibition.

Kyle & Foerster's business the last week far exceeded their expectations. They had a good supply of excellent stock, especially Killarney roses. A complimentary telegram from one of their customers extolling the excellence of the stock received, as well as letters of like import, were very proudly shown and gratefully received.

L. M. Leveson, of the Palace Floral Co., 678 North Clark street enjoyed a very good Christmas business.

Visitors:—Gustav Fredrickson, St. Joseph, Mich.; G. Diller, of the Imperial Floral Co., Milwaukee, Wis.; M. Rocklin, Sioux City, Ia.; Mrs. O. B. Stevens, Shenandoah, Ia.; Geo. D. Leedle, Springfield, O.

HARTFORD, CONN.—A fire slightly damaged the greenhouse of Robert Marchant at 13 Huntington street.

"The Busiest House in Chicago."

For New Year's

We offer as fine a stock of Beauties, Killarney, White Killarney, Richmond, Chatenay, Brides and Maids as can be found on this market. Also an exceptionally choice line of Carnations. We issue a weekly price letter, if you are not receiving it, write for it.

GOOD CHRISTMAS BUSINESS.

Christmas, 1910, is now a thing of the past but appears to have been profitable to retailer, wholesaler and grower alike. As expected roses were in good supply but carnations were somewhat scarce, and bulbous stock was plentiful and blooming plants sold well. Holly was very plentiful, a great deal remaining unsold, and wreaths did not seem to sell as well as usual. Good mistletoe had a good sale. The retail stores all did a fine business, cleaning up all kinds of stock.

NOTES.

Fred Armann, of Edwardsville, Ill., owing to a breakdown of his wagon, was compelled to deliver his holly and greens in an undertaker's wagon causing much consternation to some of his patrons until the situation was explained.

C. Young & Sons Co. did an immense business, selling out completely of all plants. Mrs. John Young, widow of the late John Young, who as-

sists at the store on special occasions was indisposed and unable to be downtown.

C. A. Kuehn received a very fine supply of long-stemmed American Beauty roses from A. C. Canfield, Springfield, Ill., and the carnations from Harry Baer, of Peoria, Ill., were exceptionally good.

H. G. Berning had a grand stock of roses and carnations, from the E. G. Hill Co., of Richmond, Ind.

W. C. Smith Wholesale Floral Co. had an immense supply of violets and sweet peas.

Among the novelties were the baby Christmas trees at the Paris Floral Co.

Kelley Floral Co. had a great run of goldfish and Christmas novelties.

W. F.

RACINE, WIS.—A disastrous fire at the greenhouses of Clark Adams, on Washington avenue, supposed to have started from an overheated boiler, destroyed the rear end of the greenhouses and ruined the plants and flowers.

For All Occasions We Offer Our Prize-Winning

ROSES and CARNATIONS

Pronounced by judges at the **Chicago Flower Show** as **exceptionally good** we securing **19 Awards**. Stock exhibited was taken from our **regular cuts** and as such we are able to supply customers with the **selfsame stock** which in turn will surely satisfy your customers. Heavy supply of

Beauties, Maryland, Jardine, Richmond, Pink and White Killarney, Field, Kaiserin, Maid and Bride. They are sure to give satisfaction. None better in the market.

Carnations. All the leading varieties. You will find them to be large sized flower and long stem grade, and of a quality far above the average to be seen in this market. Try them and be convinced.

Valley We grow our own valley; hence we are able to take care of regular orders for large or small quantities. **Quality is equal to the best** brought to our market. Order some of our Valley and be convinced.

Violets. Fragrant home-grown singles, you will find these hardy enough to stand long distance shipments. Can also supply the **New York or Hudson River Violets**, but owing to length of time required for these to reach Chicago, we can only fill orders for such Violets at buyers' risk.

Plenty of other Seasonable Stock of excellent quality

 **We Grow our own Stock**, which insures you getting the freshest possible. The fact that our large plant is located within 30 minutes ride from the store, as well as all depots, **enables us to fill late orders where others fail**. Give us a trial and you will find our stock and prices right.

SATISFACTORY BUSINESS.

Business in general is very satisfactory, all the retailers being well pleased with their Christmas business. Carnations in this market were of an exceptionally fine grade and quality and were a scarce article throughout the week, bringing fancy prices. American Beauties, especially long grades, were very fine, with enough to fill all orders, but a little shy on medium lengths. Violets sold readily at \$2 per hundred, the market being well supplied with a choice lot of home-grown stock. Lily of the valley, although of a fine grade, did not sell this year as readily as was expected.

Richmonds were practically out of this market, the growers being entirely off crop. Killarneys were of a nice grade and sold readily, there being enough to fill orders. Plenty of green goods. This market did not have to contend with any pickled stock, as the growers in this vicinity were not given an opportunity to hold back any stock.

NOTES.

Holton & Hunkel Co. report business very good for Christmas week and could have increased the sales considerably had there been carnations enough to fill all the orders, being unable to take any carnation orders for Saturday. A fine business was done at the greenhouse in the plant line,

cleaning out all the poinsettias and azaleas. An exceptionally fine lot of cyclamen were disposed of readily, being of a much better quality than in previous years.

C. C. Pollworth Co. was all cleaned out of stock on Saturday and report having done a fine business both in cut flowers and in plants. This firm had a large crop of carnations and were able to supply the trade nicely, and a few Richmonds, which are of a very fine grade, are now being cut.

The conservatory adjoining the store of Edlefson & Leidiger looked as though a cyclone had struck it after the brisk holiday business, their large selection being entirely cleaned out.

M. A. McKenney Co. did a fine business, working day and night to get out the orders for Christmas delivery. This concern handles a very fine lot of blooming plants and disposed of them at fancy prices.

J. P. Sherrer, of the Sherrer Co., said he never was cleaned out of stock as well as he was after the holidays, having had an exceptionally fine business.

J. M. Fox was kept busy with Christmas orders and in addition to this had several large orders for debutantes during the week.

Roy Currie, of the Currie Bros. Co., says that business for Christmas was very fine, having cleaned up everything they had.

Visitors: J. E. Matthewson, Sheboygan; C. Adams, Racine; R. G. Miller, Racine.

Los Angeles, Calif.

The Christmas business was very good hereabouts and retailers of long experience in the city say they never before booked so many advance orders as this year. People who have in other years been disappointed in getting what they needed have taken time by the forelock and ordered ahead so that, although the total of business may not be larger than in previous years, yet, retailers felt safer in giving their orders and consequently growers had long lists, only waiting the time for shipping. Christmas plants were well forward, especially azaleas. For some un-explained reason few good poinsettias are grown in pots in this section but outdoors there are large numbers grown for cuttings and, owing to the lack of rains, the bracts are exceptionally fine in color. They are likely to be over-plentiful. Of outdoor flowers there appears to be no end, hundreds of fine yellow and white chrysanthemums, sweet sultan, sweet peas, narcissus and many others being plentiful. But this makes no difference to the sale of good indoor-grown stock, which continues in fine demand. In roses American Beauty is hardly holding its own but Richmond, My Maryland, the Killarneys and other popular varieties are going strong. Long-stemmed Beauties do not find much favor here, a medium length selling better. Easter lilies are in and find a moderate demand for funeral work, but there is little demand for pot stock. Formosum is the variety principally seen now. Orchids are coming in freely from the north but they are poor and thin in texture and cannot compare for quality with the local grown stock. Violets are plentiful

NOTES.

The florists have been extremely busy with funeral work of late. F. Lichtenberg having connected with a good deal of this and also decorative work for the Eastern Star and other fraternal organizations. Mr. Lichtenberg says the advance orders for the holidays are very numerous and he looks forward to a busy time. The white desert holly was very decorative in this store, which is one of the most attractive in the city. All the work is done out of sight and consequently there is no litter of tools, wires and other materials about the store, which is most tastefully decorated and furnished.

Wright's Flower Shop has been extremely busy of late with decorations at coming-out parties and other social functions. At the home of Mrs. C. W. Wood 8,000 roses were used, 2,000 of the finest long-stemmed Richmonds being used in one room. The table decorations were of orchids, an immense number of fine cattleyas being used. Further enlargements of the store being impossible they are now enlarging the cellar below and Tom Wright appears to be as handy in controlling the mechanical end of the business as the decorative. Christmas

prospects are reported elegant here.

Sweet pea windows are pretty and give a summer-like appearance to several of the retail stores, notably Wolfskill's and Morris Goldenson's. At the latter "Johnny" Gordon is always busy with hands and tongue both going rapidly, while making up fine funeral work, of which they have had a good share of late. In preparation for Christmas we noted several new and pretty baskets and other sundries, all of the best.

When on the way home recently, Dave Wolfskill was invited, pleasantly at first, and when he refused, by persuasion from a gun, to enter an automobile, where he was relieved of all the ready cash he had about him and allowed to walk the rest of the way.
H. R. R.

EVANSVILLE, IND.—The total sales for the Christmas trade with the Wm. Blackman Floral Co. were greater than last year. The quality of the cut flowers was better than last year, the supply of roses and violets was short, and the demand for bulbous flowers was good. The prices were about the same as last Christmas. There was an increased demand for flowering plants. There is more call for plants every year—the price of cut flowers is too high.

COLUMBUS, O.—Fire destroyed the greenhouse of Frank Miller on Fairhaven pike, December 16, causing a loss of several hundred dollars.

ATLANTIC CITY, N. J.—The Edwards Floral Hall Co. states that there was an increase of about 20 per cent over last year in the sales at Christmas. The quality of all the stock was fine, there being no scarcity except in violets, and the prices were about the same as before. There was not much demand for bulbous flowers. There was no special increased demand for any one flower and plants sold about the same as last year except poinsettias for which there was a very good call.

JANESVILLE, WIS.—The Janesville Floral Co. report an increase in the business done this year over last of about 15 per cent, and the prices obtained were an advance over the year previous. The supply of roses, carnations and violets was equal to the demand, with a good call for bulbous flowers, which were also in plentiful supply, and the quality of all flowers was better than last year. There was an increase in the call for fancy red and pink roses, and in flowering plants, in fact a large increase in the demand for all the better grades of stock.

RECORD CHRISTMAS TRADE.

Christmas trade exceeded in volume that of any similar holiday in the history of the local trade, nor was it all crowded into one day, but was most liberally distributed throughout the whole week. It was essentially a plant Christmas, as every grower and retailer can testify, by the unusual call for ferns, cyclamen, poinsettias, azaleas and other flowering and ornamental plants, that commenced with Monday and continued with increasing activity up to and including Saturday and many plants were sold on Sunday and Monday, together with a surprising demand for cut flowers of all kinds. On Saturday the heaviest demand developed, when most any variety of plants or cut flowers that were attractively presented to the interested public sold without effort on the part of salespeople. Never before were so many immortelles and other dried flowers sold. These were chiefly disposed of in the shape of wreaths of various designs attractively trimmed with ribbons, statice, red ruscus and the velvet poinsettias. American Beauties had their devotees and sold somewhat better than a year ago, but prices ruled a little lower. Violets were fairly popular but no spirited demand developed. Carnations were unpopular at the prices demanded, which ran from \$1.50 to \$3 per dozen. The stock of these, however, was good and but few pickled flowers were offered. Roses of all grades were very popular and good prices were usually realized, and the poinsettias were far greater in demand than a year ago, and many fine flowers were sold. Lilies were little cared for and but

few were on the market, most of them remaining unsold. The weather was ideal for shipping throughout the week except Friday, when rain turned the already soft snow into a disagreeable slush that greatly deterred the Christmas shoppers. With this exception, the cold, seasonable weather that prevailed was most conducive to the excellent trade than all dealers enjoyed to the full extent of their facilities to care for. Holly was small factor with the florists, who handled only the better grade, and this sold well with them. Ground pine was but little handled as its scarcity confined it to but one or two dealers, who, however, sold considerable of it at higher prices than for many years past.

PLENTY OF STOCK.

Christmas conditions resembled those of Thanksgiving to a great extent, that is most every one was led to believe that stock would not be plentiful, but the reverse proved to be true and I hardly think any one was disappointed on their orders even on red stock. Carnations, of course, cleaned up first while the next two Xmas leaders, violets and American Beauties, went a little slower. Roses were plentiful at all times and did not hold their prices well. Cattleyas were scarce and what came in sold on sight. Paper Whites, Roman hyacinths, and lily of the valley sold up well. Sweet peas, baby primroses and stevia were also heavy sellers. Cut poinsettias were not as much in evidence as in other years. Plants as a rule sold well and the plant people are more than satisfied.

NOTES.

Gilbert Weaklin's place looked as tho it had seen many a Christmas by the confidence Mr. Weaklin had in stocking up (this being his first year) and all were moved out satisfactorily.

The A. W. Smith Co. and Randolph & McClements had an immense supply of poinsettia flats which kept them busy. Walter Britenstein helped the latter firm out over the holidays.

Harry Hamm, Samuel Cape, and Geo. Werheim, the East End florists, away from the shopping centers, had an unusually heavy plant trade, cleaning up everything.

The street stands did an immense amount of business as they seemed to be asking very low prices compared to what the stores were getting.

The McCallum Co. were fortunate in being exceptionally well supplied with 36-inch Richmonds of fine quality.

Mrs. E. A. Williams was kept busy with greens until Friday when all attention was given to cut flowers.

Holly and greens were big sellers on the South Side, but no special excitement occurred in cut flowers.

The Zieger Co. gave most of their attention to cut stock and had their hands full at that.

The Allegheny market had a good day, every one there getting his share.

The Pittsburgh Cut Flower Co. handled an immense lot of violets.

The East End Floral Co. has been very busy with funeral work. J.

Washington.

UNEQUALED CHRISTMAS BUSINESS.

"The best Christmas trade we ever had," is the consensus of opinion of the florists of this city. One leading florist said that a surprising feature was the immense sales of flowering plants. The azaleas have again shown their worth as Christmas plants, but it can be said that we had the best stock of them, well flowered, ever seen here. A great feature was the stock of begonias, Glory of Cincinnati and Gloire de Lorraine, but it must be acknowledged that the work of J. A. Peterson with his Glory of Cincinnati has surpassed the other varieties. The first of last week was cold, with icy streets, and there were gloomy forebodings in regard to Christmas business and deliveries. Fortunately, the last two days of the week brought milder weather and there was no in-

convenience. The great sale of plants began on December 23 and continued until December 26. The cut flower sales were heaviest on the afternoon of December 24, continuing to December 26. There was an abundant supply of cut flowers, but several retailers complained that the prices of carnations were pushed too high. Early in the week there were advices from some of the violet growing sections that the supply would be short, but everybody seems to have secured all they needed. Taken as a whole, there was a good supply of stock and prices as a rule were reasonable.

NOTES.

The store of J. H. Small & Sons was a very busy place. While this firm does not make a specialty of growing cut flowers, they do grow an immense number of fine plants. They employ an experienced plantsman and his productions for this season exceeded all of his previous efforts. A feature of the increase of the business of this firm is a fine new electric automobile for delivery purposes.

A. Gude & Bro., as is generally known, have a large glass area and are extensive growers of both plants and cut flowers. Their business was simply enormous. They are the only growers of good American Beauty roses around this city and their stock was excellent.

Geo. H. Cooke, who is exclusively a retailer, made a most excellent exhibit of plants and cut flowers, and sold them all out. Though an unpretentious man, he is generally recognized as one of the most expert designers and decorators of this city.

F. H. Kramer was one of the busiest men. At his main store, Ninth and F streets, there was a constant stream of customers. His branch stores at Grant Place and in the Center Market were also scenes of activity.

FAIR SUPPLY.

The supply of flowers in the Flower Market the last four days was much better than was anticipated a week ago. There was a fair supply of everything, which sold for good prices. About the only thing that went slow being white carnations. On about all the stands in the market bunches of the different white flowers were to be seen and Saturday afternoon the prices on all kinds of white flowers had dropped in order to clear them out, but this is the usual condition as everybody is looking for color at this season of the year. And red roses and red carnations sold almost at sight and brought the usual prices. There were just about enough violets in the market to supply the demand and they sold at a good figure. The retail dealers were too busy to talk about business very much, and while they are favored this year in having three days in which to deliver their orders, it is almost impossible to give a full report of their business, the feeling seems to be that it will be fully up to the standard of the previous years. Saturday it rained all day and interfered with business to some extent but Sunday the sun came out and gave a nice, bright day for Christmas.

FLORISTS' CLUB MEETING.

The Gardeners' and Florists' Club held a very large and interesting meeting on Tuesday evening, December 27. President Downs gave an account of his trip to England the past summer, and he said that the conditions were exactly opposite to what they have been at home. While we were suffering from a dry and parched condition it had rained there almost continually. Carnations were shown by A. A. Pembroke, of North Beverly, and James Wheeler, Eber Holmes, exhibited for A. N. Pierson, of Cromwell, Conn., cut flowers, and a pot plant of the new Dark Pink Killarney. Duncan Finlayson showed a seedling cattleya. The following were elected officers of the club for 1911:

Peter M. Miller, president.

Thomas Pegler, vice-president.

W. N. Craig, sec'y.

Peter Fisher, treasurer.

J. P. A. Guérineau, Robert Cameron, William Downs and W. J. Kennedy, executive committee.

It was announced that the Ladies' Night would be held at the January meeting when the installation of officers would take place. Nine new members were admitted.

Flower Show will be the Pierce Brothers, of Waltham. In fact this company constitutes one of the five who are promoting the exhibition. The interest and desire to make this the largest show ever held seems to be growing, and everybody from the humble possessor of a 6x6 back garden patch to the man of large estate will find something to interest them outside of the wonderful display of plants and flowers. The manager, when interviewed at the greenhouses one day the past week, stated that they were so busy filling Christmas orders that everything had to be laid aside. Activity throughout the premises gave proof of that statement. Orders have

been shipped to Vermont, New Hampshire, Maine and even as far as points in Nova Scotia.

The salesmen at the Park street flower market passed a subscription paper and presented to George Hamer, assistant to Manager Thurston, five ten-dollar gold pieces in a plush lined box as a Christmas present.

Welch Bros. have shipped a large quantity of flowers to all parts of New England to supply their large number of customers.

N. F. McCarthy & Co. report that they have been very busy with Christmas orders during the last week.

Henry M. Robinson & Co. report a good business for Christmas week.

H. C. W.

New York.

EXECRABLE WEATHER.

Well, Christmas is gone and so far as the florist trade is concerned there are no regrets. To the cut flower growers, trade has been disappointing, prices in most lines were little more than half of what they were one year ago. The weather was execrable on the day before Christmas, a steady rain was falling at daybreak and continued incessantly until well into the afternoon; then it cleared. The following day was bright and clear, became better in fact as the time for business passed away. Fortunately, it was not very cold, so taking all things into consideration, it might have been worse. As mentioned above, prices were disappointing but the rose crops just the reverse; everybody seemed to be right in crop almost and such a flood of roses, especially Killarneys, was never seen before. Owing to such a superabundance of this rose, values in all other varieties were held down; still, although prices were low, comparatively, we believe the total volume of business done will be nearly ahead of every previous year even though general average prices will be much lower. Violet growers had a particularly hard streak of luck in getting their flowers to the city. Shipments that should have been in the hands of the wholesale men in the afternoon of December 24, did not arrive until 1:30 next morning, in fact they arrived one hour later than those shipped so as to arrive at midnight. Just what had been the cause of the trouble, no one seemed to know but the absence from the market of those violets during Christmas eve was without a doubt the cause of a great monetary loss to the Hudson River violet industry. As is customary at these holiday festivals, the wholesale men kept their stores open all night. With such heavy supplies as had come in; however, clearances were out of the question and there remained quite a little of almost every seasonable flower when the stores were finally closed on Sunday afternoon. So far as we were able to determine, Richmond roses and carnations were the best sellers, held their prices and cleaned out better than any other stock. The roses fetched from 25 cents each for the extra long and fancy blooms, down to \$5.00 per 100 for the shortest. The carnations touched eight cents and in some instances 10 cents each for the red ones; while rich pink colors ranged from \$6 to \$8 per 100 when good, inferior grades going as low as \$3 per 100. With the exception of the red varieties, it will be seen that carnations averaged little better than they were doing a few weeks ago but, of course, there were a great deal more of them available for the holidays than could be had a few weeks back. Special grades, blooms of such roses as Killarney, My Maryland, Bride and Bridesmaid were quoted at 15 cents but sold in most instances at 10 cents and 12 cents where quantities were taken, and from these figures they ranged down to \$3 per 100 for number two's and three's. There was more than a sufficiency of all the varieties but the Killarneys were away in the lead in numbers. The quality was all right, too, held-over stock being conspicuous by its absence. With special grade tea roses going so cheaply it will be easily understood why the American Beauty roses were such a difficult problem. It cannot be said that this rose was so much more overabundant than in some former years but with long stemmed pink roses at 10 cents and 12 cents, it did seem impossible to do anything satisfactorily with the Beauties. A very few specially selected blooms may have touched the dollar mark, yet 75 cents each was the top price asked at most places for the very best and even that

price could not be realized and clearances effected. Further cuts were made on the figures, down to 60 cents each, and still many were left when the holiday trade was all over, the Beauty question was indeed a cause of worry to those who handled them in large numbers. While the crop of cattleyas was not as large as usual there were enough to meet all demands; prices were held rather firm and out-of-town orders did not materialize to any great extent. Gardenias were one of the scarce things in the market and good blooms brought 50 cents and 75 cents each. Lilies were plentiful and did not sell at all well, the same remarks also apply to Paper White narcissus, Roman hyacinths, stevia, and lily of the valley. Prices in all of them were no better than have been prevailing for some time and it was impossible to clear out of any of them satisfactorily. Sweet peas were plentiful, a good many were handled and a fair lot were left over, no advance in prices were attempted. Tulips were in the market but were very limited in supply. There were quite a number of chrysanthemums which sold only fairly well. Some large yellow blooms went as high as \$5 per dozen, these were exceptional, however, the ruling prices being from \$1.25 to \$2.50 per dozen, and there were quite a number that remained unsold at closing time Sunday. Violets sold at from \$1.25 down to 60 cents per 100, according to quality for there were various grades of them. The delay in the arrivals on Saturday caused much disappointment and loss, for in the Sunday morning, the \$1.25 price was out of the question as the big store trade was then over; the weather was fine, however, and the street peddlers soon got busy and while that kind of trade will soon move thousands of violets, it means at prices ranging from 60 cents to 75 cents per 100. Cut poinsettias were too plentiful and did not clear out well; prices asked were from \$3.00 per dozen down, according to their size. The retail trade from what we could learn was eminently satisfactory. Plants were in fine shape, everybody bought heavily and trade was good, plants selling very well indeed. Cut flowers were reasonable in price and it was no trouble to handle them at a profit, far better than has been the case in most years previously. Trade in holly and mistletoes, also holly plants, was very good indeed, taking it all in all, it was very good for the retailer all around.

NOTES.

A rather amusing incident happened a few days ago at Weir's, the Brooklyn retailers. A number of college students entered the store and arranged for a funeral design to cost \$13.00, one of their class members having lost a brother by death. The design was paid for and as the address of the deceased could not be learned, the flowers were sent to the students' home, which is in the upper part of New York. Letters of condolence in two languages had also been prepared by the students, the family being foreign born, and were sent along with the flowers. When the messenger arrived at the students' home, he was met at the door by a sister of the supposedly deceased young man. She said, "There is no death in the family, my brother in order to procure leave of absence from college gave the brother's death as an excuse to get the holiday; there is no death, consequently the flowers are not needed." Surprising, isn't it, how far reaching a lame excuse will go sometimes.

The explosion that occurred at Lexington avenue and Fifty-first street on December 19, and which caused the loss of many lives, broke a plate glass window in the A. T. Bunyard Floral Co.'s store, corner Madison avenue and Forty-eighth street, sev-

eral blocks away from the scene of the explosion.

An advertisement in the daily press by a retailer, offering to deliver a nice box of flowers at Christmas time, to any part of the city for \$2.00 was productive of good results. There is nothing so good for the florist business, wholesale or retail, as advertising.

Frank White of Waverly Place, Elizabeth, N. J., shot and killed himself December 26, after eating his Christmas dinner. He was 47 years of age and business worries are supposed to be the cause of the act.

Myer, retail florist at Fifty-eighth street and Madison avenue, is operating as a branch store the premises formerly occupied by John King Duer, Sixty-third street and Madison avenue.

H. Chadwick, of the Vaughan's Seed Store staff, was called to his home in the West, December 23, by the serious illness of his father.

Mr. and Mrs. C. W. Scott, of the Yokohama Nursery Co., sailed for Bermuda on Saturday, December 24, for a short vacation.

Among visitors in town were A. N. Pierson, Cromwell, Conn.; M. Courtenay, grower for T. M. Rogers, Northport, L. I.

P. T. Smith, wholesale florist, 49 West Twenty-eighth street, has been slightly indisposed for a few days.

Monday was the legal holiday and the trade generally closed their stores about noon.

Des Moines, Ia.

The Society of Iowa Florists at their meeting held at the State House with the State Horticultural Society adopted resolutions urging the legislature to pass a law making it possible for merchants in Iowa to sell insecticides. The present law is such that it is practically impossible for dealers to sell them. At present, the florists must send to other states to secure the packages of insecticides and fungicides which they may require.

MARSHALLTOWN, IOWA.—A greenhouse is being constructed by the Western Grocer Co. Mills in which to start plants to be used on their farms.

Monmouth County Horticultural Society.

The regular monthly meeting of the
Monmouth County Horticultural Soci-
ety was held on December 16. The
election of officers took place with the
following results:

Wm. Turner, president.
John Kennedy, vice-president.
George Kuhn, financial secretary.
H. A. Kettel, recording secretary.
N. Butterbach, treasurer.

It was decided to hold the annual
dinner on January 18, tickets for
which may be obtained from H. Kettel,
Fairhaven, N. J., at two dollars each.
The meetings during winter will be
held on the first and third Friday of
each month and during summer time
on the first Friday of each month. The
bowling club of the society of which
H. A. Kettel is captain, will have a
series of games with the National
Bank local team and also with the El-
beron Horticultural Society's team.
Three new members were proposed as
active members and five new members
elected.

We Can Still Supply IN FIRST-CLASS CONDITION:

Araucarias

OUR SPECIALTY.

We are the largest
importers of these lovely
decorative plants,
the *Araucaria Ex-
celsa*, *Robusta Com-
pacta* and *Glaucia*.
6,000 of the choicest
last spring importa-
tion now ready for im-
mediate shipment. It
is of no use to look
elsewhere for cheaper
prices. We now con-
trol and will control
the market of the *Araucarias* in the future.

Araucaria Excelsa, raised from top cuttings, no
seedlings. Plants, 5-5½-6-7 in. pots, 15-18 20-
25-30 in. high, 3-4 5-6 tiers, 2-3-4-5 years old. 50c,
60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big
value for your money. Just think! An elephant
6-in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high,
for only 60c to \$1.00; a jumbo, 6-in. pot, 5 year
old, 25 in. and over, as wide as a bushel basket,
5-6 tiers for only \$1.00; and what do you think
a holy terror, 30 in. and over, 5-6 tiers, worth
\$7.00, for only \$1.25 to \$1.50.

Robusta Compacta, *Excelsa Glaucia*, 6-in. pots,
\$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest *Araucaria Robusta Com-
pacta* and *Excelsa Glaucia*, a house full, for
only \$1.15 to \$1.50, worth double.

Primula Chinenalis, mostly white, 5¼ in., \$2.50
per doz.

Asparagus Sprengeri, 2½ in., 3c; 4 in., 10c.

Kentia Forsteriana, in fine shape, 6-in. pots,
30 35 40-45 in. high, 4-5-6 years old, 75c, \$1.00,
\$1.25, \$1.50, \$2.00 to \$2.50 each.

Kentia Belmoreana, 30 35-40 in. high, 5-5½-6-7 in.
pots, 5-6-7 years old, \$1.00, \$1.25, \$1.50 to \$2.00
each.

Kentia Belmoreana, combination plants, 25 to 30
in. high, made up of 3 plants, 6 to 7 in. pots,
\$1.00, \$1.25, \$1.50 to \$2.00; 4-in., 20 in. high, 20c
to 25c.

Our Ferns this year are exceptionally very fine
Boston, *Scottii*, *Whitmani* and *Scholzii*, 5½
and 6 in., 35c, 40 and 50c; 7 in., large bushy
plants, 75c to \$1.00. As big as a bushel basket,
\$1.00 to \$1.25. Remember, all our Ferns are
pot-grown, not lifted from benches.

Neph. Glatasii, a new beautiful fern, an improve-
ment on *Scottii*, much shorter and bushier than
Scottii, 5¼ in. pots 50c; 3 in. pots, 25c.

Pteris Wilsonii, 3 large bushy plants in 6-in. pan,
30c to 35c per pan.

Ferns for Dishes, big assortment, 2½ in. pots, at
\$4.00 per 100.

Dracena Bruanti, 25 to 30 in. high, 6 in. pots, 40c
to 50c. Highly recommended for store and house
decoration: stands heat, cold and dust.

Latania Borbonica (Chinese Fan Palms), 30 to 35
in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

Adiantum Hybridum, 6-in. pan, 25c to 30c.

Cocos Weddelliana, 3-in. pots, 15c, 18c and 20c.

Jerusalem Cherries, or *Solanum* 6-in. pots, 25c,
35c, 50c; full of ripe berries.

Cineraria Grandiflora, Aschmann's well-known
strain, 2-in. pots, \$3.00 per 100; 4-in., 10c.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

SAN JOSE, CALIF.

JOHN C. LEONARD, treasurer of the Leonard Seed Co., Chicago, who has been ill with diphtheria, is progressing favorably.

A. HENDERSON & Co. is the name of a new firm which will do a general business in seeds, bulbs, plants and supplies at 51 Wabash avenue, Chicago, commencing January 1. Alex Henderson, who has held a responsible position at Vaughan's Seed Store during the past 13 years, is the principal of the concern, and Guy M. Reburn, who has been a traveling representative of the same establishment for a number of years, joins in the business. These young men have a host of friends in the trade and we wish them every success in this enterprise.

ROCHESTER, N. Y.—Among the many pleasant days that come to the people connected with the house of James Vick's Sons, Christmas Day takes the highest place. On December 24, the annual celebration occurred in the form of a dinner served in the offices of the company. More than a score of the young ladies from the office and departments, together with Charles H. Vick, George Arnold and E. F. Rowe, gathered about the tables and were served with turkey furnished by W. T. Fonda, treasurer of the company. At the close of the dinner, which was served in a most capable manner by Henry Smith, several of the ladies gave and responded to toasts. F. B. King, of the Mandeville & King Co., entertained the entire office force, December 24, at the Hotel Eggleston, in celebration of Christmas Day. Mr. King was assisted by W. H. Dildine, superintendent of agents, and C. C. Barnes, general superintendent.

A New Seed Bill.

On December 13 there was introduced into the House of Representatives a bill, now known as H. R. 29163, and the same was referred to the Committee on Interstate and Foreign Commerce and ordered to be printed. Every seedsman should write his congressman at once for a copy of above bill, giving the number, and should protest against this iniquitous proposed act, which puts every seedsman under a prison penalty law and is intended to put the seed business at once and forever into the disreputable class, carrying as it does the assumption that this industry is so conducted that an unreasonable number of those engaged in it are dishonest.

This bill can be fought and should be fought on the broad, fundamental

ground that Congress has no right to put such a ban on any reputable industry until it is shown by open and unbiased hearings in various sections and by census and custom house records that there does exist in this trade dishonest practices beyond the usual average run of human misdoings. The best men in the trade claim that the average of commercial honesty in the seed trade excels that of most others and does so of necessity because misdeeds in seed sales are known in a few weeks and no merchant could succeed for even two seasons who knowingly sold bad seeds.

Seedsman who value their reputation and the reputation of their industry, down to the future generations, should get busy now and demand, before such a disgraceful law is put upon them, that just and ample proof is furnished of this dishonesty assumed by the proposed bill, before they allow themselves to be put into the class with patent medicines, pettifogging lawyers and get-rich-quick concerns. Get a copy of the bill—read it. Write your congressman, or go and see him, or both. Do it now.

Imports.

During the week ending December 10, imports were received at New York as follows:

H. Frank Darrow, 594 cases lily of the valley pips, 30 cases trees and shrubs, four barrels seed and one crate trees.

Wm. Hagemann & Co., 489 packages and 144 cases lily of the valley pips.

Peter Henderson & Co., 270 bags and 150 barrels seed.

Vaughan's Seed Store, 180 cases lily of the valley pips, 42 packages seed, seven cases plants and two packages basketware.

J. M. Thorburn & Co., 73 bags seed and 61 cases trees.

McHutchison & Co., 18 cases trees and shrubs and six cases plants.

Wadley & Smythe, 18 cases trees and shrubs.

C. C. Trepel, 10 cases lily of the valley pips.

J. J. Habermehl's Sons, five cases plants.

MacNiff Horticultural Co., five cases trees.

Stumpp & Walter Co., three cases bulbs and three cases trees.

Wm. Elliott & Sons, one case seed.

Weeber & Don, one case seed.

To others: 2,881 bags, 1,211 barrels, 1,063 packages, 400 sacks, 272 cases and two casks of seed, 433 cases and 85 packages lily of the valley pips, 122 cases, 25 packages and nine boxes plants, 122 packages trees and shrubs, 14 packages, four cases, one box trees and one bale shrubs, 100 cases immortelles, 16 cases bulbs.

A good salesman is a valuable friend to a business man. He is a walking bureau of information and generally a very intelligent man. Often his time is worth more than that of the man he is selling—he comes perhaps only once a year—and always tries to wear a smile. Now the best hotel is a poor home, and the boys on the road usually deserve courteous treatment; yet the writer has met men who look upon them as a menace to their business, whereas they are a benefit. The successful salesman has no time to talk about others, he is a booster; he is not merely an order-taker, but a business-getter; he is aggressive; has strength of purpose; combines the interests of the house with those of his clients; and in general is a very capable man, and an indefatigable worker. He knows no hours for sleep until his business is done and he eats when he can; stands all kinds of climate and all kinds of people; and is a vital part of this business world of ours and a man worth your time to see.

We know there are some salesman or order-takers in this business who are rum-guzzlers; and some are business beggars, the latter being principally foreigners; but there are good ones and there will be more as time flies. **Horseshoe Brand** salesman are gentlemen, who have faith in their goods and the house, who have practical experience in the importing business, and who are absolutely independent men, that have "made good." They are selling the best there is and they know it, and those they do not reach, the mail does, and we solicit business from all who want **Horseshoe Brand Products.**

Write Us.

Ralph M. Ward & Company

"Not How Cheap—But How Good."

12 WEST BROADWAY,
NEW YORK

Market Gardeners

Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;
H. F. Hall, Grand Rapids, Mich., Vice-President;
S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.
Annual meeting at Boston, Mass., 1911.

ACCORDING to the December issue of the Crop Reporter issued by the Department of Agriculture the total acreage of potatoes in the United States for the year was 3,591,000, producing 338,811,000 bushels of a total valuation of \$187,985,000.

Prices of Indoor Fruits and Vegetables.

New York, December 26, 1910.—Mushrooms 50 cents per pound; cucumbers, 20 cents each; lettuce, \$1.50 per doz. heads; tomatoes, 50 cents per pound; asparagus, \$9.00 per doz. bunches; radishes, 60 cents per doz. bunches; grapes, \$1.00 to \$1.25 per pound.

Seasonable Notes.

It is always interesting to hear from others in regard to methods. Maybe some would like to know how we go at things. Early in the season a heavy snow covered up our spinach fields preventing any further cutting. The price rapidly advanced to one dollar per bushel, which is a tempting figure when one has hundreds of bushels buried in the snow. We laid a long pipe line into the field and started our irrigation steam pump; one man with a hose to wash away the snow and frost and a couple to follow, cutting the crop. By piping the exhaust steam into the water line we got the right temperature for rapid thawing.

Last winter in the heavy snowstorm we put one-inch pipe lines into the gutters of our greenhouses and connected to heating system. Those lines of pipe kept the gutters free, permitting the water to flow out and the snow to slide down to be melted in turn, thus saving many a glass from breaking and admitting sunlight the next day. Where heavy snows occur such pipe lines should be ready beforehand so they can be turned on at a moment's notice.

MARKETMAN

Forcing Rhubarb.

Rhubarb can be made quite a profitable crop in the winter time, as it occupies no valuable space, that is, need not be put into growing beds in sunlight. Under benches will do, or in sheds or even in a boiler room. The

factors are heat, moisture, and darkness. Many operators allow too much light to reach the plants, which induces an early leaf growth to the detriment of the stems. It is the search for light which causes the plant to send up the long stalks so much desired, hence the exclusion of light is important. Heat regulates the thickness of the stalks to a great extent. We can only force out the stored-up vitality which is in the roots, and a high temperature produces a long, thin stalk while a more moderate heat gives us a heavier product. Fifty degrees to fifty-five degrees is a desirable temperature. It is not necessary to provide deep growing beds, all we need is enough earth to pack the clumps solidly and to hold the needed moisture; for after the forcing the roots are worthless. For early forcing roots should be exposed to freezing to ripen them. Later in spring this is not necessary.

Langdon's Tomatoes

"I have tried all the various strains of Earliana on the market, and yours is the only one I have found that meets my idea of what a good early Tomato should be.

Prof. W. F. Massey.

"Grower" writes, Nov. 13 1910: "I think your strain the finest early variety ever produced for outdoor use, and a good heavy cropper. For forcing it is also very good. It seems to do better with two or three stems than with one alone. It can be planted much closer than other forcing varieties, and has not yet shown a fruit with me that had blossom end rot or dry rot, although other varieties around it have shown it more or less. It is remarkably solid and meaty inside, but has one fault like all Earlianas, having a thin skin. If kept too dry they show a softness, but they will stand more water and feed than any other variety I ever grew."

"Grower" runs 100,000 sq. ft. of glass and knows what a good tomato should be.

Send for our circular for further description and see Market Growers' Journal of Nov. 5.

If you want to be first on your market with perfect tomatoes that will bring a premium over top-notch prices, plant Langdon's Northern Adron-dack Strain of Earliana Tomatoes. Equally good for field or forcing.

Prices: 1/2 oz., 40c; 1 oz., 60c; 2 oz., \$1.20; 4 oz., \$2.00; 8 oz., \$3.50; 1 lb., \$6.00.

"Highly Pleased With Dorothy Gordon As a Producer"

CARNATION DOROTHY GORDON. FULL SIZE

When in Philadelphia,
Be Sure to Look Us Up

—the way one prominent Eastern grower expresses his opinion of our grand new Carnation. And mind you, he says this after giving it a trial, **himself**—he isn't taking anybody else's word for it.

He says further that he wishes he had a larger stock of "Dorothy Gordon" and speaks favorably of its very large flowers, long stems, and the enormous quantity which his range is producing.

Another prominent carnation house, which grows most of the leading sorts, has planted "Dorothy Gordon" extensively, and speaks very highly of it, expressing satisfaction with both the quality and quantity of its flowers.

Remember what we've told you before about "Dorothy Gordon;" color clear pink—a shade darker than pink Enchantress; flowers large—averaging over three inches in diameter—form and substance of the very best. Bears at least one-third more flowers than Enchantress, and brings regularly 50% more money.

We are now growing a splendid but limited stock of rooted cuttings and offer these at

\$6.00 per 100; \$50.00 per 1000.

Specify your wants now, as our growing capacity is limited, and we are booking orders for many thousands of rooted cuttings each week.

Railway Station: JENKINTOWN

Joseph Heacock Co., Wyncote, Pa.

CARNATION

Mrs. G. W. Ward

The most prolific and profitable variety in the market, producing more flowers and bringing a higher price than any other Carnation. The Commercial Value of this variety has been further demonstrated by the highly satisfactory results obtained by last year's purchases.

MRS. C. W. WARD

is a free and perfectly healthy grower, producing perfect flowers on long stems as early as September 1st.

The color is the clear, deep pink so much in demand.

**Rooted Cuttings: \$6.00 per 100;
\$50.00 per 1000.**

ALMA WARD, Large White. Rooted Cuttings: **\$7.50 per 100. \$60.00 per 1000.**

The Nursery Trade

American Association of Nurserymen.

W.P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June 14-16 1911.

NEW YORK, N. Y.—The Japanese Nursery & Construction Co. have been incorporated to import and sell Japanese plants, shrubs and trees. Capital, \$35,000. The incorporators are Kengo Moriva, H. Brevort Odell, and Geo. W. Dobbs, of Yonkers.

W. E. McMURRY, of Hamilton, the newly elected member of the Montana legislature, has been appointed chairman of the committee on legislation of the Florists' and Nurserymen's Association of Montana. The additions to membership of the association during the past week are: David Gibson, of Helena, and W. E. Gleason, of Florence.

Helenium Autumnale Superbum Rubum.

In reading the article on heleniums in the issue of THE AMERICAN FLORIST of December 10, page 977, I note that you omit to mention a variety of recent introduction called Helenium autumnale superbum rubrum, which was awarded a first class certificate by the Massachusetts Horticultural Society. In my opinion this is head and shoulders superior to any existing sort in color, habit and general usefulness for garden decoration, or as a cut flower. In color it most resembles a blood red English wallflower and took well with the cut flower men in New York city last summer, where it sold on sight at very satisfactory prices.

Sparkill, N. Y. R. W. CLUCAS.

Sambucus Pubens.

Early in July last, the writer like many more florists, made the trip called the "Gorge Route" at Niagara Falls, and when going down the Canadian side, was much interested to note the beautiful effect of an elder then in fruit, growing in profusion among rocks and other waste places. The cluster of berries were a bright coral red, and exceedingly ornamental, so much so that the writer could not rest satisfied until he had found out the name, for it was mortifying to think that after earning a living for thirty-three years where shrubs of all kinds ornamental were grown, this was new to him.

Sambucus pubens seems to be the name of this red-berried elder and those who seek after effects of planting where the season of bloom is followed by another of fruitage will do well to make a note of this beautiful shrub. Very few catalogues contain it because the demand for it is limited, and this is strange when we think of the many thousands of trained observers that pass along this way each year and see it at its best as did the writer, go home, and forget it.

There cannot be any difficulty attached to the culture of this elder, and its propagation could easily be effected by seeds sown soon as ripe, and it will thrive even in the shade and moist places as well as under ordinary conditions.

E. O. O.

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Viburnum Henryi.

Viburnum Henryi was awarded a first-class certificate at the meeting of the Royal Horticultural Society September 27. The genus viburnum, as represented in gardens, has been much enriched by Mr. Wilson's travels in western and central China on behalf of James Veitch & Sons, not only in the number of new species introduced, but more particularly in the new aspects of the genus that have been revealed. V. Henryi is one of the most distinct of the new species. It is an evergreen shrub growing ten feet high, stiffly branched and of somewhat rigid habit. The leaves are oblong or oblong-lanceolate, three to five inches long by about one-third as much in width; of stiff leathery texture, very lustrous dark green above, paler beneath, and furnished with stellate hairs on the mid rib and stalk; the margin is shallowly toothed, except at base. The flowers are produced about midsummer in pyramidal panicles two inches to four inches long; they are about one-fifth of an inch in diameter and dull white. The shrub owes its attractiveness as a garden plant to the abundant crop of bright, coral-red berries. Originally discovered by Dr. A. Henry (after whom it is named) in the Patung district of Central China in 1887, it was introduced to this country by Mr. Wilson in 1901. Plants have been grown in the Coombe Wood Nursery since then without protection, and there is little doubt from the vigorous, healthy aspect of the plants there that it is a

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist, ¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. \$3.50.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. \$2.50.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. \$1.25.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. \$1.50.

THE GOLDFISH (Mullett).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. \$2.00.

THE CULTURE OF WATER LILIES AND AQUATIC PLANTS (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.

This T shaped plan of Curvilinear Palm house and three curved eave wings was recently completed at Oakdale, N. J.

From this side you see the difficulties of such a location and how successfully they were met

Curved Eave Houses are the Thing These Days.

We have the model way of building them to obtain greatest light, the strength needed and the attractiveness you want. Send for information.

HITCHINGS & COMPANY

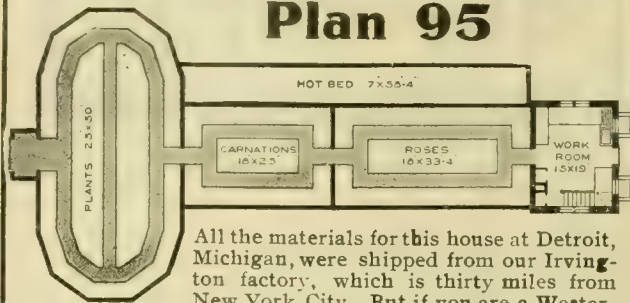

1170 Broadway, NEW YORK.

Wichita, Kans.

The florists have hardly had time to find where they are at since the rush—but a general report indicated that it was the heaviest ever—showing about 30 per cent increase. Weather conditions were perfect, the entire week being favorable for the Christmas shopper—and the florist was especially favored by the mildness of temperature. A temperature of about 40 degrees on Christmas morning was favorable for plant delivery and everything could go with a rush. The supply of evergreen roping lasted only a few days. Holly was in ample supply but not much was left in the hands of the florists. The quality of holly was generally good with occasionally a bad case of dried stock. There is no question but much more was used than ever before, as quantities were sold by merchants and street men who before had never handled the stuff. Cut flowers were in heavy demand with adequate supply. Bulb stuff as usual being the slowest to move. But the heaviest increase was in the plant trade. The stock offered was generally of splendid quality, and sales were at generally profitable prices. The sales of made-up arrangements were only moderate. It is quite probable that they would have been heavier if the florists could have taken time to make up the pieces. The call for pot trimmings was simplified in many cases by the customer taking a jardiniere with the plant. The sales in this line amounted to a nice little item. The usual amount of night work was indulged in, all of the shops spending at least one night on their work—with late hours for the entire week. Azalea plants were not quite up to the average. Some fine plants were offered but much poor stock was left in the hands of the florists. The stock received in this year's importations being generally below the average in quality.

Plan 95

All the materials for this house at Detroit, Michigan, were shipped from our Irvington factory, which is thirty miles from New York City. But if you are a Westerner, we can save you that freight now, because our new factory near Chicago will be working merrily along first of the year. If you want immediate attention just write to Mr. Sykes at The Rookery, Chicago, and you will get quick action.

**VAUGHAN'S
SEED STORE**
Chicago New York,

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.
The pump is of brass throughout, simple and powerful.
The mixing device keeps the contents of the tank well stirred up from
start to finish.

When the machine is filled to within six inches of the top, a few strokes
of the pump will compress enough air in the tank to produce a continuous
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,

and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

HEATING PLANTS

Standard Steam and Hot Water Heating Plants.

Wonderful Values. We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate.

Send for our Special Heating Catalog, filled with valuable information: tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. Ask for Booklet No. 47. 300,000 feet of Standard Pipe, all sizes: will be cut to any length.

Engines, Boilers, Valves and Fittings.

Building Materials and Supplies.

Send for our new 1000 page Catalog No. 47. Free upon request.

Florists' Ice Boxes

Manufacturers and Dealers of
Store and Office Fixtures.
Tel. Monroe 5616.

HILLSBORO, OHIO.—Simon J. Hider reports the business as the best in the history of the florists' trade, flowers selling well and at good prices. Carnations have been slow, but are improving. Mrs. C. W. Ward, looking very fine. A variegated Helen Gould is looking very promising. An addition of two houses 20x100 feet is contemplated.

FORT WAYNE, IND.—W. J. & M. S. Vesey report that the Christmas business this year was greater than in previous years, but the percentage is not yet known. The price of cut flowers were about the same as last year but the supply was not large enough to meet the increased demand, except of bulbous stock of which there was plenty and the quality of all the flowers was fine. There was a large demand for every variety of stock especially flowering plants which showed a marked increase.

Our Supplements

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue as otherwise they may miss some of this high grade work.

GREENHOUSER'S OBSERVATIONS

Stock Plants of Chrysanthemums.

"It takes a year to grow a chrysanthemum" is an old saying, but somehow many growers persist in acting as though the plants needed no attention or thought from the time the flowers are cut until the cuttings are again inserted. To get good plants we must have good cuttings and to get good cuttings the stock plants must be looked after. They are little trouble and all they ask is a little new soil on a fairly light bench or in pots in a cool house, water enough to maintain root action and plenty of fresh air. Surely this ought not to be too much attention to give the plants from which we expect a revenue during the dull November days when outside all is dreary and roses, carnations and other flowers are not by any means at their best. Our stock plants are now in flats and have been cut hard back to the root since being lifted. They are just throwing up scores of young shoots which, when about an inch high, will be topped and a regular "field" of green shoots will be produced by March when we need them for propagating. Not an inch of space is wasted as the plants were set out thickly in the flats and just as soon as the requisite number of cuttings is taken they will be dumped out and forgotten for these little stubby shoots root so freely that one can depend upon 99 per cent striking and the place is not littered up with old stock. No matter how "busy" the grower is it will pay him to take care of his stock plants.

Keep Moving.

The grower of plants for market purposes has never any stock season. No matter what the time of year there is always—or should be—something waiting to take the place of plants that are going out. A frequent visitor to our greenhouses was surprised to see on Christmas day a large house that had been filled with azaleas for Christmas again filled with Easter lilies. These plants had been waiting in various odd places to be grouped together for a catch crop out of this house before the regular Easter stock was put

in and will be finished and gone in a few weeks. Before the last azalea had gone out the first of the lilies were in and before New Year's the buds on the lilies were showing, needing only a few weeks' brisk temperature to finish them off and furnish fine spikes for cutting during February. Under the benches and in various out-of-the-way places Spirea Japonica and others are waiting their turn and will take the place of the lilies as they go out, while after Easter the house will be filled with early chrysanthemums, these again retiring before the azaleas arrive in November. The stress of modern conditions renders the use of every inch of available space at all times necessary and to do this quite considerable moving about of stock is necessary, but a frequent change of position is good for plants.

The Little Things That Count.

There is a wrong and a right method of doing most things and, as a rule, the difference in time taken to do a thing properly and to do the same thing carelessly is so slight as to be almost unnoticeable. Indeed the grower who makes up his mind to do everything properly and at the proper time usually scores at every possible point over his hurrying and yet careless neighbor who is always rushing but never "gets there." Some people use up so much energy in their "hustling" and in talking about it that they have little left for their work and it has to be done in a slipshod manner. Go into one place where everybody is always rushing around with hardly time to ventilate the houses properly and everything "up in the air" and then into another where the work seems always "caught up," where there is a time for doing certain work and it is done so regularly that it seems to have done itself, and which shows the best results? A few aphides perhaps are seen on the point of a plant, possibly the only ones in a house. The careful grower usually has a little tobacco powder handy that will entirely destroy them in a few minutes, but your "hustler" never sees them or if he

does is too busy to attend to them and they are left, necessitating in a few days the fumigating perhaps of a large house and a couple of dollars expense for the fumigant. Set two men to spray a bench of young roses for red spider. One will so direct the spray from the hose that the under side of every leaf is wetted and little water spilled on the soil. The other floods the soil and the upper surface of the leaves, but leaves the spider dry and comfortable underneath. A little thing perhaps, but it counts. When moving plants from one place to another one grower will take a few seconds to pull a weed or two out of the pots and shake off any fallen foliage, but the hustler has no time for this and sets the plants back untidy and weedy and possibly so unlevel that the next time they are watered the man with the hose will have to stop and set them upright before they will take water. That is, of course, if he too is not of the hustling variety and notices how the plants are standing. These are only a few of the small things that count, but things to emphasize the truth of the old adage that "what is worth doing is worth doing well." Much energy is saved and much better results attained if these little matters are cleaned up as we go along and nothing left to chance or until tomorrow.

Celosia Pyramidalis.

During the summer months there is often a slackening of the revenue from the greenhouses and anything that may be grown to bring in a little money during July and August will probably be useful. *Celosia pyramidalis* is easily grown, does not take much room and sells well during the stock season. A few packets of seed may be purchased very cheaply and sown early in the spring in a cool house. The plants appear in a few weeks and should be pricked off around the edges of pots or in flats to be potted simply when they have attained a little strength. Any empty room or light bench secure from frost will do. I grow them on and they may be shifted into 5-inch pots as soon as they have filled the small ones with roots. Usually by this time or soon after the feathery spikes will be showing and if small stock is needed for finishing baskets or similar purposes some may be placed in 3½-inch pots. All they want is light and air with ordinary attention to watering. Any reputable seedsman keeps the seed in stock in a variety of colors, but the bright red and yellow are the best sellers. The new *Pride of Castle Gould* should give an impetus to the culture of this old and deserving plant and we are going to try it out this season.

Seeds and Seed Sowing.

Again the time is at hand for sowing small seeds and it is well to be prepared. Seedling greenhouse plants have so many enemies right from the start that it pays to take every possible precaution, especially against insect and fungus attacks. Both fungus spores and the eggs and larvae of dangerous insects lurk in the soil and are ready in the presence of heat and moisture to spring up and destroy tender young seedlings. A safe plan is to sterilize all soil used for sowing small seeds and heat is the simplest and best method. A few boxes or deep flats will hold sufficient soil for quite

a lot of seed sowing, and these may be placed on the boilers to destroy all living organisms, whether vegetable or animal, leaving the soil just as good as before for the purpose of seed raising. If this method is inconvenient, then the seed flats can be filled and thoroughly soaked with boiling water which will answer the same purpose.

Some growers seem to imagine that seeds will live forever and keep them year after year. Now we do not by any means advise a wasteful policy, but what is the price of a few packets

of seeds compared with the loss of a crop? Never sow any doubtful seeds. There is plenty of work to do at this busy season without having to watch seed-pans in which dead seeds are sown. Go to a seed firm that has a reputation to keep up and pay the best price for a good article. Cheap seeds are worthless and should not be bought at any price. No one would think of buying a worthless piece of shoddy goods and then paying a high-priced tailor to make a suit. Why, then, waste high-priced labor and room in heavily taxed valuable greenhouses in attempting to raise good plants from old and worthless seed? And give the seedsman a square deal by giving him seeds the best chance possible. He is as anxious as the grower that seeds turn out well—it is his business to get them good but all his labor is in vain unless the grower is willing to do his share and treat them properly.

Flowers at the Debut of Miss Helen Taft.

The floral designs which are shown in the illustrations were executed by Geo. H. Cooke, of Washington, D. C., for the debut of Miss Helen Taft, daughter of the President. It is well known that photographs do not adequately portray the beauty of flowers, nevertheless we assume that a definite idea of the beauty of these offerings may be obtained from these illustrations.

The basket was made of the new yellow rose *Melody*, snapdragons, daisies, lilies and other flowers on a background of *Adiantum Farleyense*. The orchid bouquet contained all the seasonable varieties of orchids. The old fashioned bouquet which is again coming into popularity, as will be readily seen, is made up of a variety of stock.

A. F. F.

Floral Wedding Ring.

SEE SUPPLEMENT WITH THIS ISSUE.

The use of flowers for the adornment of the bride and the decoration of the church has been one of the great features of the marriage ceremony for ages, and a practice in vogue in almost all the nations of the earth where the beauties of nature are obtainable, and in some countries all the friends of the bridal couple make presents of bouquets or flowers. In this country, the decoration of the church or rooms wherein the ceremony is to take place, as well as the flowers to be carried by the bride and her attendants, is invariably given to the florist. Many of these decorations have been very elaborate, the most artistic florists in the country have exercised the best of their ability and ingenuity in developing beautiful effects. The old set bride's bouquet, made very close and formal, generally of roses, of a few years ago, have been gradually replaced by the use of other flowers, lily of the valley and orchids being used in the finest arrangements instead of the roses. Then came the more loosely arranged bunches, and then the shower bouquets with their quantities of baby and gauzy ribbons, which were a marked advance in the artistic appearance of these beautiful flowers for these brilliant occasions. But the florist is progressive and always originating

Arranged by George H. Cooke, Washington, D. C.

something new and a novel feature during the last two seasons for bridal flowers has been the bridal floral wreath or marriage ring. The finest of roses or orchids are to be used, and the showers should be of lily of the valley or some other select light flowers. The ring is made of a single wire frame covered with asparagus or adiantums and the flowers wired on. As the idea is for the bride to carry this on her arm the top of the wreath should be made very thin and light, the lower part being made heavier, giving the whole arrangement the appearance of a crescent wreath or signet ring. The showers are then fastened on in such a manner that they can be easily removed and thrown to the bridesmaids and guests upon departure. Our supplemental illustration plainly shows what a beautiful arrangement this can be made.

Educating The Customer.

The Saltford Flower Shop of Poughkeepsie, N. Y., had two very prettily printed cards which they used to enclose with their shipments during the holiday trade. One reads, "Keep this plant wet. All flowering plants require twice as much water as a foliage plant. To obtain best results let this plant stand in water for ten or fifteen minutes every day. If the plant is to be kept in a jardiniere do not let water accumulate in the jardiniere." The other "The stems of poinsettias must never be cut nor broken unless the cut or broken end is placed at once in hot water or seared over a flame. This keeps the white sap from running and prevents the wilting of the flower. If these directions are followed you will have no trouble in keeping poinsettias."

FLORISTS' PALMS.

Notes on Palms.

During the month of January but little active growth is visible in the palm houses, even the kentias moving very slowly, while arecas, latanias, cocos and phoenix are practically at a standstill. At such a time it is much better that the roots of these plants should not be disturbed, by repotting, for during the period of rest the plants may be kept in condition more readily when rather pot-bound, besides avoiding the risk of getting the soil soured by frequent waterings, as might easily occur in the case of newly potted stock.

To the practical grower, and that of itself indicates the close observer, the plants themselves will soon show when they are in condition for repotting, for not only will the center leaf begin to push up, but the tips of the roots will show fresh growing points, and when these conditions are apparent it is the proper season for shifting on those plants that are in need of it. But to those who retail their palms it may be worth repeating that no freshly potted palm is in condition to be used in the dwelling, and any stock that is to be offered for sale during the winter should not have its roots disturbed in any way. A well-rooted palm is a good plant for the living room or parlor, provided that it be given reasonable care in watering, but a newly potted plant will soon lose its bottom leaves, and grow beautifully less from week to week, and before many weeks have passed the seller is likely to hear that the fine kentia he

furnished has proved very unsatisfactory.

An even night temperature helps very much in the production of good palms, from the fact that when the stock is kept too high at night the foliage becomes thin and tender, while too low a temperature results in stunting and hardening the plants to such a degree that much valuable time is lost in getting them in a good growing condition again in the spring. A satisfactory night temperature for kentias is 60°, and the same rule will apply for *Latania Borbonica*, phoenix and *Cocos plumosa*, also *seafortthias*. But arecas, *Livistona rotundifolia*, *Cocos Weddeliana* and *caryotas* should not be in a lower night temperature than 65° to get the best results. The writer was once told by a grower that the best results obtained by the latter with *Cocos Weddeliana* were with some plants grown in a house that frequently went down to 40° at night, but this does not agree with the general experience, and is therefore not advised by the writer.

During this season of hard firing, much moisture is needed to keep the atmosphere as it should be in the palm houses, and with this in view it is a good practice to sprinkle under the benches wherever it is much exposed to the heat of the pipes, and also to damp down the walks if the latter are, as they should be, made of concrete. Then there are the dry corners on the benches, some of which are to be found in every greenhouse—those portions that always dry out first, owing in most cases to excessive heat, or too free drainage, or to certain air currents brought about by local causes. Such spots require special attention

each day, either with the watering can or the hose, and especially do they need extra syringing on some occasions when the remainder of the house may not require it, for without this extra care these dry spots become special centers for insect activity, and soon develop colonies of red spiders and thrips, either of which will soon do serious injury to the plants. Regular fumigations with nicotine paper is the best method to keep down thrips and to prevent attacks of aphids, the latter congregating on the young growth of the plants at certain seasons. Solutions of sulpho-tobacco soap for dipping, and solution of nicotine for spraying are among the safest and best preparations to overcome the various scale insects, and when used in reasonable proportions and at proper intervals, will either keep in check or really eradicate these pests of the palm grower. Syringe vigorously every bright day, unless the weather is so cold that the frost does not clear from the glass, but do the syringing early enough at this season that the plants have a chance to dry off before night. Begin to ventilate at 70° to 75° in bright weather, but do so in such a way as to avoid strong draughts, and shut down before the house gets chilly.

W. H. TAPLIN.

Lily of the Valley.

Some time ago Walter P. Stokes, the well known seedsman, gave an informal talk on lily of the valley before the Florists' Club of Philadelphia, of which the following is a synopsis:

"I went into forcing lily of the valley, thinking it the best crop out of which I could get the most dollars from a limited greenhouse space. I will give you in detail my methods of culture, telling you all I know and have been able to find out about lily of the valley, except the one thing which I consider the most important, and this you will have to find out for yourselves, and is, where to get the best pips. One cannot hope to have success without first-class pips. Some get good lily of the valley from cheap pips, but I cannot, I must have the best pips. I do not always get the best by paying the highest price, the top price stock from one dealer often being not equal to those at lower figures from another man.

"I find it impossible to get all the high grade stock I want from one firm. Very much of it comes like this (illustrating with a bundle), fine pips on the outside, but when the bundle is opened about half in the center is inferior and weak stock that will not produce salable flowers. When I receive such stock I invariably send it back and increase my order with reliable growers, or hunt up others on whom I find I can rely. I import direct from the growers of what is known as Berlin pip. All my stock is brought over in cold storage. This adds to the cost, but I find it pays, as the pips arrive in better condition. The ideal pip is to my thinking not the largest, but one rather slender, which must have a good shoulder or base. This I consider very important.

"In preparing the stock for cold storage I find it pays to repack it, although when received it is well packed. I take it out and add sand and moss and also moisten it, for if it dries out in cold

storage the cases become musty and one is apt to find mould when they are unpacked, which is abundant cause for waste that shows in the forcing. Every precaution should be taken so that the waste is as small as possible. With the best pips my waste is about five per cent. With the cheaper, second grade stock it runs from 10 to as high as 20 per cent. It required 10 bales of moss and four cartloads of sand to repack the importation of last season.

"I try to have enough stock on hand over summer to last until the middle of January of the next season, as I find it is not safe nor profitable to force the newly imported pips without that amount of rest. I know some dealers will tell you that you can get the fresh lily of the valley in for the Christmas trade, but I do not find it profitable and I prefer to use the cold storage until the middle of January. The old stock will force in about two weeks, while the first of the new takes about a month to mature, so that a grower who is supplying a regular trade has to be careful at this time to see that there is not a gap which, no matter when it comes, is sure to be at the worst possible time.

"When taken from cold storage—in summer three times a week, in winter once a week—and when thawed out I do not put in sand at once, but leave it for 24 hours, as the pips at first are soft, but gradually get firm and hard and are better to handle. I put sand in a bench about five feet across, 150 pips to the row, close together, with rows four inches apart. This will start at once, and if the pips are first class, should all be ready to cut at the same time. If they do not come even and some have to be left to mature, the crop is not a success and it will not be found profitable. In a row across the bed, counted recently, there were 150 pips. Of these there were cut 108 No. 1 sprays, 34 No. 2, and eight that did not mature, a little less than 5 per cent waste.

"I plant the pips in bar sand, which can be used over and over again for a long time, but should be put outside to purify every six months or so, as it might give a lot of trouble with fungus if used too long continuously.

"In order to get a good length to the sprays, the bed is divided into sections of frame-like construction, with a cover made of heavy duck painted a dark color and kept dark until the lily of the valley has reached the right size, when a slat covering, made of laths three-fourths of an inch apart, is substituted. Under this the foliage hardens and becomes green beautifully and the stock is soon ready for the market. The glass of the house is clear; in fact, it is a very light house of most modern construction. Many people think any kind of a house is good enough for lily of the valley, but I think the best results are obtained from a well-lighted structure.

"Lily of the valley should not be forced too fast. I keep the sand at a temperature of 75° to 80°, with the top cool. If kept too warm it comes soft and does not keep or carry well. I always soak in water for two or three hours previous to shipping. For the Philadelphia market I bunch the flowers and foliage together, just as it is cut, while for New York the sprays are placed in the middle with the leaves by themselves around the edge. I like the Philadelphia way the best.

as the bells are not so apt to get bruised as when separated from the foliage.

"The cost of lily of the valley is for the best pips \$12 to \$12.50 per 1,000; cost of cold storage, \$1 per 1,000; 15 percent for selling. The cost of growing, \$2 per 1,000. This, with freight and other charges, brings total cost up to \$16.50 per 1,000, with the market price \$3 for the first grade and \$2 for second. This leaves a reasonable profit, but everything must work out right in order to get this result, and it requires constant attention and diligence from the time the stock is received until the money from the returns is in the bank in order to bring about a satisfactory and certain profit."

THE CARNATION.

Culture and Propagation.

If the plants have been subjected to a higher temperature to bring out extra flowers for the holidays, a gradual working back to normal conditions should be the order now. While a few degrees higher temperature for a week or so to open up well advanced buds will not do the plants any harm, yet to continue it long enough to force plant growth will be very detrimental to the future crops for the balance of the season, and will ruin the plants in short order. Do not lower the temperature more than two degrees at a time. It is best to lower two degrees for three or four days, then give it another drop, so that there will not be such a sudden change, or badly burst calyxes will be the result.

As the new year opens our minds turn to the work of propagating, and from this time on until the required number are properly taken care of, the cuttings should be put into the sand as fast as the wood gets into condition. Cuttings put into the sand the first three weeks in January and taken out in early part of February give as good if not better results than cuttings taken at another time. Clean sand and a bench away from draughts are essential for successful propagating. Another important feature is to look well to the selection of the cutting. Do not allow any haphazard stripping of the plants; it is much safer to wait a week or two for a second batch. Also do not allow any wilting of the cutting from the time it is taken from the plant until it is rooted in the sand. While the cuttings are rooting in the sand it is a good plan to get the soil for potting them up into a place where it can dry out a little and get warmed through. Another part of the work to look forward to now, is that of giving the plants extra nourishment, and great care must be exercised in this respect if the plants are stripped freely of cuttings. It will not do to feed with liquid manure to any great extent, because they will not be able to assimilate it and flowers of poor keeping qualities will be the result. Also do not feed plants that are expected to produce a lot of cuttings, or it will soften up the wood so that it will be difficult to root them.

Just at this time all plant growth is at its lowest point, therefore it becomes necessary to pay particular attention to the plants' requirements. Do not water until the condition of the soil demands it, then it should be done

thoroughly. Also keep a sharp lookout for insects of every description, even though they are not visible. It is well to keep up the fumigating regularly about every two weeks as a precaution. Later in the season with the extra plant growth it is very difficult to rid the plants of insects after they have once got a foothold.

C. W. JOHNSON.

THE ROSE.

Grafting Roses.

The manetti stocks should be in readiness to work from the first to the fifteenth of January for a good early start, and all of the grafting should be accomplished not later than the last of February. From the first of March on one will find it rather difficult to make good strikes. By grafting early one can have all the heat necessary and the case doesn't have to be shaded close to the glass as would be necessary later when the sun is much stronger.

Manetti stocks should be potted off in 2½-inch pots in good rose soil, one-fourth well rotted cow manure, three-fourths soil; keep the stocks shaded after potting and at a temperature of 45° to 50° until they begin to show some root action when the eyes begin to plump up after they have been potted two or three weeks—by knocking out the plants with the swelled buds, one usually finds that there are short fibrous roots started: this will indicate the proper stage of root action to start working the stocks. The necessary tools for grafting are two sharp knives, one exceedingly sharp for shaping the scions, as a clean cut is necessary, a shallow basin filled with fresh water and a clean jar to place the wood in filled with clean cold water.

The best scions are those taken from a flower stem where the buds have been removed. One should leave an extra eye on the plants when cutting the flowers for this work. After removing the scions they should be placed into the larger jar of fresh water and then made up and placed in the shallow basin so as to be handy to pick up. The illustrations accompanying this article will clearly illustrate the manner of making the various splices, etc., and will be found accurate. We are also illustrating a simple lean-to grafting case and a double grafting case which may be a help to those doing their grafting for the first time. Before starting to graft the case should be prepared and in good working order. Whitewash the case inside, filling every crevice with lime wash applied hot. A little sulphur can be used with the lime when slaking it. Be careful in constructing the case and try to make it as near air tight as possible. Have the sashes fit snugly, and all the cracks covered with laths. It will be necessary to stretch some wires across the top of the case under the cross bars. They will prevent the case from warping and must be drawn tightly. To confine the heat under the case use building papers fastened on with strips and leave a small hole at each end, or one corner can be arranged to lift up in order to get at the valves to decrease or increase the amount of bottom heat. The bottom

of the case should be covered with a layer of moss an inch deep and over this a layer of finely screened coal ashes from one-half to 2½ inches in depth, according to how hot the case may get in testing it. There should be enough bottom heat used to be able to maintain a temperature of 80° inside the case when the weather is down to zero outside, 75° being a good temperature to run the case at for the first eight or ten days, then reduce to 70° gradually for another week, then to 65°, and by adding the slightest crack of air after twelve to fourteen days the graft will gradually harden off. The principal things to remember are to have plenty of moisture in the case, give the ashes a soaking before sitting any plants in the case. Be sure that there are not any leaks that will let the hot dry air in from below. Do not put unevenly watered plants in the case—water very carefully. Place grafts in case as soon as a small flat full is made up, arrange the plants inside so that the foliage will not overlap the next plant to it. Do not let the case get below 75° for the first ten days. In about ten days the manetti growth will be found coming from the base of the plants. These growths should be removed as soon as they get a half an inch in height. Open one sash at a time and work as rapidly as possible in doing this work, so as not to have the scions wilt.

have ripened or turned dark; from three weeks (about the time to do some airing) till about the fourth week will test the skill of the man in charge of the grafting case. Use raffia for tying and cut it in lengths about a foot long, place the raffia in water to soften it. Be sure that your scion fits all the way on one side of the cut, matching the bark on the manetti. If small scions are used, they can also be spliced as shown in figure five. The notched splice, figures two and three, represent the best method of splicing, but as we can not always match the wood evenly we use the smaller scions as shown in figures four and five. Tie firmly and do not bruise the bark of the scion by tying too tightly. Remember to temper the water when spraying the plants in the case, otherwise the temperature will drop too rapidly. It is a good plan to have a case large enough so as to be able to remove the plants farthest advanced into a cooler end of the case. Do not put air on the house when airing the grafting case, and if the ashes in the case become too dry take out a few rows and go over the case, working the plants over as you water the ashes. This is seldom necessary if sufficient moss and ashes have been placed in the case at the start and watered thoroughly.

We are also illustrating in this article a drawing of a propagating bench

GRAFTING ROSES.

After cleaning off one frame full of plants spray them over the top and close the case for a while. If the scions show a tendency to wilt in giving air to the case one cannot be too careful. The thickness of a label to start with pushed under the edge of the sash will be enough for the first day, and the case should not be aired until the callous at the top of the scions

with brick bottom. The bricks are placed on scantlings running crosswise the bench. Place the bricks as close together as possible, then cement all the cracks. Use three inches of sand and use paper or boards to close in the bottom heat. With boards doors can be arranged to regulate the bottom heat as well as the overhead temperature. Figure eight represents a two-

eyed cutting. They can be made with two or more eyes, but we prefer to have a heel or an eye left at the base of the cuttings. Figure nine represents the usual method of making a cutting of American Beauty. This is a one-eye cutting. They can also be made with two eyes when one has plenty of wood, and we prefer the two-eyed cuttings to any other when working up Beauties.

E.

HOLIDAY TRADE.

FREDERICTON, N. B.—The increase in the total sales this Christmas, states John Bobbington & Son, will show an advance of 25 per cent over the preceding one. The quality of the flowers was no better than usual with the exception of lily of the valley which was never so good, but the prices were much higher for we never had to pay so much for stock either in Boston or Toronto and consequently had to sell at higher values. The local supply was short and we had to buy heavily. American Beauty roses we could not get at any price. The demand for bulbous flowers was less than usual. Paper White narcissus were used for church decorations. There was an increased demand for flowering plants, but little call for palms and decorative stock, and violets more called for than in previous years. The demand at Christmas is for red, there being a craze for poinsettias and red carnations, the latter selling for \$2.00 per dozen. If we are in existence another year we intend to be better prepared in these two lines. The weather could scarcely have been worse on Saturday afternoon, for it poured, but Sunday was much improved.

RALEIGH, N. C.—J. L. McQuinn & Co. state that the Christmas sales are larger than last year, but there has not been a chance to figure out the percentage. There were not enough carnations and violets to supply the demand, and the retail prices were consequently higher, the supply and prices of roses about the same as before. There were enough bulbous flowers to fill all orders at fair prices. There was a marked increase in the demand for violets and carnations, which are always short at Christmas and for flowering plants, especially poinsettias in pans, azaleas, hyacinths and narcissus. We are going to try to induce our trade to allow us to deliver the plants on December 23, at least, not later than the morning of December 24, as the rush for both plants and cut flowers coming the last day makes it difficult to handle the business satisfactorily. We think every florist should begin an educational campaign on this line. The weather was bright and cold and the business was the most satisfactory that we ever had.

KEARNEY, NEB.—A marked increase in the sales of this year states the Kearney Floral Co. over the last holiday trade being about 35 per cent greater. The quality of the flowers was about the same as last year and the supply about equalled the demand with the exception of Roman hyacinths, of which there were too many. The prices were about the same as at last Christmas but red carnations, however, were higher. There was an increased demand for flowering plants and not so much call for palms and ferns. In a small town there is bound to be some dissatisfaction shown at the higher prices, but those who thought that they could not afford flowers bought holly wreaths and flowering plants. The weather was fine and with the aid of the proprietor's touring car for deliveries the work was made comparatively light. Every-

thing is promising for 1911 and the building of two new houses is contemplated.

DALLAS, TEX.—An increase of 25 per cent is the report of The Texas Seed & Floral Co. in the holiday business of 1910. There was a good supply of flowers, equal to the demand, of first class quality and the retail prices ruled

pickle any stock, so everything at Christmas was nice and fresh.

DENVER, COLO.—Nearly the same as at Christmas, 1909, states the Park Floral Co., with possibly a slight falling off. The prices this year were practically the same, with the exception of carnations, which were a little cheaper, and the supply was of good

PROPAGATING BENCH AND ROSE CUTTINGS.

about the same as last year. The demand for bulbous stock was very moderate, with a good supply. The largest call was for carnations and the cheaper and medium priced roses. There was a large increase in the demand for blooming plants, especially poinsettias, which were all sold out, begonias and cyclamen. Made-up baskets of blooming plants decorated with fancy mats were popular and sold well. The moderate priced stock had the better sale, there not being much call for the high priced roses such as American Beauty. There was a good demand for holly and Christmas trees.

PEORIA, ILL.—An increase of about 10 per cent, states Juergens & Co., in the business this year over last at Christmas. The retail prices of roses and carnations were higher than last year and while the supply of roses was plentiful enough with the exception of American Beauties, there was a shortage of carnations and violets. There were plenty of bulbous flowers but they sold well, especially Paper White narcissus. The roses this year were of better quality than last, but the carnations were not so good. There was an increased demand for cut poinsettias and narcissus. Azaleas and cyclamen sold well and at good prices. Business was good all through the month of December and there was no chance to

quality and equal to the demand except in American Beauty roses. There were plenty of lily of the valley, Paper Whites and Roman hyacinths, but no tulips. The call for medium American Beauties was heavy. There was an increased demand for Begonia Gloire de Lorraine and a good call for all flowering plants. The demand for cut flowers falls off a little each year. There was practically no lycopodium and we found our customers took readily to the use of spruce and other native greens.

SAVANNAH, GA.—A. C. Oelschig & Sons state that as near as they can estimate the holiday trade will show an increase of about 25 per cent. Owing to very favorable weather the quality of the cut flowers was better than in former years, roses especially. We had to buy considerably in the east for the demand was more than the supply, notwithstanding that we had more and better stock than ever before of our own raising. Pot plants of bulbs and cut flowers sold well, the supply being sufficient. The retail prices were about the same on all stock as last year. Made up pans and poinsettias sold better than in former years, the customers were shy of buying begonias and azaleas for Christmas gifts, but the latter had a very good sale for cemetery purposes.

LONDON, ONT.—J. Gammage & Sons state that the business this year during the holidays will show an increase of 35 per cent over last. The flowers were of better quality and the prices averaged about the same. Roses and carnations were in fair supply but violets were short, not equal to the demand. There was very little call for bulbous flowers. There was a marked increase in the demand for both decorative and blooming plants, especially for azaleas and basket arrangements which took the lead. The buying started much earlier with a call for the better quality and higher priced stock. The weather was ideal, good sleighing and not too cold. It was the best business we ever had.

FALL RIVER, MASS.—An increase of 10 per cent over the Christmas sales of 1909 is the report of C. Warburton. The retail prices for cut flowers were about the same as last year, the quality of most of the stock being better. The only shortage was in violets and the quality of these was not as good as the year previous. The demand and supply of bulbous flowers were small. There was increased call for violets and orchids, and for flowering plants and basket combinations. The demand for flowering plants seems to be more every year. A fire in an adjoining store was detrimental to our business on Friday and Saturday, the cellar being flooded and everything smoked up.

PORTLAND, ME.—L. C. Goddard reports the trade at Christmas was about the same as last year, showing little change. There were plenty of roses, but carnations and violets were short, the quality was better and the prices from 10 to 20 per cent higher than last year. The call for bulbous flowers was light and the supply bountiful. The demand for fine carnations is constantly increasing as it also is for blooming plants, but there was less call for decorative stock. The heavy rain of Saturday night on eight inches of snow made one of the worst days for business ever experienced. Had we had fair weather the trade would have shown an increase over 1909.

PUEBLO, COLO.—G. Fleischer reports that the Christmas trade increased this year from 10 to 15 per cent. The retail prices were a little better than the year previous, as well as the qual-

ity of the stock, of which there was a good supply except violets, which were all shipped from the east. The supply and demand for bulbous flowers was good, especially narcissus. There was an increased demand for both decorative and flowering plants, azaleas up to \$3.00 and cyclamen at \$1 and \$1.25 sold well. Made up baskets or jardineres filled with flowering plants are too expensive. The trade demands smaller flowering plants up to \$3.00 in value.

PORTLAND, ORE.—An increase of 25 per cent in the trade this year over last is the report of Clarke Bros. The retail prices of roses, carnations and violets were practically the same as last year and there was just about enough stock to go around. The supply of bulbous stock was small, and with the exception of lily of the valley was not needed. Red carnations were as usual in the greatest demand. The immense stock of pot plants relieved the pressure on the cut flower market in a very agreeable way. Plant basket arrangements seemed to be more popular than ever with the best buyers, there being a large number sold.

COLORADO SPRINGS, COLO.—Frank F. Crump reports that the sales during the holiday trade were greater than a year ago. There were just about enough roses and carnations to meet the call, with the exception of American Beauties which were scarce. Violets also were short of the demand. The quality of the flowers and the retail prices were about the same as last year. There was a marked increase in the sale of good flowering plants and made-up pans and baskets of assorted plants sold well. The best sellers were poinsettias and azaleas, but there were also good sales of begonias and primroses.

WINONA, MICH.—A much larger Christmas business than last year, reports John Fuhlbruegge, the increase in sales being about 30 per cent. The retail prices this year were much higher, at least 20 per cent, and the quality of the flowers was about the same, perhaps a little better. The supply of all stock was about equal to the demand, except the red flowers which were short. Narcissus sold very well. There was a big call for flowering plants and ferns, poinsettias taking

the lead. The wholesale prices of flowers were altogether too high. If prices had been lower we could have done much more business.

VICTORIA, B. C.—The Fairview Esquimalt Greenhouses, writing December 26, say they do not yet know whether the total sale will show an increase or not. The retail prices were the same except red carnations which sold at \$2.00 per dozen. The quality of the cut flowers was about the same as last year, but the supply did not equal the demand, it never does, we don't get any sunshine from September to March, and very little the balance of the year. The supply of bulbous flowers was good but they all sold. Carnations were the popular flowers and took the lead, there being an increased demand for them.

POUGHKEEPSIE, N. Y.—The total sales for the Christmas business were much larger than last year, states the Saltford Flower Shop, the percentage not yet being available. The retail prices were about the same as a year ago and the quality of the flowers was good. Carnations were shy, but roses and violets were plentiful. There was a fair demand for bulbous flowers. There was an increased call for plants both blooming and decorative kinds. The real poinsettias took the lead this year; the people are tired of the artificial ones.

GREELEY, COLO.—The Garner Floral Co. report an increase of 50 per cent in the total sales at Christmas over the preceding year. The quality of the flowers and the prices were about the same as last year. The supply of bulbous flowers was good, but there were not enough roses, carnations and violets to meet the increased call. There was a greater demand for plants than at the holiday season a year ago.

COLUMBUS, O.—John R. Hellenthal reports that the Christmas trade was the best he ever had. There was plenty of good stock. The call for flowering plants was good, azaleas and poinsettias taking the lead.

SALEM, ORE.—The Christmas business was better than ever before by 50 per cent, states Ruef Bros. The supply of roses, carnation and violets was far short of the demand. The quality

ENCLOSED CASES FOR GRAFTED ROSES.

of the flowers was better than last year, as were also the prices obtained. Bulbous flowers sold well for the people were forced to take them because the other flowers were gone. There was an increased demand for plants and cut poinsettias.

OBITUARY.

Frederick Dorner, Sr.

Frederick Dorner, senior, the eminent carnation authority, died suddenly December 29 at his home in LaFayette, Ind., having been confined to his bed only a week. Pneumonia and heart failure were the direct causes of his death, although he had been failing for nearly a year. Last January he had a severe attack of the grip from which he never entirely recovered. He was able to be up and around at times and at other times was confined to the house. On December 23 he was taken quite ill and rapidly grew weaker until the end came. His death, however, was not expected and was a great shock to his family and friends.

Frederick Dorner was born in Baden, Germany, November 29, 1837. He was the son of Frederick and Christina Dorner. When 18 years old he decided to emigrate to America where the possibilities for advancement were greater than in his own land and he set sail for the United States, going directly to LaFayette where a brother, Philip, had previously settled. Very early in life he was a great lover of nature, having something of a poetic temperament in that he dearly loved flowers. He liked to see them grow and to cultivate them, but unlike the poet, he also saw the great commercial side of this prodigal beauty of plant life and sought to turn it to account with the result that he began working for the florist, Lloyd, with whom he remained for a short time and then worked at other things until he had a start. On March 2, 1861, Mr. Dorner chose a life partner in the person of Marguerita Eihl, daughter of Lawrence Eihl, of LaFayette, and would have celebrated his golden wedding in a short time.

After following farming for some time Mr. Dorner in 1865 went to Wisconsin and engaged in farming until 1870, in which year he returned to LaFayette and started business as a florist at Gaasch's garden on Underwood street, where there were already greenhouses which he rented. About 1875 he moved to the south side of Indiana avenue, renting ground on Nineteenth street of the late Moses Fowler. Here he built a greenhouse and carried on his business very successfully. On the death of Mr. Fowler he moved, buying land of Martin L. Peirce, consisting of nine acres on Indiana avenue. This was in 1889. Since that time he added to his original purchase from year to year until his holdings became very extensive and valuable. In 1905 he purchased 24 acres at Twenty-fourth street and Indiana avenue and built greenhouses there. When Mr. Dorner started in business at Nineteenth street on the north side of Indiana avenue he had three houses and about 7,000 square feet of glass. This was in 1890. The growth of his business since that time has been phenomenal. At the present time the Dorner company has over 100,000 square feet of glass and Mr. Dorner built himself a handsome residence at Nineteenth street and Indiana avenue, where he died. The Dorner company has had a downtown office and retail establishment for a number of years at 640 Main street. Since 1890 Mr. Dorner had made a specialty of carnations.

Mr. Dorner, better known to the trade far and wide as Father Dorner,

was one of the most lovable of men, kindly and considerate of all. It is told of him that for many years he carried his noonday lunch from the house close by to the potting shed where he sat and ate at the same humble bench as his workmen. Unobtrusive to the last degree, he loved his home and his work; he loved flowers and music; he had no enemies. His achievements in floriculture, living and real, afford the best evidence of his unceasing industry. His work was painstaking and thorough, and thus he triumphed. He worked upon the chrysanthemum and helped very considerably in bringing up that flower to the zenith of its popularity in America some years ago. Among his introductions early growers will recall Mattie Bruce, Anna Dorner, Emily Dorner, Mermaid, Eda Prass, Evaleen Stein, Mrs. C. H. Duhme, Sarah Hill, Major

The Late Fred. Dorner.

Bonnaffon, E. M. Bigelow, Millbrook, Mrs. S. T. Murdock, Oakland, Elma O'Farrell, Amaranth, Mrs. W. C. Egan and Tippecanoe.

But the carnation was always his favorite and to this flower he gave his best years and his most persistent application. His careful contributions to the first volumes of THE AMERICAN FLORIST record much of the early history of the carnation and its cultivation as a greenhouse subject. His views on and experiences in "Carnation Breeding," perhaps his latest and most important contribution to the literature of the carnation, are given in THE AMERICAN FLORIST of April 13, 1907, page 596. The varieties of recent years are too well known for mention here, but most of his earliest productions, wonders in their day, are superseded and forgotten. In 1891 he gave us Cherry Lips, Creole, Fred Dorner, Mrs. Harrison, Innocence, Edwin Lonsdale, Red Cross, San Mateo, White Wings and Annie Wiegand. The following year we have Mme. Diaz Albertini, Attraction, Ben Hur, Evangeline, Nancy Hanks, Mrs. Robt. Hitt, Indiana, Mrs. Eliz. Reynolds, Richmond, Spartan, John Thorpe, Wabash and White Dove. A year later Blanche Edna Craig, Esther, Hoosier, Purdue, Salmon Queen, Wm. Scott, Sea Gull, Sentinel, Dr. Smart and Western Pride. In 1894 there were Goldfinch, The Stuart, Uncle John and A. Wood. In 1895 appeared Bridesmaid, Meteor and Storm King and Mrs. G. M. Bradt was introduced in 1897.

Thirteen children were born to Mr. and Mrs. Dorner, four sons and three daughters still living. The widow also survives. The sons surviving are Frederick E. Dorner and Theodore A. Dorner, of LaFayette, Herman B. Dorner, professor of floriculture in the University of Illinois at Urbana, Ill., and William P. Dorner, of Indianapolis. The daughters are: Miss Emily Dorner and Mrs. Fred E. Hudson, of LaFayette, and Mrs. Claude Riddle, of Los Angeles, Cal. All the children except William P. Dorner were at the bedside when the end came, Mrs. Riddle having come from her California home to spend the holidays with her parents. Mr. Dorner's business was incorporated in 1896 under the laws of the state as the Dorner & Sons Co. Mr. Dorner himself was president. The other officers are: Theodore A. Dorner, vice-president, and Fred E. Dorner, Jr., secretary and treasurer.

Funeral services were conducted at the home January 2 by the Rev. Dr. John P. Hale and interment followed at Greenbush cemetery. The funeral was largely attended and among the trade representatives noted were A. F. J. Baur, secretary of the American Carnation society; Irwin C. Bertermann and H. W. Rieman, Indianapolis, Ind.; W. W. Coles, Kokomo, Ind.; E. G. Hill and Earl Mann, Richmond, Ind.; Prof. J. C. Blair, Urbana, Ill.; Harry Balsley, Detroit, Mich.; R. Witterstaetter, Cincinnati, O., and President Asmus of the Society of American Florists, W. N. Rudd and M. Barker, Chicago. Floral offerings were very numerous and handsome and included a beautiful spray of cypripediums and white carnations from the executive committee of the Society of American Florists. The pallbearers were W. N. Rudd, Earl Mann, Irwin Bertermann, Prof. Blair, S. Saltzgeber and W. W. Lane.

John J. Gormley.

John J. Gormley, a member of the concern of Canger & Gormley, one of the leading retail firms of Chicago, died very suddenly, December 31, 1910, of stomach trouble, at his home, 2636 Orchard street, after an illness of three weeks, aged 47 years.

Mr. Gormley was born in Ireland, September 3, 1863, coming to America in boyhood. He went to work for his uncle, John Gormley, one of the pioneer florists of Boston, where he obtained a thorough knowledge of floriculture in both the greenhouses and the store of his employer. Here he remained a number of years, and in 1890 removed to Chicago, entering the employ of Ernst Wienhoeber. For fifteen years he was with this firm and in 1905 entered into partnership with John Canger, under the firm name of Canger & Gormley, opening a store at No. 29 State street, where they have built up a very prosperous business. His genial and pleasant disposition, combined with his strictest business integrity, have made him a host of friends in his adopted city, and his horticultural knowledge and artistic ability have gathered to him a large patronage in his business from the best people of the city, by whom he will be greatly missed.

Mr. Gormley was married in Boston, September 15, 1889, and is survived by his widow, Margaret E., and two daughters, Helen and Mary, aged 19 and 14 years respectively. The funeral services were held Sunday afternoon, January 1, at St. Clements Catholic church, there being a large gathering of friends and members of the trade present. The floral offerings were many and beautiful, the casket being banked with the remembrances of associates and friends. The interment was in St. Boniface cemetery.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico \$1.00 a year; Canada \$2.00; Europe and Countries in Postal Union, \$2.50. Subscriptions accepted only from those in the trade.

RENEW subscriptions promptly so that no copies of the papers may be missed.

We are in receipt of the twenty-first annual report of the Missouri Botanical Garden, containing a number of botanical papers.

THE passing of Fred Dörner, senior, the well-known carnation specialist, who died at LaFayette, Ind., December 29, removes from our midst another bulwark of American floriculture. A fine type of citizen, he gave the best years of his life to advancing his profession, more for the love of the work than the money there was in it.

Personal.

Frank A. Friedley, manager of the J. M. Gasser Co.'s establishment at Rocky River, O., and Miss Anna M. Dress, of Cleveland, were married December 28.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high grade work.

American Beauties for Royalty.

One hundred American Beauty roses were shipped from the greenhouses of L. A. Noe of Madison, N. J., for the Christmas table of the Queen Mother Alexandra of England. They are the largest and finest roses and of the longest stems to be found. Those are the specifications under which Mr. Noe's orders for the royal table have been filled every year, at this time, for a long period.

Mr. Noe, himself, selects the flowers and personally packs them. So solicitous is he of his precious product, that he would follow them across the Atlantic if that were possible. Noe roses have been going to the palace of England's sovereign for many years. They went to Queen Victoria when she was alive and King Edward's table was decorated with them every Yuletide.—New York Times.

Cement Gutters.

ED. AMERICAN FLORIST:

Will you kindly inform me if it is advisable to use cement for constructing gutters for a greenhouse?

SUBSCRIBER.

I do not believe it is feasible to use cement for gutters. There is no doubt but what it could be done, but the writer is inclined to think it would be both expensive and unsatisfactory. In the first place there would be the almost certainty of the gutter cracking unless it were carried up on a solid wall, and there would also be difficulties of construction which would make it expensive to carry the heavy weight of a cement gutter suspended.

Another difficulty would be the tendency of the cement to absorb water and remain in a damp condition, thus affecting the woodwork attached to it. No doubt this might be partially avoided, at least, by treating with some of the water proofing preparations, but such a course would be an additional expense and the results more or less doubtful. The main difficulty, however, would seem to be the attaching of the woodwork to the cement gutter; in order to nail or screw the sash bars in place it would seem necessary to anchor a strip of wood along the gutter and one would then have something practically no better than a wooden gutter. If cement walls were used and carried up to the gutter line I should favor preferably anchoring some form of iron gutter to the top, or placing a wooden gutter upon the top.

W. N. RUDD.

American Gladiolus Society.

President Hendrickson has appointed the following committee to investigate the diseases of the Gladiolus, each member to work in connection with the experiment stations in the different states:

New York.—Arthur Cowee, Berlin, N. Y.

Ohio.—M. Crawford, Cuyahoga Falls, Ohio.

Wisconsin.—H. H. Bridge, Lake Mills, Wis.

Massachusetts.—L. Merton Gage, Orange, Mass.

Indiana.—E. Y. Teas, Centerville, Ind.

Michigan.—C. H. Ketcham, South Haven, Mich.

Connecticut.—B. F. White, Terryville, Conn.

Iowa.—G. D. Black, Independence, Iowa.

New Jersey.—I. Leonard, Iona, N. J.
California.—Dr. W. Van Fleet, Chico, Calif.

Illinois.—H. B. Dörner, Urbana, Ill.
L. Merton Gage, Cor. Sec'y.

Society of American Florists.

DEPARTMENT OF REGISTRATION

As no objections have been filed, public notice is hereby given that the registration of the Geraniums, Panama, White Cloud, Ruby, General Wooster, Barnaby Rudge and Bright Eyes, by F. H. De Witt, Wooster, Ohio, becomes complete.

PRESIDENT ASMUS'S APPOINTMENTS.

The following is President Asmus's list of appointments for 1911:

Executive Board, Three Years.—E. Allan Peirce, Waltham, Mass.; Harry A. Bunyard, New York, N. Y.

Botanist.—Prof. John F. Cowell, Botanic Gardens, Buffalo, N. Y.

Pathologist.—Prof. H. H. Whetzel, Ithaca, N. Y.

Entomologist.—Dr. S. A. Forbes, Urbana, Ill.

Washington Representative of the Society.—William F. Gude, Washington, D. C.

Tariff and Legislative Committee.—John G. Esler, Saddle River, N. J. (Chairman); F. H. Traendly, New York, N. Y.; J. C. Vaughan, Chicago, Ill.; Patrick Welch, Boston, Mass.; J. O. Thilow, Philadelphia, Pa.; E. G. Hill, Richmond, Ind.

Committee on School Gardens.—Benjamin Hammond, Fishkill-on-Hudson, N. Y. (Chairman); C. B. Whinnall, Milwaukee, Wis.; Michael Barker, Chicago.

State Vice-Presidents.

California.—Edwin Lonsdale, Lompoc.
D. of C.—Z. D. Blackstone, Washington.
Georgia.—Daniel C. Horgan, Macon.
Illinois, North.—Fred Lautenschlager, Chicago.
Illinois, South.—J. F. Ammann, Edwardsville.
Indiana.—Theo. Dörner, Lafayette.
Iowa.—James S. Wilson, Des Moines.
Louisiana.—Harry Papworth, New Orleans.
Maryland.—Chas. L. Serbold, Baltimore.
Michigan, East.—Norman A. Sullivan, Detroit.
Michigan, West.—Elmer D. Smith, Adrian.
Missouri, East.—Fred H. Weber, St. Louis.
Mississippi.—S. W. Crowell, Rich.
N. H.—R. E. Hannaford, Portsmouth.
New York, East.—A. L. Miller, Brooklyn.
Ohio, North.—F. A. Friedley, Rocky River.
Ohio, South.—C. E. Critchell, Cincinnati.
Penn.—East.—S. S. Skidelsky, Philadelphia.
Rhode Island.—L. J. Reuter, Westerly.
Tennessee.—C. L. Baum, Knoxville.
W. Virginia.—A. Langhans, Wheeling.

Canada.

Ontario.—John Connors, Hamilton.
Manitoba.—H. E. Philpott, Winnipeg.
Quebec.—George A. Robinson, Montreal.
Alberta.—A. M. Terrill, Calgary.
H. B. DÖRNER, Sec'y.
December 29, 1910.

Growing Delphiniums From Seed.

ED. AMERICAN FLORIST:

What is the best way and when the best time to plant seed of Delphinium Elatum hybridum? I have sown the seeds several times and they do not germinate. Do they require some special soil? S. H.

This is much better deferred until early spring, say middle of February and especially is this so if the strain is of choice hybrid origin with a percentage of double flowered seeds mixed in. These last are always more difficult to germinate, usually weaker in starting, and when saving delphinium seeds, those from double flowers should always be kept separate so as to treat them with care and the weak ones carefully saved, they are generally the best varieties. Sow under glass in the usual way, preferably in flats, etc., so as to give plenty of space, transplant when large enough into other flats, and in May plant out where they are to bloom, and a fine display will result late in summer after older plants have passed flowering. It pays to raise some every year from seed, selecting the best to keep for seed, as these spring sown plants will mature good seed the same year.

E. O. O.

Meetings Next Week.

Baltimore, Md., January 9, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange Hall, St. Paul and Franklin streets.
Butte, Mont., January 13.—Montana Florists' Club, Columbia Gardens.

Chicago, January 11.—Gardeners' and Florists' Union No. 10615, 10 and 12 Clark street.

Cincinnati, O., January 11, 8 p. m.—Cincinnati Florists' Society, Jabez Elliott Flower Market.

Cleveland, O., January 9, 7:30 p. m.—Cleveland Florists' Club, Progress Hall, 2610 Detroit avenue.

Hartford, Conn., January 13, 8 p. m.—Connecticut Horticultural Society, County building.

Indianapolis, Ind., January 10, 3:30 p. m.—State Florists' Association of Indiana, State House.

La Crosse, Wis., January 10.—La Crosse Gardeners' and Florists' Society, Hotel Stoddard.

Madison, N. J., January 11, 8 p. m.—Morris County Gardeners' and Florists' Society, Masonic hall.

New London, Conn., January 11.—New London County Horticultural Society, Elks' hall.

New Orleans, La., January 8, 2 p. m.—Gardeners' Mutual Protective Association, 118 Exchange alley.

Sold by Seedsmen.

MANUFACTURED BY

Aphine Manufacturing Co.
MADISON, N. J.

Cincinnati.

Holiday business was good. The early part of last week nearly everything cleaned out nicely. At the close of the week much funeral work took up all roses, carnations, lilies and a lot of bulbous stock and lily of the valley. Paper whites and Romans are, however, accumulating. The general quality of the roses has never been better for this season of the year. American Beauties, Killarney and Richmond deserve special mention. Pink roses have been in especial demand. The supply of carnations was just about one-half of the normal cut of other years. The prices held up steadily until the close of the week when they shaded somewhat. More double violets have been on hand than are necessary for requirements. Princess of Wales are not coming in very strong and clean up every day. The amount of poinsettias about equaled the request. Longiflorum lilies sold nicely and were in fair quantities. Callas are none too plentiful as yet. Lily of the valley does not attract the eager grasp of the buyers. The supply of green goods is ample. Boxwood is again offered in quantities.

NOTES.

Wm. Spech was very fortunate when his new Stoddard-Dayton car was among the first of the machines to be taken from the Payne Motor Car Company's garage which was at the time threatened by the big fire and later overwhelmed by falling walls.

Billy Spech had quite a large time at his home on Alexandria Pike just out of Newport when on Thursday evening, December 15, he entertained many of his friends including several florists in honor of the marriage of his daughter. The Dutch bulb agents are now arriving in force, each of them asserting that his stock is the best of all and

Vaughan's Flower Seeds

Vaughan's International Pansies The World's Best

This is one of the specialties which has established and held the reputation of Vaughan's Flower Seeds, and this is one which we maintain carefully, not alone as to quality, but in vitality and germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt., 50c; ½ oz., \$1.50; ½ oz., \$5.00; oz., \$10.00.

Vaughan's "Giant Pansy Mixture"

Embraces, besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain. Trade pkt., 25c; ½ oz., 60c; oz., \$4.00.

Vaughan's Cut Flower Pansy Mixture

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers, who have realized big returns from the sale of the flowers. Pansies are as easily grown as violets, require less care and bring better returns. Trade pkt., 50c; ½ oz., \$1.00; ½ oz., \$2.00. oz., \$8.00.

Pansy Boulogne Giant

This is a special selection of a French Pansy grower; the flowers are of the largest size, of great substance and fine form, and are borne on particularly strong stems. They are mostly 3 and 5 blotched, delicately veined, while the colors are rich and varied. Trade pkt., 50c; ½ oz., \$2.00.

ZERO WEATHER.

At last a real touch of winter is on us, and the thermometer is flirting with the zero point. The weather probabilities prophesied a blizzard, but there has as yet been no snow, but high winds and low temperature prevail, which will no doubt shorten up the cut and will require lots of wrapping to safely get the flowers to market and guarantee their safe arrival on shipment. But the growers in this vicinity are certainly to be congratulated upon the weather which they have had up to date and during the holidays. The usual after New Years conditions prevail. There is plenty of stock of all kinds and of excellent quality. Superb roses of all varieties have been arriving all the week, and it was a great question, some of the time, where to place the large amount of stock, but the best of the flowers find an outlet and there is comparatively a very small amount but that finds a market. Long stemmed American Beauty roses are very plentiful and all the grades of this leader of roses have dropped considerable in price. Killarneys are coming in large quantities and beautiful long stemmed flowers are sold for less than half what they were bringing a week ago. There is a little more call for white roses, for the retail stores have been very busy with funeral work, which, of course, call for the white. Carnations are now arriving in quantities enough to meet the demand and on some days there is an over supply. Orchids are being received in greater quantities and the prices are considerably lower. Lilies are in good supply but there is a shortage of lily of the valley. Sweet peas are now coming in more bountifully and the usual winter prices rule. Some very fine freesia made its appearance upon the market which was immedi-

35-37 Randolph St., CHICAGO

ately taken up. The first of the daffodils were seen this week and it will be but a few days when the market will be resplendent with the yellow blooms. The shipping trade is holding up very well and normal conditions for the first of the year prevail. The retail trade has gotten over the holiday season and has been very busy with funeral orders all the week.

NOTES.

The trade was greatly shocked by learning of the death of John J. Gormley, of Canger & Gormley, on Saturday forenoon. He had been ill for but three weeks and it was not thought his ailment was serious, and on Saturday

morning it was reported that he was improving. Many were the encomiums heard from his business associates upon learning of his demise. The obituary appears in another column.

Phil Schupp, of J. A. Budlong's, reports the New Year's business very good with shipping trade excellent. This firm is cutting a large quantity of their Blue Ribbon valley for which the demand is heavy.

H. M. Burt of Jackson, Mich., spent January 3 in the city on business. Mr. Burt intends to erect several greenhouses in the near future and it is understood that his mission here was to secure plans and figures for the same.

POEHLMANN'S FANCY VALLEY EXTRA FINE HARRISII LILIES

We make these a specialty.
Can supply them all the year.
Once tried you will have no other.

Bassett & Washburn had at their office on January 3 the plans for the new building, 80x200 feet, which will be erected at the corner of Market and Lake streets. E. B. Washburn is at the head of the movement whose aim is, if the deal goes through, to have the wholesale florists, or a part of them, move from their present locations and take space in the new building, which will be completed about September 1. The University of Chicago owns the property upon which the structure is to be erected and a gentleman by the name of Heckman is the party who will put up the building.

The Chicago Carnation Co. will give a free excursion to Joliet and return on Wednesday, January 11. The train will leave the LaSalle street station on the Rock Island railroad at 11:45. All are cordially invited to join the crowd and to see their new carnation, Washington, as it grows and blooms

at their greenhouses. Luncheon will be served at the greenhouses upon the arrival of the train at 1 o'clock. Anyone wishing to take advantage of this liberal offer should leave word with Manager Pyfer so the necessary arrangements can be made to accommodate all.

The Killarney, White Killarney and Richmond roses that Hoerber Bros. are receiving at the store this week are of the best quality. Bride and Bridesmaid are looking fine and carnations, of which they have a large supply, are also arriving in splendid condition. Will Hoerber and Harry Manheim are kept on the jump filling the many orders that are received.

Mrs. H. Clifton, 373 North Forty-eighth avenue, is another of the many florists who report a rushing holiday trade.

The Geo. Wittbold Co., 737 Buckingham place, sold an unusually large number of baskets in connection with

their plant and cut flower trade during the holidays. F. M. Nelson, manager of the retail department, reports business good, with a large amount of work for funerals and weddings.

N. J. Wieter is still suffering from a severe cold but is on the job the same as usual. A large crop of White Killarney roses is being cut at the greenhouses and a large quantity can be seen at the store this week.

Buchbinder Bros., 518 Milwaukee avenue, are receiving a number of inquiries from many florists in regard to the new ice boxes which they manufacture and have recently placed on the market.

A splendid grade of stock, including all different flowers of the season, was seen at Zech & Mann's this week. We also noticed a number of La Reine tulips.

Chas. Ussing, an employee at the Hoerber Bros. store, is seriously ill in a local hospital with pneumonia.

VAUGHAN & SPERRY

LONG DISTANCE PHONE
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

Mike Fink of Kennicott Bros. Co., was surprised on January 3 when he opened the store, to find that burglars had entered during the night and ransacked the office from top to bottom. Two small boxes, one empty and the other containing \$13 in cash, were on the desk. The intruders evidently picked up the empty one and, disgusted to find it contained nothing, threw it on the floor without taking the trouble to look into the other, which contained the money. So far nothing has been missed and the only loss sustained was the pane of glass through which the robbers made their entrance.

Poehlmann Bros. Co. is mailing to their customers two very pretty calendars for 1911, and will gladly mail one to any florist upon request. O. W. Frese is devoting a greater portion of his time looking after the affairs in the office while John Poehlmann continues to handle the large trade which this firm enjoys.

Miss May McAdams, daughter of Andrew McAdams, the well-known florist at Hyde Park, returned January 3 from a few weeks' visit to Sheboygan, Wis. Miss McAdams was a member of a party of 20 that attended a house party in that city, celebrating the New Year in royal fashion.

Emil Jehlik, Ashland avenue, enjoyed a brisk business during the holidays and disposed of a large quantity of cut flowers. Mrs. Jehlik and son have been on the sick list for a few weeks, suffering from severe colds.

Vaughan & Sperry are receiving a fancy grade of long-stemmed American Beauty roses. Wm. Dittman of New Castle, Ind., will soon be on with another crop and extra large shipments will be daily arrivals.

Peter Reinberg is cutting a large quantity of White Killarney and Richmond roses of extra good quality. Carnations in all the leading varieties

PETER REINBERG

35 Randolph Street,

CHICAGO

The regular meeting of the Florists' Club will be held January 5, at the Union Restaurant, 111 Randolph street, at 8 p. m. At this meeting officers will be elected for the present year, the following having been nominated at the last meeting: H. E. Philpott, president; A. C. Kohlbrand, vice-president; A. T. Pyfer, secretary; E. F. Winterson, treasurer; H. N. Bruns, Alex. Henderson and John Degnan, trustees; Michael Fink, sergeant-at-arms. A dinner, costing those who participate \$1 each, will be served after the meeting.

Schiller, the Florist, West Madison street, is enjoying a very busy season, general retail work occupying his attention. The Misses Bert Schiller and M. Zalind are on the sick list and are greatly missed at the store.

Kyle & Foerster are filling a large number of orders for a fancy grade of Killarney roses, of which they have a

Store, 51 Wabash Avenue CHICAGO

Percy Jones

60 Wabash Ave., CHICAGO

Des Plaines, Ill.

The Des Plaines Floral Co. is cutting a large quantity of carnations in all the leading varieties, the stock being all shipped to the Chicago market where it is disposed of by two of the leading wholesalers. A look into the storage rooms showed that the stock is of A1 quality; some extra large blooms on long stems were very noticeable. The varieties grown are Enchantress, White Enchantress, Beacon, May Day, Sangamo, Mary Tolman and Conquest. This firm is well pleased with the latter, also with May Day, which is doing exceptionally well. Beacon is their favorite red and a neat profit was realized from this carnation the past year. There are now on hand 35,000 rooted carnation cuttings, which will soon be ready for delivery, the orders now being booked. The proprietors speak very highly of concrete benches which are in use and state that the prize which they won at the Chicago Flower Show was taken from stock grown on them. The success obtained is they think due to the circulation and drainage under the bench. A feature of the bench in use here is that the concrete work is porous. This is obtained only by making the tile by the same process and methods employed in making concrete building blocks. The tiles are so formed as not to have a flat surface on the bottom, the projections serving to radiate the heat and absorb the moisture, the benches being made from the Garland bench molds.

The past year has been a very prosperous one for the Geo. M. Garland Co., and the outlook for a busy 1911 is very promising, and if this firm's expectations are realized they will the present year sell 100,000 feet of gutters. Of the inquiries received 90 per

cent were for iron gutters, the people evidently believing in good substantial construction. On December 1 this firm began the furnishing of wooden work for greenhouse construction and at present are turning out material for Fred Stielow's new range consisting of seven houses 34x300 feet, which will be of iron frame construction with trussed sash bar and equipped with the Garland gutter. Mr. Stielow was one of the first users of the Garland iron gutter and it was through his suggestion that the manufacture was taken up. This firm also has a contract to furnish the material for a new range of houses for Chas. Abbott of Crown Point, Ind., and at present is manufacturing 7,000 feet of gutter for the Fochlmann Bros. Co. of Morton Grove, Ill.

A visit to the Hoerber Bros. range on December 29 found the stock to be in splendid condition. Five houses 27x200 feet long are planted to carna-

tions, principally White Perfection, Enchantress, Victory and Winsor. Seventeen houses of the same size are devoted to the growing of Killarney, White Killarney, Bride and Richmond roses. Walking through the houses our attention was attracted to a new rose, unnamed as yet. The flower was very large, similar in color to La France, but of a little deeper shade. Everywhere we looked the plants were in a good healthy condition and a large crop is assured from now on; 31,000 roses and 25,000 carnations were cut from December 18 to Christmas; 30,000 rose and 60,000 carnation cuttings are already in the sand and it is expected that propagation will be completed by March 1. Foreman Dunn has everything in fine shape and the houses are all in the pink of condition, with heavy cuts and fine growth, and he made our brief visit very enjoyable escorting us through the houses.

THE LEO NIESSEN CO.,

Business Hours: 7 a.m. to 8 p.m.
1209 Arch St.,

Philadelphia, Pa.

Philadelphia.

Now that it is all over the general consensus of opinion is that the holiday business was not quite up to expectations. Nobody seems to know just why, but there was not the snap to it and in most of the stores there were quite a lot of plants that had failed to find buyers. Christmas greens were also seen lying around and the tree men suffered badly, there being lots of cars in the various yards that were never unpacked and had to be burned up by the railroad companies to get rid of them. An immense amount of business was done in all lines, there being a big demand for cut flowers. Prices, however, ranged low, as for some reason the market seemed extra full in almost every line. Prices on the average were 25 per cent less than last year in everything but orchids and carnations, both of which flowers were the exceptions in that they were scarce and brought top prices, cattleyas selling for \$9 to \$10 per dozen and carnations \$6 to \$10 per hundred. The quality of the stock was excellent, particularly the roses, there being very little but appeared of good color and substance. The very cold weather of the week previous helped to hold it back and none of it arrived in market in very fine condition. The Jos. Heacock Co. and John Welsh Young, who are large growers of Killarney, both spoke of being well satisfied with their Christmas business, for while prices were not high they had been able to sell out their large stocks clean and the total was very satisfactory.

FLORISTS' CLUB MEETING.

The January meeting of the Florists' Club was, considering the very stormy night, very well attended. In the absence of President Heacock, Vice President Burton occupied the chair. The feature of the evening was the paper by S. S. Skidelsky, "Are We Progressive?" This was treated in the usual careful manner of the essayist who is a keen observer and whose experience in his extensive travels over the country and business with all branches of the trade enabled him to point out the hits and misses and show what is needed to keep the trade progressive. System and a thorough knowledge of the business were the foundation stones without which there could be no progress. It was a very excellent paper and brought out considerable discussion. Senator Joseph Heacock returned from Harrisburg in time to take part. Messrs. Fahrenwald, Thilow and Meehan also expressed their approval of the paper, particularly that part in which the education of the coming generation of workers in the trade was recommended. W. H. Taplin of Brooklyn will read a paper on "The Carnations of Today" at the February meeting. A lunch provided by the house committee was much enjoyed.

NOTES.

The Jos. Heacock Co. has taken the store recently occupied by Edward Reid, 1526 Ranstead street, where they will handle their large rose stock from this time on. The opening of this depot will be a great accommodation to their customers, who will be able to get fresh supplies at any hour of the day. The stock of White and Pink

Killarneys now being sent in from the Heacock greenhouses at Wyncote and the new place at Roelfs has never been surpassed in this market.

Joseph Heacock was seen last Monday, grip in hand, on his way to Harrisburg to take his place and be sworn in as senator from Montgomery county. He will be missed at the Florists' Club, where Vice-President Burton will now have the pleasure of presiding.

Ed Reid says he is more than pleased with his move to the old McKissick store, 1619-21 Ranstead street, where he has much greater facilities for handling his increasing business.

The New Year's demand was sufficient to use up most of the fresh stock offered. Prices were about 20 per cent below those of Christmas and are now down to about normal for the season following the holidays. K.

Tarrytown Horticultural Society.

The regular meeting of the Tarrytown Horticultural Society was held in its rooms on Thursday evening, December 29, 1910. The prize of the evening, given by Abel Weeks for the best 18 blooms of carnations, was won by Wm. Pope, gardener to H. Darlington, Mamaroneck, who staged a number of high class flowers. Mr. Weeks also made a splendid exhibit of carnations, staging 12 vases in 12 varieties. As he was the donor of the prize

he did not enter for competition but was awarded honorable mention.

This being the annual meeting, the secretary and treasurer submitted their yearly reports, which as regards increased membership and financial standing showed up very creditably in favor of the society.

New officers were elected for the year as follows:

John Brunger, president.
George Wittlinger, vice-president.
E. W. Neubrand, secretary.
Chas. Weeks, treasurer.
Geo. McIntosh, cor. secretary.

The dinner committee reported that they had arranged for the annual dinner to be held at the Hotel Tarry on Wednesday evening, January 18, at 7 o'clock. Tickets can be had from the secretary, E. W. Neubrand. Friends wishing to purchase tickets should procure them as soon as possible so that proper arrangements can be made for their accommodation. Wm. Scott,

Boston.

The condition of the flower market in Boston is very good. There are plenty of flowers of all kinds to supply the demand, and business has been good for the week following Christmas holidays. Values have dropped to about normal for this season of the year, and the growers are able to dispose of their daily stock at the market price. The retail stores report that they had a very satisfactory Christmas business, although the weather last Saturday when it rained all day was a loss financially, especially in the cut flower line. In nearly all the stores could be seen quite a number of orders for New Years, and the custom of sending flowers for this day seems to be growing in Boston, for while in some cities, notably New York, New Year's has been celebrated. It is only in the last few years that the business in Boston showed much increase at this season. There has been quite a demand for flowers for funerals the past month and each florist gets a share. The wholesale stores report that they did a good Christmas business and that contrary to the fact that the following week trade has usually been very quiet, this year the demand for flowers has been very good all the past week.

NOTES.

Herbert Seaverns, who for a number of years has owned and conducted greenhouses in Weston, which for the last few years he has leased to other parties, has sold his place to Francis Blake and leaves this week for Florida where he has business interests.

Henry M. Robinson & Co. were very busy when your correspondent called upon them. They are receiving a very fine grade of Killarney roses and other flowers for the season of the year.

Welch Bros. report a very large holiday business among their customers which consisted of florists in all the large New England cities and towns.

N. F. McCarthy & Co. report that they did a very good Christmas business and that trade has continued good for the past week as well.

W. H. Elliott is supplying the trade with a high grade of roses which are grown in the greenhouses at Madbury, N. H., and at Brighton.

Quint and Weis who have been conducting a florist business at 379 Boylston St., have closed up. H. C. W.

NOBEBISTOWN, PA.—Henry Yeager, the florist at No. 46 East Airy street, has purchased from his father, Wm. H. Yeager, the old homestead and greenhouses on East Oak street.

BOULDER, COLO.—An increase of about 15 per cent, reports C. F. Fawcett, in the Christmas trade this year. The flowers were of better quality than a year ago with the prices about the same, but the supply did not equal the demand—not by a long ways. The supply of bulbous flowers was limited but enough to fill all orders. The sales of plants were greater than at last Christmas, poinsettias leading with Begonia Gloire de Lorraine and cyclamen close seconds. The trade generally called for more pot plants than ever with nearly all looking for plants in bloom.

SYCAMORE, ILL.—The Christmas trade reports William Swinbank, was about 15 per cent better than last year, which was the best we had previously ever had. The supply of carnations was short of demand. December has been a very good month and everything is looking fine and promising.

New York.

HAPPY NEW YEAR.

A happy New Year to all, and may our business relations be pleasant, irrespective of business conditions. The celebration of New Years was attended with a great deal of noise and feasting here, but, so far as the flower business is concerned, very little excitement was experienced. The weather was cold and clear and flowers of all kinds abundant in supply. In the interim between Christmas and New Years business was extremely slow and prices all round were generally on the decline, nothing firm, nothing scarce, and such are conditions at present. American Beauty roses, from the special grades down to the shortest salable stock are all in heavy supply, the demand is not pressing by any means and prices are very elastic; can be made to accommodate purchasers in fact, the quantity taken being the chief factor in determining the price. Killarney roses are better sellers than My Maryland and there is more than enough of both of them. White Killarney, although coming in in excellent quality, are a particularly difficult subject, but then white flowers of any kind never go so well at the holiday season as do the colored ones. There is a good deal heard about roses bringing such low prices, and they do seem awfully low when compared with prices obtained in other years, but we must consider the immense supply that has been and still is available in this market, a supply perhaps more than double that of any previous year. When that fact is given due consideration we must or should appreciate the fact that prices were not so low after all. Carnations, while being about plentiful enough to meet all calls, do not show in excessive quantities and as a consequence prices remain fairly steady, fluctuations being very slight indeed. Cattleyas are getting quite numerous, so much so in fact that values are weakened perceptibly. The high grade blooms particularly are hard to move at the top quoted prices. Cypripediums and oncidiums are also meeting with slow demand. Violets are keeping up fairly well considering conditions among other staples, prices remain almost stationary for select stock while poor flowers find an outlet in the streets through the peddlers at some price or other. Single violets seem more plentiful than usual and are also selling fairly satisfactorily. Gardenias are scarce, these are the only real scarce things in the market. Tulips are more plentiful, but they are not as a rule, much sought after, the stems are short, consequently not very desirable. Trumpet and Golden Spur narcissus have begun to arrive and are offered at 60c per bunch of twelve. Paper White narcissus and Roman hyacinths are much too plentiful and prices are being cut severely. Lily of the valley is not in good demand. There is some white lilac coming in regularly that also seems hard to be disposed of, however cheaply it is offered. Lilies move slowly, but they move; they have to at some price or other, as the daily consignments continue to be heavy. There is a steady supply of excellent callas, and these go fairly well. Stevia is still a feature but is being offered very cheap, six and eight bunches for a dollar. And still chrysanthemums are to be seen though those who have them are having troubles of their own in finding customers for them. Smilax is too plentiful and hard to market, asparagus in bunches is a much better proposition. The green material has been affected to quite an extent with other holiday greens but from now on it is but fair to expect that smilax, asparagus and adiantum should all find a little better demand. Monday was observed as the holiday and stores closed

up about noontime, both wholesale and retail.

NOTES.

The New York Florists' club will meet on Monday evening, January 9, in their rooms, Grand Opera House building, corner Twenty-third street and Eighth avenue. Installation of officers and the annual reports by Secretary John Young and Treasurer W. C. Rickards will be a part of the business proceedings. President J. B. Nugent, we understand, has a treat in store, so we shall no doubt commence the year with a rousing big meeting.

President W. A. Burpee, of the National Sweet Pea Society of America, called an executive meeting of that body which was held in the Astor house on Wednesday, January 5.

Reed & Keller, the supply men, are showing the new Model Stemmer, a device for stemming flowers, galax leaves, etc., and which is being manufactured and sent out by the Model Stemmer Co., Inc., Madison, N. J. This article should prove a time-saver in stemming and its small cost will recommend it to the retail trade.

During the holiday rush the Cut Flower exchange has been open for business at five o'clock in the morning. Suburban buyers find that arrangement a very convenient one, enabling them to do their marketing and be back home again in time for the day's regular business.

H. Chadwick of Vaughan's Seed store staff is back from London, Canada, where he attended the funeral of his father, Sidney Chadwick, aged 65 years. Besides the mother, there are six girls and two boys left to mourn his loss. The other brother is a resident of Calgary, Alberta.

John Young, Bedford Hills, N. Y.; Thos. Bell, Fairfield, Conn.; Mr. Sykes, of the Chicago office of the Lord & Burnham Co., and D. O'Connor, of the Philadelphia office of the same firm, were among the visitors in town recently.

Phil. Kessler, wholesale florist, 55 West Twenty-sixth street, left January 5 for a ten days' trip to Bermuda. During his absence M. Vlasverd has charge of the salesroom.

Cut flowers and ribbon bedecked baskets were more of a feature in the retail florist show windows for New Years than for Christmas, some evidence that plants had cleared out quite well.

P. J. Smith, wholesale florist, 49 West Twenty-eighth street, is sufficiently recovered from his slight illness to be at his office again.

Word comes from John I. Raynor that he is having a good time among the flowers in Pasadena, California.

At the alleys on December 30, the prize offered for the highest score, a bottle of champagne, was won by J. A. Manda with 201. The three highest scores of individuals were as under:

A. Manda.....	147	168	201
R. T. Irwin.....	164	170	172

J. B. Nugent.....	103	128	126
Wheeler.....	123	138	147

Washington.

FAIR BUSINESS.

The New Year's business was fair but not extraordinary. As to weather, New Year's day was about as disagreeable as it could be, beginning with sleet and ending in a pouring rain. January 2 was no great improvement, being very dark and gloomy, with a heavy mist. The principal business was in decorations for receptions and luncheons and in boxes of cut flowers, though a few plants were sold. All stock was plentiful.

NOTES.

On December 29, 1910, Adolphus Gude was elected a potentate of Alma's Temple of the Mystic Shrine. He also was elected a representative to the Imperial Council, which meets at Rochester, N. Y., in July.

Several of the local dealers, notably F. H. Kramer, A. Gude & Bro., J. H. Small & Son, Blackstone & Shaffer, have recently been good advertisers in the daily papers and judging by their business they get returns.

A feature of the holiday trade has been the fine display of plants and cut flowers by J. R. Freeman. He has long been known as an expert plant grower and always shows exceptionally good features.

The news of the death of Fred Dornier, Sr., at his home, Lafayette, Ind., December 29, caused much regret among local florists, to a number of whom he was well and favorably known.

J. H. Small & Sons arranged a number of very artistic decorations for New Year's. Noteworthy were several in which fine displays were made with Lilium rubrum and L. auratum.

J. Louis Loose, head of the Washington Florists' Co., is well pleased with holiday trade.

Geo. C. Shaffer has been quite busy with funeral work in addition to his holiday business.

John Robertson has been very busy throughout the holidays, being strong on plants.

Z. D. Blackstone is busy and showing fine features in plants and cut flowers.

W. W. Kimmel reports good holiday trade and much funeral work.

Geo. H. Cooke is handling fine blooms of John Cook's pink rose, Radiance.

Brampton, Ont.

The weather conditions here were perfect for Christmas shipping, and the volume of trade exceeded the turnover of all previous years. With the exception of Beauties, red roses and all kinds of carnations, the Dale Estate greenhouses were practically cleared of all available stocks. Orchids were more in demand than ever this year, and only a few Laelia anceps remained out of the thousands of blooms of all varieties listed for the holiday week. Orders coming from as far away as Carolina and British Columbia had to be refused for this increasingly popular flower. The business done in florists' supplies was at its highest during December, and to show how this branch of the establishment has developed it need only be mentioned that despite the fact that double the quantity of immortelles were disposed of this Christmas than were sold during Christmas, 1909, yet another large shipment had to be cabled for from France to complete holiday requirements. From all reports the express companies excelled themselves at Christmas, and florists generally seem to be congratulating themselves on the best business they ever handled.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

THERE will be a hearing on the new seed bill at Washington, D. C., January 17.

RENEW subscriptions promptly so that no copies of the papers may be missed.

NEW YORK.—A. T. Boddington shipped a carload of tuberoses to Europe December 29.

VISITED CHICAGO:—J. S. Michael, of the Sioux City Seed & Nursery Co., Sioux City, Ia.; John C. Bodger, Los Angeles, Calif.

A MEETING of the executive committee of the American Seed Trade Association will be held at the Hotel Ponchartrain, Detroit, Mich., January 11.

CHICAGO.—Prices on the board of trade January 4 for grass seed were noted as follows: Timothy, \$9 to \$10 per 100 pounds. White clover, from \$22 to \$30.

SEEDSMEN should write their congressman at once demanding a square deal in the new seed bill (H. R. 29163) now pending. The text of the bill will be found on page 1219 of this issue.

JOHN C. BODGER, of the John Bodger & Sons Co., Los Angeles, Calif., is taking orders for the Hogue-Kellogg Co.'s beans this year in addition to his usual line. Mr. Bodger left Chicago for the East January 3.

W. ATLEE Burpee & Co. are sending their friends a very attractive paper-weight in the form of a mirror, "Seeds That Grow" being exploited on the back by means of a very good looking pansy in colors.

McHUTCHISON & Co., New York, advise up that they recently received 1,033 cases of lily of the valley pips in one day and believe this to be the record for one day's receipts. It is claimed the crop is short this year and that next season's product will be still smaller with a higher range of prices. American growers, it is stated, secure the best grade of German pips, the medium grades going to Russia and other European countries, while German growers use the inferior grades.

Advance Sale of Dutch Bulbs.

One of the representatives of a prominent Holland house says that American buyers are mainly responsible for the gradual extension of the time of placing American orders for Dutch bulbs. Formerly it was the custom to withhold the orders until the flowering quality of previous shipments was known. Now the orders are placed irrespective of this information to such a degree that the selling season, through the competition of many Dutch travelers, each striving to be ahead of the other, now extends over the greater part of the year.

That New Seed Bill.

On December 13 there was introduced into the House of Representatives a bill, now known as H. R. 29163, and the same was referred to the Committee on Interstate and Foreign Commerce and ordered to be printed. Every seedsman should protest against this iniquitous proposed act, which puts every seedsman under a prison penalty law and is intended to put the seed business at once and forever into the disreputable class, carrying as it does the assumption that this industry is so conducted that an unreasonable number of those engaged in it are dishonest.

This bill can be fought and should be fought on the broad, fundamental ground that Congress has no right to put such a ban on any reputable industry until it is shown by open and unbiased hearings in various sections and by census and custom house records that there does exist in this trade dishonest practices beyond the usual average run of human misdoings. The best men in the trade claim that the average of commercial honesty in the seed trade excels that of most others and does so of necessity because misdeeds in seed sales are known in a few weeks and no merchant could succeed for even two seasons who knowingly sold bad seeds.

Seedsman who value their reputation and the reputation of their industry, down to the future generations, should get busy now and demand, before such a disgraceful law is put upon them, that just and ample proof is furnished of this dishonesty assumed by the proposed bill, before they allow themselves to be put into the class with patent medicines, pettifogging lawyers and get-rich-quick concerns. The text of the bill is printed on page 1219 of this issue—read it. Write your congressman, or go and see him, or both. Do it now.

California Conditions.

During my 18 years' experience in the seed growing business in this state the present season is the very worst I have ever had in getting the land in condition for seed. The rain gauge at Gilroy shows a total of .55 of an inch of rain for last fall and up to today this winter. This amount came in several sprinkles and was evaporated the next day by the north winds, so that there is no moisture in the ground, which is as hard and dry as it was last summer.

We have succeeded in plowing our ranches with the aid of extra horses and steam traction engines and we are now working it down into condition by using heavy rollers, disc harrows and weighted clod mashers. It is necessary to go over the land five and six times with these implements pulled by four, six and eight-horse teams before we can do any sowing and then the land is not in the best possible condition. The cost of seeding the land is three or four times as much as in an ordinary season when we have occasional rains. And what is worse, the seed is in the dry ground and it is questionable if it will germinate even if we get rains in the near future. So far we have not had one indication of a good general storm. A good rain in California, especially the Santa Clara valley, is always preceded by several days of south wind, but this fall and winter we have not had any south wind and the rain we had was all licked up by the north or dry winds.

Onion bulbs are all in dry land and have not started any growth. We have several hundred acres seeded to radish and sweet peas but I doubt if there is a seed sprouted in this whole lot. It is simply out of the question to sow such small seed as lettuce as this must have an extra fine seed bed. Usually at this time of the year we are looking over our books to see if anything has been neglected, seeding is about done and we are watching to see that we have a stand and making all preparations for our spring work; but this season we might say that we have not yet begun and we have practically all our work still to do. Taken as a whole, it looks as if we can only expect a small average crop and only this much in case the season is normal from this time on. Too much time has already passed for us to expect a full crop.

AMERICAN FLORIST CO., CHICAGO.

Shakespeare is said to have possessed a brain-vocabulary of about 15,000 words; Webster about 8000; while the average man has perhaps 1000. Now the English language is simple as compared with the Japanese. The modern printer in Japan must make a selection from about 8000 characters to "set-up" even an ordinary story. These characters stand for words and sometimes whole sentences. Just think it over before you begin to study that interesting language. The Japanese children now study English in many schools in Japan, and in the course of time it will not be so difficult to get together. Perhaps then we can go into the bulb fields and talk English to the growers. It can't be done now, however, and it takes a well educated Japanese to be a successful bulb merchant.

Mr. Arai is one of the ablest men in the business; a man conversant with all the ins and outs; the people; their products; and the value of a lily bulb, from A to Z. He is personally in the fields much of the time and among the growers all of the time. **Horseshoe Brand** lily bulbs are marketed under his personal supervision, and they are the choicest from the Orient. The prices are reasonable. Write us.

St. Louis.

With good weather the supply of flowers increased after Christmas. Everything being plentiful except carnations. The prominent cafes, restaurants and hotels gave New Year's eve parties, and several florists furnished decorations. Next week will be opera week, which will cause a demand for flowers. Sweet peas are somewhat plentiful, especially the colored varieties.

NOTES.

John Nyflot, whose greenhouse and residence are opposite the main entrance at Calvary cemetery, did an immense trade in spruce at Christmas.

Fred Amman is cutting heavily in American Beauty roses. The cut of short lengths Friday was over a thousand.

Ostertag Bros., Riessen Floral Co., and the Paris Floral Co., had large decorations for New Year's eve parties.

Otto Sanders windows with electric accessories are a very pretty and attractive sight.

John F. Wilcox, of Council Bluffs, Ia., has started to ship roses again to this market.

The Oakland Floral Co. is sending in some extra fine carnations to this market.

C. Young & Sons Co., will have the decorations at the coming annual Imperial ball.

F. H. Weber had a splendid trade Christmas and New Years. He always keeps the latest novelties. W. F.

Another Seed Bill Proposed.

A Bill to regulate commerce among the States and with foreign nations, and to prevent the transportation of adulterated and Misbranded Seed and Bulbs, and for other purposes. By Mr. Mann, December 13, 1910.—Referred to Committee on Interstate and Foreign Commerce and ordered to be printed. 61st Congress, 3rd Session, H. R. 29163.

PAGE 1.

A bill to regulate commerce among the States and with foreign nations, and to prevent the transportation of adulterated and misbranded seed and bulbs, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That the introduction into any State, Territory, or District
4 of the United States from any other State, Territory, or Dis-
5 trict, or from any foreign country, or the shipment to any
6 foreign country of any seed or bulbs adulterated or mis-
7 branded, within the meaning of this Act, is hereby pro-
8 hibited; and any person who shall knowingly ship or deliver
9 for shipment from any State, Territory, or District of the United
10 States to any other State, Territory, or District of the United
11 States, or to a foreign country, or who shall receive in any State,
12 Territory, or District from any other State, Territory, District,
13 or foreign country, and having so received shall knowingly

PAGE 2.

1 deliver or offer to deliver in original unbroken packages, for
2 pay or otherwise, to any other person any seed or bulbs adul-
3 terated or misbranded, within the meaning of this Act, shall
4 be guilty of a misdemeanor, and for such offense be fined not
5 exceeding two hundred dollars for the first offense and for
6 each subsequent offense be fined not exceeding five hundred
7 dollars or be imprisoned not exceeding one year, or both, in
8 the discretion of the court: **Provided, however,** That this Act
9 shall not apply to seed or bulbs to be used solely for propaga-
10 tion or testing and not for sale or distribution: **And provided**
11 further, That nothing in this Act shall be held to prohibit
12 the transporting, handling, and storing of seeds and bulbs
13 for the purpose of being cleaned, mixed, graded, or labeled
14 before being offered for sale for seeding purposes.

15 SEC. 2. That the Secretary of Agriculture shall make
16 uniform rules and regulations for carrying out the provisions
17 of this Act, and, for the same purpose, may from time to
18 time publish standards for different kinds and varieties of
19 seed and bulbs and for different grades of the same kind or
20 variety of seed or bulbs.

21 SEC. 3. That the term "seed," as used in this Act, shall
22 include vegetable, flower, cereal, grass, clover, forage plant,
23 and other agricultural and horticultural seeds intended for
24 seeding purposes.

PAGE 3.

1 SEC. 4. That for the purposes of this Act seeds and
2 bulbs shall be deemed to be adulterated—

3 First. If seed purporting to be orchard-grass seed con-
4 tain more than three per centum of seed of rye grass or meadow
5 fescue; if seed purporting to be Kentucky blue-grass seed con-
6 tain more than three per centum of seed of Canada blue-grass;
7 if seed purporting to be red-clover seed contain more than
8 three per centum of seed of yellow trefoil; if seed purporting
9 to be alfalfa seed contain more than three per centum of seed
10 of yellow trefoil, burr clover, and sweet clover, singly or
11 combined; or if any seed or bulbs purporting to be of one
12 kind or variety contain more than five per centum of another
13 kind or variety: **Provided,** That no seed or bulbs shall be
14 deemed to be adulterated, within the meaning of this para-
15 graph, when accompanied by a statement or label in the form
16 and manner prescribed by the rules and regulations in this
17 Act provided for giving the names and amounts or proportions
18 of the kinds or varieties of seed or bulbs contained therein.

19 Second. If seed of any kind or variety of clover, alfalfa,
20 or flax contain more than one seed of dodder to three thousand
21 seeds of clover, alfalfa, or flax, respectively; or, if any seed
22 contain weed seed to an extent which renders it unfit for
23 seeding purposes.

24 Third. If any seed or bulbs contain, respectively, dead
25 seeds or dead bulbs or other matter in sufficient quantities to

PAGE 4.

1 materially reduce the value for seeding or planting purposes:

2 **Provided,** That no seed or bulbs shall be deemed to be adul-
3 terated, within the meaning of this paragraph, when accom-
4 panied by a statement or label in the form and manner pre-
5 scribed by the rules and regulations in this Act provided for
6 giving the amounts or proportions of live seed or bulbs and
7 other matter contained therein.

8 Fourth. If there shall be knowingly added to seed any
9 weed seed or dead seed, or any other matter materially re-
10 ducing its value for seeding purposes: **Provided,** That it shall
11 not be construed as a violation of this paragraph to blend
12 different lots of seed of the same kind or variety which are
13 not themselves adulterated, within the provisions of this Act,
14 or to mix different kinds or varieties of seed when named and
15 labeled so as to plainly show the same to be a mixture.

16 SEC. 5. That, for the purposes of this Act, seed and
17 bulbs shall be deemed to be misbranded—

18 First. When one kind or distinguishable named variety
19 of seed or bulb shall be offered for sale under the name of
20 another kind or distinguishable named variety of seed or bulb.

21 Second. If in package form and the quantity of the
22 contents is stated, they are not plainly and correctly stated in
23 terms of weight, measure, or count, or if the package shall
24 not plainly show the year in which the seed or bulbs were
25 packaged.

PAGE 5.

1 Third. If the seed or bulbs be falsely labeled or branded
2 as to the State, Territory, locality, or country in which raised
3 or produced.

4 Fourth. If the package containing it or its label shall
5 bear any statement, design, or device concerning the seed or
6 bulbs contained therein, which statement, design, or device,
7 shall be false or misleading in any material particular, or if
8 the contents of the package as originally put up shall have
9 been removed in whole or in part and other contents shall
10 have been placed in such package.

11 SEC. 6. That whenever the Secretary of Agriculture
12 shall have made public, in accordance with the provisions
13 of this Act, any standards of seed and bulbs it shall be law-
14 ful for seed and bulbs complying in all respects with the
15 standards so published by the Secretary of Agriculture to
16 bear upon the label, together with the name of the article,

17 the inscription "United States Standard;" and any person
18 who shall use such inscription or words of similar import
19 in any way as descriptive of any seed or bulb, subject to the
20 provisions of this Act, which does not comply with the
21 standards so published by the Secretary of Agriculture, shall
22 be guilty of a misdemeanor, and for each offense be fined not
23 exceeding one thousand dollars.

24 SEC. 7. That no dealer shall be prosecuted under the
25 provisions of this Act when he can establish a guaranty,

PAGE 6.

1 signed by the wholesaler, jobber, producer, or other party
2 residing in the United States from whom he purchased such
3 articles, to the effect that the same are not adulterated or
4 misbranded within the meaning of this Act, designating it.
5 Said guaranty to afford such protection shall contain the
6 name and address of the party or parties making the sale
7 of such articles to such dealer, and in such case said party
8 or parties shall be amenable to the prosecutions, fines, and
9 other penalties which would otherwise attach, in due course,
10 to the dealer under the provisions of this Act; but it shall
11 not be lawful to place on any package or container of seed
12 or bulbs any label showing that the same are guaranteed
13 under this Act unless such label further shows that the
14 guaranty is by the producer or wholesale or other dealer,
15 nor unless such label further complies with the rules and
16 regulations to be made by the Secretary of Agriculture, as
17 herein provided for.

18 SEC. 8. That if any seed or bulbs that are adulterated
19 or misbranded within the meaning of this Act and are being
20 transported from one State, Territory, or District to another
21 for sale, or, having been transported, remain unloaded, un-
22 sold, or in original unbroken packages, or if the same be
23 sold or offered for sale in any Territory or District, or are im-
24 ported from a foreign country for sale, or are intended for
25 export to a foreign country, shall be liable to be proceeded

PAGE 7.

1 against in any district court of the United States within
2 the district where the same are found, and seized for con-
3 fiscation by a process of libel for condemnation. And if any
4 such seed or bulbs are condemned as being adulterated or mis-
5 branded, within the meaning of this Act, the same shall be
6 disposed of by destruction or sale, as the court may direct, and
7 the proceeds thereof, if sold, less the legal costs and
8 charges, shall be paid into the Treasury of the United
9 States: **Provided, however,** That upon the payment of the
10 cost of such libel proceedings and the execution and de-
11 livery of a good and sufficient bond to the effect that such
12 seed or bulbs shall not be sold or otherwise disposed of
13 contrary to the provisions of this Act, or the laws of any
14 State, Territory, or District, the court may by order direct
15 that such seeds or bulbs be delivered to the owner thereof.
16 The proceedings of such libel cases shall conform, as nearly
17 as may be, to the proceedings in admiralty, except that either
18 party may demand trial by jury of any issue of fact joined in
19 any such case, and all such proceedings shall be at the suit
20 of and in the name of the United States.

21 SEC. 9. That the Secretary of the Treasury shall deliver
22 to the Secretary of Agriculture, upon his request, from time
23 to time samples of seed and bulbs being imported into the
24 United States or offered for import, giving notice thereof to
25 the owner or consignee, who may appear before the Secre-

PAGE 8.

1 tary of Agriculture and have the right to introduce testi-
2 mony, and if it appear from the examination of such samples
3 that any seed or bulbs offered to be imported into the United
4 States are adulterated or misbranded within the meaning
5 of this Act, or are otherwise falsely labeled in any respect,
6 or are of a quality forbidden entry into or forbidden to be sold
7 or restricted in sale in the country from which exported, or are
8 intended for adulteration purposes, or contain dead seed or
9 dead bulbs, or other matter in sufficient quantity to materially
10 reduce the value for seeding or planting purposes, the said
11 seed or bulbs shall be refused admission under such regulations
12 as the Secretary of the Treasury may prescribe: **Provided,**
13 That the Secretary of the Treasury may deliver to the con-
14 signee such seeds or bulbs, pending examination and decision
15 in the matter, on execution of a penal bond for the amount
16 of the full invoice value of such seed or bulbs, together with
17 the duty thereon, and on refusal to return such seed or bulbs
18 for any cause to the custody of the Secretary of the Treasury
19 when demanded, for the purpose of exclusion from the
20 country, or for any other purpose, said consignee shall forfeit
21 the full amount of the bond: **Provided further,** That such
22 seed or bulbs may be reclaimed in accordance with such
23 rules and regulations as may be prescribed by the Secretary
24 of Agriculture, and when so reclaimed as to comply with the
25 provisions of this Act, the seed shall be released to the con-

PAGE 9.

1 signee or owner, but the screenings removed from such seed
2 or bulbs shall be disposed of in the manner prescribed by the
3 Secretary of Agriculture.

4 SEC. 10. That the term "Territory" as used in this Act
5 shall include the insular possessions of the United States.
6 The word "person" as used in this Act shall be construed to
7 import both the plural and the singular, as the case demands,
8 and shall include corporations, companies, societies, and asso-
9 ciations. When construing and enforcing the provisions of
10 this Act, the act, omission, or failure of any officer, agent, or
11 other person acting for or employed by any corporation,
12 company, society, or association within the scope of his
13 employment or office shall in every case be also deemed to
14 be the act, omission, or failure of such corporation, company,
15 society, or association as well as that of the person.

16 SEC. 11. That this Act shall be known, described, and
17 designated as the Pure Seed Act of 1911.

18 SEC. 12. That this Act shall take effect and be in force
19 from and after its passage, except that no penalty of fine,
20 imprisonment, or confiscation shall be enforced for any viola-
21 tion of its provisions occurring prior to the expiration of
22 eighteen months after its passage.

Market Gardeners

Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;
H. F. Hall, Grand Rapids, Mich., Vice-President;
S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Rutenik, Cleveland, O., Treasurer.
Annual meeting at Boston, Mass., 1911.

Prices of Indoor Fruits and Vegetables.

New York, December 31, 1910.—Mushrooms, 50 cents per pound; cucumbers, 20 cents each; lettuce, \$1.50 per dozen heads; tomatoes, 50 cents per pound; radishes, 60 cents per dozen bunches; asparagus, \$7.50 per dozen bunches; grapes, \$1.00 per pound.

Truck Crops.

ED. AMERICAN FLORIST.

I have 25 acres of land, 14 miles from the city, which is part of an old lake bed and exceptionally rich which I intend to truck farm. Can you inform me what to plant to raise the most crops in one year? What crops will pay the best at this distance from the market?

G. S. B.

Very much depends in truck farming on the suitability of the soil for varied crops such as bring good prices for high cultivation. If the location be as described, an old lake bed, care should be taken first to have samples analyzed by competent authorities such as the men in charge at the State Agricultural Colleges. They are able and willing to tell not only the condition physically, or the soil, but will say what is lacking for special crops so that the same may be added without waste of costly materials in the way of fertilizing agents that either are not essential, or even harmful if applied. It is probable that the soil named will prove to be acid, or sour as it is often called, bottom land often is in this condition before being rectified with lime or some other agent. This should be ascertained at the start, also if the soil is naturally well drained, for if not, and a wet season ensues, crops will fail, and it will be very difficult to till the land.

G. S. B., if within easy reach of a large city, can easily sell anything that is well grown and taken fresh to market. It is well to begin with the easier of those crops such as sweet corn of some reliable early variety, early potatoes and peas. These are always in good demand, and the last two named may be followed with celery, this to be planted between alternate rows, and will not interfere with the harvesting of the other crops. Cauliflower should also do well on rich bottom land, but this must first be tested before growing in quantity; these do best late in summer when the cooler nights come. Good head lettuce can also be grown and will sell well at all times; lettuce requires very rich soil, and the same applies to onions which may be tried with every expectation of success. Beans, both the string and Lima varieties, are sure to do well, but only the bush kinds should be tried, the pole varieties cost too much to raise. Tomatoes are always sure of a market either ripe or green, as for pickling; in fact, if you have the right kind of soil, it is possible by intelligent fer-

tillization to raise any crop. First be sure, however, as to your soil, and then go ahead. Many a rich looking piece of land has proved unfitted mechanically for the purpose, but since the days of our Experiment Stations we can find out for a trifling cost just what we need to know before putting a lot of money and energy out at random.

E. O. O.

Baltimore.

UNPROFITOUS WEATHER.

The weather preceding Christmas was anything but propitious for the florists. Snows and sleet, cold rains and colder winds interfered with traffic, made deliveries of plants and flowers critically dangerous and almost broke up the commerce of the street vendors. These conditions continued until Christmas eve, which was more propitious and pleasant. On all sides, except from the market men, were heard satisfactory reports of the business done. Those who had out-door stands could not expose plants to the keen air. The business in immortelles was enormous, and visits to the cemeteries seemed to indicate that there is a growing, rather than a diminishing use of these artificial and unnatural decorations, the covering of snow which remained on the ground not deterring thousands from placing wreaths and crosses on the graves. The general trade of the stores was satisfactory, and plants, made-up arrangements and cut flowers were equally in demand. Roses, perhaps, least of all. For those of light colors, there was practically no inquiry, but red ones were short in offerings and went off at a lively gait. Carnations were not over abundant, though many more came in than were excepted, including, of course, the ever abundant contribution at the season of the sleepy and split-calyx tribes. Nearly all of these were finally worked off, being absorbed by funeral demands, but of roses many remained on the shelves. Violets were none too plentiful, narcissus was ample and there was green enough to go around, lilies were enough to meet calls and gardenias were comparatively scarce. Poinsettias were the favorites of the year, and a great number was sold in all shapes of baskets, pans, cut flowers, etc. The stores made more liberal decorations than usual, it would seem, of their windows, all being attractive and most of them tasteful and the concurring sentiment is that the season's trade exceeds in value that of average years, some of the Charles street people reporting, indeed, good advances over the figures of preceding seasons.

NOTES.

C. J. Fox's new greenhouse and office on Dolphin street is completed and occupied, and is neat and handsome, probably the most tasteful structures devoted to their purposes of any in the city.

The Florists' Exchange reached about its usual average, its supplies being moderately abundant, its help experienced, and its methods well-systematized.

S. B.

BLACK HALL, CONN.—T. L. Brown and J. F. Howard have leased the Black Hall greenhouse. Elmer Steele, the former manager has accepted a position with the Andrews Estate greenhouse at Elmwood, Conn.

Pittsburg.

QUIET MARKET.

Until Friday the market was very quiet, as it usually is after a holiday. Stock piled up a little on the wholesalers but by Saturday evening they were pretty well cleaned up. New Year's day helped a little. Pink roses was the only scarce thing on the market. Saturday noon they could not be had at any price. Bulb stock is moving very slow. Auratum and rubrum lilies find practically no sale at all. Greens of all kinds are very plentiful.

NOTES.

The regular monthly meeting of the Pittsburg Florists' and Gardeners' club will be held Tuesday, January 3, at 8 p. m., at the Fort Pitt. Subject, every one is requested to bring a plant flower or something connected with the florist business and be prepared to talk thereon.

Karl Klinke announces he has severed his connection with the McCallum Co., Inc., and has resigned his office as secretary thereof.

Chas. Cramer, Uniontown, had a banquet Christmas week, using one thousand red carnations on table decorations.

De Forest Ludwig is home from Cornell and is spending the holidays with his parents on the North Side.

Walter Camey, of F. B. Murdock Co., won second prize—player piano—in the Dispatch contest.

G. and J. W. Ludwig, North Side, have been very busy with funeral work.

F. H. Westhoff, Westhoffman, is handing out the smokes. Baby girl this time.

A. W. Smith Co. report their Christmas and New Year's trade as best ever.

South View Floral Co. cut some very fine poinsettias for the Christmas trade.

Geo. Pegaris, McKeesport, is seriously ill with typhoid fever.

Visitors: Jos. Thomas, Greensburg; Dingee, Truin; Geo. F. Huscroft, Steubenville, Ohio.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June 14-16, 1911.

NASHVILLE, TENN.—At a meeting of the nurserymen from several southern states held in this city the Southern Nurserymen's Protective Association was formed. J. C. Miller, of Rome, Ga., was elected president, and A. I. Smith of Knoxville, secretary.

Nurserymen Lose Suit.

An action was heard before the recorder at the Courthouse, Green street, November 30, at the suit of Messrs. Milne, trading as Dickson & Sons, Edinburgh, against Wm. H. F. Verschoyle, Stephen's Green, to recover the sum of £8 3s. 3d., balance of an account of £28 3s. 3d. for goods consisting of young trees, purchased in March, 1909.

The defense was that a large percentage of the trees failed, and that these, together with the cost of labor in planting the percentage that failed, amounted to over £8. The trees were planted in the County Kildare. The plaintiffs contended that the trees were delivered in proper condition, and that once the defendant accepted and planted them the responsibility of Messrs. Milne ceased.

Mr. Verschoyle and his steward were examined, and gave evidence that out of one lot of 11,000 young firs, nearly 30 per cent died and the former said it was reasonable to expect a death rate of about 10 per cent.

The recorder dismissed the plaintiff's claim. He said the trees were planted in Kildare, and a certain percentage of them over and above what was reasonable failed, and it was quite plain Mr. Verschoyle was entitled to recover the cost of this large percentage of failures. He was also entitled to recover the cost of labor in planting those trees. Mr. Verschoyle sent a check for £20 to Messrs. Milne without prejudice. If they were not satisfied they should have returned the check, but they did not do so. They kept the check and sued for the balance. He thought the action should never have been brought.

Mr. Fullerton (Hamilton & Craig) appeared for the plaintiffs. Gordon Bradley (Bradley & Sons) appeared for the defendant.—Dublin Evening Mail.

If the above report is correct the decision appears to us absolutely preposterous and if sustained would render the position of a nurseryman intolerable. It will be observed that nothing is said as to any complaint with regard to the trees supplied, but simply that the nurseryman was held accountable for the result. Only a fortnight ago we saw a quantity of larch lying out on a bleak hillside without a particle of covering in a bitter wind and no one about. How long they lay there we do not know, but in any case the nurseryman who supplied them would probably be blamed for their failure, and if the above case were taken as a precedent, would be mulcted in damages for the culpable carelessness of his customer. We certainly think that measures should be taken to contest such an unjust verdict.—Horticultural Advertiser, December 7.

Christmas Tree Tax.

The announcement comes from Montpelier, the capital of Vermont, that the legislature of the Green Mountain State is expected to enact a remarkable statute for the purpose of conserving its forests. This measure, we are told, "places a tax of 25 cents

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Send for description and price.

on every Christmas tree shipped out of the state. Should this bill pass the Vermont Christmas tree will disappear from the markets of Boston and New York." The statement is also made that the legislature of Vermont has already placed a tax of five cents on Christmas trees.

There is a provision of the constitution of the United States which seems to be somewhat antagonistic to this project of future legislation, and we may add that if there is any existing law in Vermont which assumes to impose an export duty on Christmas trees that also is probably unconstitutional.

Subdivision 2 of section 10, article 1, of the federal constitution provides that no state shall without the consent of Congress "lay any imposts or duties on imports or exports except what may be absolutely necessary for executing its inspection laws," and that all such laws shall be subject to the revision and control of Congress. The proposed tax on Christmas trees "shipped out of the state" would seem to be included within the term "duties on exports" as thus used in the constitution of the United States. That phrase not only refers to exports to foreign lands but to articles exported from one state to another. Thus Justin Story in his classic treatise on the constitution commends this provision which we have quoted, because it prevents petty warfare of regulation and regulates and restrains the states from exercising the power of taxation injuriously to each other and in such manner as to rouse resentments and create dissensions to the ruin of harmony and amity. It is quite possible that the legislature of Vermont pos-

A Grand New Carnation

Bright Spot

Outclasses everything heretofore grown in the dark pink class. Won first honors in the 100 class for best dark pink at the A. C. S. meeting, Pittsburgh, January, 1910, also at the Chicago Flower show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Roses for 1911

Dark Pink Killarney.

A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. When Killarney is pale, Dark Pink Killarney is bright and cheerful.

Grafted plants only, from 2 1/4 inch pots.
\$20.00 per 100; \$180.00 per 1000.

Lady Cromwell.

A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer and a color that sells.

Grafted plants only, from 2 1/4 inch pots.
\$30.00 per 100; \$250.00 per 1000.

Radiance.

Strong in growth and making plenty of stem. Cerise pink in color.

Grafted plants, \$18.00 per 100; \$150.00 per 1000
Own root, 10.00 per 100; 90.00 per 1000

Double Pink Killarney.

Originating with Robert Scott & Sons, who supply us the wood for grafting. Stronger in growth than Killarney and with at least ten more petals. A wonderful improvement.

Grafted stock only.
\$30.00 per 100; 250.00 per 1000.

Mrs. Aaron Ward.

By far the most pleasing of the yellow roses now on the market. A general favorite and one which will be widely grown, for yellow roses are in demand.

Grafted plants, \$25.00 per 100; \$200.00 per 1000
Own root, 12.00 per 100; 100.00 per 1000

Melody.

We have reserved for our orders own root plants of this choice novelty. No grafted plants.
From 2 1/4 inch pots.

\$30.00 per 100; \$250.00 per 1000.

Prince de Bulgarie

The best prices for cut flowers should be the standard for judging roses, and this rose has been the money getter. Strong and vigorous in growth, and with its beautiful shell pink bloom it has sold on sight. One of the best roses grown.

Grafted plants, \$20.00 per 100; \$180.00 per 1000
Own root, 15.00 per 100; 120.00 per 1000

Killarney, White Killarney, Richmond, My Maryland, Kaiserin Augusta Victoria.

These are the old standards, and we are headquarters for young stock.

We Can Still Supply

IN FIRST-CLASS CONDITION:

Araucarias

OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the *Araucaria Excelsa*, *Robusta Compacta* and *Glaucia*. 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5 1/2-6-7 in. pots, 15-18 20-25-30 in. high, 3-4 5-6 tiers, 2-3-4-5 years old, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant 6-in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6-in. pot, 5 year old, 25 in. and over, as wide as a bushel basket, 5-6 tiers for only \$1.00; and what do you think a holy terror 30 in. and over, 5-6-7 tiers, worth \$7.00, for only \$1.25 to \$1.50.

Robusta Compacta, *Excelsa Glaucia*, 6 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each.

We also have the nicest *Araucaria Robusta Compacta* and *Excelsa Glaucia*, a house full, for only \$1.25 to \$1.50, worth double.

Primula Chinensis, mostly white, 5 1/4 in., \$2.50 per doz

Asparagus Sprengeri, 2 1/2 in., 3c; 4 in., 10c.

Jerusalem Cherries, or *Solanum* 6 in. pots, 25c, 35c, 50c.; full of ripe berries.

Kentia Forsteriana, in fine shape, 6-in. pots, 30-35 40-45 in. high, 4-5-6 years old, 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

Kentia Belmoreana, 30-35-40 in. high, 5-5 1/2-6-7 in. pots, 5-6-7 years old, \$1.00, \$1.25, \$1.50 to \$2.00 each.

Kentia Belmoreana, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00; 4-in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine *Boston*, *Scottii*, *Whitmani* and *Scholzii*, 5 1/2 and 6 in., 35c, 40 and 50c; 7 in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

Neph. Glatrasii, a new beautiful fern, an improvement on *Scottii*, much shorter and bushier than *Scottii* 5 1/4 in. pots, 50c; 3 in. pots, 25c.

Pteris Wilsonii, 3 large bushy plants in 6-in. pan, 30c to 35c per pan.

Ferns for Dishes, big assortment, 2 1/2 in. pots, at \$4.00 per 100.

Dracena Bruntii, 25 to 30 in. high, 6 in. pots, 40c to 50c. Highly recommended for store and house decoration—stands heat, cold and dust.

Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

Adiantum Hybridum, 6 in. pan, 25c to 30c.

Cocos Weddelliana, 3 in. pots, 15c, 18c and 20c.

Cineraria Grandiflora, Aschmann's well-known strain, 2 in. pots, \$3.00 per 100; 4 in., 10c.

Now is the time for *Cineraria Hyb.* for Easter. We have a large stock of Aschmann's well-known strain, 4 in. pots, ready for a shift into 6 in., \$10.00 per 100; 2 in., \$3.00 per 100.

Mention if ship with or without pots.

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

WHOLESALE AND RETAIL FLORISTS

You both will profit by using McCray Refrigerators. Don't cut down prices because of spoilage. Stop the spoilage. Our patented refrigerator will keep your stock fresh because of the perfect circulation of cold dry air.

McCray Refrigerators

are made not only in stock sizes but are built-to-order to suit your requirements. Write to-day for our free catalog No. 72 which will give you ideas how to add to the attractiveness of your establishment.

Cleveland.

SATISFACTORY BUSINESS.

The cut-flower business for the holidays has been entirely satisfactory. Stock was plentiful in all varieties and grades with the exception of red carnations and red roses, which were short of the demand. The stock at Christmas was perhaps of as good quality as it has ever been. Roses of all kinds were plentiful between Christmas and New Year and the quality was exceptionally fine. Carnations are not yet overplentiful and the price continues good. Paper-White narcissus and Stevia are plentiful. Valley is having a good call and New Year's day were rather scarce. Easter lilies are beginning to arrive in increasing numbers and callas are quite plentiful. Sweet Peas are in good demand, but the supply has been short. The retail florists generally report a good holiday business. A few shipments of flowering plants arriving here shortly before Christmas were frozen stiff and several growers have claims on the express companies.

NOTES.

Saturday, January 14, 1911, is the day set for the first game between the Cleveland and Alliance florists' bowling teams. All florists interested in the success of either team should kindly communicate with George W. Smith of the Cleveland Florists' Exchange, who will give any information desired. The game is to be played in Alliance, and a good sized delegation is expected to go.

Miss Getz, of the firm of Westman & Getz, deserves to be congratulated on her clever and original ideas of decorating plants for the holiday trade. For about two whole weeks before Christmas this store was a perfect bower of beauty. She says that she has never been so well pleased with the results of her labor.

National Florists' Board of Trade, 56 Pine St.
NEW YORK

Albany, N. Y.

Christmas trade in this locality fell somewhat behind a year ago, although the amount in percentage is hard to state. Some dealers profess to be satisfied with the showing and believe that revised figures and collections will show a volume about the same as 1909. Florists had no difficulty to get stock with the exception of American Beauties and carnations, which the growers reported to be scarce on account of the unfavorable weather. The demand for violets fell behind that of a year ago and the reports showed that the growers made strong efforts to sell their stock up to the last moment, a condition reversed from other holidays.

NOTES.

Josiah L. Young, who for some years conducted a seed store at 375 River street, Troy, has filed a voluntary petition in bankruptcy. His schedule shows liabilities of \$21,315, of which \$7,744 is secured. In the list are the names of over 200 creditors who live in various places. He claims assets of \$17,788. Mr. Young has a storehouse in Green Island and a greenhouse in Watervliet.

The Rosery had the contract for the decorations of the assembly chamber on Monday, January 2, when John A. Dix was formally inaugurated as governor. The scheme was red and green and the effect was produced with the aid of palms and other foliage plants, azaleas, poinsettias, ardisias and such like plants. R. D.

Toronto.

THE BEST CHRISTMAS.

Christmas business was decidedly the best in the annals of this city, and in many cases is reported being from 25 to 85 per cent better than in any previous year. Owing to the extreme high prices on cut flowers, plants had first call, azaleas at \$4.00 and \$5.00 were very popular, nicely shaped and well bloomed; Cyclamen, at \$3.00 each also had very ready sale, and pans of hyacinths and red tulips were in great demand for the Christmas tables. In cut flowers, carnations were very scarce, and were held at such very high prices that there were enough to fill orders. Violets, lilies and sweet peas all found ready sale. The merchants in the general lines of business are taking more notice of the Christmas decorations, and they are

The "Meyer Green Silkline"

is the only Green Thread that should be used by florists and growers. It is guaranteed full weight and full measure.

Also Violet Thread for tying up Violets. Price of both, \$1.25 per lb.

For sale by all first-class supply houses. If your dealer does not carry it in stock, write us direct, giving us his name.

WHAT THE USERS SAY

Kroeschell versus Cast Iron

I have one of your new 1910 model Kroeschell Boilers, and same has proven very satisfactory. We have no trouble to keep temperatures in the coldest weather. We fire once or twice during the day, and once at night, and have had the best satisfaction I have ever experienced in a boiler.

Formerly I had two cast iron boilers: one cracked and I took both of these boilers out.

My coal bill with the cast iron boilers ran from \$195 to \$207 per season during the past seven years. This year, with your boiler and soft coal, my coal bill was only \$103 dollars and I still some coal left.

Your boiler is the best and cheapest on the market, not alone for the price, but also in fuel saving. I am very glad that you are so well known in Buffalo, N. Y.. I have never heard anything but praise, in which I join heartily. Wishing you every success, I remain,

MAX BUEHLER, Forks, N. Y.

KROESCHELL BROS. CO., 452 W. Erie St., Chicago, Ill.

Cattle Manure in Bags
Shredded or Pulverized

Pure—dry—uniform and reliable!
The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

Pulverized
Sheep Manure

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

The Mastin Automatic Whitewash and Spraying Machine
Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,

and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

on-Hudson, N. Y., Secretary.

Our Supplements

Subscribers should see that they get copies of
the fine supplementary illustrations showing
high grade design and decorative work. These
fine supplements should be carefully pre-
served, as they mean much to the retail florists
in dealing with their customers, illustrating as
they do the various kinds of work that the
everyday florist is called upon to perform.

The papers in which the supplements appear
should be likewise preserved, as they contain
much valuable data with regard to these special
illustrations. Subscribers should see that they
get every issue as otherwise they may miss
some of this high grade work.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Spireas.

The plants of spireas will need all
the time from now on to Easter to get
them into bloom at a profit. They
are a cheap plant anyway and there is
but little money in them, and conse-
quently it does not pay to grow them
so that they require a house run at a
high temperature to get them in at
Easter. If they are still outdoors get
them in at once, and until the shoots
begin to grow they can be stood on the
edge of the walks. As soon as the
leaves begin to form they should be
placed on the benches. Always re-
member that they want lots of water
and should be given a good copious
supply after they start growing. And
another thing they will not stand fu-
migating with tobacco smoke. Aphids
do not bother them but they should
be grown in a house that does not need
to be fumigated.

Begonia Gloire de Lorraine.

This beautiful plant has acquired a
most prominent position among the
Christmas plants, and with the im-
proved varieties which have been in-
troduced has grown to be a necessary
feature at the holiday season. Con-
siderable difficulty is experienced by
some with this plant after being taken
from the greenhouses and placed in the
dwelling houses or stores, but in our
opinion this is more the fault with the
location and care than with the plant.
We have known cases where two
plants from the same lot would be
placed in different houses, one of which
lasted throughout the winter while the
other began to fail within three days.
Where only a few plants of this be-
gonia are grown and 200 or 300 plants
will meet the requirements of the trade,
it is perhaps as well to purchase the
stock early in May or June from the
growers who make this plant a spe-
cialty, for the early culture of the
small plants during the winter re-
quires considerable attention and in a
great many cases where small quan-
tities are attempted with other plants
results in failure. Yet if the grower
desires to try the growing of his own
stock it is now time to propagate. A
bench where the heat of the sand can

be maintained at 70° is necessary to
successfully root the leaves. Select
good, strong, well developed leaves, dis-
carding any that show spot or are be-
ginning to dry at the edges. Insert
the stem in the sand so that the base
of the leaf will stand clear above and
not upon the sand. If the leaves
are allowed to rest upon the sand
they are very apt to decay. The
cuttings should be rooted in six weeks
when they can be potted in 2½-inch
pots in a light fibrous loam and placed
in a warm position and carefully at-
tended.

Hydrangeas.

Hydrangeas at Easter are a very
valuable plant, and when that day
comes as late as it does this year these
plants are much more easily obtained
than when it comes in March as was
the case last year. Pot grown plants
should be very easily forced by the
middle of April, but they must be
pushed right along and got into the
warm houses as soon as possible. Start
the plants in a temperature of 45° un-
til the growth begins to lengthen
when they can be moved into more
heat. After the plants begin to grow
they will need copious waterings, es-
pecially when in the warmer houses. Be
very careful that they never wilt or
the foliage will be burnt and the plant
ruined. Any soft sappy growths that
are made this year will not produce
flowers and can be cut out and made
into cuttings. Stake and tie the blooms
to keep them erect and straight.

Cyclamens.

The cyclamen seed that was sown in
the fall should now be growing nicely.
Many growers plant the seed in flats
about two inches apart, and these can
be grown on in the same boxes for
some time yet, but those who sowed
their seed closer will have to trans-
plant them. The method followed for
a great many years was to pot them
in two-inch pots, but it is far easier
and a much better plant is obtained
by planting into other flats about two
inches apart. This, if done carefully,
will not disturb the young plants to
any appreciable extent, and results in

much better growth. Where the seedlings are potted in small pots they are very often neglected and become dry and a stunted plant is the consequence of this oversight. It is necessary in growing these plants, as well as any others, to keep the plants moving all the time, if fine stock is wanted and not allow them to receive any check. If the seed did not germinate well, and there is not enough to insure all the stock required or a demand for any small plants at the holiday season, there is yet time to plant seed and if grown in the best manner procure very fair stock for next season. Cyclamen seed, where it is old and hard, germinates very unevenly, and when planting late we have obtained quicker and more even results, where the seed is soaked in warm water for 36 to 40 hours and then planted. The seed can be placed in a dish or saucer, and water that is as warm as the hand can be borne in, poured on to them and the dish then placed near the heating pipes, where it will remain warm. Seed treated in this manner will germinate from one to two weeks earlier than seed planted when dry and much more uniform.

Geraniums.

The Christmas sales of plants will leave plenty of room for the care of the spring stock, and the geraniums will at once need attention. The cuttings that were propagated in late summer and early fall will by this time have made growth enough to take the top out and make another cutting, and this, if done at once, will produce a fine plant for the spring sales. The plants that are in pots should be gone over and spaced out so that there is an air space between each one which will allow the plant to take on proper form and harden up a little and get into condition to stand another crowding later if lack of space requires it. Any rooted cuttings that are in flats should be potted in small pots and placed upon the benches that they may have an opportunity to grow.

Sowing Seeds of Annuals.

ED. AMERICAN FLORIST:

Having come from the south and located near Chicago, will you kindly inform me when is the proper time to sow salvia and other annuals for spring bedding, and also the time to sow *Primula Obconica* and Chinese primroses?

SUBSCRIBER.

The majority of the annuals require the seeds to be sown from March 15 to 20. *Salvia* to get good sized plants by March 1 or earlier. *Lobelias*, *Centaurea gymnocarpa* and stocks to be in bloom by June 1st, should be sown early in February. *Primulas* can be sown in March or April, according to the size plant desired for the winter sales.

EUGENE, ORE.—R. Rae has opened a new flower store in the Risdon block.

CARLISLE, PA.—Edward A. Cuddy, of North Hanover street, has sold his greenhouse to Keefer of Plainfield, who will remove it to that place.

EVANSVILLE, IND.—The Wm. Blackman Floral Co. have leased a new store at 522 Main street, which they will occupy the first of the year. This will give them a fine location with considerable more room.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Floral Pillow.

SEE SUPPLEMENT WITH THIS ISSUE.

One of the most popular designs which the florist is called upon to arrange is the floral pillow. This design is capable of the best ability of the florist and can be made of all the seasonable flowers and at all values to meet the wishes of the customer. It is one of the oldest of all the floral designs and has been used for funeral purposes for all times within the memory of those now connected with the business. At first it was made very set, adhering closely to the shape of the frame and perfectly flat and white so to have the appearance of a pillow, but gradually more loose arrangements have taken the place of the older forms and although there are sometimes seen the close, flat arrangement with the lettered inscription across the center,

Viola Moseley Perfection.

Showing Plant as Grown in England. A Suggestion to Growers of Pansies for Spring Sales. Reproduced from the Gardeners' Magazine.

the better designers make these floral pieces of much longer stemmed flowers and more loosely and artistically arranged than formerly. The pillow is one of the best designs for bearing inscriptions but the bed upon which the letters are to be placed should be made only large enough to hold them and the rest of the frame arranged more loosely. The designs that are made up without any lettering are very beautiful and are capable of such different treatment that no two will have a like appearance; some are made with the different flowers mixed throughout the arrangement; others with each flower massed together and arranged to blend or contrast with some other flower beside it, and still others are made entirely of one flower. The frame should not be too closely adhered to, letting the flowers fall gracefully away from the bottom and sides. The flowers at the bottom should be so arranged that the wire easel upon which the design stands is concealed. To be arranged in the most artistic manner, the flowers should never be placed so that they touch each other, but mixed with longer stems and arranged so that each flower shows for itself, some standing above the others. The supplement issued with this number is an illustration of how beautiful and elaborate this design can be made. It is composed of cattleyas and lily of the valley, with a generous quantity of adiantum to finish it. The orchids are wired long so that they stand out

clearly above the background and the lily of the valley and ferns lighten up the beautiful arrangement.

Bargain Sales.

We have read the very able article on Bargain Sales by Carl Stumm published in THE AMERICAN FLORIST, page 922, in the issue of December 3, and would say upon this important question as follows:

It is our conviction that the trouble of the grower, his agent the wholesaler, or the retailer, whether he be store-keeper or streetman, emanates in this connection from conditions arising from the disregard of the law of supply and demand.

For the sake of simplifying the argument let us class the wholesaler and the grower as one, the former being merely the agent of the latter. Now let us place in the retail class, store florists large and small, department store florists and street florists. All these retailers are doing business in a legitimate manner according to the demands of the consumer. It is the people who demand the little street retailer and maintain him. All these retailers are the real middle men between the producer and the consumer. The consumer, through the middle men or various retailers, dictates to the producer or grower when, where and how he will buy flowers, and the grower must, because flowers are not an absolute necessity, conform to the wishes of the customer or not sell to him. The grower has the alternative of not growing flowers except for the select few, in which case he can preside in his own little world in an autocratic manner, but he has not done this.

Let us not blame "Bargains" or the so-called "Greeks" and the other little fellows else we kick against our own kind. Let us see what the grower has done. The cry of the American grower has been "more greenhouses," and he has gone on growing flowers until he has made them popular. He has grown so many flowers and so cheaply that bargains are possible. More people buy flowers now than ever before. Even into the homes of poverty their cheer is sent, and it is a credit to our trade that it is so. We are teaching the poor and those who see only the rougher sides of life the refining and uplifting influences of the flower by letting the "Greek" sell them as they pass. Let the flowers go into these homes rather than the ash barrel and work the good they do against liquor and low living.

Our answer to the bargain question, therefore, sifts down to this: If we don't want bargains and any low prices in flowers we should not grow that many flowers. With one dozen roses in Pittsburgh on December 24th, and only one dozen, we could get at our store \$1,000 for them with ease and disappoint some people, too. If the growers are not making any money then it is because there are too many growers or else even yet flowers have not become popular enough. The remedy is obvious if the ill exists. A growers' trust might maintain prices for a while to the benefit of nobody in particular, but we doubt its being practical. It is much better, we think, to accept conditions as we find them and do the best we can with our tools and opportunities.

Buy as cheaply as you can, Mr. Retailer, for if the "Greek" buys the

same stock at the same time cheaper than you do he is a better business man. Sell as dearly as you can, Mr. Retailer, but do not complain when your competitor won't let you "rob" the people. Do not look forward to the time when there will be no competition, for it is the power that advances civilization and will always exist. And let us remember that the governor of the whole machine is the law of supply and demand. Bargains will always be, if the great consumer wants them and the great producer can afford to produce them.

ANTHONY W. SMITH, JR.,
Pittsburg, Pa.

The conditions in the flower world have been fully met by Carl Stumm in his version of bargain sales published in the issue of THE AMERICAN FLORIST of December 3, page 922. The flower business has and is developing rapidly and his article is one which fully explains, in the right way, a condition now at hand. One great trouble at the present time is that the producer of flowers has but a vague idea of the actual cost of production and permits the wholesaler or himself to dispose of his wares blindly.

It has long been the opinion of the writer's firm that the gross discrimination between the legitimate retailer and the fakir will terminate sooner or later because of the injustice therein. It is generally accepted that the first-class retailers and the shipping trade in a large flower center are responsible for the profits to the grower. In doing so they also create an opening for the fakir with his cheaper flowers, which are often in quality on a par with those bought earlier in the day.

BERTERMANN BROS. Co.
Indianapolis, Ind.

Having read the article on Bargain Sales by Carl Stumm in the issue of THE AMERICAN FLORIST of December 3, page 922, we wish to say that we are of the opinion that a florist who consumes large quantities of flowers and who can retail them at low prices is bound to make a success, as the public are tired of being overcharged for cut flowers.

Yours truly,

F. FLEISCHMANN.

New York.

Stevia Serrata.

We have just finished cutting our crop of stevia and as it was of extra nice quality and so easily raised we believe we will give our method for the benefit of other growers.

We grew our main crop of stevia in pots this season following the usual custom of plunging in frames with slight protection with a thin lath shade. This gave us good results and was all right for pot plants.

When we topped back these pot plants late in July, we put several hundred of the top cuttings into the propagating sand, where they rooted easily, and quickly. We then planted these rooted cuttings in flats of soil, planting about four inches apart in moderately rich soil in the common size flat, and of course gave the necessary attention till they had a good hold upon the soil, after which they received the same treatment as the other stevia. When these plants were about eight inches high we pinched the tops once—that is all the pinching they got. Many were not pinched at all and it

seems to have made little difference. They all grew finely and they certainly gave us elegant stock for cutting. All the sprays were straight and in every way superior to sprays cut from large plants, while the care in handling and cost of production was the least possible.

W. H. CULP.

Hardy Shrubs for Forcing.

The employment of early-flowering hardy trees and shrubs for the decoration of the conservatory and greenhouse from Christmas onwards, and in a lesser degree for the supply of cut flowers, is on the increase. Judging from the special lists coming to hand, and the extensive displays made by several nurserymen in early spring at the fortnightly shows of the Royal Horticultural Society, the cultivation of certain subjects for this purpose is of no small importance.

The amount of forcing the different kinds will bear without injury varies considerably, as also does the number of years they may be forced in succession. With a few exceptions a general rule to follow is to force the plants in alternate years, planting them out in the nursery to recuperate the remainder of the time. Wistarias, pyrus, and some prunus, treated somewhat like orchard-house trees in pots, will stand gentle forcing for several years in succession. Plants of azalea mollis can be purchased at such a cheap rate that it is not worth while planting these in the nursery, especially those which flower at Christmas or during January.

In many gardens a certain amount of transplanting and shifting of trees and shrubs is done annually during October and November. The beds in the pleasure grounds or the shrubbery borders are becoming unduly crowded, and require thinning. Here, then, is a favorable opportunity to obtain a few extra large specimens for forcing. If

Christmas to May in the show house:—Acer Negundo variegata, the variegated maple, may be grown as a pyramid or standard; the foliage is very ornamental and useful for associating with flowering plants, many of which, when forced, are devoid of leaves, or nearly so. Amelanchier canadensis, white flowers; Andromeda floribunda, A. japonica (pot in peaty soil); Choisya ternata, the "Mexican Orange-flower"; Deutzia gracilis D. Lemoinei and numerous very beautiful hybrids; Dier-villa (Weigelia) Eva Rathke, Abel Carrieri, and other garden varieties. Also Forsythia suspensa, F. viridissima, and the hybrid between the two, F. intermedia, all with yellow blossoms. Hydrangea paniculata grandiflora does not respond to early forcing, being best for flowering in May. Kerria japonica flore-pleno rich golden yellow flowers; Laburnum vulgare; standards are very useful in March and April. Philadelphus Lemoinei erectus. Then many of the prunuses are suitable for forcing, notably the double peaches, P. Persica flore-albo-pleno, flore-roseo-pleno and var. magnifica, triloba flore-pleno, Cerasus Rhexi flore pleno, japonica flore-albo-pleno, pseudo-cerasus Watereri, James H. Veitch, and other forms, with subhirtella and Pissardi; the bronze-leaved Myrobalan, Pyrus floribunda and var. atrosanguinea P. Scheideckeri. Of rhododendrons there are many varieties. Good evergreen sorts for forcing are Cunningham's White, fastuosum flore-pleno, Prince Camille de Rohan, Purity, and Chevalier Felix de Sauvage. The deciduous varieties include the sections flavum, mollis, and rustica flore-pleno. Robinia hispida, Spiraea arguta, S. prunifolia flore-pleno, and S. Van Houttei are fine shrubs. Staphylea colchica has delightfully scented white; conspicua (Yulan) and soulan- numerous varieties should include Ma-

DRACENA FRAGRANS AT GEO. WITTBOLD CO.'S, EDGEBROOK, ILL.

too large for pots tubs may be used, or even boxes of a suitable size, as the probability is most of the plants will be discarded after flowering, or put out in the nursery or some other part of the grounds. Forsythias, Spiraea prunifolia flore-pleno, S. arguta, Kerria japonica flore-pleno, and rhododendrons are a few subjects we lift in this way and force.

The following selection of subjects will provide a beautiful display from

rie Legraye white; Charles X., pale lilac, almost white when forced and Mme. Lemoine, double white, Viburnum plicatum and V. opulus sterile; Wistaria sinensi and var. alba; Zenobia speciosa pulverulenta, a peat loving plant, and magnolias are among the most distinct and pleasing subjects for forcing. The latter include stellata, white; conspicua (Yulan) and soulangeana as the best. Several varieties of the two last named might also be

grown. The chief work amongst these subjects at the present time is to pot them up as lifted from the reserve garden, or as they come to hand from the nurseryman. Stand them in a sheltered position where the pots can be protected from frost if necessary.—A. OSBORN in the London Journal of Horticulture.

Spireas for Forcing.

The herbaceous spireas, of which the old *S. Japonica*, *S. astilboides*, Gladstone and Alexandra are the best known, are among the best plants for Easter forcing, their culture being easy and success with them comparatively certain if a few simple details are followed out. Although retarded clumps are brought in for Christmas, yet the newly imported stock does not force readily until after New Year's. The clumps should be unpacked immediately on arrival, as they may heat and start to grow in the cases, this sometimes leading to the loss of good prominent shoots. The plants are quite hardy except in the very coldest localities, and after being unpacked, if they cannot be potted at once they may be laid out close together outside or in a cool shed and sprinkled over with water daily until they are potted.

The clumps always vary considerably in size and consequently all will not go into the same size pots. They may, of course, be divided to fit any size, but this is not usually advisable, as they are cut out in the best shape at the nursery before being shipped and any further cutting, unless very carefully done, is apt to injure the crowns. As a rule *S. Japonica* does not run quite as large as the others and the largest clumps may easily be got into 7-inch pots, the smaller ones into 5 to 6-inch. In any case it is not wise to cram them too tightly as they need a great deal of water in the finishing stages of growth, and if in too small pots they need too much attention. Pull out the old leaf stalks and draw the roots away from the crowns to expose the latter, then pot them firmly, using a thin potting stick to get the soil filled in properly and firmly between the clumps of roots and the pot. When potted they are best, unless the weather is exceptionally severe, for a week or two in the open air, after which they may be brought inside and placed under the greenhouse benches where they may remain until signs of growth appear, watering them moderately in the meanwhile.

When the young foliage begins to develop bring the plants up to the light in a house in which the night temperature does not exceed 55° to 60° at first, this being afterwards increased if found necessary to have them in on time. It is in the earlier stages of growth that these spireas are often neglected and, owing to being crowded closely together, the plants draw up and never afterwards regain that pretty pyramidal form with spreading base that is so attractive in a well-grown plant. They should never from the first be so closely placed that one plant touches the next, but always have room between them for light and air. Then the large lower leaves will spread and develop, keep their deep green color and be more satisfactory in every way than that in crowded plants.

The grower soon finds out what a thirsty subject he has to deal with

when the foliage begins to develop, for if they are neglected for a day the leaves wilt and if this happens too often they fail to pick up and the size and shape of the plant is consequently impaired. By the time the flower spikes show the plants will have made quite considerable roots, enough to fill the pots, and feeding will be in order. The plant is not particular as to food so there is plenty of it and it is wise to give a change of diet. Always see that the roots are moist before applying liquid manure and use this weak at first, increasing the strength by de-

Dracaena Victoria.

grees as the roots get accustomed to it. Light spraying overhead is useful, especially just as the foliage is greening and a moist atmosphere must be kept up at all times by dampening between the pots and around the house, but too much spraying is apt to make the foliage soft and cause it to wilt readily from sun or a free circulation of air. In some localities very little shading is needed if the plants are carefully handled and the atmosphere kept right, but this is a matter that has to some extent to be determined by each individual grower according to circumstances. But heavy shading should be avoided under all as it leads to

weak foliage. When sending the plants out be careful to instruct customers to water daily or much dissatisfaction will be shown. The best way to do this is by a neat printed card attached to each plant with the name of the grower on the back as an advertisement.

H. R. R.

Dracaena Victoria.

Dracaena Victoria is a native of Brazil and was distributed by William Bull & Sons of London in 1899. This dracaena is very similar in growth to *D. Lindenii* but the variegation is much superior to that variety, the whole leaf being of a bright golden yellow with a central band of light green ornamented with narrow stripes that vary in color from grayish to creamy yellow, the golden yellow intensifying with age. The plant which we illustrate is nine feet tall and has 170 leaves which averaged two feet long and four and a half inches wide and was propagated from a cutting five years ago. It was awarded a silver gilt medal at the Beekenham Horticultural Society. It requires plenty of light in order to develop the bright color with the same treatment of *D. Lindenii*.—Gardener's Chronicle.

Dracaena Mandalana.

This striking variety is said to be an American seedling named in honor of W. A. Manda, and those who saw the group of this plant that was shown in Philadelphia in 1907 will readily agree in the opinion that it is a very handsome dracaena.

As will be noted from our illustration, the growth of this variety is strong, the foliage broad, and when to this is added attractive coloring, the older leaves being bronzy red and the young growth a much brighter color, the result is a plant that attracts attention. The plantsman is reminded of *D. Leitzei*, but the coloring is much brighter than the latter, and *D. Mandalana* seems to have more substance to its foliage.

Cultural conditions similar to those generally given for *Dracaena terminalis* will answer for the variety under discussion, including warmth, moisture and plenty of light. W. H. T.

Dracaena Rothiana.

This sturdy growing dracaena belongs to the fragrans section and is considered by botanists as simply a variety of that species, although it is a sufficiently distinct form to be readily distinguished from the type. In growth *D. Rothiana* is compact, the leaves of a good specimen ranging from 12 to 20 inches in length, and three to four inches wide. In color the foliage is bright green, the margins somewhat undulated, and also reticulate or veined noticeably. This dracaena is now becoming more widely known as a suitable variety for decorative work, though by no means a novelty, from the fact that its introduction from the Comoro Islands dates from about 1877.

No special culture other than would be given to *Dracaena fragrans* is needed for *D. Rothiana*, and with light shading, a night temperature of 60 to 65 degrees, rich soil and abundant moisture, a rapid growth may be assured. W. H. T.

DRACÆNA MANDAIANA

Commercial Dracaenas.

Botanists in their wisdom do not class all the plants known to florists as dracaenas in this genus, but call some of them cordylines. Necessary as this may be to properly classify the various plants florists find it far more simple to stick to the name dracaena, and in this we but follow the custom of the trade. All are useful plants, easily grown, propagated readily, usually either from cuttings or seed, and presenting a good return for the little skill and care necessary to do them well. To take the culture of the long stemmed, erect-growing kinds first, of which *D. terminalis*, *D. Massangeana* and *D. fragrans* are well known types, it may be said that anyone with any knowledge of plant growing, no matter how rudimentary, can take it up with every prospect of success. The stems of many of these kinds are often offered to the trade and these can either be cut up in short lengths, containing one or two eyes, and the pieces inserted as cuttings or they can be laid lengthwise on a bed of sphagnum moss and covered with the same material to start shoots that are eventually cut off and potted. In either case a bottom heat of about 85° to 90° should be given and there will soon be signs of life.

Taking old leggy specimens, such as are frequently seen around greenhouses, the usual proceeding is to cut a niche all around under the tuft of leaves at the top, moss the stems and eventually, when rooted, cut off and pot the head. This is all right for the new plant, i. e., the top—but in the process the stem below hardens and has either to be thrown away or put

in heat to start growths for cuttings. We prefer cutting the head off first

and rooting it either over heat in a sand bed or in a bottle of water, then cutting up the stem into cuttings as noted above and leaving the bottom to start growing and make a new plant. However, any of these methods are safe and practicable and the one that seems most suitable under the circumstances of the case may be chosen.

Quite distinct from all other dracaenas are the two species introduced some years ago by Sander & Son of St. Albans, Eng., *D. Sanderiana*, named for Fred Sander, and *D. Godseffiana* named for his manager, Godseff. The former is a slender habited plant that looks best when grown about three or four in a pot. It has prettily white variegated stems and leaves and is among the most popular of plants for fern dishes and similar small decorative subjects. *D. Sanderiana* is easily propagated in the usual way by cutting up the stems. *D. Godseffiana* is an even more distinct plant than *D. Sanderiana*, being totally distinct in habit, and no one acquainted with the family would take it to be a dracaena at all. It has slender stems upon which are produced olive green leaves, more or less spotted with yellowish white. It is best propagated by means of young top shoots, though any part of the plant will strike, and is also an elegant plant for fern dishes.

D. fragrans is a strong growing species with green leaves variously striped and variegated with yellow. Varieties of this, sometimes classed as distinct species, are *D. Massangeana* and *D. Lindenii*, both useful and both grown considerably for market. *D. Goldiana* is a very beautiful species with glossy green leaves spotted and banded with yellow, the young foliage often hav-

DRACÆNA LINDENII.

ing a reddish tint which is very attractive. *D. terminalis* is perhaps the most widely grown of all dracænas and an excellent plant for furnishing and decorative purposes. There are many varieties of this species such as *Cooperi*, *Bausei*, *Baptistii* and *Amabilis* and all have some distinctive features. *D. indivisa* is a narrow green leaved kind that is valuable on account of its being so easily grown and thriving with

ited quantities of first-class material for cutting, while the majority lend themselves to pot culture, forming elegant and shapely specimens, which are doubly effective in that they retain their beauty for many weeks, and are valuable for indoor decoration. Not all of them bloom at the same time, but rather form a natural succession, while by gentle forwarding in heat, or retarding under the coolest conditions,

acias are under conditions where the plants secure unlimited root room; this is particularly apparent where the genial climate of certain Continental districts favor their development to a marked degree, so much so that they constitute an integral and characteristic feature in the landscape, and so almost appear as if indigenous. In a lesser degree, and possibly more restricted in variety, those favored countries in the South-West of England offer many opportunities for the culture of acacias in the open, particularly when ample shelter can be provided. It may occasionally happen that some severe winters may prove fatal to them, but with a stock of young plants in reserve such losses may readily be made good, and as they are rapid growers, they very speedily become reinvested with the old charm. In northern latitudes the acacias are best suited for greenhouse and conservatory, and where the facilities are present they prove most valuable when planted out, as it then supplies the best material for cutting, as the removal of large branches from the trees when in full flower only anticipates by a few days the pruning that is generally practised whenever the flowers fade. The following possess much merit.

Acacia dealbata, sometimes called the "Silver Wattle," from the characteristic grey-white colour of the underleaves; the flowers are yellow, disposed in broad, spreading racemes along the branches; the leaves are compound, with many pairs of linear, pubescent leaflets.

A. cultriformis has intense grey leaves, which terminate in a curious hooked point; the flowers are orange-yellow, ball-like, and are disposed in racemes.

A. Drummondii is a particularly good and well known species, having pinnate leaves; the flowers are pale lemon, borne in cylindrical spikes.

A. verticillata produces solitary pale yellow flowers, oblong in form; the leaves are like fine needles, and are borne in whorls; it is one of the best and most distinct.

A. trinervis has narrow leaves some four inches in length, and conspicuous,

DRACÆNA TERMINALIS AT JULIUS ROEHRS CO.'S, RUTHERFORD, N. J.

very little heat, in a cool greenhouse in fact. It is very easily raised from seed.

As to culture after propagating as described above, this is of the easiest possible description. With a view to hastening matters some growers plant them out on benches, but having regard to the disturbance consequent in lifting, we are doubtful if there is much advantage in this method over keeping them in pots. The pots may be plunged in soil to keep them from drying out too rapidly and this will be an advantage, but the planting out has little to recommend it except in the earliest stages. The soil should be good and firm, but not over rich. The atmosphere of the house should be moist and warm and spraying the foliage should be kept up regularly. In summer shade from bright sun is necessary, in winter abundance of light, while the roots must be freely watered at all times. This in brief is a summary of their culture, and these few details carried out carefully anyone may make a success, financially as well as culturally of dracænas.

Acacias.

The hardest and easiest cultivated of greenhouse plants, the various species of acacia takes a foremost place in the conservatory and greenhouse. They enjoy a greater measure of popularity than one might be led to suspect, for the "mimosa" of Covent Garden is none other than the flowering sprays of *Acacia dealbata* of gardens. In its season the flowering sprays are plentiful in the flower markets, so that it is practically familiar to the majority of English people. The species are of immense value to gardeners, says a writer in the *Gardeners' Magazine*, yielding unlim-

a much longer period of flowering is secured.

Their cultivation presents no difficulty inasmuch as their propagation is readily carried out either by seed or cuttings; the former is best sown as soon as ripe, and the subsequent seedlings potted on until they attain flowering size, which, in the majority of instances, is at a comparatively early stage. Cuttings of the half-ripened shoots root readily under handlights, or on a mild bottom heat in a propagator, a high temperature being at all times inimical to success with acacias.

The best results obtained with aca-

solitary, deep lemon-colored flowers, some one and a half inches long.

A. Barkeriana produces miniature ball-like sulphur-yellow flowers; the young shoots are bright purple; the mature leaves are narrow and willow-like.

A. retinodes (*floribunda*) is a species having long linear lanceolate leaves;

Dracæna Rothiana.

the flowers are in branching racemes, each branch having from fifteen to twenty flowers.

A. Baileyana has intense grey leaves resembling *A. dealbata*; the flowers are in globular heads, the racemes being erect.

A. Riceana produces its globular yellow flowers on long slender branches; the flower panicles are wide-spreading, making it a most effective subject when trained from the roof; the flowers are cream-white, while the leaves are small and needle-like.

A. lophantha is probably best known as a summer bedding subject; the foliage is extremely graceful, the flowers being greenish-yellow.

A. pubescens is a free-flowering species, with elegant compound leaves; the globular yellow flowers are disposed in racemes along the axillary peduncles.

A. affinis, *A. armata*, *A. hastulata* (*cordata* of gardens), and *A. grandis* are species in commerce, and more or less common to gardens. *Cordata* is very desirable, if only for the distinct character of the leaves, and *grandis* is one of the most desirable in flower.

Azaleas and Spireas for Easter.

ED. AMERICAN FLORIST:

When should Azalea Indica and Spirea Gladstone be started in a temperature of 50 degree to be in bloom for Easter? J. W. K.

No definite date can be given to start these plants and perfect them at a certain day in one temperature for the climatic conditions are so variable. The spireas should be started immediately after the first of the year, and kept a little cooler than 50 degrees until some growth has been made. Eight to ten weeks should be enough to bring in the azaleas in the given temperature, at that season of the year, but a great deal depends upon their condition when started. W.

WITH THE GROWERS

Dailledouze Bros., Brooklyn, N. Y.

Long famed as leaders in the carnation industry this firm is still in the front ranks of the procession as producers of fancy grade carnation flowers.

In area the glass of this establishment covers somewhere near 80,000 square feet and every foot is working, no vacant places, no diseased plants, no dirt, every inch radiant with buds and blossoms in seemingly innumerable thousands.

For so large an establishment it is somewhat surprising to find how few were the number of varieties grown, but there is not a failure among them; they are all producing heavily and it may safely be stated that the collection of varieties as a whole is an ideal one. The only white sort grown is White Enchantress, several houses be-

Dracæna Terminalis.

ing devoted entirely to this variety. Enchantress, Pink Delight, Winona, Rose Pink Enchantress, Mrs. C. W. Ward, Winsor, Dorothy Gordon and their own seedling No. 470 cover the pink section in the various shades. For the side benches, where head room is limited, Winsor fills the bill nicely. The differences between Dorothy Gordon and Rose Pink Enchantress seem very infinitesimal. Pink Delight has a beautifully shaped flower and a most pleasing color. No. 470 has the earmarks of a favorite, pure glistening pink, petals fimbriated, good size, sturdy free habit, is in its third year and is no doubt eventually destined to be named and disseminated.

The scarlet section contains Victory, Beacon and an un-named seedling. Victory falls behind Beacon as a producer and will no doubt have to be placed among the has-beens before long; it will not develop the plant size in the field that it ought to do. The seedling has both Victory and Beacon beaten in brilliancy of coloring; it comes from Victory and Red Chief and so far gives great promise in all particulars.

The crimson section has but one variety, an un-named seedling, which answers all the purposes for this color; the demand for crimsons, it is noticed, gets less year by year and less space is devoted to that color than to any other. Mrs. M. A. Patten is the only variegated sort grown and one house only is devoted to it. Besides the seedlings mentioned, there is a sport from Beacon that is being saved and will probably be tried out further next year. The color, salmon ground splashed, is streaked rather with scarlet, rather an odd combination but will no doubt appeal to some of the super-æsthetic tastes in color-harmony. All the stock here is field-grown during summer; the practice of indoor culture entirely has been discarded.

At the time of our visit we were fortunate in finding the three brothers at home, for, while Paul and Henry retired from active business a few years ago, they live on the estate yet and naturally frequent the greenhouse. Eugene, together with his son, John, are actively engaged, though a recently acquired touring car of the latest pattern claims John's attention part of the time. W. H. Taplin, well known to our readers as a writer on horticultural topics, is acting superintendent and after a tour of the greenhouses one realizes that Mr. Taplin is a grower, as well as a writer, a combination rarely met with in this day of specialization.

Chicago Carnation Co., Joliet, Ill.

The Mecca in the vicinity of Chicago for all carnationists, or those interested in the culture of the divine flower is Joliet. Here are situated the greenhouses of the Chicago Carnation Co. and just now everyone is desirous to see the novelty Washington which this

Dracæna Sanderiana.

concern is disseminating this spring. Joliet is a thriving city about forty miles from Chicago on the Rock Island railway and about two miles from the center are located the greenhouses of this establishment. On the eastern slope of a hill with a splendid southern exposure, and plenty of good air (lots of it when we were there, for the wind was blowing 60 miles an hour) the situation is of the best for fine

carnation culture. Here are 22 houses with an area of 125,000 square feet devoted entirely to the culture of carnations, which were all in exceedingly fine condition and producing blooms of the highest quality. The varieties grown are all the best of the commer-

sent out by this concern, they having obtained the western agency. The stock here grown is in fine condition, although of very late propagation, the cuttings being placed in the sand in April. Notwithstanding the fact that last summer was very unpropitious for

second year, the plants being cut back and after growth had started a good top dressing given the bench. They were in fine shape, producing large blooms and it was stated that the plants had averaged nine blooms each up to Christmas. May Day is especially prolific and the house as we saw it was a beautiful picture, the plants bearing an immense crop. Sangamo was also in very heavy cut and seems to be improving every year. Dorothy Gordon is looking very nicely and doing well, but planted side by side with Rose Pink Enchantress there seems to be but a small amount of difference. The flower is a little deeper and perhaps more constant in color, but in growth and productiveness they seem at these houses to be about on a par. Scarlet Glow was fine, of the brightest scarlet and producing finely. Shasta is a beautiful white of splendid form but appears to be a little shy during the winter season. J. Whitcomb Riley is not doing well at all and is disappointing.

The trial benches of seedlings are very interesting and some varieties were observed that certainly give great promise. In the 1907 seedlings two scarlets both look good. No. 186 is an extra large flower of nice form and a great producer. No. 1000 a very beautifully formed flower with a fine fimbriated edge and of good size. No. 96 a very handsome variegated, a large flower, not too double from $3\frac{1}{2}$ to four inches in diameter with strong stem and calyx. The ground color is white, tipped and splashed with light scarlet. In the 1908 seedlings were noted a fine light pink, No. 555, the shade of Pink Delight but a much larger bloom, a scarlet like Estelle No. 49, but much larger, and No. 165 a bright light pink nearly vieing with the Killarney rose in color.

The propagating house looked the scene of activity. Here were found 465,000 cuttings in different stages and the success in rooting was phenomenal in some cases as Superintendent Olsem jokingly says the results show more than 100 per cent rooting. The propagation of Washington is very heavy for orders are being received daily. Everybody who sees this grand

CARNATION MAY DAY AT THE CHICAGO CARNATION CO.'S, JOLIET, ILL.

cial sorts and many novelties and include the following in the quantities stated:

- 35,000 White Enchantress.
- 20,000 Enchantress.
- 15,000 Washington.
- 10,000 White Perfection.
- 7,000 Alvina.
- 6,000 Sangamo.
- 6,000 Beacon.
- 5,000 May Day.
- 5,000 Victory.

And smaller quantities of Dorothy Gordon. Scarlet Glow, Shasta, Princess Charming, Rose Pink Enchantress, Mary Tolman, Winsor, Winona, Afterglow, J. Whitcomb Riley and Aristocrat. In all nearly 150,000 plants are growing beautifully in the pink of condition, producing extra large flowers and an inspection of the houses will give any grower an idea of the worth of the several varieties in comparison with others under similar soil and conditions.

Interest of course centers in Washington. This variety is a dark pink sport of Enchantress and has all the free growing and free blooming qualities of that most popular variety. The stock is in exceptionally fine healthy condition, showing splendid culture and producing flowers as large and handsome as the best Enchantress which all growers know is the acme of perfection to date. In color it is a little darker and brighter than Mrs. Lawson, and to the writer of much more pleasing shade, for it is just over that line of cerise which seems to clash with all other colors. The stem is good and strong and carries the large flower very gracefully and is a great addition to the existing varieties.

Princess Charming was the next to attract attention. This variety, though originated and disseminated by Henry Eichholz of Waynesboro, is being also

carnation culture in this vicinity, the plants have made good growth and are now full of bloom and buds. The growth is exceedingly strong, bearing extra heavy large foliage. The stems are long and very strong, and the calyx close and heavy enough to enclose the large flower. The color is light pink, some shades darker than Enchantress as seen here and a very pleasing flower.

Of the older varieties White Enchantress was in superb condition and the blooms being cut were as handsome specimens as one would wish to see. Two benches of this variety will bear close inspection, for a trial is being made with carrying the stock over the

CARNATION WASHINGTON AT THE CHICAGO CARNATION CO.'S, JOLIET, ILL.

Manager Pyler and Superintendent Olsem in the Aisles.

CARNATION WHITE ENCHANTRESS AT THE CHICAGO CARNATION CO.'S, JOLIET, ILL.

carnation wants to give it a trial and sends in an order, the firm already having shipped 30,000 rooted cuttings.

The stock which it was our pleasure to see and inspect on our visit was certainly a high testimonial of P. A. Olsem, the superintendent, and his ability as a carnation grower, for it seldom has been our pleasure to see better stock at this season of the year and after our visit we did not at all wonder at the success of this firm at the fall shows. The management of the place is in the hands of A. T. Pyfer who makes his headquarters at the store, 35-37 Randolph street, Chicago, and so ably manages the office duties and the sale and shipment of not only the large cut from the houses but the large business done in the sale of rooted cuttings.

SANTA CRUZ, CALIF.—The report from W. E. King states that the business and conditions were about the same as last year. Mr. King adds that he was quite sick, in fact, too sick to do much business.

ANGOLA, N. Y.—The Christmas trade was very good, reports J. J. Neubeck. Owing to cold, wintry weather carnations were very scarce and sold at high prices. There was a good call for plants, especially the blooming varieties, poinsettias, primulas and begonias all sold well. The firm of Neubeck Bros. has dissolved, N. C. Neubeck withdrawing and John J. Neubeck will continue the business under his name.

MERIDIAN, MISS.—I believe the business was 25 per cent better this year than last at the holidays, says Mrs. N. C. McKinney. The retail prices this year were quite as good and perhaps better than last, the quality of the stock being much better, arriving in good condition. The supply and demand for bulbous flowers was very good. There was a great call for poinsettias and the plant trade was about the same as a year ago. I believe everyone appreciates flowers more every year and they are becoming almost a necessity during the holidays.

OBITUARY.

Miss Deborah G. Passmore.

Deborah Griscom Passmore died at her apartments in the Earlington, Washington, D. C., on the morning of January 3.

For the past eighteen years she has been the principal artist of horticultural subjects in the United States Department of Agriculture. One of her greatest and most noted achievements was a series of paintings in water colors of practically every known variety of the lily. In the division of pomology of the department she had produced thousands of paintings of fruits, many of which were reproduced in colors in the department's yearbook.

Miss Passmore was born in 1845 in Delaware county, Va., of Quaker stock. She was educated in the schools of the Friends and possessed many of the lovable qualities for which that sect is noted. She studied art under several noted painters and was once a pupil of the School of Design in Philadelphia. Previous to entering the Department of Agriculture she for a number of years taught painting in Washington, having pupils from many prominent families.

The funeral was held January 5, interment being at Moorestown, N. J.

A. F. F.

John L. Turner.

John L. Turner of the firm of Griffith & Turner of Baltimore, Md., died the first of the year. He had reached the extreme age of 90 years, but until an accident disabled him a few weeks ago he had always been constant in his attendance at the store and took an interest if not an active part in the operation of the business.

He was one of the originators of the old-established firm of which he was a member and had occupied the position of secretary and treasurer ever since its incorporation. He was a thorough business man and had contributed largely to the success of the concern, which has now reached such large proportions in its various lines of activity.

S. B.

POMONA, CALIF.—The total sales at Christmas, states O. Roessner, were larger than at the previous holiday. The quality of the flowers was better, with good supply, and the retail prices about the same as last year. The demand for bulbous flowers was poor. There was an increased demand for flowering plants.

NORWALK, CONN.—R. G. Hanford states that the Christmas business was about the same as last. The quality of flowers was good, fully as good as usual, with plenty of stock and prices about the same as last year. No special increase in demand for any special flower or for blooming and decorative plants was noticeable.

NEW ORLEANS, LA.—Abele Bros. report an increased business for the holiday trade. There was a good supply of roses, carnations and violets with the prices the same as last year. The demand for bulbous flowers was very good, not having enough. The call for both plants and flowers was about the same as at last Christmas.

IOWA CITY, IA.—A. G. Prince reports that Christmas was an increase of 25 per cent over the last. The retail prices of cut flowers were higher, with the quality about the same and the supply was equal to the demand. The demand for bulbous flowers was good as was the supply. There was an increased demand for flowering plants.

PENSACOLA, FLA.—The holiday trade was fully double what was done last year, is the report of the Boysen Floral Garden. The retail prices this year were much better for the supply was not equal to the demand, even bulbous flowers were scarce. The quality of the stock was about the same as usual. The demand for plants this year will show a decrease, not being as good as last Christmas.

HALIFAX, N. S.—F. W. Killiam has not yet figured up the total sales, but feels pretty sure that they will show an increase over the preceding year. The retail prices were about the same as at last Christmas, the quality not quite as good and the supply hardly equal to the demand. The call for bulbous flowers was not as great as in other years. There was an increased demand for flowering plants, especially azaleas and poinsettias.

RENEW subscriptions promptly so that no copies of the papers may be missed.

Personal.

Elmer D. Smith and wife are en route to California, having left New Orleans, where they had a royal time.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high-grade work.

The custom of wearing a carnation in commemoration of the birth of the late President McKinley is growing in favor each year and the colored varieties, pink and red, are the most popular for this occasion. Growers and retailers should bear this in mind. The date of the anniversary is January 29.

Pierson's Rose Novelties.

A. N. Pierson of Cromwell, Conn., brought to Chicago January 5 an exhibit of three of the roses of which he is selling stock this year. The varieties were Dark Pink Killarney, Prince de Bulgarie and Lady Cromwell. They were to be seen at the J. B. Deamud Co.'s store on Wabash avenue, and were the center of attraction for the rose-growers of the vicinity, who eagerly grasped the opportunity to see the novelties and admire their good qualities.

Dark Pink Killarney is a beautiful sport of Killarney, the color being of a very bright pink, much darker than the parent at its best and with all the good qualities of that popular variety. It is sure to win favor with the growers for the color is very pleasing and there will be no danger of having light colored roses during the short, dark days or cloudy weather.

Prince de Bulgarie is a light pink, very full and is equally handsome in the bud or when half open. The comments on the flowers shown made by those who saw them were all very favorable.

Lady Cromwell is a salmon pink sport of My Maryland of very pleasing color and beautiful shape and substance, with all the excellent qualities of its parent, and is of a color that will be popular with the high-class trade.

National Flower Show.

Under the auspices of the Society of American Florists the National Flower Show will be held in Boston, March 25 to April 1, 1911. The support so far given by the trade in general has been most generous, and many of the prominent firms of the country have secured space for their exhibits. But it is hoped that every concern that caters to the florist trade will be represented, and to that end, and to make this exhibition one that will receive world-wide recognition and rebound to the glory of the society, every member should take an active interest in this matter and induce those with whom they trade to exhibit their goods at this time.

The general manager, Chester I. Campbell, has been engaged because of experience in details of such exhibitions, and also being a member of the S. A. F., but the co-operation of every member of the society and trade is necessary to make this show a grand success. The exhibition has been brought to the attention of all flower lovers of New England and the attendance will undoubtedly be large. The manager earnestly requests that everything will be done to boom the show and will welcome any suggestions to accomplish that end.

In addition to the list of exhibitors published in THE AMERICAN FLORIST in the issue of December 10 these additional concerns have engaged space: Bobbink & Atkins, Rutherford, N. J.; D. Landreth Seed Co., Bristol, Pa.; Lager & Hurrell, Smmitt, N. J.; Yokohama Nurseries, Inc., New York; Julius Roehrs Co., Rutherford, N. J.; Fottler, Fiske & Rawson Co., Boston, and Bradley Fertilizer Co., Boston.

New York Notes.

C. W. Scott of the Yokohama Nursery Co., and wife are back from a very pleasant trip to the Bermudas. From personal observation, they speak very highly of the conditions of the Lillium Harrisii crop as it is at present, being very healthy and vigorous. They also mention that the growing of mixed collections of bulbs there has been about discontinued, growers now devoting their space to the true Harrisii as near as is possible, some growers, they aver, realizing that the demand for Harrisii has been on the wane for some time, have gone out of the business of bulbs entirely. On the return trip Mr. and Mrs. Scott were held up by the fog outside Sandy Hook for 30 hours but even this exasperating delay when so near home was not sufficient to mar the pleasure of what they term a most delightful trip.

The New York and New Jersey Association of Plant Growers will hold their third annual dinner on Thursday, February 2, at the Cafe Martin, Twenty-sixth street, near Broadway. The committee in charge of the dinner arrangements, Julius Roehrs, Jr., Herman C. Steinhoff and Louis Dupuy, announce that there will be no speech-making as music and other entertainment will be provided by professional talent. Members and their wives and friends are assured of a pleasant evening. It is not to be a full dress affair; on the contrary, those attending are requested to appear in their business attire. The tickets are \$6 each and as the previous annual dinners of this association have been such enjoyable gatherings a large attendance of members and friends is assured.

The executive board of the National Sweet Pea Society of America were banqueted by President W. A. Burpee at the close of their meeting, held in the Astor House, January 5. Among those present were W. G. Kerr, Wm. Simm, H. A. Bunyard, A. Forbes and Mr. Wilson. The principal business of the meeting was the arranging of prizes to be offered at the show to be held in Boston in March, in conjunction with that of the National Society.

Hart, florist at 1000 Madison avenue, suffered a total loss by fire on the night of January 6, cause of fire being unknown. The greenhouse in the rear of the store, counters, ice-box, fixtures and stock all went. It is understood that it will be fully a month before repairs can be made and business resumed.

The long-established retail business of E. A. Burgess, 423 Bedford avenue, Brooklyn, has been purchased by E. Meissner & Son, who are now in possession. The Meissners are well known in the trade and everybody wishes them all success in their new venture.

Being obliged to vacate, as the building is to be torn down, M. A. Boone, retail florist, Broadway and Thirty-fourth street, has moved to Thirty-third street, next door to the Hotel Martinique. This is but a few steps from the old location.

Recent visitors included W. A. Burpee, Philadelphia, Pa.; W. G. Kerr, Doylestown, Pa.; Wm. Simm, Cliftondale, Mass.; J. Ryken, representing H. M. Hardyzen, Boskoop, Holland.

H. A. Bunyard, general manager at Arthur T. Boddington's, is receiving the congratulations of his friends on his appointment to the directorate board of the S. A. F.

The Kernan Co., dealers in evergreens, are moving from 112 to 119 West Twenty-eighth street, where they will have much more commodious quarters.

The annual dinner of the Morris County Gardeners' and Florists' Society will be held at the Mansion House, Morristown, N. J., January 16.

Paul Dailedouze and Henry Dailedouze, the retired Brooklyn growers, will leave shortly for a voyage to Porto Rico.

A directors' meeting of the Cut Flower Exchange was held on December 7 at their office in Long Island City.

A meeting of the trustees of the New York Florists' Club was held in Traendly & Schenck's offices January 6.

The twelfth annual dinner of the Tarrytown Horticultural Society will be held at the Hotel Tarry, January 18.

C. W. Ward is reported seriously ill at New Orleans. His wife and family physician have been telegraphed for.

C. Loechner has opened an office at No. 1 Hudson street.

The Flatbush Bowling Club has been in existence 22 years and has met every Thursday evening without an exception since its organization. On January 5 the annual roll for prizes took place and everybody won something of value. The scores made were as follows:

C. Woeker	131	117	143	143
A. Demusy	169	176	155	150
A. Zeller	120	120	110	124
H. Dailedouze	197	213	175	182
P. Dailedouze	172	138	139	170
A. Schmutz	164	136	167	154
E. Hanssen	168	147	137	117
P. Riley	169	143	168	...
L. Schmutz	163	133	145	...

Yonkers Horticultural Society.

On Friday, January 6, a well attended meeting of this society was held in Wiggin's Hall. A. Herrington installed the officers elected for 1911, previously speaking very highly of the work done by the gentlemen who held office in 1910. He said that the sound position, financial and otherwise, held by the society, is due to efforts made by the retiring officers. The president, Lee Whitman, spoke of necessary hard work for the coming year. Invitations were received from the Morris County and Tarrytown Horticultural Societies inviting members to the annual dinner given by each of those bodies. The Yonkers dinner committee were instructed to go ahead and make arrangements for an early date. Julius Roehrs & Co. exhibited cut blooms of some fine forms of Cattleya trianae, Lycaste Skinneri alba, Laelia anceps alba, etc. A committee composed of A. Herrington, W. H. Waite and A. Bennett awarded a certificate of merit to this exhibit.

H. M. BLANCHE, Sec'y.

PROVIDENCE, R. I.—The fourteenth annual supper of the Florists' and Gardeners' Club of Rhode Island will be held January 16.

The Home Correspondence School
Dept. A. F., Springfield, Mass.

Louisville.

Christmas trade was about up to the
average. The weather was cold and
unfavorable, nearly every florist hav-
ing some losses from plants being
frozen in delivering, it being warm in
the middle of the day and growing
bitter cold later, and plants were frozen
even when wrapped.

NOTES.

Florists have trouble with insects
destroying plants, but C. H. Kunzman
Floral Co. had a new enemy appear.
Some cows got into their carnation
houses last fall and did serious damage,
eating the carnation plants. They had
a fine lot of Lorraine begonias and
cyclamen plants to wholesale Christ-
mas, but their carnations were off
crop.

The C. B. Thompson Co. had the
plants frozen in the conservatory back
of the store owing to the neglect of
the company supplying steam heat,
letting the steam get too low the night
of January 3. Mrs. C. B. Thompson is
confined at home by illness.

Nick Ruhlman will dispose of his
greenhouse plant in this city, purchas-
ing property outside where he can
spread out. He was recently elected
Regent of the Louisville lodge Royal
Arcanum.

Mrs. G. W. Hodges had a serious
loss by fire, one greenhouse partially
destroyed and the barn filled with
hay and containing a number of boxes
of greenhouse glass was totally de-
stroyed. The horses and cows were
saved.

A letter from Chas. Rayner, formerly
president of the Anchorage Rose Co.,
who is now located at Hill Crest, Van-
couver, B. C., says he is prospering
and is delighted with the place.

Don't Forget, in the Rush

That You'll Need Stock Later on.

For example, there's your

Manetti

For winter grafting. We offer English at
\$12.00 the thousand; French at \$10.00. Both
good; 3 to 5 millimeters; smooth, evenly
graded, disbudded, well-rooted stocks, es-
pecially selected for florists' grafting.

Lily of the Valley

Reimschneider's Exposition, \$14.00 the
thousand (1,700 to the case).

Perfection, \$12.00 the thousand (2,000 to the
case).

Holsatia, for storage and later forcing, \$11.00
the thousand (3,000 to the case).

Write and make known your wants. We are Growers for the Trade,
and sell only to the Trade. Use printed stationery.

Make Money Selling Orchids-- We're Ready to Help You Do It!

Ever try Orchids on your cut-flower trade? If not, you probably haven't an accurate idea of how profitable a line they are—profitable, in bringing you the **best** trade of your town; profitable, in making you a patronage that **holds** because pleased; profitable, in the **margin** between the buying and selling price.

In our experience with Orchids, we have learned to love them for their beauty and their commercial value—they are distinctive and "original," and, to those who love odd and charming things in cut flowers, no other can compare with them.

Orchids are superb for floral designs and are increasing in popularity for corsage bouquets, etc. They command a much higher price than you can get for other flowers, and of course, the profits are correspondingly greater.

Heacock's Cattleyas
Will Bring You Profits.

We Know How to Grow Orchids--Will Supply Flowers That You Can Sell Profitably.

We have been growing Orchids for several years. We started with a small stock of plants and investigated their value as commercial cut flowers. We sell the flowers principally at wholesale, but have studied the retail market closely. We **know** that Orchids sell readily and bring retail florists a good profit; they can be shipped for long distances without injury, and will stand a lot of rough handling. These and other facts have determined us to go into the business on a wider scale.

We are, therefore, now ready to supply Orchid flowers to the trade at reasonable rates, securely packed to carry for long distances—a thousand miles or further without difficulty. We grow many leading commercial varieties and will quote prices and give particulars on request.

When in Philadelphia Be Sure to Look Us Up.

Joseph Heacock Co., Wyncote, Pa. **Railway Station
JENKINTOWN:**

CARNATION

Mrs. G. W. Ward

The most prolific and profitable variety in the market, producing more flowers and bringing a higher price than any other Carnation. The Commercial Value of this variety has been further demonstrated by the highly satisfactory results obtained by last year's purchases.

MRS. C. W. WARD

is a free and perfectly healthy grower, producing perfect flowers on long stems as early as September 1st.
The color is the clear, deep pink so much in demand.

**Rooted Cuttings: \$6.00 per 100;
\$50.00 per 1000.**

ALMA WARD, Large White. **Rooted Cuttings :

STOCK PLentiful.

Plenty of everything has been the word at all the stores during the past week, but the weather has been quite cold and the rose cut with many of the growers is shortening up and for the last few days the demand for some varieties has been very close to the receipts, and with some there is a scarcity of pink roses. The stock is all of fine quality, and while there is a good call for the short and medium lengths much of the cut that is being brought into the market is of the longer grades. American Beauties especially are almost all long stemmed flowers, but as to quality they are grand and the prices at which they are quoted are very moderate. Carnations are in oversupply yet the better grades are selling well and at good prices, but there is a great oversupply of the poorer flowers many of which have hard work finding a market. Sweet Peas are coming in much more plentiful and may be found in good quantities at all the stores. Orchids are arriving in good quantities and the prices are tending downwards. The bulbous stock is now beginning to be felt upon the market, there being plenty of Paper White narcissus and Roman hyacinths. Tulips are being offered and the quality is very good, but with the plentiful supply of other stock, they are not meeting with any great demand. Trumpet major and Golden Spur are both to be seen but not yet in any great quantity. Freesia is a daily offering and of good quality and is greatly appreciated by the nice trade. Greens are in good supply and of good quality. The topic of interest and conversation at the wholesale stores is the project of a general removal from the several buildings which they have occupied in the vicinity of the corner of Wabash avenue

35-37 Randolph St., CHICAGO

and Randolph street, to a new building that is contemplated at the corner of Market and Lake streets, and there is a very strong sentiment toward making arrangements for quarters in the projected building.

NOTES.

Notwithstanding the inclement weather a party of 35 gathered at the La Salle street station at 11:45 January 11 to accept the invitation of the Chicago Carnation Co. and visit the greenhouses at Joliet and inspect the new variety, Washington. Manager Pyfer was on hand in the capacity of host and guide and acceptably filled the position. Upon the arrival at the houses dinner was served and the afternoon

was spent overlooking the houses and carnation novelties. The party consisted of the following: J. B. Deamud, John Zech, J. P. Degnan, John Kruchten, John Sinner, J. Dinstel, James Frenicka, E. L. Gammon, Anton Then, Fred Smith, Theo. Gallos, A. Christiansen, Frank Beu, Charley Kruchten, of this city; Fritz Bahr, J. McNeil, Joe Sullivan, Highland Park; A. Schultz, Frank Roth, John Leavy, Frank Smithers, Hammond, Ind.; Guy French, N. A. Schnitz, Wm. Flugge, Morton Grove; Frank Dant, Decatur; H. W. Buckbee, Rockford; J. R. Falkenstein, Naperville; E. O. Opert, John Tiplady, Henry Illenberger, Lake Forest; C. Klemm, Arlington Heights; N. Bezdek, Wilmette.

POEHLMANN'S FANCY VALLEY EXTRA FINE HARRISII LILIES

We make these a specialty.
Can supply them all the year.
Once tried you will have no other.

A novel sight is interesting the pedestrians and automobilists that pass the fountain at the junction of Grand boulevard and East Thirty-fifth street. A spruce tree was placed in the fountain and on the advent of the recent cold wave under the guidance of J. F. Foster, superintendent of the South Parks, the workmen sprayed the tree with water from a hose and the cold created an iceberg, an American flag was then placed on the highest pinnacle. Surrounding the frozen pyramid stretched wires on which are fastened electric lights in red, white and blue.

W. H. Troyer of Elkhart, Ind., was in the city this week, getting prices on a new greenhouse, 30x105 feet, which will be erected in the near future. Mr. Troyer reports a very good season, the holiday trade being exceptionally large. A neat profit was realized from plants, especially poin-

settias, which were all sold at a good figure.

At J. A. Budlong's carnations and roses continue to be the chief offerings and they certainly are good. Judging from the number of boxes that are being continually shipped out there is no question but that this firm is enjoying a splendid shipping trade.

A. F. Longren and W. C. Johnson, the traveling representatives of E. H. Hunt, started out this week over their usual territory, drumming up business for the firm. Clifford Pruner returned recently from a business trip to St. Louis, Mo.

At Poehlmann Bros. Co.'s we noted an extra fine grade of white, pink and lavender sweet peas on extra long stems. This firm is also cutting a fancy grade of calla and Harrisii lilies that equal any seen in the market.

The stock arriving at Hoerber Bros. is fine in every way, good carnations,

Bride, Bridesmaid, Richmond, White Killarney and Killarney roses. Killarney is in magnificent condition, fine buds on long stems with splendid foliage.

The J. B. Deamud Co. is the recipient of a splendid grade of stock of all kinds. Carnations and sweet peas are looking fine, also Trumpet Major and lupins, of which they are receiving a liberal supply.

Chas. W. McKellar had a slight operation performed for blood poisoning, mention of which was made in these columns last week. Frank Ayers is looking after the business during the proprietor's absence.

Miss Ambrose has accepted a position as stenographer with the Chicago Carnation Co., entering upon her duties January 11.

A. Henderson & Co. are offering for sale a large number of rooted carnation cuttings.

52-54 Wabash Ave., CHICAGO.

Thomas Brown and Albert Stahlein, of Detroit, Mich., spent a few days of last week in the city on business and pleasure combined. The Chicago Carnation Co.'s greenhouses at Joliet were also visited and both were favorably impressed with the fine condition of the stock.

Bassett & Washburn are on with a heavy crop of carnations and some excellent blooms can be seen at the store this week. Their O. P. Bassett carnation is looking particularly fine and is in great demand, selling readily and bringing good prices.

Allie Zech received a letter this week from his old friend, Teddy Vogel, now located at Los Angeles, Calif. Teddy wrote they were having ideal weather and that the outdoor peonies were now in bloom.

Vaughan & Sperry are enjoying a splendid shipping trade, large quantities of stock being sent out daily. A fancy grade of American Beauty roses was seen at the store this week.

Peter Reinberg is cutting a large quantity of American Beauty, Richmond, Killarney and White Killarney roses, the latter being of exceptionally good quality.

Zech & Mann are mailing to their customers a very attractive calendar, the scene, which represents a reproduction of summer time, being a work of art.

O. Johnson of the Flower Growers' Market informs us that the Batavia Greenhouse Co., of Batavia, lost several boxes of glass in last Sunday's storm.

The White Killarney roses that Wiator Bros are receiving at the store are of A-1 quality, fine buds on long stems with splendid foliage.

Wieland & Risch continue to receive an ample supply of roses and carnations and some excellent stock can be seen at the store this week.

51 Wabash Ave., CHICAGO

The E. C. Amling Co. are now comfortably located in their new store, 19 Randolph street, the change being made January 6.

Henry Van Gelder of Percy Jones', is receiving a large quantity of violets, carnations and all other seasonable stock.

G. H. Pieser of Kennicott Bros. Co., we are pleased to state, is improving in health and early recovery is looked for.

The Avenue Floral Co., 3810 Grand avenue, report a rushing business with plenty of funeral and wedding work.

The Geo. Wittbold Co., 737 Buckingham place, report a very busy week, funeral work occupying their attention.

The annual meeting of the Horticultural Society was adjourned January 10 to February 7.

The roses and carnations that John Kruchten is offering this week are of extra good quality.

Kyle & Foerster are filling a large number of orders for a fancy grade of Killarney roses.

A prominent social event of the week was the White-Harris wedding January 7. The decorations at both the church and residence were handsome and elaborate and were arranged by John Canger of Canger & Gormley.

Geo. Asmus says business is very brisk and several of his assistants are on the sick list.

H. E. Philpott took his departure January 7 for his home in Winnipeg, Canada.

Wm. Dittman of New Castle, Ind., is spending the present week in the city.

J. B. Deamud celebrated the 45th anniversary of his birth last Monday.

E. F. Winterson Co. is showing some extra fine lilies and tulips this week.

Bob Newcomb is now with Vaughan's Seed Store.

Visitors.—Wm. Dittman, New Castle, Ind.; Anders Rasmussen, Wm. Beetman, New Albany, Ind.; Thomas Brown, Albert Stahlein, Detroit, Mich.; W. H. Troyer, Elkhart, Ind.; A. N. Pierson, Cromwell, Conn.

BEAUTIES!

We are cutting heavily in **AMERICAN BEAUTY ROSES** and can fill your order on short notice. Also a fancy grade of **RICHMOND, KILLARNEY** and **WHITE KILLARNEY**. Plenty of all other seasonable stock.

PETER REINBERG, ^{35 Randolph St.}CHICAGO.

Chicago Florist's Club.

The regular meeting of the Chicago Florists' club was held at the Union restaurant, January 5, with President Asmus in the chair. There was a large attendance and the usual business was transacted, including the election of nine new members as follows: J. W. Starrett, 5657 Saginaw avenue; Wm. Wolniewiz, 1214 East School street; J. W. Schmid, 913 Montana street; V. Bezdek, Wilmette, Ill.; H. B. Dorner, Urbana, Ill.; Nick Karthaus, r. Ridge avenue; Geo. Gobel, 2242 Warren avenue; A. Malchow, 3743 North Clark street; Guy M. Reburn, 51 Wabash avenue. Proposed for membership: C. L. Sherer, 4931 Superior street; Max Cohen 1563 West Polk street; W. L. Kroeschell, 440 West Erie street; E. F. Winterson, Jr., 45 Wabash avenue; J. Wolniewiz, 1214 School street. Officers for the ensuing year were elected as follows:

H. E. Philpott, president.
A. C. Kohlbrand, vice-president.
A. T. Pyfer, secretary.
E. F. Winterson, treasurer.

H. N. Bruns, Alex. Henderson and John P. Degnan were re-elected trustees. The installation of officers followed, the rules having been suspended for that purpose, as ordinarily the installation would not take place until next meeting. A. N. Pierson, Cromwell, Conn.; Thos. Brown and Albert Stahlein, Detroit Mich., and E. O. Orpet, Lake Forest, were visitors and made brief addresses. Manager Pyfer, of the Chicago Carnation Co., exhibited a number of carnations, including Washington, Princess Charmine and seedlings No. 186, fine scarlet, and No. 150, very large, cerise pink, all of which were very fine and given honorable mention by the examining committee. C. W. Johnson, of Mount Greenwood Cemetery, exhibited seedling No. 3508, a good scarlet, and a

vase of mixed seedlings. These also were given honorable mention. A. N. Pierson exhibited Dark Pink Killarney, Prince de Bulgarie and Lady Cromwell roses. Some references to these will be found elsewhere in this issue, but it may be stated here that Mr. Pierson remarked that Prince de Bulgarie was of European origin and was known in this country to some extent as Mrs. Taft. Prince de Bulgarie and Dark Pink Killarney were awarded certificates.

Supper was served after the meeting, F. F. Benthey officiating as toast-

University has offered to install two freight and two passenger elevators, also a cold storage plant with pipes throughout the building, giving each dealer a separate cold storage room as large as may be desired. The rent will be much lower than the florists are now paying and in addition they will be granted a lease of from five to 10 years. Nearly all the wholesale men favor the new location and several have already signified their willingness to vacate the present quarters. The new building will be modern in every particular and well lighted. A meeting was held January 10 at the Poehlmann Bros. Co.'s store and another at Bassett & Washburn's store January 11.

Chicago Bowling.

On January 4 the Orchids won two games and lost one to the Roses, the Violets also won two and lost one to the Carnations. Several ladies were present and report having had an enjoyable time. A. Fisher heads the individual average list with T. C. Yarnall second and Allie Zech in third position. The following table shows the number of games won and lost by each team to date:

	Won.	Lost.		Won.	Lost.
Orchids	25	11	Carnations	16	20
Roses	19	17	Violets	12	24

STOCK SHORTENING UP.

There has been quite a lull the past week, the demand being light for plants and cut flowers. There have been several large balls, included in which is the First Assembly, held at the Bellevue-Stratford Hotel, and the Charity Ball at the Academy, the decorations for these being in the hands of the Habermehls, who handle all the large work of this kind in the city. The supply of cut flowers, particularly roses, is shortening up. Richmonds are noticeably off crop, and Beauties are also shortening up. Carnations are about equal to the demand, but sweet peas are to be seen in quantity, the quality is fine and for the next month or two there promises to be a splendid lot of these flowers on the market. Orchids are much more plentiful, there being some splendid cattleyas offering in quantity. New crop lily of the valley is freely offered. Very fair tulips are seen. Mignonette has been scarce this season but is now offered by several of the large houses. Violets are in fair demand, the double and single being equal favorites. Narcissus and Roman hyacinths are coming ahead of the demand and Von Sion daffodils are quite good sellers at firm prices.

NOTES.

Hermann spent a day among the Lancaster brothers last week and was delighted with his visit. He says that several of the large establishments are given up to the culture of geraniums, making a business of sending out the rooted cuttings all over the country. Although they are grown here by the hundred thousand the large demand keeps the stock on the move at all times and he saw one telegraph order for 10,000 plants turned down as the grower was already full of orders for the next month.

A. N. Pierson of Cromwell, Conn., had a few of his new roses at Pen-nock-Meehan's last week. A dark pink Killarney was a pretty flower but seemed to lack substance. A red rose of E. Towill of Hillside, seen at the same time, looked good—it is a cross between Richmond and Beauty and is, I think, a prize-winner if as free as Richmond, which it resembles considerably.

The business of the late J. W. Col-flesh is to be carried on by his three sons, who will purchase the stock from the estate and rent the houses for a term of years. They have all been raised in the business and will no doubt carry it on successfully.

The Joseph Heacock Co. are now installed at 1526 Ranstead street and this move has already proved of great convenience to their customers, who get their stock earlier and also find a reserve to draw on later in the day if business is good.

The rafters of the new house, 50x500 feet, now being erected by Victor Groshens at Hillside, are being put in place. When this is completed he will have about 100,000 square feet of glass under cultivation.

At Elmer Weaver's a house 56x300 feet had just been completed and was planted entirely with sweet peas, which will give quite a cutting when they get in.

U S Budlong's E Blue Ribbon Valley.

Edward Reid has been spending the past week in a swing around the circle of his southern trade. He says he found things in a prosperous condition.

Walter Stokes is sending in a fine grade of new crop of lily of the valley and quantities of tulips. Easter lilies are also a specialty.

The Leo Niessen Co. are handling a grand stock of carnations. Exceptionally choice stock was seen there the past week.

Berger Bros. now show something choice in Lady Campbell violets. They are exceptionally fine flowers. K.

Baltimore.

MORE TEMPERATE CONDITIONS.

There has been a week of improved, indeed, of almost normal weather, with clear skies, warm airs and an occasional rain which has caused all the snow to disappear. The more temperate conditions have given a fillip to trade, and there was a pretty fair inquiry for all kinds of stock. Indeed, in one or two instances, there was as the day closed, nothing left over. Carnations have been about the most meager in supply. Roses were more plentiful, and sometimes there was a surplus of lily of the valley and violets. The glut of narcissus is exhausted, and the distinctive Christmas things are in the realms of the past.

NOTES.

The annual meeting of the Florists' Exchange was held on January 9. The institution has held its own, and the amount of business shows no substantial variation from the past year; but to make the total amount of sales probably required the handling of a greater volume of material than other seasons, the tendency of prices being downward. This is so palpable in almost all products in this line that it seems to argue there is an approach to overproduction.

The death of J. L. Turner of the firm of Griffith & Turner, last week, takes away one of the oldest of the well-known seedsmen of this city.

STOCK PLENTIFUL.

The flower business is passing through that stage which always follows in the wake of the large holiday trade, when some of the growers are bringing in the crop which they tried to get in about two weeks earlier but, on account of the weather conditions, they were unable to, and consequently the supply on some kinds of flowers is in excess of the demand, and in order to clean up the stock on hand each day they are obliged to drop the price. The universal opinion is that there are plenty of flowers coming in to supply the demand. While roses and carnations sell quite readily if they are of good quality, there is quite a lot of bulbous stock coming into the market at the present time, and some of the varieties move slowly, especially is this true of Paper White narcissus. Sweet peas and violets are coming in in larger quantities than they have been during the last month, and on every hand it is a little harder for the salesman to clean up the stock in trade satisfactorily to himself and to the grower who consigns to him. The retail dealers report a fair business and say that it is about up to the standard for this time of the year. Almost all varieties of flowers are to be seen in the stores and certainly the prospective purchasers have a chance to make a selection suitable to themselves. Quite a few flowering plants are still seen on the counters, and they find a good sale.

NOTES.

H. M. Robinson & Co. were very busy when your correspondent called on them, putting up large orders going to various parts of New England and New York state.

Mann Brothers are bringing into the market tulips, Trumpet Major and Golden Spur narcissus, which are finding a good sale.

Welch Bros. report a good daily business, which includes a demand for flowers of all kinds from their many customers.

E. J. Rogean is offering for sale a nice grade of single violets as well as stevia and carnations.

Thomas Pegler is handling a nice grade of carnations and sweet peas.

Moses Penn, a florist of Roxbury, was married Thursday, January 5.

H. C. W.

Monmouth County Horticultural Society.

At the meeting of the Monmouth County Horticultural Society the dinner committee reported that the dinner would be at the Globe Hotel, Red Bank, N. J., January 18. The Sheridan, where it was formerly held, could not furnish sufficient accommodation this year as there are about 135 applications so far at hand. Applications should be sent at once to the secretary, H. A. Kettel, Fair Haven, N. J. Three new members were elected and two nominated. The society is in very good financial condition, according to the financial secretary's

GENERAL BUSINESS APATHY.

Since the beginning of the year there has been a general apathy felt in the cut flower trade. It is usual, of course, this quieting down of everything just after a holiday but, with so much stock coming in, as is the case at present, the dullness seems more pronounced and prices are very variable indeed. Roses of all kinds are very plentiful; white ones are the hardest to move and in the pink section, Killarney seems to be more preferable than is My Maryland, though both varieties are coming in in excellent condition. American Beauties have taken a decided tumble in price, particularly in the special and fancy grades. Carnations increase in supply daily and the red varieties, while they were the best sellers around the holidays, are now in just the opposite condition, harder to dispose of satisfactorily than ever the white ones were, prices on all the colors have weakened perceptibly. Cattleyas are getting quite plentiful, the supply available seemingly is much larger than was anticipated some time ago; a drop in value has, of course, been a natural consequence. Lilies seem to be holding up fairly well, not being quite so numerous as they were one week ago. Lily of the valley has dropped materially in value owing more to the lack of demand rather than to any increase in the supply. Tulips are getting much more numerous and are showing better stems. The demand is slow, however. Narcissus Paper White are still coming in in large quantities. Golden Spur, Trumpet and the yellow polyantha type are also available in limited quantities. Freezias are beginning to come in quantity but are not moving very fast as yet. Violets are very plentiful and going cheap, the street men, during the recent mild weather, have been reaping a rich harvest with them.

New York Florists' Club.

The New York Florists' Club met Monday evening, January 9, with a very large attendance. In opening the meeting, the retiring president, A. L. Miller, said:

"Fellow Members: Retiring as your president I hardly know how to express my feeling towards you for the generous support given me during my term as your honored president. I sincerely appreciate the good work the various committees have rendered. Especially the chairman, who left nothing undone to make the year's administration a successful one. To our secretary, to whom a great part of the credit is due, I assure you, Mr. Young, I extend my heartiest thanks for your kind support and wish you success and happiness. I also wish to extend my thanks to the trade papers for the generous support they have given the club the past year and hope they will continue the good work in the future. It was indeed gratifying to me to see such a large attendance at the meetings, also that the exhibition tables were well filled with beautiful and rare exhibits during the year. Gentlemen, I assure you that this was the proudest year of my life. I love my profession, I love the New York Florists' Club and I loved my work as your president and did all in my power to be just and fair to all. I hope my administration has met with your approval. I again extend my heartiest thanks to all and stand ready to give the new officers my support in any capacity that they or the club may call upon me to give."

Mr. Miller then introduced the newly-elected president, John B. Nugent, Jr., saying:

"Mr. John B. Nugent: One year ago tonight I stood in your position and will say I was the proudest flor-

ist in the United States. Tonight, I am just as proud to have the honor and pleasure of turning over my duties as president to you, knowing that you will bestow honor and credit upon the club and upon yourself by administering the affairs of the club justly and fairly. You have been honored with the highest office in the gift of the club, which is a great responsibility, and with you now lies the welfare of the club. I know that each member in return is ready to give you his hearty support when called upon. The members have selected you as their standard bearer for the ensuing year, and it is needless for me to stand here and give a long introduction. If you will perform your work as president as well as you did that of chairman of the house committee I know the members will find no fault, but will appreciate your good work. You have my sincere wishes for a prosperous and successful administration. Gentlemen, I now take pleasure in introducing to you your president for the coming year."

President Nugent, in his response, thanked the members for the great honor shown him and assured them that while they had selected no great speaker, he would do the utmost in his power to make the year a prosperous one for the club. Vice-president Harry A. Bunyard, Secretary John Young, Treasurer W. C. Rickards, together with the newly-elected trustees, were each introduced in turn and made brief addresses.

P. O'Mara, for the legislative committee, reported that the bill affecting the proposed appropriation of \$50,000 by the state for erecting greenhouses was in preparation, he had received it from W. F. Kasting of Buffalo, and after reading the same, had forwarded it to Cornell University after making slight changes in it. Mr. O'Mara also said that a letter will be sent to the secretaries of horticultural, gardeners' and florists' associations, asking them to appoint delegates to appear at Albany with other delegates before the proper committee of the legislature, when the bill is presented, and that as individual members, they will use every endeavor in furthering the project of getting the appropriation. That letter will be followed by another to every prominent person in the trade, so as to bring every possible ounce of weight to bear upon the matter.

Secretary Young announced that the committee of awards had visited the establishment of Robt. Scott & Son, Philadelphia, to pass on the two new roses, Double Killarney and Melody. The former rose scored 86 points, the latter, 85 points, and both were awarded the club's certificate. Letters of resignation of membership of the club were read from L. J. Kreshover and A. E. MacDonald, both were accepted with regrets.

Treasurer W. C. Rickards read his annual report which showed a balance on the right side of \$3,920.73. Vice president H. A. Bunyard presented a report for the trustees in which were several suggestions that created lengthy discussion. After much spirited argument, participated in by Messrs. Scott, Weathered, Weston, Berry, O'Mara, Sheridan, Birnie, W. A. Manda, Marshall and others, it was decided that but one ladies' night of the club be held during 1911. Mr. O'Mara presented a resolution favoring the proposed bill of appropriation to be forwarded to Albany at the proper time, the same being adopted. C. B. Weathered presented resolutions of sympathy on the death of Frank Manda, a copy of which was ordered sent to the bereaved family.

Secretary Young drew attention to the fact that two of our members, F. W. Bruggerhof and E. C. Horan, had lost their wives by death since

the last meeting of the club. President Nugent appointed committees to draw up testimonials of sympathy, for Mrs. Bruggerhoff, J. A. Pepper, J. A. Shaw and C. B. Weathered; for Mrs. Horan, W. F. Sheridan, John Young and S. S. Butterfield.

President Nugent, announcing his committees for the year, gave out the following: Legislature, P. O'Mara, John Birnie, F. R. Pierson; Essay, J. A. Shaw, W. H. Siebrecht, Jr., J. H. Pepper; Awards, A. L. Miller, R. Simpson, W. F. Sheridan, Chas. H. Totty, F. H. Traendly, W. Duckham, H. Weston; Exhibition, W. E. Marshall, H. Turner, J. S. Hendrickson, J. Rossbach, A. R. Kennedy; House and Entertainment, R. Berry, A. Rickards, J. Fenrich; Outing, T. Fenrich, P. Einsmann, R. Young, S. S. Butterfield, J. Donaldson, C. Webber, B. Chadwick, M. Gottlieb, A. H. Langjahr, C. W. Scott; Dinner, C. B. Weathered, A. L. Miller, Chas. Schenck, R. Koehne, J. A. Shaw.

On the exhibition tables were several vases of sweet peas from G. T. Schuneman, Baldwins, L. I., for which a cultural certificate was awarded. W. C. Roberts, Ossining, N. Y., had a vase each of two seedling carnations; a scarlet, numbered 66, a cross between Beacon and Victory, large, long-stemmed and bright in color; seems like a winner, scored 88½ points. The other was crimson, fair size and good stem. The thanks of the club were awarded. President Nugent, at the close of the business session, entertained the members royally with turkey, beef and other refreshments, following which vocal and instrumental music provided rare amusement until a very late hour. A rising vote of thanks to the president for this treat concluded this, the first meeting of the year.

BANGOR, ME.—The sales at Christmas were about 20 per cent greater than last year, states Adam Sekinger. There were plenty of roses, but carnations and violets were scarce. The quality of the stock was, I think, better and the prices about 20 per cent higher than last year. There were but few bulbous flowers. There was a greater demand for roses and blooming plants. We sold all the azaleas that we could get. The sale of greens was more than before and there was a greater call for the cheaper plants. We sold more decorative plants than ever before.

LINCOLN, NEB.—An increase of about 35 per cent over the sales at Christmas, 1909, is the report of C. H. Frey. The quality of the stock was much better, we never had finer flowers, the supply was good and the retail prices about the same. Bulbous flowers were in good supply, but there was not much demand. There was a greater call for flowering plants. A much larger per cent of the business was cash sales than ever before, and the call was for the best stock. Ideal business weather prevailed, fine cold nights and sunny days.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

JOHN L. TURNER of Griffith & Turner, Baltimore, Md., passed away the first of the year.

VISITED CHICAGO.—J. C. Robinson, Waterloo, Neb., and Chas. M. Page, Des Moines, Ia.

MAULE'S (Philadelphia) general catalogue for the season of 1911 is being printed near Chicago by the Conkey Co.

THE Bateman Mfg. Co., Grenloch, N. J., makers of the Iron Age implements, will celebrate their 75th anniversary January 12.

AUSTIN, TEXAS.—The Cross S. Farming Co., Crystal City, capital \$1,000,000, has been chartered to purchase and sell seeds, plants, trees, etc.

CHICAGO.—Prices on the board of trade January 11 for grass seed were noted as follows: Timothy, \$9 to \$10 per 100 pounds. White clover, from \$22 to \$30.

THE Kimberlin Seed Co., Santa Clara, Calif., writes December 29, as follows: "We have had no rain for two weeks now and everything is very dry, nothing growing. We planted lettuce seed two weeks ago and it has not started yet. The California Cannery Co. planted 400 acres of peas two weeks ago and they are all rotting in the ground now, not enough moisture to sprout them. We have had 1.35 inches of rain to date against 5.45 this time last year. If we don't get rain in the next two weeks the crops will be cut off one-half in California this year."

THE hearing on the proposed new seed bill has been postponed and is now scheduled for February 2 at Washington, D. C. The American Seed Trade Association's committee on seed legislation, consisting of Watson S. Woodruff, Orange, Conn., chairman; Chas. N. Page, Geo. S. Green, Henry W. Wood, Kirby B. White, J. J. Buffington and A. L. Rogers will probably attend the hearing, also President Albert McCullough and committee, A. E. Reynolds, Chas. D. Boyle and J. G. Peppard, of the Wholesale Grass Seed Dealers' Association. Mr. Green is on both committees.

American Purchases of Japanese Lily Bulbs

Consul-General Thomas Sammons of Yokohama quotes the following statistics showing the exportation of lily bulbs from Japan to the United States from 1905 to 1909 inclusive:

Year	Number	Value
1905.....	4,854,215	\$ 84,056
1906.....	6,206,456	117,453
1907.....	6,646,674	141,803
1908.....	5,165,899	92,169
1909.....	6,637,924	132,723

The following sizes of bulbs are largely exported from Japan to the United States: Six to eight inches in diameter, seven to nine inches and eight to 10 inches.

How to Fight the Proposed Seed Bill.

That this bill, H. R. 29163, will be fought both in the House and the Senate by all reputable seedsmen goes without saying. One fundamental reason alone justifies every seedsmen in making the strongest fight possible everywhere to defeat it. That is the attempt of the law to brand the seed business as a dishonest one, one which by reason of the law itself is therein accused of being so disreputable and dishonest that it must be put under government inspection and prison penalties. Every seedsmen knows that no such foundation for the law exists. The assumption that more dishonesty exists in the seed business than in the average other business or profession is absolutely wrong. As a matter of fact the seed business is and must be, because of the nature of it, more honest than most other kinds of business. Any intentional variation from strict honesty in dealing in seeds is discovered by the purchaser in a few weeks or a few months and would necessarily ruin the reputation of the seller. The author and sponsor of the present bill has evidently paid no attention to the percentage of wrongdoing in this business or any other. Insignificant and unimportant errors or misdoings in connection with this trade have been magnified entirely out of proportion to the volume of business done. Before this bill is allowed to become a law or to pass either house, the trade has every right to insist that an unusual percentage of wrongdoing be proven against this trade, and that proof does not exist. It must be possible to get an equitable hearing in the senate on this proposition. It cannot be that the upper house will take away the business rights of the citizen as is proposed in this case with-

out the strongest definite evidence that the business is a disreputable one, and there is no such evidence obtainable.

First, the fight is to be made in the house. The names and city and state addresses of the members of the Interstate and Foreign Commerce Commission, who will be responsible for recommending this law to the House of Representatives, are as follows: -

James R. Mann, Chicago, Ill.
Irving P. Wanger, Norristown, Pa.
Frederick C. Stevens, St. Paul, Minn.
John J. Esch, LaCrosse, Wis.
Chas. E. Townsend, Jackson, Mich.
James Kennedy, Youngstown, Ohio.
Joseph R. Knowlan, Alameda, Calif.
Wm. P. Hubbard, Wheeling, W. Va.
J. M. Miller, Council Grove, Kansas.
Wm. H. Stafford, Milwaukee, Wis.
Wm. M. Calder, Brooklyn, N. Y.
C. G. Washburn, Worcester, Mass.
Wm. C. Adamson, Carrollton, Ga.
Wm. Richardson, Huntsville, Ala.
Chas. L. Bartlett, Macon, Ga.
Gordon Russell, Tyler, Texas.
Thetus W. Sims, Linden, Tenn.
Andrew J. Peters, Boston, Mass.

Every seedsmen should not only write to his representative in his state, but to business men of the highest standing in his community who have influence with such representative and explain to them the injustice of this proposed prison penalty act, and ask their aid in the fight.

Second, a similar letter or a stronger one should be written to each Senator of your state showing the injustice of the act. With such letter should be sent letters from your best citizens, bankers and men of prominence in your community, regarding your standing and the reputable and honest conduct of your own business, and protesting on their own behalf for you against legislating your business into the prison penalty class.

You should get these documents and this report ready to place before your representatives and your senators at once.

National Sweet Pea Society.

A meeting of the executive board of the National Sweet Pea Society of America was held at the Astor House, New York, on Thursday afternoon, January 6, President W. Atlee Burpee presiding. Secretary H. A. Bunyard announced that the National Flower Show committee had offered the society \$150 with which to arrange premiums for a sweet pea section at the Boston show next March, provided the society would duplicate the amount for the

same purpose, making \$300 in all. The offer meeting the approval of the board, the required \$150 was made up then and there. Wm. Sim of Cliftondale, Mass., produced a proposed schedule of premiums and after some discussion the same was accepted. The date for the Sweet Pea Day at the show was left to Secretary Bunyard and Mr. Sim to arrange. It will probably be March 29, and the society will meet in the evening. It was arranged that Prof. A. B. Beal be invited to present a paper at the meeting on "Trials of Sweet Peas Under Glass." G. W. Kerr of Fordhook, Doylestown, Pa.; Wm. Duckham of Madison, N. J., and James Wheeler of Natick, Mass., were selected to act as judges and Wm. Sim was elected to act as manager of the sweet pea exhibition. Many details as to entries were discussed and settled. It was decided that the scale of points for judging be as follows:

Stem	25
Color	20
Size	25
Number of flowers on stem.....	15
Substance	15

Suitable recognition, in the form of certificates to novelties and other exhibits not classed in the premium schedule, will be given.

In regard to seed trials during the coming season, the secretary was instructed to write seedsmen to furnish such seed of novelties and varieties for trial as it might be desired to try, and that the executive board suggested that the trial ground should contain not more than 100 of the latest varieties, and not more than 25 seeds of any one variety. A letter from Prof. John Craig was read, in which that gentleman regretted his inability to attend the board meeting, and asked for instructions in different matters relating to trials during the coming season. It was decided to hold a summer show this year, and that invitations be solicited from cities wishing to have the exhibition.

Imports.

During the week ending December 17, imports were received at New York as follows:

McHutchison & Co., 25 cases bulbs, 18 cases plants, six cases trees and shrubs and five cases trees.

DERRY, N. H.—The Benj. Chase label and stake factory burned on the morning of December 11 with great financial loss. Rebuilding and new manufacturing arrangements will be started at the earliest possible moment.

Breitmeyer Honored in Retiring.

At midnight, Philip Breitmeyer ceased to be mayor of Detroit. Three hundred of his friends seized upon this occasion to attest their regard for him. The gathering took the form of a dinner at the Cadillac, attended by men prominent in the city's business and political life. Personal tributes, spontaneous and sincere, voiced the affection and esteem in which the retiring official is held by his close associates.

Probably not since the complimentary dinner given a few years ago to the late William C. Maybury have so many of Detroit's best known citizens gathered to show their respect for one of their number. The huge dining room in the hotel was filled to its capacity by guests, who at frequent intervals shouted and sang the praises of Phil Breitmeyer, public servant for five and one-half years, who was returning to private life.

An orchestra which led those present in the parodies on the mayor and incidents in his city hall career, took up a place in the gallery at the extreme end of the dining room. At the other end Philip Breitmeyer, flanked on one hand by Gov. Chase S. Osborn, and on the other by John W. Anderson, the toastmaster, beamed as he welcomed the end of his rather eventful, if somewhat stormy administration in the mayor's office.

John W. Anderson, as toastmaster, succeeded in keeping his hearers in buoyant spirits throughout. He toasted and teased the guest of the evening and the other speakers responded until the hands of the clock reached and then passed 12 o'clock, when Philip Breitmeyer became a private citizen, succeeded in office by William B. Thompson, one of the guests of the evening.

The dinner, Mr. Anderson explained, later in the evening, was a "non-partisan republican banquet." It was the first time in his life, he said, that he ever had the privilege of paying \$5 to hear himself speak. After a brief introduction he presented Thomas May, who amused the guests with a number of crayon drawings.

City Controller Heineman paid a splendid tribute to the retiring mayor in response to his toast, "Phil Breitmeyer, the friend."

"The best answer to my toast is the crowd about him," he said. Mr. Heineman referred to the ex-mayor's optimism and said he thought there was but one time during his administration when Mr. Breitmeyer felt despondent. This was when the committee of 50 failed to settle the street car question.

Homer Warren laid particular emphasis on the integrity of Philip Breitmeyer. "No matter whether you agree with him or not there is no one who can say that his administration was marked by anything but straight-forwardness," he said.

Allan H. Frazer, who was to respond to the toast, "Phil Breitmeyer as a Politician," was in an especially humorous vein. He took a number of shots at Proctor K. Owens, at "the committee of 50," and at the guest of honor. "They say a politician is a spoilsman. You can't say that of Phil," he remarked. "For he goes out of office poorer than he came in. He is the rarest kind of politician that I have ever had to deal with."

Mr. Frazer referred to the outgoing mayor's selection of a police commissioner. "They picked Breitmeyer, a little German boy, so that he would appoint a liberal police commissioner, and what did he do?" He appointed Frank Croul. If Phil Breitmeyer had been a politician he might have appointed someone else."

Gov. Osborn was the last speaker on the program. He received a splendid ovation from the guests, who arose,

Dreer's Double Petunias.

OUR DOUBLE PETUNIAS, for more than half a century, have been the acknowledged standard. The strain this season is equal in high quality to its predecessors, and is well known to the trade.

We offer 15 distinct varieties, in strong, 3-inch pots, which will quickly furnish an abundance of cuttings. Strong, 3-inch pots, 75c per doz.; \$6.00 per 100; the set of 15 for \$1.00.

Seed of our **SUPERB STRAIN OF FRINGED PETUNIAS**. Double, 75c per 500 seeds; \$1.50 per 1000 seeds. Single, 50c per trade pkt.; \$1.00 per 1-16 oz.; \$1.50 per 1/2 oz.

Our Quarterly Wholesale Price List, issued January 1st, offers a full line of seasonable Plants, Seeds and Bulbs.

The above prices are for the Trade only.

HENRY A. DREER, Philadelphia, Pa.

shouted and waved their napkins in his direction.

"I came here for the same purpose that all of you did," began the governor. "To pay tribute to Phil Breitmeyer. What matters it whether a man is mayor or citizen when he has friends like these? I sometimes think that you good people hardly realize what Detroit means to the people out in the state. I want to tell you that on the night of the primaries we were more perturbed out in the state than were you. When Detroit is well governed we are all proud."

"Many pleasant things have been said tonight about Phil Breitmeyer. They were not half the echoes of your hearts. But if you can tonight by your presence give encouragement to men like Phil Breitmeyer then the benefit to be derived from this banquet will be more than social. We need more men like Phil Breitmeyer. We need them all over the state."

"I stand for everything that is best in Teutonic friendship. May I not suggest that the man who loves flowers loves children? I think you will agree with me that Phil Breitmeyer is the biggest chrysanthemum in Detroit."

—Detroit Evening News, January 10.

Lenox Horticultural Society.

The monthly meeting of this society was held in the Town Hall January 7. A letter was read from Elmer D. Smith, Adrian, Mich., offering a special prize for a vase of their chrysanthemum Lenox, to be competed for at the fall show. The society accepted the offering, and passed a hearty vote of thanks to Mr. Smith for his kind offer. It was decided that we hold the annual ball towards the end of the month, also the annual dinner sometime in February. Philip Gustavson was unanimously elected a member of the society.

FLOWER SEEDS

Catalogue free on application.
Stamp letters 5 cents; foreign post cards 2 cents

FREDERICK ROEMER,

Seed Grower, QUEDLINBURG, GERMANY.

The chief item of interest was a short but practical paper on orchids by Robert Grindrod, who has charge of the orchids under Thomas Proctor. The essayist dealt with cattleyas, laelias, phalaenopsis, dendrobiums and miltonias. The treatment of newly-imported plants, compost required, how to pot them, watering, shading, etc.; right away on until they were established plants, full of vigor in growth, and all beautiful when in flower. He laid great stress upon the need of firm potting, and had brought with him a cattleya which demonstrated fully what he meant by firm potting. A good discussion followed; Mr. Grindrod ably answered the questions put to him. He is a very able young man and will be heard of in the future. A hearty vote of thanks was accorded him for his able essay.

J. W. PYBUS.

Vaughan's Flower Seeds

Vaughan's International Pansies
The World's Best

This is one of the specialties which has established and held the reputation of Vaughan's Flower Seeds, and this is one which we maintain carefully, not alone as to quality, but in vitality and germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt., 50c; ½ oz., \$1.50; ¼ oz., \$5.00; oz., \$10.00.

Vaughan's "Giant Pansy Mixture"

Embraces, besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain. Trade pkt., 25c; ½ oz., 60c; oz., \$4.00.

Vaughan's Cut Flower Pansy Mixture

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers, who have realized big returns from the sale of the flowers. Pansies are as easily grown as violets, require less care and bring better returns. Trade pkt., 50c; ½ oz., \$1.00; ¼ oz., \$2.00. oz., \$8.00.

Pansy Boulogne Giant

This is a special selection of a French Pansy grower; the flowers are of the largest size, of great substance and fine form, and are borne on particularly strong stems. They are mostly 3 and 5 blotched, delicately veined, while the colors are rich and varied. Trade pkt., 50c; ½ oz., \$2.00.

New Preliminary Flower Seed List Ready. Please write for same if you have not received one.

10 Per Cent Special Cash Discount.

On orders over \$2.00 for Flower Seeds if the cash is enclosed 10 per cent. This discount does not apply to Asparagus Seed. Cash discount on this is 2 per cent.

VAUGHAN'S SEED STORE,

25 Barclay St., NEW YORK. 84 and 86 Randolph St. CHICAGO.
803-805 W. Randolph St.

Cleveland.

STOCK PLENTIFUL.

Cut flower sales for the week average about the same as the week before. Stock is about equal to the demand, excepting American Beauty and Richmond roses. The dark weather in November and December caused many of the plants to run blind. Pink and White Killarney are plentiful and stock exceptionally fine. Sweet Peas are being received in greater quantities. Lily of the valley of excellent quality is quite plentiful and finds a good market. Carnations are in good supply but clean up daily. Smilax is abundant and asparagus and adiantum are having a good sale. Boxwood sells well and the quality is fine. Stevia is about done, tulips and Paper White narcissus are plentiful and violets are having only a fair demand.

NOTES.

Smith & Fettes Co. had a very beautiful window display for the holidays. The store was crowded from floor to ceiling with flowering plants and cut flowers of the usual good quality. Frank Smith was on hand to conduct things in his usual business and gentlemanly way.

The Jones-Russell Co. report a very satisfactory Christmas business. Regular and extra clerks all working their best to keep up with the rush. Mr. Barber says there is a very noticeable increase in the year's business.

The bowling match between Alliance and Cleveland bowlers was postponed on account of the death of Geo. Bowditch's brother. Notice of new date will soon be published.

The Florists' Club will hold a flower show at the club's rooms at the first meeting in February.

The father of A. M. Coe, of North Olmstead, died this week at a ripe old age. C. F. B.

TO THE TRADE

HENRY METTE, Quedlinburg, Germany.

GROWER and EXPORTER on the VERY LARGEST SCALE of all CHOICE VEGETABLE, FLOWER and FARM SEEDS. (Established 1787.)

Specialties: Beans, Beets, Cabbages, Carrots, Kohl Rabi, Leek, Lettuces, Onions, Peas, Radishes, Spinach, Turnips, Swedes, Asters, Balsams, Begonias, Carnations, Cinerarias, Gloxinias, Larkspur, Nasturtiums, Pansies, Petunias, Phloxes, Primulas, Scabious, Stocks, Verbenas, Zinnias, etc. Catalogue free on application.

HENRY METTE'S TRIUMPH OF THE GIANT PANSIES, (mixed), the most perfect and most beautiful in the world, \$5.00 per oz., \$1.50 per ¼ oz., 75c per 1-16 oz. postage paid. Cash with order.

Market Gardeners

Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;
H. F. Hall, Grand Rapids, Mich., Vice-Pres-
ident; S. W. Severance, 508 Illinois Life
Building, Louisville, Ky., Secretary; M. L.
Ruetenik, Cleveland, O., Treasurer.
Annual meeting at Boston, Mass., 1911.

Prices of Indoor Fruits and Vegetables.

New York, January 7, 1911.—Mush-
rooms, 50 cents per pound; cucumbers,
15 cents each; lettuce, \$1.20 per dozen
heads; tomatoes, 40 cents per pound;
radishes, 60 cents per dozen bunches;
asparagus, \$7 per dozen bunches;
grapes, \$1.00 per pound.

Pittsburg.

PLENTY OF STOCK.

Very little can be said of the market.
Carnations and pink roses are not quite
so plentiful. There is just about
enough coming in to take care of the
orders. Stock of all other kinds is
very plentiful. Beauties and white
roses move very slowly.

NOTES.

The Gardeners' and Florists' Club
held a very successful meeting Tuesday
evening, January 3, and the following
were placed in nomination for the sev-
eral offices. For President, John Jones
and W. B. Allen; vice-president, P. S.
Randolph; treasurer, H. L. Blind; sec-
retary, H. P. Joslin; assistant secre-
tary, O. S. Crall; executive committee,
E. C. Reineman, John Bader, Niel Mc-
Callum.

Karl Klinke has formed a partner-
ship with George Werheim, who has
run a flower store at 4709 Liberty av-
enue for a number of years, and will
open a new store in the Jenkins Ar-
cade. While Mr. Werheim intends to
take care of the practical end of the
business, both are hustlers and have
ability, and we see no reason why
they should not get along.

H. L. Blind & Bro. had the decora-
tions for the 125th anniversary of
Lodge No. 45, F. & A. M., both at their
temple and the Rittenhouse, where the
banquet took place. Both were much
commented on as every plant showed
the decorator's art. Besides the plants
and wild smilax, American Beauties,
pink roses, lilies and Paper Whites
were used.

a business caller in town today.

A. W. Smith & Co. are getting some
very fine chrysanthemums from their
Canfield greenhouses. The Smith "Dol-
lar Box" got quite a call today. Same
contained 18 Pink Killarneys of qual-
ity. There could be no kick on this.

Zieger Company, Rittenhouse St.,
report a healthy increase in their busi-
ness right along, and are very much
pleased with their new store.

McRae & Jenkinson Co., New Ken-
sington, are closing out their East End
store on account of the building going
to be torn down.

One still sees the express companies
juggling Christmas plants that arrived
late and were turned down by local
florists.

Jacob Gerwig has severed his con-
nection with J. B. Murdock & Co. Last
week Jake became papa for the first
time.

Marshall Anderson has disposed of
his Bouquet street store in Oakland to
his cousin, J. Dunlap Anderson.

C. W. Gerdum, of Cleveland, O., was
H. H. Wiggins has closed his East
Franktown avenue store.

The McCallum Co. are receiving a
fine line of cattleyas, also special lily
of the valler.

H. Weber & Son, Oakland, Md., are
going to open a new store in Clarks-
burg, W. Va.

Jos. Thomas, Greensburg, reports his
Christmas trade as very satisfactory.

— Farney, of Rice & Co., Philadel-
phia, Pa., was a visitor. J.

St. Louis.

PROMISING OUTLOOK.

At the beginning of the week, prices
on carnations were low but by Satur-
day and Sunday they advanced. Vio-
lets have increased in supply and
sweet peas, except fancy stock, move
slowly. American Beauty roses have
been in demand but the stock received
is poor. Bulbous stock is increasing,
narcissus selling fairly well. The out-
look, with fair weather, is, however,
promising.

NOTES.

A meeting of the Retail Florists'
Association took place last Friday
evening at the Knights of Columbus
hall. The election of officers took
place, resulting as follows: C. C. San-
ders, president; Theo. Miller, vice-
president; F. C. Weber, Jr., secretary,
and Robert F. Windler, treasurer. A
banquet will be given January 14 to
which the wholesalers have been
especially invited.

C. Young & Sons Co. used large
quantities of wild smilax, laurel and
cut flowers at the Imperial ball. Geo.
W. Lapp, formerly with J. F. Am-
mann, of Edwardsville, Ill., is now in
the employ of this concern.

P. Krouwel, representing C. J. Speel-
man & Sons, Sassenheim, Holland, and
Lagarde & Spellman, Ollioules, France,
visited the trade this week.

Al Gromz, at Geo. Angermueller's,
was ill and unable to attend to busi-
ness for a few days last week.

The twenty-first annual report of
Shaw's Botanical Garden has been is-
sued.

The Kalisch Floral Co. disposed of
many cut orchids during the holidays.
The May Burns Floral Co. report a
good trade.

C. A. Kuehn is handling some very
choice Mexican ivy. W. F.

Cincinnati.

STOCK MORE PLENTIFUL.

Stock in general has been coming in
more plentifully and as a result prices
have fallen to their normal winter lev-
el. The demand seemed to have shift-
ed somewhat from the choicest of
stock to that suitable to be used in
work at a handsome profit to the de-
signer. The prices naturally are gen-
erally far below holiday prices. The
quality of the roses in the market is
unsurpassed. This is particularly so
of the Killarneys, Richmond and Amer-
ican Beauties but Brides, Bridesmaids
and Ivory are so good that they can
scarcely be called second choices. While
some growers seem to be some-
what off crops others are cutting
stronger and as a result there is a
promise of a full supply of roses of all
kinds with a possible exception of
Beauties. The market on the last
mentioned is somewhat tight with a
demand for medium size slightly in ex-
cess of the supply. The market can
at last supply the demand for car-
nations. The request is especially
strong for white and the lighter shades.
The darker colors showing a tendency
to accumulate. Callas and Longiflorum
of quality find a very ready sale. Dou-

ble violets have been selling very well
the last few days but at such low
prices that it is profitable to use them
in work. More single violets are com-
ing in all the time day by day. Lily
of the valley is selling well. Poin-
settias can be had in quantities at fair
prices. Narcissus and Roman hya-
cinths are very plentiful. The supply
of green goods is ample for all de-
mands with the exception of asparagus
plumosus of which only about half
enough arrives. Shipping business in
this city has been very good.

FLORISTS' CLUB MEETING.

The Florists' club met at Wm. Mur-
phys, 311 Main street. There was a
large and enthusiastic attendance. The
guarantee fund for the flower show
in the fall is fast reaching its goal.
James B. Allan, Al. Horning and Miller
were elected to membership to the so-
ciety. Wm. Murphy and President C.
E. Critchell were accorded a vote of
thanks for their hospitality in serving
refreshments. A vase of C. C. Mur-
phy's new seedling red was exhibited
and won unanimous approbation.

NOTES.

Julius Dilloff, representing Schloss
Bros., New York, was a visitor.

Chas. Murphy is cutting a full crop
of carnations.

The bowling scores at the last meet-
ing were as follows:

	1st game.	2nd game.	Champion- ship average.
C. Witterstaetter	180	172	169

The Nursery Trade

American Association of Nurserymen.

W.P. Stark, Louisiana, Mo., President;
E.S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N.Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June 14-16, 1911.

HELENA, MONT.—The employees of the State Nursery Co. were the guests of Manager and Mrs. Mills at a dinner on December 30, at their residence at the nursery. The host and hostess were pleasantly surprised by the presentation of a handsome cut glass water set, from the "boys" as a token of their esteem.

Notes From Southern California.

One of the noblest trees is the Australian banyan (*Ficus macrophylla*), which at first sight appears like *F. elastica* but has smaller slightly different foliage. Trees of this species 40 feet high and upwards are not uncommon and at the Homer Laughlin palace at Hollywood we noted a fine bit of planting: *Cocos flexuosa* with a trunk 14 inches in diameter and approximately 40 feet high; *Araucaria excelsa* about 50 feet high; a species of *arundinaria* about 25 feet and the *ficus* about 30 feet were very rich and effective owing to the variety in shape and tints of green of the foliage. Incidentally one of the finest effects in greens is frequently noted here in the rich, deep green of the olive groves and the lighter more lively green of the oranges. This contrast is most effective when seen in late afternoon or evening from the top of a hill, the effect of light and shade being then remarkably good. The loquat is used more as a lawn tree than for the sake of its fruit, though this ripens thoroughly here and the same is true of the Californian cherry.

All the varieties of the Chinese hibiscus do well here and if the roots are well irrigated during the dry season they keep in wonderfully good order. The comparatively new variety, Peach-blow, is a most effective and beautiful thing, with its warm, rosy-pink coloring and large double flowers. Several of the cassias from Buenos Aires and the West Indies are perfectly hardy here and grow very rapidly. Covered with the bright yellow flowers they are very attractive but of a rather untidy habit, and a far more attractive plant to our way of thinking is the old *Tecoma stans* (*Bignonia stans*). This forms an erect, handsome shrub and when covered with the large, tubular, clear yellow flowers is most distinct and attractive. The climbing species of this genus are very freely planted about the verandas and porches, *venusta* being probably the finest of all. The lovely flowers are the brightest crimson—and a fine plant, well flowered, is sure to attract attention. *Bougainvillea glabra* is planted almost too freely. It is true it makes a magnificent show, climbing to the top of the tallest houses and remaining a solid sheet of flower for many months, but there is something about the color of the flowers that does not harmonize with anything else. With just a reference to two rather remarkable plants, we will close these somewhat rambling notes: *Erythea armata*, the blue palm of California, is a striking fan palm with large glaucous leaves and is very fine when planted in a mass; *Casuarina equisetifolia* is an upright evergreen pine-like tree with

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

84-86 Randolph St. CHICAGO 25 Barclay St. NEW YORK.

A Grand New Carnation

Bright Spot

Outclasses everything heretofore grown in the dark pink class.
 Won first honors in the 100 class for best dark pink at the
 A. C. S. meeting, Pittsburg, January, 1910, also at the Chicago
 Flower show, November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early
 and continuous bloomer, brings fully 25 per cent more flowers to the
 plant than Lawson at its best; flowers well shaped on long wiry
 stems; calyx does not split. It is a good shipper, and the cuttings
 root easy.

Price per 100, - - -	\$ 12.00	Price per 5000 - -	\$400.00
Price per 1000, - - -	100.00	25 at 100, 250 at 1000 rates.	

Place your order now, to be in on early deliveries.

Roses for 1911

Dark Pink Killarney.

A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. When Killarney is pale, Dark Pink Killarney is bright and cheerful.

Grafted plants only, from 2 1/4-inch pots.
\$20.00 per 100; \$180.00 per 1000.

Lady Cromwell.

A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer and a color that sells.

Grafted plants only, from 2 1/4-inch pots.
\$30.00 per 100; \$250.00 per 1000.

Radiance.

Strong in growth and making plenty of stem. Cerise pink in color.

Grafted plants, \$18.00 per 100; \$150.00 per 1000
Own root, 10.00 per 100; 90.00 per 1000

Double Pink Killarney.

Originating with Robert Scott & Sons, who supply us the wood for grafting. Stronger in growth than Killarney and with at least ten more petals. A wonderful improvement.

Grafted stock only.
\$30.00 per 100; 250.00 per 1000.

Mrs. Aaron Ward.

By far the most pleasing of the yellow roses now on the market. A general favorite, and one which will be widely grown, for yellow roses are in demand.

Grafted plants, \$25.00 per 100; \$200.00 per 1000
Own root, 12.00 per 100; 100.00 per 1000

Melody.

We have reserved for our orders own root plants of this choice novelty. No grafted plants.
From 2 1/4-inch pots,
\$30.00 per 100; \$250.00 per 1000.

Prince de Bulgarie

The best prices for cut flowers should be the standard for judging roses, and this rose has been the money getter. Strong and vigorous in growth, and with its beautiful shell pink bloom it has sold on sight. One of the best roses grown.

Grafted plants, \$20.00 per 100; \$180.00 per 1000
Own root, 15.00 per 100; 120.00 per 1000

Killarney, White Killarney, Richmond, My Maryland, Kaiserin Augusta Victoria.

These are the old standards, and we are headquarters for young stock.

Grafted plants \$15.00 per 100; \$120.00 per 1000
Own root, 2 1/4-in., 6.00 per 100; 50.00 per 1000

Lager & Hurrell, Summit, N. J.

Portland, Me.

The florists report that the holiday sales were fully equal to last year. Prices were high on carnations and roses.

S. C. Allen is now in Boston and will take charge of the seed department of the Park & Pollard Co., which they will open in connection with their poultry supplies and feeds. Park & Pollard are the originators of the Dry-Mash Feeding System. A.

We Can Still Supply

IN FIRST-CLASS CONDITION:

Araucarias

OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the *Araucaria Excelsa*, *Robusta Compacta* and *Glaucia*. 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the *Araucarias* in the future.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5 1/2-6-7 in. pots, 15-18-20-25-30 in. high, 3-4-5-6 tiers, 2-3-4-5 years old, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant 6-in. pot, 4 years old, 4-5 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6-in. pot, 5 year old, 25 in. and over, as wide as a bushel basket, 5-6 tiers for only \$1.00; and what do you think a holy terror 30 in. and over, 5-6-7 tiers, worth \$200, for only \$1.25 to \$1.50.

Robusta Compacta, *Excelsa Glaucia*, 6-in. pots, \$1.00 \$1.25, \$1.50 to \$2.00 each.

We also have the nicest *Araucaria Robusta Compacta* and *Excelsa Glaucia*, a house full, for only \$1.25 to \$1.50, worth double.

Primula Chinensis, mostly white, 5 1/4-in., \$2.50 per doz.

Asparagus Sprengeri, 2 1/2-in., 3c; 4-in., 10c.

Jerusalem Cherries, or *Solanum* 6-in. pots, 25c, 35c, 50c.; full of ripe berries.

Dracena Bruantii, 25 to 30 in. high, 6-in. pots, 40c to 50c. Highly recommended for store and house decoration: stands heat, cold and dust.

Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

Adiantum Hybridum, 6-in. pan, 25c to 30c.

Azalea Indica, Easter forcing: *Vervaneana*, Professor Wolters, *Empress of India*, *Schryveriana*, double variegated 60c, 75c \$1.00 to \$1.50; *Mme. Van der Cruyssen*, *Simon Mardner*, pink, *Niobe*, white, *Apollo*, red, 60c, 75c, \$1.00, \$1.25 to \$1.50. In large plants we have *Niobe*, *Helena Thielman*, *Bernard Andreas Alba*, white, *Mme. Van der Cruyssen*, and others, \$1.50, \$2.00 to \$2.50.

Kentia Forsteriana, in fine shape, 6-in. pots, 30-35-40-45 in. high, 4-5-6 years old, 75c, \$1.00, \$1.25 \$1.50, \$2.00 to \$2.50 each.

Kentia Belmoreana, 30-35-40 in. high, 5-5 1/2-6-7 in. pots, 5-6-7 years old, \$1.00, \$1.25, \$1.50 to \$2.00 each.

Kentia Belmoreana, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00; 4-in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine *Boston*, *Scottii*, *Whitmani* and *Scholzii*, 5 1/2 and 6-in., 35c, 40 and 50c; 7-in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

Neph. Glatfashi, a new beautiful fern, an improvement on *Scottii*, much shorter and bushier than *Scottii* 5 1/2 in. pots 50c; 3-in. pots, 25c.

Pteris Wilsoni, 3 large bushy plants in 6-in. pan, 30c to 35c per pan.

Ferns for Dishes, big assortment, 2 1/2-in. pots, at \$4.00 per 100.

Cocos Weddelliana, 3-in. pots, 15c, 18c and 20c.

Spiraea Cladstone, started, in 5 1/2 to 6-in. pots, at 15c, 20c to 25c.

Cineraria Grandiflora Hybrida, Aschmann's so well-known superior strain which brought as high as one dollar a plant wholesale last Easter. Now is the best time if you want good plants for Easter. We have a very large stock of 4-in., ready for a shift into 6-in.; price, only \$10.00 per 100; 3-in., \$3.00 per 100.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

GODFREY ASCHMANN

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

WHAT THE USERS SAY

TEST AT 12° BELOW ZERO WITH HEAVY WIND

The No. 7 Kroeschell Greenhouse Boiler is heating 10,000 square feet of glass—it will take care of 15,000 square feet. We had no trouble to keep up temperatures when it was 12 below zero, with a heavy wind. The boiler has given entire satisfaction, and it is certainly an up-to-date affair and we would use no other.

CERNY & ROWE, Kirkwood, Mo.

KROESCHELL BROS. CO., 452 W. Erie St., Chicago, Ill.

Ready Reference Section.

10 CENTS PER LINE, NET.

ALTERNANTHERAS.

Alternantheras, red, yellow and Brilliantissima, rooted cuttings, 60c per 100; \$5 per 1,000; 2½-in., \$2 per 100; \$18 per 1,000. Mosbæk Greenhouse Co., Onarga, Ill.

Alternantheras, yellow, R. C., 60c per 100. Jos. H. Cunningham, Delaware, O.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. \$3.50.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. \$2.50.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. \$1.25.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. \$1.50.

THE GOLDFISH (Mulertt).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. \$2.00.

THE CULTURE OF WATER LILIES AND AQUATIC PLANTS (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.

American Florist Co. 324 Dearborn St. CHICAGO

Chicago New York

Albany, N. Y.

At the January meeting of the Albany Florists' Club the officers for 1911 were installed, one new member elected, two applications received, and an interesting discussion held upon three trade questions. President Frederick Goldring presided for the last time and after calling the meeting to order and accepting the name of Arthur Zirkman of M. Rice & Co., Philadelphia, as member of the club he resigned his chair to Frederick A. Danker, the new president. Frederick Henkes and Patrick Hyde were named a committee to escort the new officers to their chairs. Under the head of good of the club President Danker drew from the question box three enquiries: "What is the proper temperature for growing Killarney roses?" "Is primula obconica guilty of all the charges brought against it?" and "What is the object of the Florists' club?" Under the first question it was found that members kept a night temperature in their houses of from 58 degrees to 62 degrees. The consensus of opinion was in favor of the higher temperatures. In regard to primula obconica an interesting letter from the Bender Hygienic laboratory of this city was read. The director made mention of experiments in which the leaves of the plant were macerated in a mortar and both aqueous and alcoholic solutions made of the extract. In one experiment the solution was applied to the skin of rabbits from which the hair had been shaved and in the other it was applied on the hands, antiseptically cleaned first, of 55 students in the Albany medical college. No developments fol-

Let's Talk Business

Does it pay you in the long run to take the risks--to be your own contractor, and have to stand all delays on your greenhouse materials or erection? Just for example: Suppose you shop around for your materials, buying them here, there and everywhere, from at least half a dozen concerns, and what happens?

You are subject to the delays of six different firms, doing business six different ways, shipping your materials at six different times.

You engage mechanics for a certain date, and when they come, half the materials have not arrived--the work can't go on and the men must go off to another job. Finally, when you are actually ready, the men cannot come and you are held up again waiting for them. So much for being your own contractor.

Now suppose you had placed the entire job with us--materials, erection and all? You could then hold us responsible for the complete proposition. Any delays on shipments of materials, so the men couldn't work, would be our funeral.

Any dissatisfaction concerning the materials or work, you could then adjust with one firm.

When completed, you would have the best possible house and equipment for the money. One not excelled by any other in the business. One that would not be a collection of unrelated parts, but everything made with an idea of meeting the exact demands of your particular case.

Whichever way you decide to place your order, whether for materials alone, or for materials and erection, you will save money in the end by placing that order with L. & B. Try it and see if you don't.

If You Intend to Build This Year

Let's get together and talk this greenhouse matter over. In a short time building will be going merrily on, and you want to have things all settled so your new greenhouse will be among the number. Now you know the kind of houses we build--and that there is none better--you know that we have a reputation for pleasant dealing, so send for our illustrated matter--and let's get together and do business.

Elizabeth, N. J.

lowed in any case. At the meeting, nevertheless, numbers insisted that they had been poisoned by handling the plant. The third question was disposed of by a general agreement that the object of the club is to promote better acquaintance among members of the trade through the medium of social intercourse.

R. D.

COLONIE, N. Y.—Josiah L. Young filed a petition in bankruptcy December 27, with liabilities of \$21,315 and assets of \$17,744, including stock in Troy and storehouse and greenhouse in Green Island, valued at \$10,000. There are over 200 creditors. Building, loan and insurance companies have secured claims for over \$7,000.

Tacoma, Wash.

The holiday business for 1910 and 1911 is now past. Taken as a whole the volume of business exceeds that of any previous year and while it is an apparent fact that no individual florist reports anything especially good or any great increase—unless it be just one exception—the reason is easy to locate when we consider the increased number of stores lately started. The supplies were equal to the demand and stocks generally good—though many carnations brought in showed signs of too much heat and were cut too soon. Prices at retail were the same as last year, but the wholesalers advanced theirs. Roses were rather scarce and of inferior grade. Violets from California arrived in fine condition and were all sold. English holly was plentiful and quality good. Our stores were fortunate this year in not having all market men handling it in competition. Some very good chrysanthemums were to be had—they retailed at \$3 to \$5 per doz. There was a surplus of poinsettias, many of them very inferior.

NOTES.

Tacoma Floral Co. reports a fine business and Mr. Beal tells that "not a plant in bloom was left and our sales just double those of December, 1909." No cause for discouragement in this.

Northwestern Floral Co. sold out a lot of plants by putting a fine showing into a store room alongside the California Florists' Co.

Mrs. Watson, in the Public Market building, handled a nice lot of stock and cleaned out practically everything except some small plants.

John Hamilton & Son have a new store on K street near Eleventh and get their proportion of business all right.

California Florists enjoyed a good trade, and plants, cut flowers and greens were about all cleaned out.
S. L. H.

Fishkill, N. Y.

The new factory of the Hammond Paint and Slug Shot Works is now completed and was placed in operation the beginning of the new year. The building at the "northeast corner of the long dock" in which Mr. Hammond located when he came here years ago from Mount Kisco has been vacated and the factory entirely removed to "Hammond's Corner."

The erection of the factory was commenced at the close of last spring, the corner-stone being laid June 22. The building was completed about a month ago and dedicated by the holding of a bazar and dance for the benefit of the fund for the new Bank Square fountain, which will replace a former drinking fountain known as "Hammond's Fort," a picture of which is among the papers and articles deposited by Mr. Hammond in the corner-stone last June. Mr. Hammond is beginning the year in a brand new building at the gate of the town.

BRIDGETON, N. J.—Mrs. Rae has closed her store on High street, as the building has been leased, and has moved the stock to her greenhouses on Seventh street.

PORT CHESTER, N. Y.—Edwin E. Leonhardt, son of Emil Leonhardt, and a member of the florist firm of Emil Leonhardt & Son, was married to Miss Louise Lennin, of New York city, December 17.

HARRISBURG, PA.—A fire of unknown origin destroyed the boiler room, warehouse and several greenhouses of H. S. Miller near Summerdale January 1. The loss is estimated at several thousand dollars.

Montreal.

Christmas business this year was good. It is confidently estimated that the increase in sales amounted to fully 35 per cent, but the plants and flowers sold will not quite reach that advance, 25 per cent being about the right figure, the difference being in the increased price of the stock which in some cases amounted to almost double what they brought some years ago. Poinsettias in pot plants easily took first place, azaleas next, cyclamen, Primula Obconica, Begonia Gloire de Lorraine and Glory of Cincinnati and a nice lot of tulips in pans sold well. Altogether there hardly was a good flowering plant left unsold. Cut flowers were more plentiful but the prices were high. There was a splendid lot of greens which had a large sale.

NOTES.

Hall and Robinson's sales were a thousand dollars more than last year, which some years ago was considered the largest sales made by the leading stores for the entire Christmas week. Their plants were all home-grown, as were a large percentage of the cut flowers. They had an immense stock of poinsettias but all were sold except a very few.

The cut blooms from the St. Bruno Floral Co. were a superior lot, noticeably Richmond and Killarney roses. This company, encouraged by their success, is going to build an entirely new range of houses near St. Bruno Station where they have purchased a farm.

Rougemount, a concern operating a large range of houses for the forcing of vegetables, was sold at auction. A syndicate of Montreal financiers were the purchasers at a price which is said to be in the neighborhood of \$35,000.

At McKenna's, the largest store in town, everything was cleaned up except a few Boston ferns. Poinsettias were the first to be sold and azaleas next, and they had a splendid lot of both.

LUCK.

Salt Lake City.

The holiday rush is over and the florists all seem to be glad of it. Cut flowers sold well and at good prices. There was not near enough local stock and quantities of cut flowers were shipped in, arriving in a remarkably good condition, which is very unusual for Salt Lake at holiday times. We have to ship our stock from a long distance when our home production is exhausted, some coming from Chicago, but the majority from Colorado points and Council Bluffs, Iowa. There was an increase in the call for blooming plants, especially azaleas, and good call for lily of the valley in pans. The weather being cloudy the cut of carnations and roses was very light. Holly and greens sold fairly well, most of the green business being done by the grocery-men and fakers, the florists only handling a few cases each to accommodate their best customers.

NOTES.

The Gens Floral Co. retired from the florist business January 1. Mr. and Mrs. Gens have worked faithfully at the retail florist business in this city for nearly six years. Their success was a surprise to some of the florists here, as the flower business was new to them, neither of them having had any previous experience. They have maintained the highest-priced store in the best location in the city and they are leaving this city with the good will of their competitors and customers. They will spend some time in traveling before locating again.

NEW YEAR'S ROSE TOURNAMENT.

The New Year's pageant of flowers, held January 2, was one of the most magnificent spectacles imaginable. The "Crown City" is beautiful at all times, but on this lovely January morning under a blue sky with a faint breeze from the nearby orange groves laden with their delicate perfume, and the sun shining warm and bright, the setting for the really splendid show was absolutely perfect. The streets were lined with palm fronds and bunting, almost every building being elaborately trimmed with asparagus plumosus, Cherokee roses, pepper boughs and orange branches laden with fruit. The Queen of the Tournament (Miss Ruth Palmer) rode in an exquisitely built barge, drawn, apparently, by a large swan of white roses attached by ropes of smilax, a most beautiful conceit. The number of floats, automobiles and other decorated vehicles numbered over 100, and in richness of design and decoration left nothing to be desired. To mention a little of them would take far too much space, but a few of the most striking may well have notice.

The South Pasadena Magnet float was very attractive and was supposed to be symbolic of the drawing powers of the lovely spot. The magnet was made of 20,000 white roses and an immense number of scarlet geraniums. The base was of flaming poinsettias and was drawn by six coal-black horses with blankets and collars of scarlet flowers. Fifty thousand violets and chrysanthemums were used in the Realty float by the chamber of commerce, the golden yellow chrysanthemums rising in the form of an immense sun from a cloud of blue violets. The Covina city float, representing the orange packing industry, was a marvel of detail, perfectly carried out, and applauding sightseers were rewarded by oranges tossed from the float by attendants. Thousands of the golden fruits were thrown out all along the line of march as a New Year's gift from this thriving center of orange culture. Another float from the citrus country was entered by the Azusa chamber of commerce. Against a background of snow-capped mountains, fruit bearing oranges a cascade of water and a horn of plenty typified the need of water to produce this luscious fruit.

The Japanese American Association of Pasadena had a characteristic float with a typical Japanese garden worked out in perfect detail. Dwarfed trees, rustic bridges, a bamboo arbor covered with wisteria and running water were among the details and quaint little Japanese children, daughters of prominent members of the association, lent the touch of life that alone was needed to perfect this elegant entry. Bells of sweet peas, to "ring out the old, ring in the new" year were suspended on the Raymond hotel float and swung to and fro as the procession moved along. This alone was worth a journey to the "Crown City." Other fine entries were from the steamship Morehead, Cleopatra's barge with thousands of violets papyrus and ferns with a canopy of daffodils, the fire department exhibits and the beautiful float from the Hotel Maryland. In short, the whole spectacle from first to last was a magnificent success in every way. H. R. R.

Annual Convention at Baltimore, Md., August,
1911.

CHRYSANTHEMUM SOCIETY OF AMERICA

Annual convention and exhibition in conjunc-
tion with the St. Louis Horticultural Society, St.
Louis, Mo., November, 1911. ELMER D. SMITH,
Adrian, Mich., President. C. W. JOHNSON,
Morgan Park, Ill., Secretary.

THE AMERICAN CARNATION SOCIETY.

Next annual convention and exhibition at
Boston Mass., March 29-30, 1911. FRED BURKI,
Pittsburg, Pa., President; A. F. J. BAUR, Thirty-
eight St. and Senate Ave., Indianapolis, Ind.,
Secretary.

AMERICAN ROSE SOCIETY.

Next annual meeting and exhibition at Boston,
March 27-28, 1911. WM. H. ELLIOTT, Brighton,
Mass., President; A. FARENWALD, Roslyn, Pa.,
Vice President; BENJAMIN HAMMOND, Fishkill-
on-Hudson N. Y., Secretary.

Our Supplements

Subscribers should see that they get copies of
the fine supplementary illustrations showing
high grade design and decorative work. These
fine supplements should be carefully pre-
served, as they mean much to the retail florists
in dealing with their customers, illustrating as
they do the various kinds of work that the
everyday florist is called upon to perform.

The papers in which the supplements appear
should be likewise preserved, as they contain
much valuable data with regard to these special
illustrations. Subscribers should see that they
get every issue as otherwise they may miss
some of this high grade work.

GREENHOUSER'S OBSERVATIONS

Correct Atmosphere.

If there is one single point that the
average greenhouse grower falls down
on more frequently than any other
it is that of providing a correctly bal-
anced atmosphere in the houses. Air,
light, heat and moisture are all rela-
tively important and when any one
is neglected or in such over-supply as
to upset a proper balance then some-
thing is going to suffer. A correct at-
mosphere is not easy to define and
what is proper and right for one class
of plants is wrong for another—what
is right at one time of the year is
wrong in another and what is correct
in winter in California would be a long
way out in Indiana or Illinois. Look
out for that grower who has a set
formula for all and every occasion.
It is in the meeting of varied condi-
tions that arise, in looking ahead and
arranging for contingencies that the
successful grower differs from the
mediocre. This question of atmos-
phere was brought very closely to our
attention recently when speaking to
a grower who had not much personal
experience in orchid-growing but who
had listened to a "multitude of coun-
sellors." One had advised him to lay
out money in shallow iron tanks to
place under the stages, filled with
water, to replenish the moisture in
the air; another had shown him a new
method of planting orchids to save
the trouble of potting; instructions as
to watering and withholding water at
various times, shading and ventilating
at stated hours and many others equal-
ly well meant and given. But none
of these advisers thought it necessary
to remind him to keep up a correct
temperature in the houses, an atmos-
phere that makes one feel, directly
they enter, that the plants are, or
ought to be, enjoying life.

Atmosphere for Roses.

Again a rose grower was troubled
with thrips. All kinds of learned and
unlearned discussions as to the various
attributes of cayenne pepper, nicotine
preparations, cyanide fumigations and
others were indulged in and one after
the other recommended but none ad-
vised the moistening of dry, dusty cor-

ners in the houses and the mainte-
nance of an atmosphere in which the
plants would thrive and the thrips be
uncomfortable. But it is an important
point, brother growers, this suiting of
the atmospheric conditions to the needs
of the plants grown. No one with an
atom of practical greenhouse sense
would advise the same amount of mois-
ture in a rose house in the afternoon
as he would in an orchid house or the
same amount of heat in forcing a
house of lilies in the early stages as
a house of crotons. Circumstances
alter cases here as everywhere and
that is where the grower who thinks
ahead and who looks before he leaps
and suits the atmosphere of his houses
to the conditions of his plants will al-
ways score over the one-idea, rule-of-
thumb grower who has a set rule for
all and every occasion.

Plants With Fragrance.

Fragrant flowers are always accept-
able and there are very few so sweet-
ly scented as those of the Japanese or
Chinese osmanthus, (*O. fragrans*). If
there is a plant of this almost hardy
shrub in a greenhouse with only one
or two of its pretty little creamy white
flowers open it will be noticed directly
one enters. Its fragrance is like that
of *Boronia megastigma*, sweeter but
not so heavy as that of freesias, and
anyone with a retail store who grows
part of his own stock would probably
be able to sell a few plants of it at
a good price and also recommend it
as an easily-grown subject for the
house or window. *O. fragrans* is also
known as *Olea fragrans* but is so dis-
tinct from the olives generally that
osmanthus seems a more suitable
name. The plant is easily propagated
by cuttings made from the semi-rip-
ened wood in a frame or cool green-
house temperature and at no season of
the year is any great heat required,
it being, as mentioned above, almost
hardy. A peaty compost and firm pot-
ting are to its liking and frequent
spraying while in active growth will
keep insects in check. And speaking
of fragrance, how many people now
ever think of or grow the old *Diosma
ericoides*? The flowers are nothing to
boast of but the plant when sprayed

or rubbed slightly in passing emits a most delightful odor. It is like a heath in habit, hence the specific name and is easily grown in a cool greenhouse.

The Trash Pile.

A big trash pile usually denotes a progressive florist but the trash pile should be outside the greenhouses, not inside. Some people have a perfect mania for keeping all kinds of plants around that never will and never can pay for the room taken up. Out of a batch of lilies there is almost always a certain number of diseased plants and these are usually quite easily seen soon after the growth starts. Throw them out at once. They are absolutely useless and never will pay one cent for time and water. Again after forcing azaleas there are often some plants left over. If there were a hundred or two and they had been properly potted instead of being just rammed into the pots any old way, as is usual, then it might pay to look after them and hold them over another year, but when there are only a few plants they will be an eyesore all the year and will not at the end of that time be worth the 40 or 50 cents that a good new plant will cost. For it must be remembered that we don't grow hyacinth bulbs; they are simply brought here ready to flower and after flowering, practically all are thrown away.

Another section of the indoor trash pile is often devoted to rose plants that for some reason or another were not planted in due season. The grower does not throw them away, thinking that in some unaccountable way they are going to be used some day. But they never are and they are kept kicking about all summer and all winter until rose-propagating time comes around again. Then when the best part of a year has been wasted on them the grower at last decides that they will not be needed and out they go, having meanwhile bred enough red spider or thrips to stock an acre of glass. Rubbish has been described as "useful material in the wrong place," an apt definition, for all this kind of trash, rotted down, burnt, or otherwise disposed of, has a certain value, but keep it out of the greenhouses until it has been so treated. To be a financial success every available inch of space must be utilized for something that is all the time growing into money—there should be no out-of-the-way corners for cripples and has-beens.

GREENHOUSER.

Use of Basement.

ED. AMERICAN FLORIST:

I have a basement 13x40 feet and six feet high, light and dry. Can I make use of it for anything except mushrooms. BILL.

The basement can, of course, be used for storage, but the question is not very clear and if it is meant to inquire whether the basement can be used for growing anything would say that this is hardly probable, but if the basement can be kept very cool it will make an ideal place to keep the bulbs after they have become well rooted until they are brought up into the greenhouses. W.

KOKOMO, IND.—W. W. Coles has his finely equipped floral establishment here up for sale, the cause being family health troubles which compel removal southward. Mr. Coles plans locating near Houston, Texas, when he disposes of his property in this city.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

The Cross.

SEE SUPPLEMENT WITH THIS ISSUE.

The cross as a floral design for funeral work has always been popular with many people and is arranged either to lie flat, reclining or standing upon a base. All three designs are capable of elaboration but the standing cross and base can be arranged in large sizes and with the most expensive flowers, making it a very highly finished product of the designer and a costly offering. While the frame should be adhered closely enough to not to lose the form of the cross, yet compact work is no longer in vogue with the better designers and the large standing crosses can be made very lovely and with much longer-stemmed flowers, making the work much more artistic

Wreath of White Killarney Roses on Easel.

Arranged by Young & Nugent, New York.

and still at the same time preserving the form enough to make it plain to the hurried observer what the design is intended to represent. The cross may be made of all the different light colored flowers in their season and with several kinds artistically arranged or of any of the nicer flowers exclusively. Crosses of roses are often designed with adiantum or other handsome greens to properly finish them and orchids and lily of the valley are used in the finest work. The many different handsome varieties of foliage are also often used, as well as the galax, ivy and other greens, but to make these arrangements handsome, some select and expensive flowers should be used, either in the shape of garlands hanging from the arms of the cross or in well arranged sprays on the face, which will greatly relieve the sameness and add to the artistic effect. The base of the standing cross gives the designer an opportunity to prove his ability, for here the form need not be followed at all and the personal taste has full sway in developing a very

handsome piece of work. Long-stemmed roses, lilies, callas or any of the large, prominent and select flowers can be most artistically arranged in these foundations for the cross. A very effective background for the base is made of the fronds of cycas, which can now be procured, and they add very materially to the makeup. It is not necessary to adhere to the mound form for it is often much more effective to have one side of the base at the back built much higher than the rest, gradually sloping toward the front and the other side made a little lower in order to obtain the proper balance. These features all depend upon the artistic ability of the designer and present an opportunity for the best thought and labor. The design which is so beautifully illustrated in the supplement accompanying this issue is an example of the way in which a design of this kind can be arranged, the cross is of galax with sprays of lily of the valley and the base of lilies and asparagus and leucothæ sprays.

January Flowers in Chicago Retail Stores.

The usual after-holiday conditions prevail in the retail stores but the mid-winter trade has held up well and a very satisfactory business has been enjoyed since the advent of the year. There has been an unusual amount of funeral work, much of which has been elaborate and expensive, and weddings, coming-out parties, banquets and receptions have kept things very busy. The stores are all very attractive and an extensive line of seasonable stock is to be found on all the counters and in the refrigerators and window displays.

The beautiful roses claim first attention and are to be found the great feature at all the stores. American Beauty is, of course, the leader and superb blooms are to be seen and its popularity with the buyers is increasing every year. Killarney and My Maryland are beautiful as are the Mrs. Jardine, White Killarney and the brilliant Richmond Perle des Jardin is still the best yellow but Sunrise is very well liked for some purposes. The carnation is as great a favorite as ever and the blooms are of excellent quality. The varieties seen at the stores are numerous, Enchantress being the most popular. The novelties are taking well especially Dorothy Gordon. The sale of the red varieties drops off after the holidays and there is scarcely any call for the crimson. Violets seem to be losing ground, though quantities of both the double and single varieties are still handled. The production of so many other attractive flowers for corsage work and personal adornment have replaced this once popular flower. Orchids can now be procured in quantity and in beautiful variety. Cattleyas, oncidiums, lælias, dendrobiums and cypripediums are to be seen, but the cattleyas have the call, and the demand for this most exquisite flower is increasing. Sweet peas in white pink and lavender are in fine shape and these sweet flowers give a touch of summer to the different spots where they are shown. Lily of the valley, that is so delicate and beautiful, touch up the window displays and the other places where seen. The immaculate lilies make a most beautiful showing and the finest of the large showy flowers procurable at this time

of the year. The bulbous flowers are beginning to make their appearance both tulips and narcissus being seen and the yellow trumpets are a welcome and bright addition during the short dark days. Among the other flowers shown are marguerites, lilacs, bouvardias, antirrhinums, pansies, lupines, Paper White narcissus and Roman hyacinths which all have their place in the great midwinter display.

At Muir's, on the south side, beside the usual grand display of roses, carnations and the full line of seasonable stock, were seen many of the exotics procurable during the mid-winter season, and a novelty in the shape of a very delicate lupin was noticed. The usual fine stock of lily of the valley was on show, and a trip through the greenhouses saw the pips producing their flowers. A very fine trade is being enjoyed and business has held up well ever since the holidays. Plant trade has been good and a large number of funeral designs have been arranged. The greenhouses are being rapidly transformed from the Christmas display to Easter, and a fine lot of plants is being started for the latter date. The new Studebaker auto-delivery car, which is the pride of W. J. Smyth, has been in active use since Christmas, for a very fine trade has been in progress all the year. The usual high-grade stock which this store always carries was on display, and a novelty that is meeting with much favor is the new Japanese basketware, filled with small ferneries. It is very handsome and having a good sale.

Orchids are lavishly displayed and being received with much favor by the trade enjoyed by C. A. Samuelson, and a very fine assortment was shown, both in the window and on the counter in the store. A very handsome plant of *Cattleya trianae* bearing 15 magnificent blooms was an attractive centerpiece in the window, which was greatly admired by the passersby and everyone stopped to look upon the beautiful specimens. The demand for these exotics is increasing every year, states the proprietor, and as the prices have now reached a place where the trade feels that they can afford them and a more constant supply assures them that they can be obtained, the sales increase which is an indication of a tendency for the best that the market affords. A grand display of roses and other seasonable stock was noted, including some very nice Trumpet major narcissus. John Mangel always has an attractive store and his windows arranged to draw the attention of the customer. Violets are always a pronounced feature as well as the finest roses upon the market. The display of orchids in the window this week was very beautifully presented, the blooms being arranged upon branches of cork placed in a tree form, making a very natural as well as artistic effect. Banquets and funeral work have kept all hands busy, some very elaborate casket covers having been arranged and a dinner at the Blackstone this week called for a large amount of flowers. Decorations and banquets following each other through the month at hotels, clubs and halls, as well as a liberal demand for fine funeral work have kept things humming at Strail & Hahn's and an exceptional good business is being enjoyed.

The beautiful store of Fleischmann was resplendent with the finest roses,

sweet peas and exotics, and trade is exceptionally good for the season, this firm receiving its full share of the society's functions. The beautiful corsages of violets, orchids and other flowers which are so artistically arranged and finished at this store are greatly appreciated by their customers. Gardenias are finding favor. A fine line of this increasingly popular flower is always on hand. Canger & Gormley have been very busy since the coming in of the year with fine weddings, receptions and funeral work. An elaborate wedding decoration last week which called for a large amount of stock and material made then the recipients of much praise by those who were fortunate enough to enjoy the privilege of seeing it.

An extensive display of all the seasonable flowers was seen at Lange's and of a great variety. The stock is of the finest quality and embraces everything the market affords from exotics like orchids and gardenias to sweet peas, marguerites and daffodils. The popular dollar box is taking well at this store with good demand. Bohannon as usual is well equipped with the finest in the market which is always attractively shown. The case of orchids beside the door is a very taking feature and catches the attention of the customer upon entering. Debutante's receptions and dinner parties are keeping everyone busy at the E. Wienhoeber Co. and a beautiful line of roses of the finest quality and other high grade stock is on hand. Orchids are lavishly displayed and used, and the plants in the houses are now bearing very handsome blooms of these interesting flowers. Some very beautiful freesia was noted and nicely grown tulips in attractive receptacles. An extensive line of the finest stock was seen at Friedman's in both stores which was very attractively shown, including roses, orchids, gardenias and other seasonable flowers.

January Flowers in New York Stores.

Some of the world's most famous writers have been inspired to soar to the highest point of perfection in word painting through the influence and admiration of flowers. One, the greatest of all writers, said: "If a man love not flowers, dread him." Another compared his love to a "red, red rose, newly sprung in June;" in fact almost every flower known has been the theme of song by some inspired writer.

It is in their native surroundings, however, that flowers have been so worshipped and adored by the great poets, for we have yet to learn that any gems of thought, either prose or poetry, have been inspired by flowers when seen out of their natural season. Isn't it deplorable that some master mind does not take up the subject of our January flowers and immortalize them! What a range of subjects would we have! How easy he could find them. A two-hour run in a "Taxi," visiting our retail stores would show him a better and more complete collection of beautiful flowers than could be obtained by making a trip around the world.

That may seem a large statement but come with us among the stores during this cold, raw, January day, and you will be convinced that this is our real season for flowers, nowhere else can you find such an aggregation of blossoms.

Here are roses, perfect in their color, fragrance, and their other attributes, with stems anywhere in length from 12 inches up to five feet, and every color known to the family almost, represented. American Beauty is the favorite in red, though Richmond is used in large quantities and, being more prolific, it can be had at less cost. In pink colors, Killarney is the choice at this particular time of the year, closely followed by My Maryland, Bridesmaid and Mrs. Jardine. White Killarney and The Bride are the white sorts mostly seen and the yellow and orange shades are shown in Sunrise, Perle's and Deegan's and a few newer varieties.

The varieties of carnations are too numerous to mention them all, but the most popular, that is, those seemingly handled in the largest numbers are Enchantress, white, pink, and rose pink; Pink Delight, Winsor, White Perfection, Mrs. C. W. Ward, Beacon, Victory, Harlowarden and Mrs. M. A. Patten, all of these seem to be favorites in their respective colors and, there may be others. Orchids are well represented. There are cattleyas trianae, Schroderi and Percivalliana; cypripedium insigne and its varieties; oncidiums and laelias in variety, dendrobiums and calanthes, a selection of choice morsels that would please the most fastidious taste.

Then see what a wealth of miscellaneous flowers there are: gardenias, so white and what a penetrating odor they carry; violets, single and double, white and purple, and sweet enough to be intoxicating almost; Lily of the valley, without some of which no bridal bouquet is complete; Sweet peas, white, pink and lavender; wall flowers, reminders of grandmother's garden, and their own sweet and peculiar fragrance; mignonette, the only flower that seems to blend with the so-called green orchids, cypripediums; narcissus, white and yellow; tulips, white, pink, red and yellow; Roman hyacinths, so pure in color and so spring-like in their fragrance; lupins, another reminder of colonial gardens; marguerites, white and yellow, Goethe's immortalized flower; lilac; lilies, white and pink; freesias; bouvardia; stocks; stevia, marigolds; antirrhinum in variety, and last though not least, the famous bird of paradise, strelitzia.

These are some of the flowers seen in New York stores in January. What a wealth of material it is. When we consider the artistic minds of those who are arranging and disposing of them, when we see the minuteness of detail that is gone into in order to make every flower show to the best advantage, we appreciate the fact that for excellence and variety of material and for skilled artistic ability in arrangement, New York holds first place.

Victoria Trickeri Seed.

ED. AMERICAN FLORIST:

I have about 200 seeds of Victoria Trickeri. Will some one please tell me how to keep them until February when they will be seeded? I am keeping them in water at present time at 65°.

SUBSCRIBER.

Victoria seeds should be kept in water, either a wide necked bottle or jar, the temperature ranging between 60° and 65°, and preferably in the dark or shade.

W. T.

SAVANNA, ILL.—S. Y. Lambert's place burned out December 28.

PEOPLE WE KNOW.

Ralph M. Ward.

Good telegraph operators generally make good business men. In the earlier days, especially, it was considered an excellent training and many of our best men today have made their way through the operator's chair. One of the most efficient operators known in the 70's was a chief train dispatcher for a western railroad out in Iowa. He was a congenial young man, had many friends and was prosperous. One Christmas day he married a beautiful girl, the daughter of one of the pioneer families of the state. The honeymoon lasted a while and then they settled down in a little home in Marshalltown, Iowa, just opposite the present site of Kemble's greenhouses. In 1879 a son was born and they called him Ralph—just why he never knew. He was a sickly child and if there was any sickness in town he got it. In 1881 another son came to them and they named him Charles. Now Charles was also his father's name and when it came to dealing out middle names, Ralph being mamma's boy and Charles papa's boy, it was decided to make it Charles Wayne, but as this combination made a "Jr." in the family (his father's initials being C. W.) and not wishing to burden him with that second-hand title nor call him by number, the name Wayne was the popular premoner.

It was a happy family, this combination of four, and things went well until Ralph picked up a good dose of diphtheria one day en route to school, which cast a gloom over the home for several months, but finally he came to, and got well. About this time the family moved to California, locating at Los Angeles, where they built a home. The boys continued to go to school and do things all boys do, until in 1887 their mother took sick and they moved back to Iowa, where she died shortly after. This, of course, broke up the little family, the father's sister taking Wayne and the mother's parents taking Ralph.

Now Ralph was brought up along the banks of the Mississippi at Davenport, Iowa, until 1898—eleven years, and during that time attended the public schools, business college and studied law in the offices of two prominent attorneys. He was just a plain, freckle-faced, happy-go-lucky kid commonly called "Dad." Finally, at the age of 19, he began to do some thinking. He had no money and prospects did not seem very bright, so he wrote his father, who was then in Philadelphia, that he was determined to leave Davenport. His father sent him money and after bundling in an old trunk his worldly possessions, consisting chiefly of books and little trinkets highly prized, he left town one night at midnight for Chicago. Chicago did not tempt him long and after dicker-ing one day with a cut-rate ticket broker on Clark street he secured a ticket over the B. & O. railway for New York, since it cost less for a ticket there than to Philadelphia, where he wanted to go. When the train reached the Quaker City that place of brotherly love was in receipt of a lad looking for a job.

The first job was with a grocery house, sweeping the floor, slinging flour, paring cheese and relieving the lit-

tle Jewish cashier girl at noon hour. It lasted three weeks. What he wanted was a position in a law office, but he found so many lawyers long in the business working for so little, it discouraged him. He then took a position with the firm just organized, Messrs. Hagemann & Meyer, importers and exporters of bicycles, typewriters, Harrisii and lily of the valley pips. The salary was \$5 per week, which paid for board, laundry and left a little besides. He walked home to save money. This was in October, 1898. The next year the firm moved to New York and after some deliberation decided to take Ralph along with the furniture. So it was in June, 1899, that Wm. Hagemann, Chas. F. Meyer and Ralph M. Ward moved from the little six by ten office on South Third street to the new and larger one in Dey street in the great city of New York.

Business grew and prospered, but owing to certain conditions being

Ralph M. Ward.

brought about the firm of Hagemann & Meyer was dissolved and the firm of Wm. Hagemann & Co. was established by Wm. Hagemann and Ralph M. Ward in 1902. A year later Mr. Ward withdrew from the firm and started in business for himself at 17 Battery place, under the name of Ralph M. Ward & Co.

At first it was hard lines, trips abroad being frequent and expensive, and sales, of course, very moderate at the start. The business grew, however, owing to hard work and lots of it, persistency, square dealing and by the aid of good and faithful employees, until today it is the largest business of its kind in the world. While Mr. Ward is the sole owner of the business, he is only a part of the organization. The business is conducted on good principles, is open and above-board and every man is recognized as a vital part of it. The foreign connections are of the highest order, having been secured after much foreign traveling and thorough investigation. Incidentally Mr. Ward is now 31 years of age, married, and has one daughter; resides principally at Bound Brook, N. J., 35 miles from New York, where he has an elegant home; is a 32d de-

gree Mason, member of the Railroad Club of New York and the Meadowbrook Country Club, an alderman, director of a bank, and is interested in various business enterprises.

THE PLANTSMAN.

Rose Propagation.

The propagation of the rose stock if not already in progress should be started at once. A bench where the heat in the sand can be maintained at 65° to 70° is the first necessity, and the piping should be enclosed in such a manner that should the heat rise above this point the enclosure can be opened and allow the excess heat to escape. The bench should be thoroughly cleaned and given a good coat of whitewash, with which has been mixed a little sulphur. Procure some good sharp sand, not too fine, and sift it through a quarter-inch mesh screen and place about three to four inches of this in the bench and make perfectly level. If the sand is dry it should be well watered and after allowing the water to soak in packed very hard and solid. The depth of the sand should be at least three inches after it is packed down. Thermometers should be placed in the sand to ascertain whether the right temperature is maintained. The small dairy thermometers are very quick to note any change in temperature and very moderate in price. For cuttings select nothing but healthy wood of good color, using two-eye cuttings with the bottom cut just below the eye. These will need no trimming except to remove the bottom leaf, allowing the leaf on the top eye to remain. Take a flat stick about 1½ inches wide and one-half inch thick, as long as the bench is wide and laying flat on the sand draw a knife through the sand reaching nearly to the bottom. Insert the cuttings about 1½ inches apart in this cut in the sand, care being taken that the leaves do not overlap. The sand should then be pressed firmly around each cutting and the bench thoroughly watered. The temperature of the house should be at 56° to 58°, and in ventilating allow no draught to strike the cuttings. Under these conditions the cuttings should root in from three to four weeks.

Genistas.

This plant, botanically a cytisus, yet widely known to the trade as a genista, is a valuable spring blooming plant especially at Easter, when its sweet yellow flowers are very attractive. This plant belongs to the brooms and should never be subjected to heat but grown in a cold light house in a temperature of from 40° to 45°, where they will never lose their foliage and hold the flowers better. These plants lend themselves to trimming and training very easily and some of the plantmen have them in various forms, pyramids, balls and even in the shape of baskets with the long shoots arched over for handles. These are very effective and bring remunerative values. The older varieties were very apt to drop their blooms but there are new varieties that when in bloom are a mass of yellow flowers. If large plants are desired it is time to begin propagation; in fact, some that grow the larger plants propagate in the fall. The last of the pinching back should be done now, for if carried on

PHALÆNOPSIS AT J. A. CARBONE'S, BERKELEY, CALIF.

much longer the flowering wood will be taken off and only the long growths should be cut back later, and the center shoot pinched out of these.

Hybrid Roses.

Very fine plants for Easter or the spring sales are the hybrid perpetual roses in pots, and they are very easily grown. Dormant stock potted in 6-inch pots in January and grown cool should be in bloom the middle of April. The plants should be potted very firmly in good compost. The canes cut back to two eyes and all the small wood cut out. They should then be placed in a cool house with a night temperature of 40° and the canes frequently syringed in order to soften the old wood and open the dormant eyes. If started early they will need no forcing at all and the blooms will be much better grown in the cool temperature. The varieties that force the easiest are Baroness Rothschild, General Jacqueminot, John Hopper, Mdle. Gabriel Luizet, Magna Charta, Mrs. John Laing and Ulrich Brummer. They will probably need a little feeding after the buds have set, when a watering of weak liquid manure once a week will increase the size of the flower. A little soot added to the manure water will brighten the color of the flower and add a lustre to the foliage.

Poinsettias.

The stock of poinsettias left after the holidays should all be allowed to dry off gradually until the wood ripens and then be stored away. The plants that are in pots can be placed in a good sunny corner close together and watered occasionally, gradually decreasing the supply until all the leaves drop off and the wood hardens. The top

will probably die back if it has not been cut off. The plants can then be placed under a bench in a carnation house, the pots being laid on their sides so that any drip from the bench may not wet the soil. Select as dry a position as possible, for the plants should not be watered until wanted for propagation in the spring. The plants in the beds should also be gradually ripened off and when they have lost their foliage and the wood thoroughly ripened, lifted and planted close together in flats and placed in quarters similar to those in which the pots are placed.

Centaurea Gymnocarpa.

This splendid bedding plant with its silvery fern-like foliage, known as Dusty Miller, is very useful both for edging flower beds and in baskets or vases of mixed bedding plants. While the true Dusty Miller is *Centaurea candidissima* which is a very slow grower and the seed sown in late fall, yet *C. gymnocarpa* being the more rapid grower and more showy plant, is more widely grown and better known. To procure nice plants seed should be sown now and as soon as large enough the young plants pricked off and potted in 2½-inch pots and grown in a low temperature where they will make fine stocky plants for the spring sales.

WAKEFIELD, KANS.—P. R. Walter states that the Christmas trade was good and that the supply of flowers was short, not near enough to go around. A new house 20x100 feet has been erected. On January 13 a severe thunder and lightning storm, with the thermometer at 10° above zero, accompanied by a heavy fall of sleet, was experienced. The first rain or snow that has fallen since September 3.

ORCHID NOTES.

Phalaenopsis.

While at present all other classes of orchids have to give way to cattleyas for commercial supremacy there are others that enjoy considerable popularity, and among these the moth orchids or phalaenopsis take a high place. For bridal or corsage bouquets, boutonnieres, table decorations and for many other uses these orchids are even superior to cattleyas and there is every probability that, as people of taste and means become better acquainted with their beauty and long lasting qualities, they will be much more sought. Even now a house of plants in good health is good property and especially in southern and southwestern points where their culture is far easier than in the east or the middle west. There is nothing in the whole range of orchid flowers more beautiful than those of *P. Schilleriana* or more chaste and lovely than those of *P. amabilis*, both of which are described below, while many of the smaller and rarer species are exquisitely beautiful though not so well suited as the above for commercial purposes as cut flowers.

The culture of phalaenopsis is not difficult though it must be admitted a greater degree of care is needed than with cattleyas. It is not perhaps so much a matter of growing the leaves as of conserving them after they are grown. Many a fine specimen has been reared with large healthy leaves that looked like success only to be lost again during a dark, dull spell in winter. Again in cities where heavy fogs are frequent the flowers are very apt to wilt and be lost either before opening or as soon as open, while the alkali

in some waters is highly deleterious, especially if used over the foliage. But while this sounds like a formidable list there is really nothing to hinder a skilled and careful grower from being successful with these beautiful plants.

For choice we would recommend a span roofed house of rather flat pitch running north and south and fitted with lath or linen shades. The minimum night temperature should be 68° to 70° with a reasonable amount of atmospheric moisture at all times. Rest, as usually understood in orchid culture, is not necessary for phalaenopsis, for although there is a slackening of growth in winter, nothing like drying off as practiced with dendrobiums, calanthes and deciduous species generally should be allowed. The growing season may be said to last at least nine or ten months while even in the middle of winter there is more or less root action always going on. In February or March, according to location, the plants will usually begin to grow more or less and a brisk, moist temperature rising from 70° at night to well up in the eighties by day with sun heat should be maintained. This should be kept up all through the growing season and shading provided just as soon as the foliage of the plants feels hot to the hand of a person who has been in the house for some time. The time for shading varies so much in different localities that nothing like definite rules can be laid down. Here in southern California we had to shade our plants of phalaenopsis during the shortest day in the year but there is a difference for instance in "lovely Los Angeles" and "chilly Chicago" in December. But everywhere and at all times shade only as long as there is danger of the sun burning the foliage.

While we have grown these moth orchids in all kinds of receptacles there is nothing we believe so suitable as the long cylindrical shaped basket of teak. If sphagnum moss can be obtained fresh with live green points, there is we believe no better material for the roots, but the ordinary dry or dead sphagnum is bad for any orchids and especially for these supersensitive species. A far better material is the ordinary osmunda fiber or peat, as it is termed, consisting of fern root from which most of the earthy and sandy particles have been removed by sifting and beating. We formerly used and recommended charcoal for mixing with orchid composts but have long given up its use and are convinced that the roots are healthier and live longer on the ordinary broken pots or "crock" than on the burnt wood. When replanting see that the plants are fixed so firmly that they cannot possibly rock about or they will never become properly established.

In northern latitudes it is necessary in order to prepare the plants for the long cold winters to consolidate the leaves as much as possible by admitting as much sun and air as possible during the late summer months. This prevents loss by the leaves giving way at the axils and falling, not perhaps during the winter but in early spring when growth again becomes active. As to water growers will do well to keep in mind that a well moistened atmosphere is far more likely to lead to good results than a wet condition of roots and leaves. Phalaenopsis generally do not relish overhead watering and beyond an occasional spraying overhead to remove any dust that may have ac-

cumulated or to replenish the atmospheric moisture on a very hot day the syringe or hose should be kept away from the leaves. This is especially true of *P. Schilleriana* and others with marbled or ornamental foliage. Water the roots in accordance with the state of growth. When growing freely water freely but when the plants are inclined to rest diminish the supply. Insects are not usually troublesome and may be kept under by ordinary care and diligence. The following are among the finest species in the genus and will make an interesting and beautiful collection:

P. amabilis is the type of the genus and the species on which it was founded by Blume. It has large green

Geranium H. Plath.
Raised by Richard Diemer, Colma, Calif.

leaves and its flower spikes occur from the base of these. Sometimes they are erect, sometimes pendulous or arching and the beautiful flowers are three to four inches across, pure white with a few red lines about the lip and column. It should be noted in connection with the spikes of this and some other species that they frequently branch out after the first flowers are over and produce secondary spikes. Consequently when cutting the flowers remove as little of the spike as pos-

Geranium Seedling No. 8.
Raised by Richard Diemer, Colma, Calif.

sible. Cut just above one of the sheathed joints when it will probably flower again. *P. amabilis aurea* has considerable yellow markings about the lip.

P. Aphrodite is very similar in general appearance to *P. amabilis* and is often sent out as that species. It has a differently shaped lip and the foliage is a deep purple shade beneath and very glossy green above. This is also sent out under the name of *P. grandiflora*. *P. Dayana* and *P. gloriosa* are both forms of *P. Aphrodite* with more highly colored markings about the lip.

P. Esmeralda, though hardly to be recommended as a commercial orchid on account of its small size, is a very beautiful species with erect flower spikes bearing pretty little flowers that vary in color from amethyst purple to rosy white. It is quite distinct in habit and appearance from the larger species named and of a semi-deciduous nature, often losing many of its leaves in winter.

P. Lowii is not often seen in American collections and is purely deciduous, losing its leaves and forming no distichous stem. Its flowers are produced on slender arching stems and are usually white with a purple flush to the sepals and petals, the lip purple. It is a difficult plant to grow, liking considerable shade and plenty of moisture in the atmosphere. It grows naturally on lime stone rocks in Moulmein and some growers have been successful by using lime stone in the compost for it.

P. Luddemanniana has short, few flowered spikes of flowers, whitish heavily barred and streaked with chestnut brown. Some of the varieties are very rich looking and all are interesting from a collector's or a botanist's standpoint, but it is not worth growing commercially for cut flowers.

P. Mariea was named by its discoverer, the late F. W. Burbidge of Trinity College, Dublin, in compliment to his wife. He found it on the island of Sulu when traveling in search of rare plants for the famous firm of Veitch & Sons, Chelsea, England. It bears few flowered spikes; each bloom two inches in diameter, the color being yellowish or creamy white with bars of reddish brown and a stain of bright purple in the center. It likes a heavy shade while growing.

P. Sanderiana is a beautiful species or natural hybrid having the characteristics of a hybrid between *P. Aphrodite* and *P. Schilleriana*, the flowers being variable in color from almost pure white (alba) to light rosy pink on the upper sepals and petals. The foliage shows some marking but not so much as that of *P. Schilleriana*.

P. Schilleriana is one of the grandest orchids in cultivation. The lovely foliage alone would make it worth growing, an unusual circumstance in orchids, while the great, loose branching pinnacles of pink flowers are among the finest in the whole family and never fail to evoke admiration. Besides being the finest it is also probably the easiest to grow of all the moth orchids and one that should never be omitted, no matter how small the collection.

P. Stuartiana was discovered by Boxall, one of the collectors for the famous English firm now known as Stuart Low & Co., and named after its founder. It is a good deal like *P. Schilleriana* in habit and appearance but hardly as fine a plant. The flowers

occur on branching spikes, are whitish with purple dots and it is altogether a fine species.

P. violacea, though small, is a very lovely plant, not any value as a commercial cut flower but of great interest. It produces about three to five flowers on the erect spikes and these are singularly beautiful whitish with violet purple markings on the segments.

Besides the above species there is a number of beautiful hybrids, both natural and raised artificially by hybridists but, with few exceptions, these are too rare to be included among orchids for commercial cut flowers. *P. intermedia* is one of the best known of the natural hybrids and has also been raised artificially by crossing *P. Aphrodite* and *P. rosea*. H. R. R.

Geranium Dr. Lincoln Cothran.

New Seedling Geraniums.

For several years Richard Diemer of Colma, Calif., has been raising seedling geraniums and improving upon them until now he has a fine collection of named and unnamed varieties all showing fine sturdy habit and being of a most free-flowering nature. One of the finest is *H. Plath*, a cross between *Meteor* and *Queen Olga*. It is a single flower, the individual pips often from 2½ to 3 inches across, produced on bold, shapely trusses, the color being a bright, fiery scarlet, one of the finest in existence. Seedling No. 1 is remarkable for its great freedom of flowering. The flowers are a bright cherry red on the lower petals, the upper ones much darker, producing a pansy-like effect. Seedling No. 40 is a cross between *Snowdrop* and *Claire Albane*. It is a lovely thing with pure snow white flowers larger than those of either of its parents, and a most effective variety. This fine variety is very rare as yet, Mr. Diemer only possessing about a dozen plants. In Seedling No. 8 we have the largest individual flower of all, each pip measuring three inches across. The trusses are looser than those of *H. Plath* but very bold and striking. It is deeper in color, though raised from the same parents as the latter variety. Dr. Lin-

Geranium Seedling No. 1.

Raised by Richard Diemer, Colma, Calif.

coln Cothran is a beautiful flesh pink of magnificent habit and will be fine either as a bedder or pot plant. Its parents are *Beaute de Poitevine* and *Queen Olga*. This is a gem and is one of the many possessed by Mr. Diemer who has a large and interesting collection. H. R. R.

Illinois Horticulturists and Florists.

The convention of the Illinois Florists Association in conjunction with the Illinois State Horticultural Society and various other state Horticultural Societies and the Truck Growers' Association will be held at the University of Illinois, Champaign, commencing January 31, and ending February 10. The last three days of the convention will be given over to the Florists' Association. The exhibition of flowers will be held on February 8, all flowers to be staged by 12 o'clock and will remain open to the public until February 10. There will also be an exhibition of fruit and vegetables which will be held prior to exhibition of flowers. An extensive programme of interesting papers has been prepared embracing subjects on the growing of flowers, plants and vegetable and other horticultural subjects. Insects and the various diseases of plants will be discussed in a number of papers read by prominent authorities among them being Dr. S. A. Forbes, State Entomologist, John J. Davis, chief assistant to Dr. Forbes; Prof. M. B. Thomas of Wabash College, Crawfordsville, Ind.; and Dr. J. W. Folsom of the University of Illinois. Other interesting papers will be those on "Strawberry Culture" by C. E. Percels, the illustrated lecture on "The Story of the Gem Melon," by Prof. J. W. Lloyd, and the paper on pruning fruit trees by Prof. C. S. Crandall.

One of the most important papers in which we are all interested is the illustrated lecture on "How to plan Home Grounds" by W. N. Rudd. The essayist is a well known authority on this subject and his paper will be of great value to the average florist, so many of whom are called upon to give advice as regard the planting of grounds around a home. Among the other papers which will be of particular interest to the florists are: "Packing and Shipping Plants and Flowers" by J.

F. Ammann, Edwardsville; "Fertilizers, for Use of the Florist" by H. B. Dorner; "Illinois Greenhouses and their Products," by Philip J. Foley, Chicago; "Floral Decorations," by Miss Emily Dorner, Lafayette, Ind.; "The Development of the Public Park with Especial Reference to the Small Town," by Prof. J. C. Blair; "Greenhouse Management" by C. L. Washburn, Hinsdale; "Live Issues for the Florist" by J. C. Vaughan, Chicago; "Some New Things" by E. G. Hill, Richmond, Ind.; and "Work at the Experimental Greenhouses" by H. B. Dorner, Urbana. This joint meeting will be the largest ever held by these societies and will dispense much valuable information on many topics which are essential to the florist trade. The meeting is open to florists and all others interested in horticulture

Geranium Seedling No. 40.

Raised by Richard Diemer, Colma, Calif.

and will be largely attended. Any further information desired can be obtained by addressing Secretary J. F. Ammann, Edwardsville, Ill.

Geneva, Ill.

The Riverbank Greenhouses have quite a large establishment containing about 30,000 square feet of glass and plans are being consummated to increase the area to 100,000. Four houses 27x200 feet are planted to roses, carnations and sweet peas, a fern house 28x100 feet and a propagating house 12x100 feet, all of which have gravel walks through the greenhouses. The office building is equipped with large packing room in which are two sorting benches of concrete and an artificial refrigerating house with ice box for flowers. They have installed an electrical centrifugal pump with a capacity of 75 gallons of water a minute and under the east end of the building a tank which will hold 60,000 gallons of water. There is also a mushroom cellar 16x119 feet.

MATAMORAS, N. Y.—Roddie Dewitt, a young man employe of Colonel Quick, was found unconscious in one of the greenhouses December 21, dying a short time after being removed to the house.

Cleveland.**STOCK RATHER SHORT.**

The dark, cloudy weather has had its effect on the rose crop, and there is not enough to fill orders, especially during the last few days of the week. Carnations are a little more plentiful, but a brisk demand cleans them up daily. Sweet peas are coming in less quantities on account of the lack of sunshine. A few daisies and calandula arrive. There is a good demand for lilies and callas and lily of the valley is having a good call and the quality is of the best. Tulips, Proserpine and La Reine are in good supply, with fair demand.

NOTES.

One of the most beautiful and original table decorations seen here lately was one by the Jones-Russell Co. for the Roadside club. The center of the table was composed of green moss to represent grass. Over this was built a roadbed of lake sand and gravel, small wooden ties and miniature iron rails, and on the track stood a perfect model of a pullman passenger car made of red and white carnations. Telegraph poles, wires, block signals, mile posts (bearing various advertising signs) lined the entire stretch of track. The landscape represented farm land on which miniature farm houses, trees made of boxwood, toy animals and numerous farm implements were arranged with an artistic skill seldom surpassed. The ladies were provided with corsages of gardenias and the gentlemen boutonnières of the same beautiful flowers.

On February 13, the first meeting night next month, the Florists' club will have a flower show at the club rooms on Detroit avenue. Any growers having anything to exhibit kindly communicate with Frank Friedly, secretary. The club rooms are beginning to look like olden times. More members are attending at present than for some time past. Many new members are coming in every meeting night and would suggest that this be a good time for you to join and also for the old members to come around and help to make this an up-to-date florists' club.

G. A. Barber, Beloit, is going to rebuild his greenhouses and erect two houses 18x200, one 14x100, and one 16x150, of modern and up-to-date construction in every respect.

Mrs. J. Lincoln Brown had the misfortune of having two of her large plate glass windows in the front of her store blown in during last week's wind-storm.

C. F. B.

Detroit.**FLORIST'S CLUB MEETING.**

About twenty-five club members turned out to the regular meeting, Monday evening, January 16. The great attraction was the belated address by Albert Pochelon on "The Holiday Trade." He had not prepared a paper on the subject, but his system was so full of unhappy memories of the trials encountered during the holidays that he had no difficulty in entertaining his hearers with a recital of the numberless annoyances that are met with on such occasions and declared emphatically that no money could be made out of Christmas trade. Other participants in the discussion held more optimistic views and contended that the increased volume of trade made it possible to net a good profit even after all extraordinary expenses are called for. "Al" was freely twitted for his pessimistic attitude and reminded of well known possessions resulting from his business alone.

E. A. Scribner read a paper from the columns of THE AMERICAN FLORIST issue of January 4, 1909, entitled "Insecticide Treatment for Thrips," by A.

C. Beal. A discussion of this subject was assigned to the next meeting.

The entertainment committee reported having completed arrangements for the dance and card party, Thursday evening, January 19, at Harmonie Hall.

Wm. Roberts was elected to membership and Clarke Stevenson and W. Munt were visitors.

There was on exhibition a vase of the new carnation "Brightspot" by Nic Zweifel, North Milwaukee, Wis. The blooms were shipped here a week previous and were still in fine condition when shown and the variety was highly commended by all. The flowers were large, even colored, of dark pink shade and were borne on extra strong stems over twenty-four inches long. A vase of seedlings shown by F. Dorner & Sons included Gloria, Pink Delight, White Wonder and Scarlet Glow. These, too, had been cut a week previous and were mostly in good condition and elicited much praise, particularly Gloria and Pink Delight, which were certainly beautiful flowers possessed of rare merit. A vase of Double Killarney rose was also shown, sent by Pennock-Meehan Co. These were in the last stage of development but evidently had been fine blooms, but were then in no condition to be fairly judged.

The Question Box contained this query: Can the trade paper reports emanating from Detroit be relied upon? A spirited discussion followed and after a general condemnation of the alleged unreliable character of such reports in the past and the strongly expressed wish of the members that a reform be effected the matter was referred to J. F. Sullivan, representative of THE AMERICAN FLORIST and the only

strongly expressed views of the members, calling for a decided reform in their reportorial capacities, especially in connection with market quotations and reviews of local conditions that may influence the same. The committee named was composed of R. Rahaley, E. A. Scribner and Chas. Plumb.

J. F. S.

Toronto.**BUSINESS ACTIVE.**

Business conditions here are the best ever and the activity seems general in all the stores, an unprecedented amount of funeral work has been demanded and flowers at all adaptable for this work have been so much called for that we are quite used to the wholesalers' "nothin doin." The rose crop which was very heavy at Christmas went off shortly after and with continued dull weather the plants refuse to bloom freely, these with carnations are the scarce items at present. The roses are grand and a little bit of sunshine will help them in productiveness; American Beauties, Richmond and the two Killarneys all show great promise; carnations are heavily covered with buds and will soon be plentiful. The most welcome feature at present is the bulbous stock which is coming in fine and the many daffodils, tulips, freesia, narcissi and Dutch hyacinths give us variety to work with, violets are a glut on the market. All kinds of ferns are scarce, even good old Boston is shy at this season.

NOTES.

Grobba and Wandrey have some grand rhododendrons, many of the

VIEW OF GENY BROS.' STORE, NASHVILLE, TENN.

trade paper representative present. He vigorously defended his own work in this line and challenged anyone to point to a single case of inaccuracy in any of his reports covering the past twelve years while he has represented THE AMERICAN FLORIST. To this no denial was made, but many claimed that the representatives of other papers had continuously offended in this vitally important matter. The heated discussion terminated with the appointment of a committee with instructions to apprise the trade paper representatives of the

lighter shades are used up in funeral work, though the plants are so good that it is often with regret that they are put to the knife. Their average cut daily at present is 1,000 freesia, 1,200 daffodils and from 1,500 to 2,000 tulips, they are again cramped for space and will erect two more houses, 40x180.

Wm. Fendley of Brampton is again the violet man. No order is too large to be looked after at present.

H. G. D.

TERRE HAUTE FLORISTS AT FRED G. HEINL'S, JANUARY 6.

Los Angeles, Calif.**A BANNER HOLIDAY TRADE.**

Not only one but many of the retailers declared that their Christmas business this year far exceeded that of any previous year. Up to a few days before the event some of the more timid were afraid that the counter attractions of the automobile show, the great aviation meet at Dominguez fields and others would divert some of the money that usually finds its way to the florists' coffers, but that these fears were groundless was soon shown in the liberal orders given and the quite unprecedented amount of transient trade. Then a few days before and up to and including Christmas day there was a very much greater demand for funeral work than usual, this all adding to the work of the busy store help and keeping all "on the jump." Christmas plants sold very readily, cyclamen, azaleas and spiraeas finding a good demand. For holly and greens generally there was a great call and many had to be disappointed. Some of the wreaths were very poor and apparently hardly worth carrying home, but they sold well. Plant baskets found a ready demand and the stores, one and all, were decidedly attractive. Poinsettias cut from outside were grown this season owing to the dry weather, but being so plentiful did not get the growers so good a price as usual. American Beauty roses did not begin to fill the demand and good orders for these and orchids had to be turned down. Of Richmond there was a fair supply but more of this favorite red could have been sold. This, in fact, holds good in the case of all roses and the only satisfactory point about it is that customers took carnations and other outdoor flowers instead of them and this helped to clear up the surplus. Taken altogether the holiday business was well up to expectations and everyone was satisfied.

Frank Lichtenberg is delighted with his Christmas business and he has also had a large share of funeral work.

His baskets and other plant devices were particularly good and the large, conveniently arranged store showed these off to good advantage.

A. F. Borden had a fine cut of carnations for Christmas and reports trade at his retail store good. J. Dekema of the late firm of Jensen & Dekema of Chicago, is grower for Mr. Barden. His health is much improved since coming to California.

H. R. R.

Terre Haute Florists' Banquet.

Fred G. Heindel extended to the florists of Terre Haute an invitation to meet with him on the evening of January 6, and seventeen of the craft responded, and at 7 p. m. they were paired off and marched to the garage and were agreeably surprised on arriving to see a table laden with all the good things. A card, one of the shipping tags of John G. Heindel & Son, with the name of the party who was to occupy the chair, was at each plate. Before us was one of the most unique and delightful table settings that any of us had ever seen. The center of the table was decorated with Pandanus Veitchii. Each article of food, such as potatoes, beans, etc., was served in jardinières; the salads were served in fern dishes; each and every dish was properly labeled with a six-inch pot label so that everyone was intelligently informed as to what he was eating. Common garden trowels were used as spoons in dishing out the different kind of eatables. The ice cream was served in three-inch pots in pot saucers. The rear of the garage was screened off with an imitation of the old garden fence covered with vines. An old-fashioned watering can was suspended from the center of the ceiling and old garden hose draped to the corners. All of the tools that are necessary in a greenhouse were crossed and stacked at intervals around the garage. After dinner was served they marched to the residence of Fred Heindel, where music

and cigars were enjoyed. After this, all went to the opera house and witnessed the show for the balance of the evening. Everyone had a good time and will long remember the first meeting of the florists of Terre Haute. Those who were present were: Fred G. Heindel, John G. Heindel, Otto Heindel, Ed Cowan, James Cowan, Dr. Risse, John Winton, Henry Dempsey, Aug. Weidenhoff, Wm. Dibble, Harry Richmond, Fred Wunken, N. B. Stover, Henry Graham, Edgar Weber, W. D. Miller, Mrs. Fred Heindel, Mrs. W. D. Miller, Minnie Dueniveg and Fred. Patterson.

OBITUARY.**Thomas B. Snare,**

Thomas B. Snare, foreman at the greenhouses of Frederick A. Danker, Albany, N. Y., died on January 9, after an illness of nearly two weeks with pleuro-pneumonia. His funeral took place from his residence, 489 Hamilton street, on January 12, and was attended by a goodly contingent of the Albany Florists' club. Members of the club acted as bearers and the organization contributed a wreath as one of the floral pieces. Mr. Snare was a popular member of the club. He learned the florist business when a boy, but abandoned it for railroad work when a young man. He worked on the New York Central as fireman and engineer and ran some of the fastest trains in the company's service. On the solicitation of his family, he retired from railroad work about 18 years ago, and went back to the calling of his early life. He was employed as gardener at the summer place of John Dewitt Peltz, a prominent lawyer, at Selkirk, and after the death of Mr. Peltz, about five years ago entered the employ of Mr. Danker. His widow, three daughters and a son survive him. R. D.

Wisconsin Sphagnum.

This season's crop of Wisconsin sphagnum will probably be below the usual grade because of the drought followed by fire which burned over the tips of the moss. Sphagnum is growing scarcer as the swamps in which it grows are being gradually burned over and used for farming purposes. In a short time the one Wisconsin district which in recent years has furnished the most sphagnum will be entirely depleted.

Chrysanthemum Society of America.

At the forthcoming show of this society, to be held at St. Louis in November, 1911, the following special premiums have been offered:

By Jerome Jones of Boston, for the best 10 blooms of the variety Mrs. Jerome Jones, first prize, \$15; second prize, \$10.

By Elmer D. Smith & Co., Adrian, Mich., for the best 12 varieties, introductions of 1910 and 1911, not less than 12-inch stems, first prize, \$15; second prize, \$10.

C. W. JOHNSON, Sec'y.

American Breeders' Association.

The seventh annual meeting of the American Breeders' Association will be held at Columbus, O., February 1-3, as the guest of the National Corn Exposition. The opening session which will consist of the reports of officers and committees will be held in the Exposition Auditorium. The subsequent meetings, at which the reports of the committees on breeding plants and animals and the illustrated talks, will be held in the Government Building. Among the many interesting reports of committees to be presented are those on Nomenclature and registration, Breeding nut and forest trees, Prof. George B. Sudworth, Washington, D. C., chairman; Breeding trees and vine fruits, Prof. S. A. Beach, Ames, Iowa, chairman; Breeding vegetables, W. W. Tracy, Washington, D. C., chairman; Breeding roses, Dr. W. Van Fleet, Washington, D. C., chairman, and Pedigreed seed and plant business, Eugene Funk, Shirley, Ill., chairman. Further particulars can be obtained by addressing the secretary, W. M. Hays, Washington, D. C.

National Flower Show.

Called together by Chairman F. R. Pierson, the National Flower Show committee and the executive board of the Society of American Florists have been holding very important meetings in Boston this week. Mr. Pierson issued the call in order that many details of the coming show could be definitely arranged. After three days of almost incessant labor the work was accomplished and all indications point to a most successful exhibition. The schedule of premiums was completed and will be issued immediately. The dates for meetings of the different societies have been decided upon. The show opens Saturday, March 25, and the American Rose Society meets Monday and Tuesday, March 27 and 28; the National Sweet Pea Society Tuesday, March 28; the American Carnation Society Wednesday and Thursday, March 29 and 30; National Association of Gardeners Wednesday, March 29; the American Gladiolus Society Thursday,

March 30; the Society of American Florists Friday and Saturday, March 31 and April 1. The Massachusetts Horticultural Society will offer gold and silver medals and help greatly in other ways. Rules and regulations covering the executive and scales by points for judging were gone over and decided upon. The meetings were harmonious throughout. Everything is running smoothly and it is going to be the greatest show ever. Those attending from a distance were President Asmus, Chicago; Chairman Pierson, Tarrytown, N. Y.; Treasurer Kasting, Buffalo, N. Y.; Frank H. Traendly and Harry Bunyard, New York.

Society of American Florists.

At the time of the National Flower Show at Boston, Mass., March 25-April 1 inclusive, there will be held an adjourned meeting of the S. A. F. At the same time will be held meetings of the American Rose Society, the American Carnation Society, the affiliated societies. It has been decided that each member in good standing of the S. A. F. and the affiliated societies shall have one season admission ticket, admitting one. If a member belongs to more than one society he shall be entitled to only one ticket and not one for each society. In other words belonging to three societies will give the member only one and not three tickets. For additional tickets, trade or exhibitors' tickets may be secured at reduced rates.

In order to take advantage of the free admission to the flower show the member's dues for 1911 must be paid. Dues are payable on the first day of January and unless paid at that time the member is not in good standing. Payment of his dues will again place him in good standing. Members wishing to become life members during this month may do so on the payment of \$25.00. Those joining after January must pay \$25.00 and also the \$3.00 dues for the year, or a total of \$28.00.

Each member should make an effort to secure at least one new member during the year. This would take our membership above the 2,000 mark.

Application has been made for railroad rates for the meeting in March. Further notices concerning the same will appear in the trade papers.

We hope to see every member of the society at Boston in March.

H. B. DORNER, Secy.

White-Fly Control.

The Experiment Station of the University of Florida has issued a bulletin on the control of White-fly, *Aleurodes nubilifera*, which are very injurious to citrus growers. There are three methods of control—the fungus diseases, spraying with insecticides and fumigation. There are parasitical fungus that attack and destroy the white-fly and directions are given for the culture and the spraying of this fungus. The spraying with soap solutions as an insecticide can be carried on successfully when most of the insects are in the larval or pupal stages. Whale oil soap is the best and cheapest material, a good mixture being one pound of whale oil soap, three pounds of washing soda to 16 gallons of water. Fumigation is done with hydrocyanic acid gas.

PANSIES sown this month make sturdy stock for May planting.

RENEW subscriptions promptly so that no copies of the papers may be missed.

"SUBSCRIBER."—The best book for your purpose that we know of is Taft's "Greenhouse Construction," which we can supply on receipt of \$1.50.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high-grade work.

Western New York Horticultural Society.

The annual meeting of the Western New York Horticultural Society will be held at Rochester January 25-26. Sessions will be held on mornings, afternoons and evenings and the following papers will be read and discussed: "The Forward Movement in Country Life," by Dr. L. H. Bailey, of Cornell University; "Pruning Fruit Trees," by Edward Van Alstyne, Kinderhook; "The Peach," by Charles D. Barton, Marlton, N. J.; "Some New Data Regarding Lime and Sulphur," by Dr. L. L. Van Slyke; "The Organization and Work of an Experiment Station and its Relation to Practical Agriculture," by Dr. W. H. Jordan; "Reclaiming Old Apple Orchards," by G. A. Drew, Greenwich, Conn.; "Notes on Fruit Diseases in 1910," by Prof. F. C. Stewart; "Pear Prylla and Other Spraying Problems," by Prof. P. J. Parrott; a lantern slide talk on "The Field Laboratory—A New Method of Solving the Plant Disease Problems of the Grower," by Prof. H. H. Whetzel, and a debate on the resolution, "That top-working nursery stock is disadvantageous to the fruit grower's best interests." M. G. Kains affirmative and George T. Powell negative. An interesting feature will be the round table talks for market gardeners and small fruit growers, and the large number of important questions in the question box to be answered and discussed. An exhibit of fruit and vegetables will be held in conjunction with the meeting.

Horticultural Society of New York.

At a recent meeting of the council of the society, it was decided to hold flower exhibitions in conjunction with the monthly meetings. The first three of these monthly exhibitions will be held at the American Museum of Natural History on the second Wednesday in February, March and April. The meetings during the summer will be held at the New York Botanical Garden. Prizes will be offered at each exhibition, the first to occur February 8, will be for orchids and roses. Information and schedules can be obtained by applying to the secretary, George V. Nash, Bronx Park, N. Y.

Warning.

Florists are warned to look out for a man named Frank Mombert (which may be assumed), 21 to 24 years old, five feet seven inches tall, ruddy complexion, brown hair and smooth shaven, wearing a brown suit and rough coated beaver hat. Claims his home is in Oregon, but born in Iowa. He was in our employ and left January 8, taking money and \$15.00 worth of flowers.

TRILLOW'S GREENHOUSES.

Des Moines, Iowa.

Wants, For Sale, Etc**One Cent Per Word, Cash with Adv.****For Plant Advs., See Ready Reference Section.**

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—As foreman; all around florist, where Am. Beauties are a specialty preferred. Key 376, care American Florist.

FERNS, ROSES and Soft Wooded Plants

Write us your wants and ask for new circular. Can save you money on Ferns, especially Whitman.

GEO. A. KUHL

Wholesale Grower for the Trade. PEKIN, ILL.

Evansville, Ind.

Since the holidays business has been rather dull, but during last week there was a change and everyone was busy. The majority of the calls were for funeral work, while there were some social events. The weather has been warm for a week or more with very little sunshine, and roses and carnations are not of the best, but it is now cooler with prospects of brighter weather.

NOTES.

The Blackman Floral Co. have been very busy since they moved into their new store. They have more room and when everything is settled will have a fine store. They intend to put in a cold storage plant in the basement.

Julius Niednagel & Sons have been cutting very nice long Killarney, and Ivory is coming into crop again. The carnations, as well as all other stock, are in excellent condition.

Royston & Fenton are getting some good Ivory, but are off crop with Bride and Bridesmaid.

Ben Kramer arranged some fine work for a large funeral January 14.

Nellie Goodge has been confined to her bed, but is convalescent.

Henry Seymour continues to have his usual run of business.

Karl Seidler will rebuild next year. E. L. F.

Don't Forget, in the Rush

That You'll Need Stock Later on.

For example, there's your

Manetti

For winter grafting. We offer English at \$12.00 the thousand; French at \$10.00. Both good; 3 to 5 millimeters; smooth, evenly graded, disbudded, well-rooted stocks, especially selected for florists' grafting.

Lily of the Valley

Reimschneider's Exposition, \$14.00 the thousand (1,700 to the case).

Perfection, \$12.00 the thousand (2,000 to the case).

Holsatia, for storage and later forcing, \$11.00 the thousand (3,000 to the case).

Lilacs

Imported, pot-grown, for cut flowers; bushy, suitable for 7 or 8 inch pots, 50c each; \$5.00 the dozen. Charles X only.

Half-Standard Roses

Baby Rambler and Mrs. Cutbush, 50c each; \$5.00 the dozen. No better at any price. Full Standard Baby Rambler, same.

Bush Roses

Fine assortment leading H. P.'s like Brunner, Charta, Druschki, etc.

Also Hybrid Teas, Ramblers, Dorothy Perkins, etc.

Write and make known your wants. We are Growers for the Trade, and sell only to the Trade. Use printed stationery.

Dorothy Gordon, the Carnation

that LASTS

THE substance of Carnation Dorothy Gordon when cut is one of its very special advantages—and from now on, for several months, that's a feature that will count big with your trade. You simply cannot do much with some Carnations; but the flowers of Carnation Dorothy Gordon keep their fine form, color and fragrance. Here is one example—we could tell you of many others:—

A lady wore a Dorothy Gordon—not a select specimen, but just an average run-of-bench flower—on Tuesday evening. She kept it in water until Sunday, then wore it to church; put it back in water, and it kept in good shape for a day or so more. You don't know of many other Carnations that would stand such treatment as that, do you? WE don't, and we've been growing commercial Carnations, many leading varieties, for years!

Then there are a lot of other strong points to consider—Carnation Dorothy Gordon is not bad about bursting at the calyx—a feature that has spoiled many an otherwise good sort. It is a tremendously free bloomer, with large flowers; is a little darker than Pink Enchantress, and is borne on long, stiff stems.

With us this Carnation has proved a great money-maker. Let it make money for you, too—we offer a fine but limited stock of rooted cuttings for immediate delivery at

\$6 per 100, \$50 per 1000.

CARNATION DOROTHY
GORDON. FULL SIZE

Orders are coming rapidly and as all will be filled in rotation, we recommend that you specify your wants early. Dorothy Gordon is not an experiment and we are confident that it will fully justify our claims wherever tried.

A DECIDED SHORTAGE.

The cold wintry weather during the short days, and the cloudy spell which has hung over the city for the past two weeks, have had a decided effect upon the cut in this vicinity. Roses, which have been very plentiful until the turn of the year, have been received in much smaller quantities, and it has been very difficult for the growers to meet all the demands of the buyers. One of the retailers made the statement that in his twenty years' experience he had never seen the market shorten up so quickly or vary so much as has been the case in the last two weeks. American Beauties are in very good quality for this season, the majority of the bloom being of good color and a smaller percentage of bull-heads than is often seen at this time of the year. Killarney and other pink and white roses are not equal to the demand and many orders have to go only partly filled. Carnations are being received in good quantities and although the receipts are considerably smaller than they were a week ago, yet there is enough to meet the demand, but if the bad weather continues there will also be a shortage in these as well as the roses. Lily of the valley is in good supply, with an equal demand. Cattleyas and other orchids are more plentiful and can be obtained at very moderate prices. There is a good call for lilies and the prices have advanced. Paper white narcissus are plentiful and are really the only flower on the market which is in noticeable over-supply. Sweet peas are coming in quite heavily, but are finding good sale. Stevia has about disappeared from the counters. Tulips and Trumpet Majors are regular offerings and some Von Sions have made their appearance, but the quality is not of the best and the demand for the grade offered is slow.

CHICAGO CARNATION CO.

A. T. PYFER, Manager.
Phone Central 3373.

35-37 Randolph St., CHICAGO

The stock of greens holds up very well and the quality is good.

NOTES.

Manager Pyfer of the Chicago Carnation Co. was pleased with the large number who accepted the invitation to visit their greenhouses at Joliet on January 11. The visitors spoke highly of Washington and several were so well pleased with this new carnation that they placed their orders for rooted cuttings immediately.

At Peter Reinberg's good American Beauties have been the leading feature, large quantities of elegant stock arriving daily. On January 18 the shipment of these flowers consisted of 20 boxes, mostly of a long stemmed grade.

Hoerber Bros. are cutting a large quantity of Bride, Bridesmaid, Richmond, White Killarney and Killarney roses. The latter are of exceptionally good quality and are as good a grade as can be seen in the market.

Vaughan & Sperry received a large shipment of boxwood on January 16 and are now prepared to fill all orders. This firm is now receiving a large quantity of cattleyas of high grade quality.

George Reinberg is selling a large number of grafted rose plants and rooted cuttings, mostly Killarney and Richmond.

Frank Johnson of the A. L. Randall Co. returned January 11 from a business trip to Milwaukee.

POEHLMANN'S FANCY VALLEY } We make these a specialty.
EXTRA FINE HARRISII LILIES } Can supply them all the year.
 Once tried you will have no other.

The wholesale dealers held a meeting this week in regard to the new building which is to be erected at Market and Lake streets. A committee was appointed consisting of C. L. Washburn, chairman, August Poehlmann, George Reinberg, Nic Wietor, C. M. Dickinson, J. B. Deamud and J. Foerster, to make the necessary arrangements. Several other locations are being considered but the majority favor the proposed building on Market street. Another meeting was held last evening, January 18, particulars of which will be printed later.

Mrs. Lillian Muir Coulter, the daughter of the late Samuel Muir and sister of John Muir, died suddenly January 9 of peritonitis, aged 43 years. She and her husband and daughter, 16 years old, had made their home with her mother at 4104 Prairie avenue, where the funeral took place Wednesday, January 11.

E. C. Amling is making preparations to leave for Los Angeles, Calif., and expects to take his departure some time next week. He will in all probability take his auto along and considerable time will be spent enjoying the beautiful scenery for which that state is noted.

Poehlmann Bros. Co. is cutting a large quantity of cattleyas of high quality. Carnations and sweet peas are looking fine; also Trumpet Major which were the best we have seen in the market.

Although there is a shortage of stock, Zech & Mann seem to have their usual supply and a splendid grade of roses and carnations can be seen at the store this week.

E. B. Washburn and wife left January 18 for Pasadena, Calif., where they expect to remain until the latter part of March.

J. Stuppy of the Stuppy Floral Co., St. Joseph, Mo., is spending a few days in the city on business and pleasure combined.

Kyle & Foerster continue to receive a large quantity of Killarney roses and are filling a large number of orders for the same.

The Killarney and Richmond roses that Wieland & Risch are receiving at the store this week are of A1 quality.

President Asmus left for Boston, January 14, to attend a meeting of the National Flower Show workers.

L. H. Winkelman of the Bassett & Washburn force is confined to his home with a severe cold.

John Kruchten is receiving regular shipments of home-grown gardenias of good quality.

Sam Pearce has happily escaped pneumonia, but is still confined by rheumatism.

Extra Fancy Cattleyas

Mrs. J. A. Budlong has the sympathy of the trade in the loss of her father Wm. Smith, aged 89 years, who passed away at her home in Bowmanville, Friday morning, January 13. The funeral was held from the family residence, and the interment at Rose Hill cemetery. Mrs. Budlong has been ill for some time and was unable to attend the funeral.

Emil A. Danz and wife celebrated their silver wedding January 15 at their home on West Lake street. Friends and relatives to the number of thirty were present. A bountiful collation was provided and Mr. and Mrs. Danz were the recipients of many tiful presents.

Willard Secor, proprietor of the Hill City Greenhouses of Forest City, Ia., spent a few days in the city this week. Mr. Secor is interested in the mortgage and loan business, the greenhouses being in charge of C. B. Simon, who looks after the splendid trade which the firm enjoys.

Chas. W. McKellar is still suffering from the effects of blood poisoning but his condition is improving. The physicians found it necessary to perform several operations, but they now have the case well in hand and an early recovery is looked for.

The J. B. Deamud Co. is receiving a splendid grade of roses, carnations, valley, violets, gardenias and all other seasonable flowers. This firm is filling a large number of orders for wild smilax and fancy ferns.

Stock at Wietor Bros. has been of the usual fine quality this week. American Beauties are arriving in splendid condition, also White Killarney roses, of which they have a liberal supply.

The carnations that Henry Van Gelder is disposing of this week are of extra good quality, violets continue to arrive in quantity and a large number are sold daily.

"The Busiest House in Chicago."

Business is Business

PETER REINBERG, 35 Randolph St. CHICAGO.

Morristown, N. J.

The annual dinner of the Morris County Gardeners' and Florists' Society was held in the Mansion House here on Monday evening, January 16. For some years this annual event has taken the form of an informal smoker, this time a regular course dinner was decided upon as the proper thing to have, and, now that the event is over, it is agreed by all who attended that it was the best annual affair the society ever held. The menu was an appetizing one, replete with good things, liquid and solid, and 75 members and their friends participated.

With the coffee came the intellectual food of the evening, this being served by Patrick O'Mara, who acted as toastmaster in his usual matchless style. The toastmaster in his opening remarks referred to the great good that has been accomplished by horticultural societies in raising the standard of things grown, the exhibitions held and the competition for honors in prizes spurring each and every one on to producing something better. The various sister societies were referred to briefly by the toastmaster, each being responded to by some one of their members. Wm. Turner, for the Monmouth County Horticultural Society.; P. Murry, for the Elberon Horticultural Society; Mr. Everill, for the Glen Cove Horticultural Society; Mr. Woodcock, for the Tarrytown Horticultural Society; A. F. Larson and John Hayes, for the New Jersey Floricultural Society; C. H. Waite, for the Yonkers Horticultural Society; W. Duckham and A. Herrington for the Morris County Gardeners and Florists' Society. Harry A. Bunyard spoke for the traveling men and Chas. H. Totty for the commercial men. At the close of the speaking it was very evident to

an outsider that horticultural societies had not only led to the growing of better stock, but had also produced a large crop of orators among their members. The tables were tastefully adorned with plants and flowers and while the dinner was being served, vocal and instrumental music was given by a quartette of colored musicians.

Visitors included P. O'Mara, Jersey City; W. Turner, N. Butterbach, Oceanic, N. J.; J. Whittinger and Woodcock, Ossining, N. Y.; Mr. Sperling, C. H. Waite and several members of the trade press from New York.

WIETOR BROS.,

L. D. Phone, Randolph 2181.
51 Wabash Avenue,

CHICAGO.

St. Louis.

The weather has been warm the greater part of the week but is threatening snow and colder. Roses seem to be off crop and are very scarce, and carnations are bringing good prices. Violets are selling fairly well. Jonquils are to be seen but not in any quantity. American Beauty roses are not plentiful, but there are some nice short-stemmed ones on the market.

NOTES.

The Florists' Club met January 12 with President Cannon in the chair, twenty-five members being present. It was agreed to celebrate the twenty-fifth anniversary of the club's existence in June, and the trustees will re-

port at the next meeting as to the manner in which the event will be celebrated. Three new members were elected as follows: John Held, John Houlihan and Jules Bourdet.

Edw. L. Loyet had a large wedding order using many white orchids and lily of the valley which were supplied by the Chicago market.

Mrs. Waldmann has a very pretty store in her new location in a fast growing neighborhood.

The Paris Floral Co. are now making a specialty of one dollar boxes of assorted flowers.

Gustave Gross is bringing some nice violets and carnations into the market.

U S Budlong's E Blue Ribbon Valley.

Otto Sander had a specialty window with California violets Saturday. This was a novelty in the downtown district.

The Mullanphy Floral Co. are busy and among the largest buyers in the city market.

STOCK GROWING SCARCE.

Business is fair in this market. There is not an over supply of stock coming in and therefore there is no chance for the market to flood up. The majority of growers having just an ordinary cut of carnations. Roses are very scarce, especially the pink and white. Lilies, selling readily at good prices. There are a number of sweet peas coming in which find ready sale. Enchantress and white carnations are rather scarce and are bringing a good price. Violets are of a fine grade and are coming in in quantities. Green goods of all descriptions, enough for everybody.

FLORISTS' CLUB MEETING.

At the monthly meeting of the Milwaukee Florists' Club the installation of officers took place. W. C. Zimmerman being chosen installing officer, C. Dallwig sergeant-at-arms. The following officers were installed:

H. V. Hunkel, president.

A. Leidiger, vice-president.

G. Mueller, secretary.

J. G. Heitman, treasurer.

F. H. Holton, G. Kellner, trustees.

The president then appointed the entertainment committee for the ensuing year as follows: G. Rusch, chairman; F. H. Holton, R. Currie, W. Halliday and W. C. Zimmerman. H. D. Schiller, representing the Chicago Carnation Co., attended the meeting and exhibited a vase of the new carnation, Washington. The meeting was very poorly attended and there should be a little more interest shown at these meetings as it does not give this club a very good send-off when visitors from out of town attend.

There should be something done to make these meetings more interesting. The president has taken his first step by appointing C. Dallwig a committee of one to bring up a discussion for each meeting which we hope will arouse enough interest to swell the attendance the ensuing year.

NOTES.

Holton & Hunkel Co. received some of the first tulips, which are being forced at their Humboldt plant, although of a short stem grade, they are selling quite readily. This concern reports business good.

Currie Bros. Co. report business good. This firm does a large amount of funeral work throughout the states and therefore there is always something doing.

J. M. Fox & Son say business is good. They were kept busy working half the night on New Year's with a large amount of funeral work.

Nic Zweifel reports receiving quite a number of inquiries and orders for

STOCK MUCH SHORTER.

The feature of the past week has been the shortening up of stock, particularly roses, although all lines are affected, and there is much hustling to get enough to go around, as even with the light demand it is difficult to fill orders satisfactorily. Killarney is about the only rose for which it seems safe to take orders as American Beauties, white roses, and Richmond are very much off crop. Carnations are also scarce—on Saturday last there was not a bunch outside of white left in any of the houses. Sweet peas, which were coming in rather plentifully, have also felt the influences of the cloudy weather of the past week and are scarce and poor, the growers saying they do not open and are dropping their buds in large quantities. Some very good lilac is seen and lily of the valley is grading much better, the new crop now coming in fairly good shape. Paper white is a bit scarcer and is ruling quiet although higher than the low price of last week (\$2.00 for good stock). Roman hyacinths are in demand and Golden Spur narcissus and white tulips, La Reine, are seen in larger quantities and are in good demand. Azore lilies are now offered in quantity and are popular on account of their pure white flower and fine stout long stem. Pansies are good sellers, being always in demand. Violets are plentiful and prices rule low, the quality is good. Good maidenhair and bunch asparagus sell up clean every day; more of these useful greens should be grown. Blooming plants are in demand and the assortment is increasing. Azaleas are first and some very good Mme. Van Der Cruyssen is seen from the Harris establishment. Colflesh is also sending a nice lot. Cyclamen from the Craig Co. are splendid, the best seen this season. Meckey is proud of his marguerites. Zimmer and Jos. Habermehle are strong on Primula Obconica and Chinese primroses, for which there is always a demand.

NOTES.

The wholesale houses report the volume of business rather small but enough to use up the limited supply of flowers coming in and in fact that it has the past week been difficult to fill orders for some stock. The Niessen Co. say they are satisfied with the trade and could handle more stock if they could get it. American Beauties, Killarney, Richmond and choice carnations are leaders.

Senator Jos. Heacock is now attending the sessions of the Pennsylvania Legislature. Mr. Heacock expects to be on hand from the opening to the closing of this body, as he is thoroughly convinced that a public office is a public trust and he will at all times try to be on hand to carry out the wishes of his constituents.

Robert Craig has gone to the tropics to see if he cannot shake the whooping cough which he contracted recently from one of his grandchildren. His objective point is the Isle of Pines with a probable visit to Porto Rico. He expects to return in time for the great show at Boston. He sailed from New York January 14.

The Floracraft Greenhouses at Moorestown are right in it with their white and "pinked" tulips. The lily of

the valley is very promising, the new crop showing up very well. Easter hydrangeas are on the way and this year are to be grown in medium sized pots. Floracraft is noted for its hydrangeas.

Bernheimer says his customers are always wanting more of the Florex Gardens' carnations than he can spare. They are No. 1 stock. The crop of tomatoes from the large house is now in and meeting with a ready sale.

W. J. Baker says he sells up clean every day, the demand being greater than the supply. A specialty here is the true Adiantum cuneatum, Croweanum has nothing on this sterling old sort when well grown.

Ed. Reid's special the past week has been American Beauties and a fine stock of New York double violets for which latter he has a fine shipping trade.

The Pennock-Meehan Co. about keep one man busy packing cattleyas, large quantities of this stock being shipped every day.

Berger Brothers are receiving some top notch Lady Campbell violets. Some excellent Bride roses are also seen.

K.

MANHEIM, PA.—A fire originating in the boiler of the greenhouses of Monroe Hostetter partially destroyed one of the buildings. The loss will probably reach \$500.

Tuxedo Horticultural Society.

The annual meeting of the Tuxedo Horticultural Society was held January 3, President Thomas Murray in the chair. There was a large attendance and the following officers were elected for 1911:

David S. Miller, president.
C. R. Russell, vice-president.
James Allen, treasurer.
Albert Fischer, secretary.
Joseph Tansey, Wm. Brock, Wm. Hastings, P. Cassidy, R. H. Schaeffer, Simon Helmers, Albert Fischer, executive committee.

After the election a discussion of the by-laws took place and a motion to have the by-laws revised was laid upon the table, to be acted upon at the next meeting. The members were served with a supper in the ante-room after the meeting, which was heartily enjoyed. ALBERT FISCHER, Sec'y.

NORMAL CONDITIONS.

The demand for flowers at the present time is about normal for this season of the year. The supply of roses is shortening up as is the case after the Christmas crop has been marketed, and at times certain colors of carnations are hard to obtain. The prices have dropped until the salesman is obliged to sell more flowers than was the case a year ago this time in order to get the same amount of money. There are no roses and but few carnations in the market after the morning business, and a small amount of bulbous stock, Paper white narcissus, which have been coming in the last two weeks in such quantities as to make it hard work to dispose of them at a satisfactory price. On the whole business seems to be very satisfactory all around, there is just about enough to supply the demand, so that the growers are able to clean up all the stock on hand, and the retailers report business is about as good as they can expect at this season of the year.

NOTES.

President George Asmus of the Society of American Florists has honored Boston and vicinity by appointing E. Allen Pierce of Waltham to be a member of the executive committee for three years.

It is reported that a movement is being made by some of the florists to get a bill through the legislature allowing them to keep their stores open for business on Sundays until twelve o'clock.

The Boston Gardeners' and Florists' Club meets next Tuesday evening, January 17, when the officers for the ensuing year will be installed.

William Caharer, salesman for the Sutermeister estate, was taken to the hospital the past week and operated upon for appendicitis. H. C. W.

Pittsburg.

STOCK SCARCE.

There is very little change in this market for the better since the last writing. Stock of all kinds continues scarce, roses suffering the most, as there is not enough coming in to fill the orders, which keeps the wholesaler jumping to take care of his customers. The cut of American Beauties at present is very small with a light demand. Violets are coming in more plentifully, with a quality that can not be beat. The demand for them is fair. String smilax, adiantum and other greens are very plentiful. Some very fine orchids are seen on this market.

SUPPLY PLENTIFUL.

The prevailing weather for several days has been of a decidedly damp and foggy nature and seems to have had a baneful influence upon the cut flower trade. Business is without vim and apathetic in its daily trend, but we are expecting a turn for the better every day. Supplies of all flowers, excepting roses, seem to increase rather than diminish. American Beauty, as well as all the other seasonable roses, are plentiful enough to make it impossible for the dealers to adhere strictly to any given price, 'tis a question of get as much as you can, but do not lose any sales by holding out for a high figure. Carnations are receding in value just a trifle, they get more plentiful each week and, as a natural consequence, prices go down gradually, still it is appreciated by all that carnations have been and yet are doing very satisfactorily. Violets have taken a serious tumble in values, the high class retail stores seem to be side-stepping them in a great measure, and the outlet has to be looked for among the street men mostly, which fact explains the drop in the price. Of course, there are a great many coming in every day, other cities, we are informed, are drawing very lightly from the violet section, so almost the entire output finds its way into this market. Cattleyas are still plentiful enough for all demands, gardenias are becoming more in evidence and are to be had at slightly lower figures than have prevailed for some time. Sweet peas are very variable in quality, the really good ones receive a fair price, but the poorer stock is a difficult proposition. Lilac is coming better and there is more of it seen, good sprays are obtainable at \$1.00 per bunch. Narcissus, Paper White, is still going begging almost. Princeps and Golden Spur are arriving in limited quantities and sell fairly well. Tulips are plentiful and of various degrees of quality, the short stemmed crop does not realize more than half as much as do the flowers which have fairly good stems. Lily of the valley prices have shown no improvement, and there is a big supply coming in daily. Freesias are seen in every place almost, getting more plentiful every day. A limited supply of antirrhinum is arriving, not enough to quote prices upon. Roman hyacinths have slackened up a bit, lilacs are plentiful and callas are getting more so every day. Asparagus in bunches goes fairly well and smilax is evidently not so difficult to move as formerly, owing, perhaps, to a slight curtailment in the quantity received.

NOTES.

James McHutchison, importer, 19 Murray street, intends to leave on January 21, for a ten-weeks' pleasure trip. He will sail on the S. S. Bleucher, from this port, making a South American cruise, going around the "Horn," and up the western coast of South America as far as Valparaiso. Stops will be made at all the important seaports enroute, and inland excursions will be made to points of interest.

A. H. Langjahr, wholesale florist, 55 West Twenty-eighth street, has just signed a lease covering a period of six years almost, for the handsome new store, 130 West Twenty-eighth street. The lease dates from Sept. 1, 1911. Mr. Langjahr is to be congratulated on securing such a desirable location.

F. H. Traendly and Harry A. Bunyard were summoned to Boston on the night of January 16 on National Society affairs. The New Jersey Floricultural Society will give a "smoker" at Orange, N. J., on the second Friday in February.

Valentine Hamann, carnation grower, Summit, N. J., suffered a severe loss by fire on January 11. One house was entirely destroyed and thousands of plants ruined, the loss is estimated at several thousand dollars.

W. H. Siebrecht, Jr., is receiving the congratulations of his many friends, —his wife made him a present of a baby girl on January 15. He is now blessed with both a boy and a girl and is doubly happy.

C. W. Ward, seized with illness recently at New Orleans, La., is improving rapidly.

Visitor: J. C. Hatcher, the well known grower, Amsterdam, N. Y.

On January 13 the prize for the biggest score, a bottle of wine, was won by J. Austin Shaw. The scores made were as under:

J. A. Manda.....	170	155	181	141
J. A. Shaw.....	148	159	152	176
C. W. Scott.....	119	129	132	156

R. E. Berry.....	139	109
Kunkel.....	104	131
Watkins.....	94	96

Washington.

GOOD SUPPLY.

Business was rather slow during the first days of the past week, but improved toward the last, dinners and luncheons having occurred that called for much fine stock. Orchids, roses, gardenias, carnations, sweet peas and violets are all arriving in good supply and condition and there is also an abundant supply of narcissus and tulips, the latter are now beginning to show their good points. In narcissus, the Golden Spurs and Trumpet Majors are arriving in good condition. There is a considerable trade in azaleas, cyclamens and other plants.

FLORISTS' CLUB MEETING.

The monthly meeting of the club was held on the night of January 3, President Robertson in the chair. On account of the strenuous work of the holiday season the attendance was rather slim and but little business was transacted. There was a discussion concerning the late flower show, but as the final report had not been received, no definite steps could be taken. The nomination of officers takes place in February, election at the March meeting.

NOTES.

The annual meeting of the Washington Florists' Exchange was held on the night of January 11. This is exclusively a wholesale organization which came into existence about fourteen months ago. The annual report showed gratifying results and exceeded all expectations in the volume of business transacted. Milton Thomas was elected president for the ensuing year. Albert Schnell was re-elected as manager. Other officers were unanimously re-elected as follows: Theo. Deitrich, vice-president; Adolph Bowdler, secretary; John Robertson, treasurer, and a board of directors.

At the U. S. Propagating Gardens there is now great activity. Head gardener Henloch, in addition to preparing for spring planting in the parks, has to keep up a bountiful supply of cut flowers for the White House. The crops of American Beauty, Killarney and other roses, as well as carnations, are in splendid condition, while the palms, ferns and other decorative plants never looked better.

Many fine designs were seen at the funeral of the late Senator Elkins, January 6. A. Gude & Bro., who have had the patronage of the family, were in charge of the arrangements and executed a large number of fine designs. Many appropriate offerings from friends were made up by J. H. Small & Sons, Geo. H. Cooke and Z. D. Blackstone.

To show their faith in their works, the New Orleans boomers for the Pana-

ma Exposition for 1915, have opened headquarters at the new Ebbitt hotel, 4th and F streets. They have several rooms handsomely fitted up and decorated with many horticultural products of their state.

At the U. S. Department of Agriculture they have tried an experiment of holding over a bed of carnations. While the plants seem healthy and are blooming freely we think that the quality of the flowers deteriorates and that it would be impracticable for commercial men.

John A. Magruder, a florist of this city, has invented a new device for split carnations. It is an imitation calyx that can be readily slipped under the calyx where split and is worthy of the attention of the trade.

Noteworthy among much fine stock that is being sent in by local growers are A. Gude & Bros'. gardenias. The flowers seem to be the acme of perfection, the stems are long and the foliage is glossy green.

The Flower Store, 2926 Fourteenth street, which is conducted by Philipps and wife, has had a very prosperous holiday trade and is showing fine features in plants and cut flowers.

O. W. D'Alcorn, an extensive grower of bulbs at Congress Heights, will this week open a retail store at 1734 Pennsylvania avenue.

W. W. Kimmel is pushing work on a new conservatory in connection with his Fourteenth street store.

C. J. Saunders has recently opened a nice retail store at 1411 Yore street, near Forrestville street.

Christmas and New Year's business were good, the stock was plentiful on account of the summer-like weather and prices were about the same as former years. Poinsettia are wanted more and more as are Azaleas. Begonia Gloire de Lorraine has seen its days, the people prefer an azalea or even a good primrose or a fine pot of poinsettia. Ferns, palms and araucaria moved better than in former years, made up baskets and ferneries moved slowly. 1910 was certainly the best year we ever had. Since January 1 the business has been irregular, mostly funeral designs, a very few parties and weddings. Stock now is not too plentiful and prices are firm, American Beauties are scarcer, violets are more plenty, lilac and sweet peas are shown in the windows. Bulbous stock is coming in, both Trumpet Majors and tulips.

J. J. H.

CRAWFORD, N. J.—E. T. Durnklee will open a flower store on Eastman street, near the station.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.
Annual convention at Milwaukee, Wis., June 20-22, 1911.

Much sweet corn is showing low vitality under test.

VISITED NEW YORK: John C. Bodger, of John Bodger & Sons Co., Los Angeles, Calif.

MISS M. W. WILLIAMS, of the Braslan Seed Growers' Co., San Jose, Calif., passed through Chicago last week en route to Washington, D. C.

WASHINGTON D. C.—G. Edw. Schultz, the well-known seedsman, has been confined to his home for the past week with a severe attack of grippe, but is now much improved.

BIDS for supplying the United States Department of Agriculture, Washington, D. C., with seeds for the free government distribution closed January 17. At the time we go to press we are without definite information regarding the allotment of the contract.

DUTCH reports indicate that, so far as it is possible to judge at this time and pending outcome of the February and March weather, hyacinths of the common grades will be somewhat higher, tulips materially lower, crocuses, except yellow, slightly advanced and narcissi about the same, with possible slight advance on some kinds.

French Seed Crops.

Paris, January 5.—The persistency of the wet weather is not only interfering to a considerable extent with the bringing in of 1910 crops, but has already done some damage to those of 1911. The damage is comparatively small in the south and center of France, but in the western district of Anjou, which was partly flooded at different times last summer, some of the fields are again under water this winter, so that the influence of such abnormal conditions is bound to be felt in the end. How far this will affect such crops as were partly planted out, onion, cabbage, parsley, turnip, corn-salad, etc., it is not possible to state at this early date.

American Seed Trade Association.

The executive committee of the American Seed Trade Association met at Detroit, January 11, and selected Milwaukee for the next convention city. There were present, President E. L. Page, all the members of the committee, J. C. Robinson, S. F. Willard, C. N. Page, S. F. Leonard and Kirby B. White, together with Watson S. Woodruff, chairman of committee on seed legislation, Albert McCullough, chairman of the membership committee, W. H. Grenell and John Smith. Arrangements were made to attend the hearing on the Mann bill, which has been postponed to February 2.

Watkins & Simpson's Novelties for 1911.

In the seed novelties offered by Watkins & Simpson of London, England, are some very interesting new varieties which should attract the buyers. Among those that appear to be worthy a trial we note the following:

Anthirrhinum nanum grandiflorum, in six new colors; Maize Queen, salmon with yellow lip; Dainty Queen, beautiful salmon buff; Rose Queen, bright rosy pink; Pink Queen, lovely pink with yellow lip; Buff Queen, lovely shade of rose with deep canary lip; Golden Fairy, shell pink with lemon-yellow blotched lip.

Alyssum compactum Little Dorrit, a grand improvement on Little Gem, being much more compact.

Aster mammoth Mauve Queen, a grand florists' flower of a rich pearl gray; the flowers are of perfect form, large and double, of the Comet class.

Ageratum Mexicanum Capella, a new Tom Thumb ageratum of a pretty rose chamois color and dwarf compact habit.

Balsam improved camellia flowered Primrose, a charming novelty with clear yellow flowers that are extra double, of a pleasing rosette shape, measuring over two inches across.

Broom White Gem, a grand improvement on the old white Portugal, more compact in growth and literally covered with flowers.

Brachycome iberidifolia Little Blue Star, a charming annual with star-shaped flowers of bright blue, growing very compact and free flowering.

Calliopsis nana compacta Red Star, a showy, compact, free flowering plant with small red star-shaped flowers, and Tiger Star, with flowers of a rich bronze beautifully striped and mottled with gold.

Cineraria miniature, a dwarf and distinct type. The plants grow to a height of about eight inches, covered with flowers, and the colors are varied with white centers.

Dianthus superbissimus Queen Alexandra, the purest and largest pure white dianthus ever offered.

Dimorphotheca aurantiaca, a rare and showy annual from South Africa, of easy culture, neatly branched, bearing rich orange gold flowers 2½ inches in diameter. A bed in full bloom is a magnificent sight.

Gaillardia Lorenziana The Bride, an ideal white double annual gaillardia.

Gypsophila elegans carminea, a bright carmine variety covered with bloom.

Lobelia Celestial, a new and distinct shade of blue in lobelias.

Lupinus polyphyllus Excelsior, a fine strain of perennial lupins ranging from very pale to a deep rose and shades of lavender, mauve and blue colors.

Nasturtium Tom Thumb Fireball, orange-scarlet and Feltham Beauty, brilliant scarlet dwarf growing and compact and free-flowering, and Queen of Tom Thumb and tall Queen with variegated leaves in separate colors.

Nemesia hybrida Blue Gem, blue and White Gem white and compacta Triumph, varied colors, and Fire King, fiery scarlet crimson, dwarf growing and free-flowering plants.

Pansy Matchless, a selected strain of perfectly formed pansies of bright colors.

Papaver orientale Excelsior, a new strain of beautiful varieties.

Petunia hybrida Editha, a small flowered petunia for open ground culture, rose color with dark carmine star with pencilled veins and markings.

Sweet Peas: Doris Burt, light scarlet; Masterpiece, rich lavender Spencer type; Earl Spencer, beautiful orange; Mrs. Hugh Dickson, cream pink Spencer on buff ground; Maud Holmes, a sun-proof crimson Spencer.

Poppy Shirley Picotee, a selected strain of Shirley poppies in separate colors.

Schizanthus Wisetonensis Excelsior, a large flowered strain with markings and colors of a fancy pelargonium.

Sweet William Scarlet Beauty, a rich, deep scarlet selection of Pink Beauty.

Wallflower Golden Glory, a new and charming variety of rich old gold color.

Zinnia elegans grandiflora fl. pl. Cardinal, rich glowing crimson, and elegans nana Fire King, deep scarlet flowers, measuring three to four inches in diameter.

Florists and Seedsmen, Scratch or Poultry Food

Sell Your Own
We will make it for you under your own brand, for \$28.00 per ton. Send today for sample 100 lb. bag \$1.50. Mr. C. E. Jensen, of Atlantic City, N.J. on Oct. 27th, 1910, writes as follows: "I want to state that your three grades of Poultry Food—Chick Starter, Developing Food and "Square Deal" Scratch or Poultry Food—stands without an equal today. They are perfect mixtures and sound in grain and a pleasure to handle."
J. BOLGIANO & SON, Importers and Wholesalers
(Established for 92 years). Baltimore, Md.

TALL double tuberose seem to have gone out of use in the commercial trade, although there is still some demand for them.

CHICAGO.—Prices on the board of trade January 18 for grass seed were noted as follows: Timothy, \$9 to \$10.25 per 100 pounds. White clover, from \$22 to \$30.

THERE are almost enough Hollanders in Chicago to give notice of the annual Bollen Kweker-Reizigers Vereeniging usually held by these thrifty travelers at this central point.

Baltimore.

SPRING WEATHER.

We have had a week of April mildness, soft rains and balmy breezes. The grass is turning green, the frost is all out of the ground, and out-of-door operations are freely followed. On Saturday J. E. Corse stated that he had planted twenty-five evergreens of large size for a customer who was anxious to have signs of things progressing on his suburban place. This weather has not contributed to promote business, however; the continued showers and fogs deterring many persons from going into the downtown districts. There have been one or two good weddings which demanded fine material, and some funerals where large displays were made. Notable among the latter was that of General Ferdinand C. Latrobe, an eminent citizen who had been seven times mayor of Baltimore, and at the time of his decease and for several years previously was president of the Park Commission.

NOTES.

At the annual meeting of the Florists' Exchange Michael Lohr was elected one of the board of directors, replacing Wm. G. Lehr. There were no other changes, and the old officers were re-elected, namely: Isaac H. Moss, president; Frederick C. Bauer, vice president; Charles E. Akehurst, treasurer; Philip B. Welsh, secretary. The annual statement showed that the business done for the year exceeded that of any other year by a very handsome margin, and a dividend of \$25 per share on the capital stock was ordered distributed. It is not yet announced, but it is to be assumed that John J. Perry will be reappointed as manager for the current year. S. B.

Dreer's Double Petunias.

OUR DOUBLE PETUNIAS, for more than half a century, have been the acknowledged standard. The strain this season is equal in high quality to its predecessors, and is well known to the trade.

We offer 15 distinct varieties, in strong, 3-inch pots, which will quickly furnish an abundance of cuttings. Strong, 3-inch pots, 75c per doz.; \$6.00 per 100; the set of 15 for \$1.00.

Seed of our **SUPERB STRAIN OF FRINGED PETUNIAS.** Double, 75c per 500 seeds; \$1.50 per 1000 seeds. Single, 50c per trade pkt.; \$1.00 per 1-16 oz.; \$1.50 per ½ oz.

Our **Quarterly Wholesale Price List**, issued January 1st, offers a full line of seasonable Plants, Seeds and Bulbs.
The above prices are for the Trade only.

Westchester and Fairfield Hort. Society.

A number of gardeners and florists met at the Rye Nurseries December 28, 1910, on invitation and formed the Westchester and Fairfield Horticultural Society. At the last meeting held at the Rye Nurseries January 11, 1911, it was decided that the meetings be held the second Friday of each month at Royal Arcanum Hall, in Stamford, Conn., at 8 o'clock sharp. The officers of the society are:

James Stewart, president.
 Alex Geddes, vice-president.
 Martin M. Benedek, secretary.
 Thos. Aitchison, treasurer.
 Wm. Morrow, Chas. Adcock, H. L. Hand, Robert Williamson and J. T. Burns, executive committee.

All who are interested in this society will kindly address the secretary, Box 136, Mamaroneck, N. Y.

MARTIN M. BENEDEK, Sec'y.

MANKATO, MINN.—About 10 per cent increase over the sales last year is the report of N. Neilson. The supply of roses, carnations and violets was just about right to meet the demand. The quality, compared to last year, was better and the wholesale prices higher, consequently the retail prices advanced, but the increase went into the grower's pocket. There was a good demand for flowering plants which sell better every year.

TO THE TRADE

Market Gardeners

Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;
H. F. Hall, Grand Rapids, Mich., Vice-President;
S. W. Severance, 503 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.
Annual meeting at Boston, Mass., 1911.

Prices of Indoor Fruits and Vegetables.

New York, January 14.—Mushrooms, 40 cents per pound; cucumbers, 18 cents each; lettuce, \$1.10 per dozen heads; tomatoes, 40 cents per pound; radishes, 60 cents per dozen bunches; asparagus, \$7 per dozen bunches; rhubarb, \$1 per dozen bunches; grapes, \$1 per pound; string beans, 40 cents per quart; lima beans, 40 cents per quart; peas, 40 cents per quart.

Chicago, January 17.—Mushrooms, 15 cents to 20 cents per pound; cucumbers, \$1.25 to \$1.50 per dozen; lettuce, 20 cents to 22½ cents per pound; radishes, 10 cents to 40 cents per dozen bunches.

Seasonable Notes.

With the turn of the year no time should be lost to start tomato seeds for the spring crop under glass. Tomato plants are slow to come along and this is not too early. Where a medium scarlet tomato is wanted, Comet will answer; for larger fruit, Bonny Best or Chalks Jewel are good ones. For pink tomatoes Globe and Beauty are the kinds. Globe is a pretty good forcer if properly handled and there is none better to eat; in fact, well grown greenhouse Globes will rival the finest peaches in delicacy.

With cucumbers the case is different. Most inexperienced and many experienced operators start their plants too early, which is a serious mistake. We allow only four weeks to produce heavy cucumber plants. If one has no warm house to forward these, make a hotbed with manure inside the greenhouse and see them jump. By this we mean a regular hotbed with hot manure and sash, just like outdoors, only under shelter, as we can ventilate them so much better inside than outside. Cucumbers should be started in brisk heat and never stopped.

MARKETMAN.

Cincinnati.

MARKET EASY.

The business locally is moving along the even tenor of its way. There is generally plenty of stock and hence no arguments as to why one should get more of this kind or that kind than was allowed him. Three or four warm days had no effect on the quality and condition of the shipments. All arrived in first class shape. The prices in general are fair. American Beauties in all lengths are plentiful. Killarney are somewhat short of the demand and at times Brides are too, but taken all in all there is enough to supply the demand. Carnations continue to come in stronger and the prices have gone down, but at this low figure they clean up nicely. The amount of single violets is increasing in numbers and they are taking away some of the call for doubles. The latter, though good in quality, sell at bottom prices. Paper White narcissus and Roman hyacinths are making what is probably

their last big splurge of the year and are glutting the market. Orchids last week were in larger supply than the market required. Lily of the valley and sweet peas are regular factors. Poinsettias are still offered and are of good quality. In green goods asparagus plumosus is more or less scarce, while there is a very strong demand for fancy ferns.

NOTES.

Wm. Murphy has installed in his sales office a clock the large hand of which shows the progress the guarantee fund is making.

C. E. Critchell and L. H. Kyrk received large shipments of fresh green wood moss last week.

O. Woodworth, representing the Sifton Co. of Chicago, called on the trade the past week.

Julius Baer is reported to have had the Seasongood golden wedding decoration.

Miss Edith F. Kyrk has been exceedingly busy with decorations.

Wm. Murphy has been receiving a nice lot of lilies.

Al Horning is the "candy kid" when it comes to sweeping the pins off the alley and just waltzing away with the prizes. At the last meet he won the cash prize donated by Wm. Murphy; this week he carried off a knife given by the J. M. McCullough's Sons Co.

Buffalo.

CHANGEABLE WEATHER.

With a decided change in the weather from the cold and white Christmas to almost the warmth of April is what Buffalo is experiencing up to today. Business has also undergone the same change. Christmas trade this year was, we are pleased to say, larger than last year, with a good supply of everything except carnations, which were higher at wholesale than ever before, an extreme shortage, owing to dark weather, being the reason. Roses were of excellent quality and reasonable in price, ranging as they did from \$1.50 per dozen for Bon Silene to \$25 per dozen for Beauties. Those were the extremes. The average price for carnations was \$1.50 per dozen. Violets of finest quality were sold at from \$1.50 to \$4.00 per bunch. Orchids, lily of the valley and gardenias in artistic arrangements for gifts were close seconds to the violet and gaining in favor very fast. Roman hyacinths, narcissus and stevia having the usual demand at regular prices. As to plants the usual Christmas ones were in, namely, poinsettias, always popular and never better than this year; begonias, azaleas, primulas, ardisias and cyclamens were in good supply and well grown. Tastefully arranged baskets of growing plants prettily trimmed were in good demand. Holly, mistletoe, laurel and other greens had their usual call, the quality being good. Boxwood wreaths with

poinsettias or ruscus were rivals of the holly this year and were a welcome change. Ground pine was scarce but not missed, as laurel is more acceptable for decorating and as easy to handle. Small fancy vases and baskets of boxwood, ruscus and winter berries were a new idea here and were good sellers. Society was very active from the Monday before Christmas until New Year's. Receptions, dinners and balls were scheduled for every afternoon and evening, which gave the florists plenty of work and all going to make a successful holiday trade. Weddings of different sizes were also on the list, one in Warren, Pa., took several of S. A. Anderson's men three days to finish.

NOTES.

January 1 brought a few changes in the stores: John Kramer, who opened a new place on upper Main street in November, has sold out to Miss Gertrude Sauer, formerly with S. A. Anderson, Mr. Kramer again associating himself with his father on the market. J. H. Rebstock has vacated his Elmwood greenhouses and store for S. A. Anderson and removed to the Gibbs' block, a few doors from his former location.

The coming meeting of the Buffalo Florists' Club promises to be very interesting from a store point of view. Edward Slattery of Palmer's, Fred Brown of Anderson's and Rowland Cloudsley of the Lenox Flower Shop are going to talk on ideal stores and their management to be followed by a debate from the others.

The leading hotels had special dinners for New Year's Eve and had beautiful decorations. The different florists who had the hotels vied with each other in artistic work. Their work was excellent, showing originality in each decoration.

Each day brings another "bulb man" and some had the courage to call during Christmas and New Year's.

NOTE what the oldest florists in the City of Chicago have to say about our construction.

CAN YOU speak likewise of your wooden construction?

IF NOT, do not again contemplate using wooden gutters in your new houses—

BECAUSE, when you write us you will find that Garland semi-iron or trussed iron frame houses are not more expensive.

Although we do not claim to be able to sell you one of our semi-iron houses for less than you can buy an all-cypress house, still we do claim that the **extra light, saving of crops from drip, non breakage of glass, quickness in disposing of snow off roof of house, and—last but not least—that they will last indefinitely**, and will not have to be replaced within 12 years, will more than compensate for the small extra cost.

Dec. 28, 1908.

G. M. Garland Co.,
Des Plaines, Ill.

Dear Sirs:—

We are in receipt of your communication of the 21st, asking us in regard to the gutters we purchased from you about 15 years ago. I believe these are some of the first gutters that were cast by your company, and I wish to say that some of the houses in which these gutters were used have been torn down and rebuilt and larger houses constructed, using the same gutters, for the gutters are just as good as they were 15 years ago. Iron gutters will last a life-time, and our experience with iron gutters has been very satisfactory. We feel sure that when once a person has used them, he never will go back to the old, wooden gutters again.

Very truly yours,
THE GEO. WITTBOLD CO.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June 14-16 1911.

THE thirty-second biennial meeting of the American Pomological Society will be held at Tampa, Fla., February 10 and 11, 1911.

SENATOR DEPEW, on January 9, introduced in the Senate of the United States a bill (S. 10098) to provide for the introduction of foreign nursery stock by permit only.

Rosa Rugosa From Seed.

In the article on Rosa Rugosa by E. O. Orpet in THE AMERICAN FLORIST, issue of December 24, 1910, page 1126, the author gives a very good description of Rosa Rugosa and tells of inferior stock which he calls a mongrel strain and then tells how to raise Rosa Rugosa from seed, finishing the article by saying the hybridizer or plant mixer has proven himself a meddler. Now I have raised Rosa Rugosa from seed of the true stock three different times in the last ten years and never got anything else but the inferior stock which he calls the mongrel strain, a few of which I still have in the nursery under further trial, the rest all being destroyed. I hope if any reader follows the advice given he will have better results than I have had. Try root cuttings and propagate the same, for every little root left in the ground when the plants are dug sends up a plant in the spring.

G. INDERMUHLE.

New Jersey Floricultural Society.

The New Jersey Floricultural Society held their regular meeting January 13 in Lindsley Hall, 240 Main street, Orange, N. J. The officers for the ensuing year were installed by the Rev. L. H. Lightfe, the botanist of the society, who said a few words of encouragement to each. Competition for the silver cup closed with the following results: Roses—A. B. Jenkins, Albert F. Larson, gardener, first; Thos. A. Edison, Frank Drews, gardener, second. Carnations—S. M. & A. Colgate, William Reid, gardener, first; Chas. Hathaway, Max Schneider, gardener, second. Seedling carnations—William Reid, first; Albert F. Larson, second. Orchids—Lager & Hurrell, Summit, N. J., first. Foliage plants—William Reid, first. Flowering plants—William Reid, first. Competition for 1911 will commence at the February meeting and end at the December meeting. There will be two classes for orchids, one for the commercial growers, the other class open to all except commercial growers. Two classes for roses. A separate class for American Beauties. A vegetable class. The "B" class calls for a vase of any one kind of cut flowers. The "B" class is for the smaller growers.

The society will hold its annual smoker at the February meeting. Eight new candidates were elected to membership in the society, five other names were put in nomination. Annual reports from the secretary and treasurer were read. The treasurer's report showed a nice balance in the treasury. Altogether 1910 was a very successful year for the society and the future looks very bright. The monthly com-

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Send for description and price.

petition for points keeps up the interest in the society and keeps the competitors on the alert all the time watching their stock, otherwise the other fellow would get ahead of them.

WILLIAM REID, Sec'y.

HAVERHILL, MASS.—John E. Tabor has sold his interest in the Rosemont greenhouses at North Parish to his former partner, W. F. Eaton.

MANCHESTER, N. H.—The Christmas sales for 1910 were about 50 per cent more than 1909, reports S. H. Mead & Co. The quality of the flowers was better with prices about the same and on account of cloudy weather we were handicapped in the supply, violets being quite short throughout this part of New England. The demand and supply for bulbous flowers was good. The call for flowering plants was greater than last year.

Roses for 1911

Dark Pink Killarney.

A sport of Killarney, similar in habit, but more highly colored than Killarney at its best. When Killarney is pale, Dark Pink Killarney is bright and cheerful.

Grafted plants only from 2 1/4-inch pots.
\$20.00 per 100; \$180.00 per 1000.

Lady Cromwell.

A shell pink sport of My Maryland that for pleasing color is unsurpassed. A wonderful producer and a color that sells.

Grafted plants only from 2 1/4-inch pots.
\$30.00 per 100; \$250.00 per 1000.

Radiance.

Strong in growth and making plenty of stem. Cerise pink in color.

Grafted plants, \$18.00 per 100; \$150.00 per 1000
Own root, 10.00 per 100; 90.00 per 1000

Double Pink Killarney.

Originating with Robert Scott & Sons, who supply us the wood for grafting. Stronger in growth than Killarney and with at least ten more petals. A wonderful improvement.

Grafted stock only.

\$30.00 per 100; 250.00 per 1000.

Mrs. Aaron Ward.

By far the most pleasing of the yellow roses now on the market. A general favorite, and one which will be widely grown, for yellow roses are in demand.

Grafted plants, \$25.00 per 100; \$200.00 per 1000
Own root, 12.00 per 100; 100.00 per 1000

Melody.

We have reserved for our orders own root plants of this choice novelty. No grafted plants.

From 2 1/4-inch pots.
\$30.00 per 100; \$250.00 per 1000.

Prince de Bulgarie

The best prices for cut flowers should be the standard for judging roses, and this rose has been the money getter. Strong and vigorous in growth, and with its beautiful shell pink bloom it has sold on sight. One of the best roses grown.

Grafted plants, \$20.00 per 100; \$180.00 per 1000
Own root, 15.00 per 100; 120.00 per 1000

**Killarney, White Killarney,
Richmond, My Maryland,
Kaiserin Augusta Victoria.**

These are the old standards, and we are headquarters for young stock.

Grafted plants \$15.00 per 100; \$120.00 per 1000
Own root, 2 1/2-in. 6.00 per 100; 50.00 per 1000

We Can Still Supply

IN FIRST-CLASS CONDITION:

Araucarias

OUR SPECIALTY.

We are the largest importers of these lovely decorative plants, the **Araucaria Excelsa**, **Robusta Compacta** and **Glaucia**. 6,000 of the choicest last spring importation now ready for immediate shipment. It is of no use to look elsewhere for cheaper prices. We now control and will control the market of the Araucarias in the future.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5 1/2-6-7 in. pots, 15-18-20-25-30 in. high, 3-4-5-6 tiers, 2-3-4-5 years old. 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each. We give big value for your money. Just think! An elephant 6-in. pot, 4 years old, 4-5-6 tiers, 20-25 in. high, for only 60c to \$1.00; a jumbo, 6-in. pot, 5 year old, 25 in. and over, as wide as a bushel basket, 5-6 tiers for only \$1.00; and what do you think a holy terror 30 in. and over, 5-6-7 tiers, worth \$700, for only \$1.25 to \$1.50.

Robusta Compacta, **Excelsa Glaucia**, 6-in. pots, \$1.00, \$1.25, \$1.50 to \$2.00 each. We also have the nicest **Araucaria Robusta Compacta** and **Excelsa Glaucia**, a house full, for only \$1.25 to \$1.50, worth double.

Primula Chinensis, mostly white, 5 1/4-in., \$2.50 per doz.

Asparagus Sprengeri, 2 1/2-in., 3c; 4-in., 10c.

Jerusalem Cherries, or **Solanum** 6-in. pots, 25c, 35c, 50c; full of ripe berries.

Dracena Bruantii, 25 to 30 in. high, 6-in. pots, 40c to 50c. Highly recommended for store and house decoration: stands heat, cold and dust.

Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c, 75c to \$1.00 each.

Adiantum Hybridum, 6-in. pan, 25c to 30c.

Azalea Indica, Easter forcing: **Versaenana**, Professor **Volters**, **Empress of India**, **Schryveriana**, double variegated 60c, 75c, \$1.00 to \$1.50; **Mme Van der Cruyssen**, **Simon Mardner**, pink, **Niobe**, white, **Apollo**, red, 60c, 75c, \$1.00, \$1.25 to \$1.50. In large plants we have **Niobe**, **Helena Thielman**, **Bernard Andreas Alba**, white, **Mme. Van der Cruyssen**, and others, \$1.50, \$2.00 to \$2.50.

Kentia Forsteriana, in fine shape, 6-in. pots, 30-35-40-45 in. high, 4-5-6 years old, 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each.

Kentia Belmoreana, 30-35-40 in. high, 5-5 1/2-6-7 in. pots, 5-6-7 years old, \$1.00, \$1.25, \$1.50 to \$2.00 each.

Kentia Belmoreana, combination plants, 25 to 30 in. high, made up of 3 plants, 6 to 7 in. pots, \$1.00, \$1.25, \$1.50 to \$2.00; 4-in., 20 in. high, 20c to 25c.

Our Ferns this year are exceptionally very fine: **Boston**, **Scottii**, **Whitmanii** and **Scholzei**, 5 1/2 and 6-in., 35c, 40 and 50c; 7-in., large bushy plants, 75c to \$1.00. As big as a bushel basket, \$1.00 to \$1.25. Remember, all our Ferns are pot-grown, not lifted from benches.

Neph. Glatrasii, a new beautiful fern, an improvement on **Scottii**, much shorter and bushier than **Scottii** 5 1/2 in. pots 50c; 3-in. pots, 25c.

Pteris Wilsonii, 3 large bushy plants in 6-in. pan, 30c to 35c per pan.

Ferns for Dishes, big assortment, 2 1/2-in. pots, at \$4.00 per 100.

Cocos Weddelliana, 3-in. pots, 15c, 18c and 20c.

Spirea Cladstone, started, in 5 1/2 to 6-in. pots, at 15c, 20c to 25c.

Cineraria Grandiflora Hybrida, **Aschmann's** so well-known superior strain which brought as high as one dollar a plant wholesale last Easter. Now is the best time if you want good plants for Easter. We have a very large stock of 4-in., ready for a shift into 6-in.; price, only \$10.00 per 100; 3-in., \$3.00 per 100.

Mention if ship with or without pots.

Cash with order, please.

All plants must travel at purchaser's risk.

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

WHAT THE USERS SAY

TEST AT 12° BELOW ZERO WITH HEAVY WIND

The No. 7 Kroeschell Greenhouse Boiler is heating 10,000 square feet of glass—it will take care of 15,000 square feet. We had no trouble to keep up temperatures when it was 12 below zero, with a heavy wind. The boiler has given entire satisfaction, and it is certainly an up-to-date affair and we would use no other.

CERNY & ROWE, Kirkwood, Mo.

HENRY A. DEER,
914 Chestnut St., Phila., Pa.

Automatic Electric Condensation Pump.

Heating troubles and problems are a great nuisance to many florists and the automatic electric condensation pump which has been placed upon the market by the Chicago Pump Co. is especially designed to be used in places where the heating returns are below the boiler level, or the steam heating apparatus is defective, or too small to afford the necessary degrees of heat. In heating plants where, through the settling of piping, water pockets have been formed, or through lack of attention the greenhouse is insufficiently heated this pump affords an instant and permanent relief.

This pump draws the condensation and air through the return pipes, which in turn fills the heating system with hotter steam, causing the piping to heat up quickly and the returning of hotter water to the boiler. By this system the greenhouses can be heated much more rapidly, and a proper amount of heat maintained at all times with a very small steam pressure, and will save one-half the firing and 20 to 50 per cent of the coal consumed, and it also prevents all water hammering and pounding.

The entire installation can be placed near the boiler, occupying but little space and requires no attention, save oiling the motor once a week. The cost of operation is so small that it is hardly to be considered and the installation of one of the pumps will pay for itself in less than one winter's time.

Louisiana Experiment Station Sends North For Their Greenhouse

It is a good many hundred miles from Irvington, N. Y., to Baton Rouge, to ship materials for an iron frame palm house and wings. It costs money. But if California, Colorado, Texas and such far western states think our materials are worth paying the freight on, it is only logical that the nearer-by states do not hesitate to do it. The truth is, freight charges

don't prevent people from buying the best greenhouse there is, when it is the best they want. After April 1st, all western orders will be filled direct from the Chicago factory. That means a thousand miles haul cut off the freight charges. Send to our nearest office for a catalogue. It shows houses we have erected from coast to coast.

Chicago House Wrecking Co.
35th and Iron Sts., CHICAGO.

Syracuse, N. Y.

An important meeting of growers and dealers in roses is to be held in this city on January 21, at the Y. M. C. A. With this gathering it is hoped by those interested to form a permanent organization of florists and gardeners for the purpose of holding flower shows at different times. The paramount purpose of the meeting is to arrange for a rose show to be held in this city next June, with a possible strawberry show as an auxiliary. Rev. D. B. Mills of this city, a prominent clergyman, and district superintendent of the Methodist Episcopal churches, is the moving spirit in the affair and he hopes for a hearty response, not only in Syracuse but throughout Central New York. Assisting Dr. Mills is Henry Youell, who is well known to florists and gardeners all over New York State. Speaking of the association he said: "Other cities, including Rochester, Albany and Buffalo, have their horticultural associations, but Syracuse has always been very backward in this matter. These monthly shows are held free to the public and noted growers all over the country send seedlings to be shown. This keeps the public in touch with any new flower that may be grown—carnation, rose or whatever it may be. Then they have large shows each year, to which an admission is charged." These shows are declared to be not only an educational feature but will stimulate trade among the florists, for people seeing and becoming familiar with the flowers will unquestionably purchase more. Mr. Youell believes that a permanent organization here, with amateur gardeners as association members, would be of great benefit to all concerned.

One of the most attractive retail stores in Central New York is that opened recently by W. E. Day & Co., in the magnificent new Onondaga Hotel building, South Warren and East Jefferson streets. The store faces on the Warren street side. It is handsomely decorated and well stocked and Mr. Day, who is personally in charge, declares that the trade has opened up well.

A. V. B.

RENO, NEV.—Fred J. Fischer reports the holiday trade as about the same as last year. The prices were higher both at wholesale and retail. The supply of roses, carnations and violets was equal to the demand, and there was no bulbous stock, the quality being about the same as at previous Christmas. There was an increased demand for poinsettias, but not much call for plants.

Bate Evaporator

Easy to Install. It Will Save Time and Money.

Does the work thoroughly. Makes fumigating an easy task. Fumigating will not have to be done so often. Can be put on the pipes any place in the house. Takes only a minute to fasten it to the pipes. This system of fumigating does not leave any tobacco odor on the flower. Not one drop of the insecticide is wasted, all being properly evaporated. Try one and be convinced.

Single pan, 60c; per dozen \$6.60; in larger quantities, per pan, 50c. The following sizes we carry in stock: 1-inch 1 $\frac{1}{4}$ -inch, 1 $\frac{1}{2}$ -inch, 2-inch. Larger sizes made to order.

Toledo, O.

Christmas was much better than previous year, increased sales in cut flowers and plants are reported from every one. As a consequence retailers as well as wholesalers are pleased, if the sun had had a little more mercy on us, flowers would have been more plentiful, carnations especially are not up to standard as they should be this time of the year. However, whatever there was in cut flowers went off nicely, but more could have been sold just as easily. Plants are selling better every year and the leaders for Christmas were poinsettias, azaleas, cyclamen, primula chinensis and obconica, especially the latter, which are inexpensive. Flowering plants were sold out with the growers long before Christmas and many out of town orders had to be turned down.

NOTES.

A sweet pea show was arranged for the last meeting of our club and prizes were offered for the best cut sweet-peas and the best arranged floral piece of 25 sweet peas and greens. The first and second prize for cut sweetpeas was awarded for Christmas Pink and Florence Danzer to J. Gratoop, other varieties on exhibition were Pink Beauty, Christmas Meteor and Mrs. Wallace. Mrs. S. N. Peck carried off the first

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods, and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

Joliet, Ill.

A recent visit to the city of Joliet found the florists all in fine condition, having passed through a prosperous holiday season and with promising prospects. The city is one of the well known carnation centers of Illinois, for here are located two concerns that have acquired national prominence in carnation culture.

About two miles from the city and close beside the Chicago Carnation Co. is located the Thompson Carnation Co., who have a greenhouse plant of twelve houses with an area of 108,000 square feet, besides a commodious office building. The concern makes carnations and chrysanthemums.

The present season two types in which are grown carnations and Marie Louise carnations is looking in very fine condition and the crops are of first quality. The cut from these houses is sold directly to the large retail stores in Chicago and other large cities, shipments being made daily to St. Paul, St. Louis, Kansas City, New Orleans and to many points in Oklahoma and Texas. In the office building a refrigerating plant and equipment was added the past summer which not only keeps the storage room at the proper temperature but can also be used to manufacture the necessary ice to use in packing the shipments. Much of the credit for the high character of the stock at this establishment is due to P. W. Peterson, the foreman of the plant, who is to be congratulated upon the appearance of his place.

Another establishment looking in fine shape is that of Joseph Labo who has a plant of some 35,000 feet in which is grown a general line of stock, for the business of this establishment is principally retail and the stock grown includes carnations, roses, chrysanthemums, violets, lilies, palms, ferns and a full line of bedding plants, which are in very nice condition. Mr. Labo started in 1897 at his present location and by persistent and diligent work has built up a very prosperous business.

An establishment that has developed rapidly in the last few years is that of Larson & Goranson, Inc., starting in 1902 with two small houses, have added two larger ones and have just completed an attractive concrete and stone office building. The houses are well stocked with a good line for general retail work.

Under the name of the Carter Floral Co., C. E. and May F. Carter have recently purchased the former retail establishment of the Chicago Carnation Co. and have a very attractive place well stocked with all the requirements of a first class retail greenhouse. Mr. Carter formerly conducted a greenhouse near Collins street, and Miss Carter has for several years been identified with the Chicago Carnation Co., being in charge of the retail store.

While the concern of C. W. Shepard & Co. make a specialty of landscape work, planning and laying out home and park grounds, yet at 1001 Cass street they have an equipped office and greenhouse in which are raised a large number of bedding plants and ornamental shrubs.

The store of A. C. Rott is always very attractive and the proprietor has acquired an enviable reputation for his original and artistic window displays, as well as for his beautiful floral work, which has attracted to him the best trade of the city. There is always on hand a full line of the best of seasonable stock and a look into the store showed everything in up-to-date shape and a prosperous business enterprise.

The Superior Standard

RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.

$\frac{3}{4}$ of the heating surface is in the tubes.

Ask the man that knows the one using different style boilers—names are yours for the asking.

After using our boiler one season, you will say like all others: Nothing but "Superior" for me.

This boiler has given better satisfaction than any other boiler on the market

MADE IN NINE (9) SIZES FOR HOT WATER.

Send for catalogue and list of growers that are using this boiler

THE SUPERIOR MACHINE & BOILER WORKS, 840-850 Superior St., Chicago.
